The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before September 10, 1979. Please reference the FERC control number in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-426]

Colorado Interstate Gas Co.; Application

August 20, 1979.

Take notice that on August 2, 1979, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP79-426 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of three additional 1,100 horsepower compressors and ancillary equipment at its existing Mocane Compressor Station in Beaver County, Oklahoma, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that the wellhead pressures of many wells on the gathering systems of the Mocane-Adams Ranch Fields have declined to the point where Applicant's gas purchase contract obligations cannot be met with the existing compression capability of its Mocane Station. Therefore, in order to provide a lower suction pressure to offset declining field pressure and to comply with gas purchase contracts in the Mocane Field, Applicant proposes to construct the 3,300 horsepower addition.

The estimated cost of the proposed facilities is \$2,659,009 which Applicant proposes to finance from current funds

on hand, funds from operations, short-term borrowings, on long-term financing.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. GP79-42]

D/FW Oil & Gas, Inc.; Application for Allowance for Production-Related Costs

August 16, 1979.

Take notice that on June 22, 1979, D/FW Oil and Gas, Inc. (Applicant), Suite 603, University Towers, 6440 N. Central Expressway, Dallas, Texas 75204, filed with the Federal Energy Regulatory Commission (Commission), pursuant to §§ 1.5 and 271.1105 of the Commission's regulations, an application for recovery of production-related costs under

authority of section 110 of the Natural Gas Policy Act of 1978 (NGPA) and section 271.1105 of the Commission's regulation implementing that section. Applicant is applying for an allowance of \$0.22 per MMBtu for transportation and compression costs connected with natural gas deliveries to Coronado Transmission Company (Coronado).

The Applicant is currently seeking a determination from the Texas Railroad Commission that this gas delivered to Coronado qualifies for a maximum lawful price under section 102 and 103 of the NGPA. Applicant, however, is requesting the \$0.22 allowance under section 110 of the NGPA only in the event that the gas does not qualify under sections 102 or 103 and is subject to a maximum lawful price under section 109 of the NGPA.

Any person desiring to be heard or to make any protest with reference to this proceeding should, on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, room 825, North Capitol Street, N.W., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the commission on or before September 10, 1979.

Please reference the FERC control number in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ID-1729]

Elwin W. Thurlow; Application

August 18, 1979.

Take notice that on August 9, 1979, Elwin W. Thurlow, (Applicant) filed an application pursuant to Section 305 (b) of the Federal Power Act to hold the following positions:

Position	Name of corporation	Classification
President	Maine Yankee Atomic Power Co.	Public utility
President	Maine Electric Power Co.	Public utility
Director	Maine Electric Power Co.	Public utility

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September

8, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-26466 Filed 8-23-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. GP79-44]

Equitable Gas Co.; Protest To Charge and Collect NGPA Prices

August 20, 1979.

Take note that on May 1, 1979, the Equitable Gas Company (Equitable) filed pursuant to § 154.94(h)(8) of the Commission's regulations (18 CFR 154.94(h)(8)) in Docket No. GP79-44 a petition protesting the right of the Cities Service Company (Cities) and the Pennzoil Company (Pennzoil) to charge Equitable the maximum lawful prices established by the Natural Gas Policy Act of 1978 (NGPA). Equitable is located at 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219.

As stated in the petition, both Cities and Pennzoil sell natural gas to Equitable and seek a determination that certain gas sold to Equitable qualifies for the maximum lawful price under section 103 or 108 of the NGPA. The petition alleges that Cities and Pennzoil have filed for interim collection authority with respect to this gas.

According to Equitable, both Cities and Pennzoil assert the right to charge and collect the section 103 and 108 prices pursuant to their contracts with Equitable. However, Equitable in its petitions alleges that its contract with Cities is a fixed price contract and contains no indefinite price escalation clause, and that its contract with Pennzoil, though containing an escalation clause, provides only for price escalations tied to cost-based rates. Thus, Equitable in its petition contests, on the grounds of lack of contractual authority, the right of both of these producers to collect the NGPA ceiling rates.

The actual language of the contracts at issue herein is contained in Equitable's protest, a copy of which is contained in the Commission's public files and available for inspection by any member of the public.

Any person desiring to be heard or to make any protest concerning Equitable's protest filed in this docket should on or

before September 12, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken herein, but will not serve to make the protestants parties to this proceeding. Any party wishing to become a party to this proceeding, or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. GP79-43]

Florida Gas Transmission Co.; Petition for Declaratory Order

August 16, 1979.

Take notice that on July 3, 1979, Florida Gas Transmission Company (FGT), P.O. Box 44, Winter Park, Florida 32790, filed a petition for a declaratory order pursuant to § 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR 1.7(c)) in Docket No. GP79-43. Petitioner requests that the Commission determine the appropriate treatment to be accorded severance taxes paid under an intrastate rollover contract pursuant to § 106(b) and 110 of the Natural Gas Policy Act of 1978 (NGPA) and § 271.601, *et seq.* of the Commission's interim regulations thereunder (18 CFR 271.601, *et seq.*).

By separate gas purchase contracts dated January 15, 1957, Sun Oil Company (Sun) agreed to sell natural gas to Florida Power Corporation (FPC) and Florida Power & Light (FP&L). The gas purchase contracts expired by their own terms in June 1979, and were not extended by the parties thereto. Upon their termination, FGT entered into gas purchase contracts for the gas that Sun had previously sold to FPC and FP&L.

FGT states that under the terms of the January 15, 1957 contracts, Sun was responsible for the payment of all taxes imposed upon the gas sold to FPC and FP&L. The June 1979 Sun-FGT purchase contracts, however, provide that FGT is to reimburse Sun for all taxes imposed on the gas.

The foregoing raises the question as to whether a seller under an intrastate rollover contract subject to § 106(b) of the NGPA may, without exceeding the maximum lawful price established by

that section, collect State severance taxes from the buyer when the expired contract required the seller to bear such taxes.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 6, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further notice. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. GP79-61, formerly RI79-38]

George A. Angle, d.b.a. Frontier Oil Co.; Application for Increase in Maximum Lawful Price Under NGPA To Recover Production-Related Costs

August 16, 1979.

Take notice that on December 11, 1978, George A. Angle, d/b/a Frontier Oil Company, 1720 Kansas State Bank Building, Wichita, Kansas 67202, a small producer, filed in the captioned docket an application for a determination under Section 271.1105 of the FERC regulations that the maximum lawful price applicable to a first sale of natural gas should not be considered to be exceeded as a result of the addition thereto of production-related costs in the amount of 22 cents per Mcf. The gas involved is to be sold to Kansas Nebraska Natural Gas Company pursuant to a contract of November 20, 1978. Applicant states that such gas was not subject to any contract on November 8, 1978, (day before enactment of the NGPA) and that the wells at that time were shut in. It further states that it is to gather the gas from its low volume, low pressure gas wells scattered over some 28,000 acres to a central point and there compress the low pressure gas to a pressure suitable to Kansas Nebraska's requirements; and that Kansas Nebraska has agreed to pay

a fee for such gathering and compression.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 or 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 6, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before September 10, 1979.

Please reference the FERC control number in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

[Docket No. CP77-537]

Natural Gas Pipeline Co. of America; Amendment to Application

August 20, 1979.

Take notice that on July 27, 1979, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-537 an amendment to its application filed in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to provide for certain changes in the construction of certain proposed facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant now proposes to construct and operate approximately 27 miles of 8-inch pipeline, and appurtenant facilities,

from Madill Processing Plant to Applicant's existing 10-inch pipeline in Love County, Oklahoma, and to construct and operate 400 horsepower of compression. The total estimated cost of these facilities is \$2,705,000, which cost would be met from funds on hand.

Applicant indicates that the construction and operation of these facilities is necessary in order to receive into its system quantities of natural gas to be produced from reserves located in Bryan and Marshall Counties, Oklahoma.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding.

Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. TC79-138]

North Alabama Gas District; Petition for Declaratory Order

August 20, 1979.

Take notice that on April 3, 1979, North Alabama Gas District (Petitioner), P.O. Drawer 2605, Muscle Shoals, Alabama 35660, filed in Docket No. TC79-138 a petition for a declaratory order pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedure. Petitioner requests that the Commission issue a declaratory order interpreting certain provisions filed with the Commission as part of Tennessee Gas Pipeline Company's (Tennessee) tariff. Petitioner further requests relief from the penalty charges assessed against it by Tennessee.

Petitioner states that it has contracts with Tennessee and Texas Eastern Gas Pipeline Company (Texas Eastern) to buy certain amounts of natural gas. Petitioner then resells such gas to U.S.S.

Agri-Chemical Corporation. Petitioner further states that it exceeded its daily demand from Tennessee during September 1978 and was billed for the excess amount in the September 1978 monthly statement according to Tennessee's tariff provisions. Petitioner asserts that part of the charges assessed by Tennessee are tantamount to a penalty charge. Petitioner argues that it should be relieved from paying such penalty charge because the excess gas was not willfully taken, but was taken as a result of a faulty meter of North Alabama situated on Tennessee's pipeline.

Petitioner further states that the relief it seeks is permissible under Paragraphs 5.1, 5.3 and 6.2 of Tennessee's FPC Gas Tariff Ninth Revised Volume No. 1.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 14, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before September 10, 1979.

Please reference the FERC control number in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ID-1877]**Richard A. Crabtree; Application**

August 16, 1979.

Take notice that on August 9, 1979, Richard A. Crabtree (Applicant) filed an application pursuant to Section 305 (b) of the Federal Power Act to hold the following positions:

Position	Name of corporation	Classification
Treasurer	Central Maine Power Co.	Public utility.
Treasurer	Maine Yankee Atomic Power Co.	Public utility.
Treasurer	Maine Electric Power Co., Inc.	Public utility.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 8, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. CP79-427]

Southwest Gas Corp.; Application

August 20, 1979.

Take notice that on August 2, 1979, Southwest Gas Corporation (Southwest), P.O. Box 15015, Las Vegas, Nevada 89114, filed in Docket No. CP79-427 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain additional transmission facilities in its northern Nevada system all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Southwest states that its Northern Nevada jurisdictional transmission system extends from the Idaho-Nevada border to the California-Nevada state line near the north and south ends of Lake Tahoe.

The proposed facilities consist of 2,294 feet of 8-inch loop line which facilities would permit adequate pipeline pressure and volumes to be maintained upstream of the sales meter for CP National Corporation, a resale customer of Southwest.

The application indicates that the estimated design day requirements for natural gas by Southwest's Priority 1 and 2 customers on its South Lake Tahoe lateral beginning with the 1979-80 heating season, would exceed the daily design capacity of the current facilities to deliver such gas.

The proposed loop line would increase the daily design capacity of the existing facilities to deliver the estimated design day requirements of natural gas to Southwest's Priority 1 and 2 customers for the 1979-80, 1980-81, and 1981-82 heating seasons. Without the construction and operation of the proposed facilities during the 1979 summer construction season, Southwest asserts, it would be unable to deliver the estimated design day requirements to its high priority customers on the South Lake Tahoe lateral.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if

the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Southwest to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-418]

Tennessee Gas Pipeline Co., a Division of Tenneco, Inc.; Application

August 20, 1979.

Take notice that on July 25, 1979, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP79-418 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the rendition of compression service for Natural Gas Pipeline Company of America (Natural), United Gas Pipe Line Company (United), Sea Robin Pipeline Company (Sea Robin) and Trunkline Gas Company (Trunkline) (Recipients), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to render compression service for Recipients pursuant to the terms of a gas compression agreement dated May 30, 1979, between Applicant and Recipients, whereby Applicant would accept and receive daily from Recipients, as permitted in Applicant's sole opinion by operating conditions on its system, such quantity of gas as Recipients make available at the East Cameron 281B (EC 281B) Platform; compress for Recipients such quantity of gas; and deliver such quantity of compressed gas to Recipients, less volumes of gas for Applicant's fuel use requirements involved with the proposed service.

Commencing with the date of initial receipt of gas by Applicant for compression, Applicant indicates that it would charge each Recipient a monthly charge (prorated for any partial months) equal to a percentage of the total cost of service for the compressor units being utilized based on the ratio of the volume of gas compressed by Applicant for Recipient's account and the total volume of gas compressed during such month.

Initially, the total cost of such service shall be \$51,667 monthly. Applicant states, and Applicant and the Recipients would rely on the monthly allocation made by the producer-operator on the EC 281B Platform for the volumes used in the determination of the percentage referred to above. Also, Recipients would provide to Applicant volumes of gas to compensate for Applicant's fuel and use requirements by providing at no cost to Applicant a monthly volume of gas for Applicant's compressor station fuel use requirements equal to each Recipient's share of the actual volumes used for fuel in the compressor station, it is said.

The proposed service would be beneficial to Recipient in that it would permit them to receive gas supplies for their respective system supply without the need to install additional horsepower and, at the same time, would optimize the use of Applicant's facilities. Applicant's assistance would further enable Recipients to receive gas into a joint interstate pipeline being constructed by all Recipients, except Trunkline, under their respective budget authorizations, which would connect the EC 281 Platform to the Stingray System.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if

the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. CP77-435]

Transcontinental Gas Pipe Line Corp.; Amendment to Application

August 20, 1979.

Take notice that on August 1, 1979, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77001, filed in Docket No. CP77-435 an amendment to its application filed in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to provide for the transportation of up to 2,000 Mcf of natural gas per day for United Gas Pipe Line Company (United), all as more fully set forth in the application on file with the Commission and open to public inspection.

Pursuant to temporary authorization issued herein on August 3, 1979, Applicant is presently transporting for United up to 90,000 Mcf of natural gas per day which gas is produced in Vermilion Area Block 22, offshore Louisiana, and delivered into Applicant's Central Louisiana Gathering System onshore in the Pecan Island area, Vermilion Parish through facilities jointly owned by Applicant, Florida Gas Transmission Company and Sea Robin Pipeline Company (Sea Robin). Applicant indicates that it receives the gas at the Pecan Island location and redelivers equivalent million Btu's to or for the account of United at the interconnection between Applicant's and United's systems in Victoria County, Texas, and the interconnection between Applicant's system and the system of Tennessee Gas Pipeline Company, a Division of Tenneco Inc., near Crowley, Acadia Parish, Louisiana.

United, through its affiliate Sea Robin, has arranged to purchase approximately 2,000 Mcf of natural gas per day which gas is produced in East Cameron Area Blocks 38 and 39 and delivered to the jointly owned Vermilion 22 facilities by means of budget-type facilities to be constructed by Sea Robin. Applicant proposes to receive such gas at Pecan Island and redeliver equivalent million Btu's to or for the account of United at

the aforementioned redelivery points, in accordance with the provisions of Rule Schedule X-159.

Applicant indicates that the volumes of gas available to United from the East Cameron Area blocks would help to maintain as adequate and reliable service as possible in United's marketing areas.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-422]

Transwestern Pipeline Co. and Michigan Wisconsin Pipe Line Co.; Application

August 17, 1979.

Take notice that on July 30, 1979, Transwestern Pipeline Company (Transwestern), P.O. Box 2521, Houston, Texas 77001, and Michigan Wisconsin Pipe Line Company (Mich Wis), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP79-422 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of interconnecting facilities and the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Pursuant to the terms of a gas exchange agreement, natural gas quantities would be exchanged at a balancing point at an interconnection to be constructed where Mich Wis' 20-inch pipeline and Transwestern's 24-inch pipeline intersect in Roberts County, Texas. The application indicates that

construction of the interconnection facilities is estimated to cost approximately \$121,790.

In the gas exchange agreement, Transwestern and Mich Wis have provided for the possible future addition of wells and balancing points, when necessary, to provide other points of exchange and, accordingly, request the Commission to permit the exchange of gas from these future wells and balancing points.

In the gas exchange agreement Transwestern and Mich Wis have agreed to gather, deliver, and exchange gas from the following wells:

Sooner No. 1, Beckham County, Oklahoma.
Cupp "D" No. 1, Beckham County, Oklahoma.
Sutton No. 1, Beckham County, Oklahoma.

The application asserts that both systems have capacity available to render the exchange service and the arrangement would avoid the duplication of existing facilities resulting in a reduced cost of bringing the subject gas supplies to market.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transwestern and Mich Wis to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-26454 Filed 8-23-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. CP79-429]

United Gas Pipe Line Co.; Application

August 20, 1979.

Take notice that on August 3, 1979, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP79-429 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation by United of natural gas for Mid Louisiana Gas Company (Mid Louisiana), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

In the application United requests authorization to transport up to 9,000 Mcf of natural gas per day for Mid Louisiana in accordance with the gas transportation agreements between United and Mid Louisiana dated June 21 and June 23, 1979. Mid Louisiana has acquired such gas from production (1) under the State of Louisiana Lease No. 6324 located in the Timbalier Bay area, Lafourche Parish, Louisiana, attributable to the interests of Natomas North America, Inc., Union Oil of California, and Louisiana Land and Exploration Company and (2) in Bayou Jean LaCroix Field located in Terrebonne Parish, Louisiana, attributable to the interest of Louisiana Land and Exploration Company, it is asserted.

Pursuant to the terms of the June 21, 1979, gas transportation agreement, Mid Louisiana would deliver or cause to be delivered to United up to 6,000 Mcf per day at a mutually agreeable point located on United's existing Lake Raccourci Field Main Line in Lafourche Parish, Louisiana; and pursuant to the July 23, 1979, gas transportation agreement, Mid Louisiana would deliver or cause the delivery of up to 3,000 Mcf per day of natural gas to United at a mutually agreeable point located on United's existing pipeline in the Bayou Jean LaCroix field in Terrebonne Parish, Louisiana. United would transport and redeliver to Mid Louisiana equivalent volumes, less quantities attributable to fuel and company-used gas and, if necessary, plant volume reduction, to Mid Louisiana at the existing point of

interconnection between the systems of United and Mid Louisiana at the Scotland Compressor Site, Baton Rouge Parish, Louisiana, and/or any mutually agreeable existing authorized point of interconnection between the facilities of United and Mid Louisiana. Measuring facilities necessary for Mid Louisiana to make deliveries to United would be installed, owned, operated and maintained by Mid Louisiana at no expense to United. Existing facilities would be used by United to make redeliveries to Mid Louisiana; therefore, new construction of facilities by United would not be required.

Mid Louisiana has agreed to pay United for gas transported, under the said agreements, an amount per Mcf equal to United's jurisdictional transportation rate in effect from time to time in United's Southern Rate Zone as such may be determined by United based on rate filings made from time to time with the Commission, less any amount included in such jurisdictional transportation rate which is attributable to fuel and unaccounted for gas. The current rate, exclusive of the cost of gas utilized in United's operation, is 19.40 cents per Mcf.

The proposed transportation would allow Mid Louisiana to receive additional quantities of natural gas into its system without the costly construction of transmission facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the

matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for United to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. SA79-12]

Western Gas Interstate Co.; Application for Adjustment and Request for Interim Relief

August 20, 1979.

On July 27, 1979, Western Gas Interstate Company ("Western") filed with the Federal Energy Regulatory Commission an application for an adjustment under Section 502(c) of the Natural Gas Policy Act of 1978 ("NGPA") wherein Western sought exemption from Sections 281.201 through 281.215, inclusive, of the Commission's Regulations under the NGPA. Western also requested interim relief pending determination of the application.

Said regulations require the filing of tariff sheets regarding curtailment plans, the filing of indices of entitlements regarding high-priority and essential agricultural users, the attribution of natural gas, and the establishment of a Data Verification Committee. The applicant states that it sells gas to only one customer, its parent, Southern Union Company, and that such sales are made in accordance with tariffs on file with this Commission. The sales of gas to the ultimate consumers are regulated by various state and local authorities and are made in order of the priorities set forth in curtailment plans on file with said authorities. The applicant further states that it projects no curtailment of essential agricultural or high-priority uses. For these reasons, the applicant contends that the requirements of §§ 281.201 to 281.215 are unnecessary and would be burdensome, and, consequently the applicant requests waiver of such requirements, all as more fully set forth in the application which is on file with the

Commission and open to public inspection.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's Rules of Practice and Procedure, Order No. 24 issued March 22, 1979.

Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41. All petitions to intervene must be filed on or before September 10, 1979.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-26456 Filed 8-23-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. TC79-8]

Transcontinental Gas Pipe Line Corp.; Order Granting in Part and Denying in Part Petition for the Institution of Proceedings and for a Declaratory Order, Establishing Procedures for Briefing and for Hearing and Granting Interventions

Issued: August 17, 1979.

I. Introduction and Procedural History

On February 28, 1979, Transcontinental Gas Pipeline Corporation (Transco) filed in Docket No. TC79-8 a petition pursuant to Section 1.7 of the Commission's Rules of Practice and Procedure (18 CFR § 1.7(c)) for the institution of a proceeding and for a declaratory order.

Transco requests the Commission to institute a proceeding to inquire into:

1. The facts and circumstances that resulted in the shortage of gas on Transco's pipeline system;
2. The effect of Transco's gas tariff curtailment provisions and service agreements and of the Commission's orders, rules and regulations; and
3. The effect of an award of damages for curtailment of service against Transco upon the Commission's ability to carry out its responsibilities under Sections 4, 5 and 7 of the Natural Gas Act.

Transco further requests the Commission to make specific findings and issue a declaratory order that:

- (a) The natural gas shortage on Transco's system was caused by intervening events and factors beyond Transco's control;
- (b) That Transco reacted to offset the shortage on its system in good faith and in a reasonable and prudent manner under conditions then existing;

(c) That Transco's curtailment tariff provisions and service agreements are in compliance with Commission rules and regulations; and

(d) That, under such circumstances, compliance with such tariff provisions is a complete defense to any claims for damages for breach of contract; and finally,

(e) That an award of damages against Transco for curtailments of service would constitute an undue preference and discrimination under the Natural Gas Act and would unduly and adversely affect the Commission's ability to fairly allocate the gas supplies available to Transco.

Transco states that its petition was prompted by a continuing controversy concerning the causes of the natural gas shortage on Transco's system. Transco's efforts to maintain and supplement its gas supplies in response to the declining deliverability of its contracted reserves and the effect of curtailment plans on Transco's obligations to serve its customers.

It is necessary to inquire briefly into the procedural history associated with this petition in order to gain a fuller understanding of the issues involved therein. The instant petition arises out of a civil damage suit filed against Transco by CF Industries, Inc. (CF) and Farmers Chemical Association, Inc. (Farmers) in connection with the curtailment on Transco's system commencing in 1971 and continuing to the present time in U.S. District Court for the Western District of North Carolina, Civil Action No. CC77-131. Transco filed and the Commission approved interim curtailment plans as early as 1971 and a more permanent curtailment plan was approved in 1976.¹ Furthermore, the Commission has conducted several investigations which commenced in January 1975 and are continuing at present into the causes of the shortages on the Transco system, both as a result of the Commission's own initiative and

¹An order of November 15, 1971, 46 FPC 1212 (1971) approved the first interim curtailment plan. See Opinion No. 778 issued October 8, 1976, prescribing a permanent curtailment plan for Transco, and Opinion 778-A issued December 8, 1976, denying rehearing. Remanded, *State of North Carolina v. F.E.R.C.*, 584 F. 2d 1003 (D.C. Cir. 1978). Transco's curtailment is presently governed by a settlement approved by an order of January 19, 1979, order denying rehearing of August 2, 1979, *State of North Carolina v. F.E.R.C.*, supra, also remanded the compensation issue under the Opinion No. 778 plan. The Commission has that matter under consideration; see August 2, 1979 order at pp. 3-4.

as mandated by several decisions of the U.S. Court of Appeals.² The final resolution of these investigations is still pending.

On February 16, 1979 a jury in the North Carolina federal district court proceeding awarded \$23.8 million in damages against Transco in favor of CF and Farmers based on Transco's liability in contract, negligence and promissory estoppel.³ The federal district court in that case twice denied Transco's motion to refer to the Commission several of the same issues for which Transco seeks a declaratory order in the instant petition.⁴ The case is now on appeal to the United States Court of Appeals for the Fourth Circuit⁵ where Transco has again filed a motion both to refer several of these issues to the Commission under the doctrine of primary jurisdiction and to stay the appeal pending such referral.⁶

Although many of the issues raised in the Transco petition are closely related to similar litigation against other pipeline companies arising out of curtailments in the early 1970's,⁷ the commission specifically confines this order to the instant petition. This order will address and dispose of each of the issues raised in Transco's petition.

II. Issues Raised in the Transco Petition for Institution of a Proceeding

A. Transco seeks to institute a proceeding to inquire into the facts and circumstances that resulted in the shortage of gas on Transco's pipeline system in order to develop a factual

² By order of January 8, 1975 the FPC instituted an investigation in Docket No. RP75-51 into the causes of Transco's 1974-75 shortage and what should be done to prevent a recurrence thereof. See Order of June 25, 1976 in Docket No. RP72-99, wherein the causes of Transco's shortages as related to the compensation question were examined. This issue has been in the courts for some time, viz.: an order by the D.C. Circuit on August 1, 1975 which withheld consideration of the interim curtailment plan until the FPC's investigation was completed (Case No. 74-2036); a subsequent vacation of that order in *Transcontinental Gas Pipeline Corp. v. FPC*, 423 U.S. 326 (1976); a subsequent remand to the FPC by a D.C. Circuit order of February 6, 1976, and, on appeal, another remand to develop a fuller factual record. *Transcontinental Gas Pipeline Corp. v. FPC*, 562 F.2d 664 (D.C. Cir. 1976).

³ *CF Industries, Inc. and Farmers' Chemical Association, Inc. v. Transcontinental Gas Pipeline Corp.*, No. CC77-131 (W.D.N.C., Charlotte Division).

⁴ See 452 F. Supp. 358 (1978); second referral request denied in unreported order of October 6, 1978.

⁵ *CF Industries, Inc., et al. v. Transcontinental Gas Pipeline Corp.*, Nos. 79-1359 and 79-1366.

⁶ The motion was filed on July 5, 1978.

⁷ Similar litigation has been instituted against United Gas Pipe Line Company, Kansas-Nebraska Natural Gas Company, El Paso Natural Gas Company and Florida Gas Company.

record. The Commission undoubtedly can assert and has asserted jurisdiction over investigations into the causes of natural gas shortages on particular pipeline company systems pursuant to its broad authority under the Natural Gas Act in the area of curtailments.⁸

Upon thorough review of this request, the Commission declines to institute the proceeding sought by Transco. The Commission believes that it is not necessary at the present time to assert its jurisdiction to undertake the factual proceeding sought by Transco for several reasons.

First, there is no indication that the \$23.8 million federal district court judgment against Transco will have a material adverse effect on Transco's financial position so as to create a compelling present need for the institution of a Commission proceeding. In fact, to the contrary, Transco's 1978 Annual Report states that "Pipe Line [Transco] believes . . . that, in any event, the final resolution of [CF and Farmer's] claims will not have a material adverse effect on its financial position."⁹

Second, the Commission is unable to perceive a need at the present time for the Commission's assertion of jurisdiction to provide a forum for broad determinations into the full historical circumstances surrounding shortages on particular pipeline systems. The Commission has, in the past, conducted limited examinations into particularized points of inquiry concerning shortages on certain pipeline systems.¹⁰ The broad historical proceeding sought by the petitioner can justify the expenditure of the Commission's limited resources only upon a showing of a compelling present need to undertake the proceeding. In view of the Commission's judgment that no such present need has been demonstrated in Transco's petition and in view of the significant ramifications of the acceptance of broad historical proceedings in that the potential for a substantial burden on the Commission's limited resources would arise, the Commission declines at this time to

⁸ *FPC v. Louisiana Power and Light Co.*, 406 U.S. 621 (1972); *Fort Pierce Utility Authority v. Federal Power Commission*, 526 F.2d 993 (5th Cir. 1976); See also Section 16 of the Natural Gas Act, 15 U.S.C. § 717(c).

⁹ See Transco Companies, Inc. 1978 Annual Report dated February 19, 1979.

¹⁰ See, e.g., Transco investigation in Docket No. RP75-51 initiated by an order of January 8, 1975;

"Certain Producer and Pipeline Respondents" investigation in Docket No. RP75-112 of thirteen pipeline companies initiated by an order of February 20, 1975.

institute a proceeding to inquire into the facts and circumstances that resulted in the shortage of gas on Transco's pipeline system.¹¹

B. Transco next seeks a proceeding to inquire into the effect of its gas tariff curtailment provisions and service agreements and of the Commission's orders, rules and regulations. The Commission grants this request in part, but carefully circumscribes the scope of the proceeding in this area. In particular, the Commission will not adjudicate specific common law claims of contract liability. This is a determination ultimately for the courts.¹² Nor will the Commission make a determination as to negligence or wrongful conduct. Negligence questions bearing upon resolution of specific contract liability questions properly belong to the courts.¹³ The Commission, however, is cognizant of the public importance of tariff and service agreement interpretation questions in the context of curtailment damage suits and, therefore, provides the following reasons as justification for the limited proceeding ordered on this question.

Transco and other pipelines must submit to the Commission's certification authority before engaging in the transportation of gas subject to the Commission's jurisdiction or before the construction or extension of any facilities associated therewith, and such regulatory oversight continues once the certificate is issued by the Commission and accepted by the Company.¹⁴ A federal obligation to continue service attaches subsequent to the issuance of the certificate and continues until the

¹¹ The Commission does not, at this time, decide the further question of whether a broader inquiry into the historical causes of shortage on pipeline systems would ever constitute a proper basis for the Commission's primary jurisdiction in curtailment damage suits. We have, however, no power to award reparations or damages. The Supreme Court has held, in similar cases involving a primary jurisdiction reference by a court to an agency of issues relating to damage claims, that the agency's lack of remedial power over alleged past wrongdoing makes such a reference inappropriate. *Montana-Dakota Utilities Co. v. Northwestern Public Service Co.*, 341 U.S. 248 (1951); *T.I.M.E. v. United States*, 359 U.S. 464 (1959).

¹² *Mississippi Power & Light Co. v. United Gas Pipeline Co.*, 532 F.2d 412 (5th Cir. 1976); *State of Louisiana v. FPC*, 503 F.2d 844 (5th Cir. 1974); *International Paper Co. v. FPC*, 476 F.2d 121 (5th Cir. 1973); Order of August 8, 1978 in *United Gas Pipeline Company* (Docket No. RP71-29—Phase III).

¹³ Order of August 9, 1978 in *United Gas Pipeline Company*, Docket No. RP71-29 (Phase III); see also Order of August 20, 1978 in Docket No. RP71-29.

¹⁴ Section 7(c) of the Natural Gas Act, 15 U.S.C. § 717(c).

Commission authorizes abandonment of service.¹⁵

The certificate rather than the specific contract controls the terms of the service.¹⁶ Moreover, the interpretation of the service agreement is clearly within the Commission's jurisdictional purview.¹⁷

It is, therefore, appropriate for the Commission to determine in a carefully delimited proceeding the effect of Transco's service agreements upon various claims asserted in connection with curtailments in service made pursuant to Commission-approved orders, rules and regulations.

The interpretation and effect of Transco's gas tariff curtailment provisions and the Commission's approval thereof are also matters appropriately entrusted to the Commission pursuant to its regulatory authority under the Natural Gas Act. It is well established that the interpretation and effect of tariff provisions approved by a federal regulatory agency are ordinary uniquely within the agency's primary and exclusive jurisdiction.¹⁸ All of the reasons traditionally cited for the assertion of the primary jurisdiction doctrine, viz., special competency and expertise of the administrative agency, necessity to avoid disruption of the overall regulatory scheme and the necessity for uniformity of regulation are extant in the instant Transco request for the interpretation of its gas tariff curtailment provisions.¹⁹ The courts and this Commission have recognized the primary jurisdiction of the Commission over the interpretation and determination of the effect of the tariff provisions at issue in litigation closely akin to that involved in the instant petition.²⁰

Therefore, Transco's petition is granted in part to establish a process to interpret and determine the effect(s) of the petitioner's gas tariff curtailment provisions and service agreements and of the Commission's orders, rules and regulations. The Presiding Administrative Law Judge shall be

empowered to determine the extent to which this question presents factual as well as legal issues which require an evidentiary hearing and shall delineate the scope of the limited proceeding accordingly in view of the substantial record already developed in the other Commission and court proceedings involving the curtailment of Transco's system. Such parts of the records in these other Commission and court proceedings which are material to this inquiry may be incorporated therein. The Commission, however, emphasizes that it declines to consider specific questions of negligence or wrongful conduct or those involving ultimate contract liability premised upon negligence or wrongful conduct.

C. Transco also petitions the Commission for the institution of a proceeding to inquire into the effect of an award of damages against Transco upon the Commission's ability to carry out its responsibilities under Sections 4, 5, and 7 of the Natural Gas Act. This request is apparently designed to encompass the specific Transco request in the petition for a declaratory order that a damage award based on curtailment of service would constitute an undue preference and discrimination under the Natural Gas Act and would unduly and adversely affect the Commission's ability to allocate fairly the gas supplies available to Transco.

The Commission's authority with respect to determining under Section 4(b) of the Natural Gas Act whether an undue preference or advantage has been granted to any person or whether any person has been subjected to any undue prejudice or disadvantage has been described as being without limitation.²¹ The issue of undue preference raised in the context of curtailment damages suits, therefore, present novel questions within the Commission's exclusive jurisdiction. However, while the Commission possesses the authority to set aside any contractual provision creating an undue preference,²² the threshold question here relates to whether an undue preference is created by the award of damages in the context of curtailment suits.²³

Due to the novel and difficult questions presented, the Commission accepts the issue of whether an undue preference or advantage has been or

²¹ See 15 U.S.C. § 717(c)(b); *Michigan Consolidated Gas Co. v. Panhandle Eastern Pipeline Co.*, 173 F.2d 784, 789 (6th Cir. 1949).

²² *State of Louisiana v. FPC*, 503 F.2d 844, 864 (1974).

²³ The Commission has accepted the referral of the undue preference or advantage issue in *United Gas Pipeline Co.* Docket Nos. RP71-29, et al. (Phase III). Order of August 9, 1978.

would be granted to any person, or whether any person has been or would be subjected to undue prejudice or disadvantage in connection with the award of damages for curtailment of service on Transco's system and what, if any, steps should be taken in response to this situation. Although this question involves predominantly legal issues suitable for the submission of briefs by interested parties and trial staff, the presiding Administrative Law Judge shall be empowered to institute a limited evidentiary hearing to the extent that this question presents factual issues not already adequately developed in other Commission and court proceedings involving the curtailment on Transco's system. Such parts of the records in these other Commission and court proceedings which are material to this inquiry may be incorporated therein.

The Commission believes that there is no present need, however, to depart from its previous position in *United*,²⁴ which declined to consider the broader questions raised by Transco's request for the institution of a proceeding to inquire into the effects of an award of damages against Transco upon the Commission's ability to carry out its responsibilities under Section 4, 5 and 7 of the Natural Gas Act and to determine whether an award of damages would unduly and adversely affect the Commission's ability to allocate fairly the gas supplies available to Transco. It is premature at this time for the Commission to consider such issues in view of the fact that the district court judgment against Transco is now on appeal to the U.S. Court of Appeals for the Fourth Circuit and such issues cannot be answered effectively without speculating as to Transco's liability. As previously mentioned, the Commission will not adjudicate ultimate liability and therefore declines this request except with respect to the undue preference issue.

III. Issues Raised in Transco's Petition for a Declaratory Order

Transco has requested findings and a declaratory order that the natural gas shortage on Transco's system was caused by intervening events and factors beyond Transco's control and further that Transco reacted to offset the shortage on its system in good faith and in a reasonable and prudent manner under conditions then existing. In light of the Commission's declination to institute a proceeding to inquire into the facts and circumstances that resulted in

²⁴ See Order of August 9, 1978 in *United Gas Pipeline Company*, mimeo., pp. 16-17.

the shortage of gas on Transco's pipeline system, the Commission emphasizes its intention not to adjudicate negligence or wrongful conduct questions and, therefore, herein declines to issue a declaratory order as to these two requests which concern the causation of the shortage of gas on Transco's system and the reasonableness and prudence of Transco's actions.

Transco next seeks a declaratory order that its curtailment tariff provisions and service agreements are in compliance with Commission rules and regulations. The Commission understands this request to contemplate Transco's technical compliance with Commission rules and regulations, viz., that Transco has filed for and has received the necessary FERC regulatory approvals with respect to its curtailment tariff provisions and service agreements. There is no material controversy regarding this request as Transco has dutifully filed proposed interim and permanent curtailment plans which have been approved by the FPC and this Commission.²⁵ Transco has been operating under either a court-ordered or Commission-approved curtailment plan since 1971.

Nor has there been any uncertainty as to Transco's compliance with the Commission's regulatory requirements in regard to its service agreements at issue. In this regard, the FPC issued a certificate of public convenience and necessity to Transco to construct a lateral from its main pipeline into northeastern North Carolina and southeastern Virginia in order to expand service to, *inter alia*, the North Carolina Natural Gas Company (NCCNGC) pursuant to a twenty year service agreement.²⁶ NCCNGC supplies CF and Farmers. The Commission, therefore, finds that Transco's curtailment tariff provisions and service agreements are in technical compliance with Commission rules and regulations and so grants the requested declaratory order with respect to this issue. This finding, however, in no way addresses the issue of causation of or blameworthiness for the curtailment on Transco's system.

A declaratory order that compliance with such tariff provisions is a complete defense to any claims for damages for breach of contract is also sought by

Transco. The legal authority of the Commission to issue such an order is at best doubtful in light of language in two Fifth Circuit decisions which suggests serious reservations as to the legal validity of such a Commission order.²⁷ The Commission need not reach this question, however, because it adheres to its traditional position of declining to adjudicate issues of ultimate contract liability which properly belong to the courts.²⁸ The Commission believes that the declaratory order sought by Transco with respect to the issue of whether Transco's compliance with curtailment tariff provisions is a complete defense to breach of contract damage claims clearly involves questions of ultimate contract liability and, therefore, is appropriately entrusted to the courts for ultimate resolution.

Finally, Transco requests the Commission to make specific findings and issue a declaratory order that an award of damages for curtailment of service would constitute an undue preference and discrimination under the Natural Gas Act and would unduly and adversely affect the Commission's ability to fairly allocate the gas supplies available to Transco. This issue has been previously discussed in this order (see Part II(C), *supra*), the resolution of which being the Commission's acceptance of the undue preference and discrimination issue for briefing by interested parties and trial staff and possibly for a limited evidentiary hearing and the Commission's non-acceptance of the issue of whether an award of damages would unduly and adversely affect the Commission's ability to fairly allocate the gas supplies to Transco. The resolution of this request with respect to the undue preference question, therefore, must await subsequent action after briefs have been submitted and the limited evidentiary hearing, if necessary, has been held.

In accordance with the March 19, 1979 notice of the Transco petition published at 44 Fed. Reg. 18073 (1979), petitions to intervene were required to be filed on or before April 10, 1979. The following petitions to intervene were filed in a timely fashion and intervention should be granted as to the parties listed below.

Consolidated Edison Company of New York, Inc.; North Penn Gas Company; Pennsylvania Gas and Water Company; Philadelphia Gas Works, Public Service Commission of the state of New York; Public Service Company of North Carolina, Inc.; Delmarva Power and Light Company; North

Carolina Natural Gas Corporation; Public Service Electric and Gas Company; Atlanta Gas Light Company; Texas Gas Transmission Corporation; United Gas Pipeline Company; Interstate Natural Gas Association of America; Washington Gas Light Company; Elizabethtown Gas Company; North Carolina Utilities Commission; Columbia Gas Transmission Corporation; The Brooklyn Union Gas Company; Piedmont Natural Gas Company, Inc.; CF Industries, Inc. and Farmers Chemical Association, Inc.; Consolidated Gas Supply Corporation; The American Textile Manufacturers Institute, Inc.; Philadelphia Electric Company; General Motors Corporation; and Carolina Pipeline Company.

The following petitions to intervene were received after the April 10, 1979 deadline:

South Jersey Gas Company; Eastern Shore Natural Gas Company; Commonwealth Gas Pipeline Corporation; Long Island Lighting Company; Virginia Electric and Power Company (VEPCO).

VEPCO states that it did not become aware of the proceeding until after the filing deadline. The Commission finds good cause to grant VEPCO's petition to intervene. The other untimely petitioners did not state reasons for their late filings. The Commission, nevertheless, finds good cause to grant these petitions in view of their substantial interest in this proceeding.

The Commission finds and orders:

(A) That Transco's request to institute a proceeding to inquire into the facts and circumstances that resulted in the shortage of gas on its system is herein denied for the reasons stated above.

(B) That a proceeding be instituted to interpret and determine the effect(s) of Transco's gas tariff curtailment provisions and service agreements and of the Commission's orders, rules and regulations relevant thereto consistent with the foregoing procedural and substantive limitations regarding the scope of such proceeding.

(C) That the proceeding established by paragraph (B) in the context of this order also address the issue of whether an undue preference or advantage has been or would be granted to any person, or whether any person has been or would be subjected to undue prejudice or disadvantage in connection with the award of damages for curtailment of service on Transco's system and what, if any, steps should be taken in response to this situation, and that such issue be addressed in accordance with the procedural directions stated above.

(D) That all other requests for the institution of proceedings in Transco's petition are herein denied for the reasons stated above.

(E) Transco's request for declaratory order that its actions with respect to

curtailment of deliveries have been reasonable and prudent is herein denied for the reasons stated above.

(F) Transco's request for declaratory order that its curtailment tariff provisions and service agreements are in compliance with Commission rules and regulations is hereby granted provided that such declaratory order is understood to be strictly limited to technical compliance with Commission rules and regulations.

(G) That Transco's request for a declaratory order that its curtailment tariff provisions form a complete defense to claims for damages for breach of contract is herein denied for the reasons stated above.

(H) An Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR § 3.5(d)), shall preside at the prehearing conference and subsequent hearing in this proceeding, with authority to establish and change all procedural dates and to rule on all motions (with the exception of motions to consolidate or sever and motions to dismiss), as provided by the Rules of Practice and Procedure.

(I) The above listed interveners are permitted to intervene in the instant proceeding subject to the rules and regulations of the Commission; *Provided, however*, that participation of such interveners shall be limited to matters affecting asserted rights and interests as specifically set forth in the petitions to intervene; and *Provided, further*, that the admission of such interveners shall not be construed as recognition by the Commission that they might be aggrieved because of any order of the Commission entered in the proceeding.

By the Commission.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

Western Area Power Administration Colorado River Storage Project (CRSP); Revised Proposed Power Rate Adjustment

AGENCY: Western Area Power Administration (Western), Department of Energy.

ACTION: Announcement of a public information forum for the CRSP revised proposed power rate adjustment.

SUMMARY: The Western Area Power Administration initially proposed a 38-percent rate increase for CRSP firm and peaking power as published at 44 FR 19533 (April 3, 1979) and amended by 44 FR 30759 (May 29, 1979). Public information forums were held in Phoenix, Arizona, on April 24, 1979; in Salt Lake City, Utah, on April 25, 1979; and in Denver, Colorado, on April 26, 1979. A public comment forum was held in Salt Lake City, Utah, on June 26, 1979, and written comments were received until the close of the comment period on July 11, 1979.

A public information forum is scheduled to be held in the Grand Ballroom Number One, of the Hotel Utah, Main and South Temple Streets, Salt Lake City, Utah.

DATES: The public information forum will be held at 9 a.m. on September 5, 1979.

ADDRESSES: Interested persons wishing further information should contact: Mr. A. M. Gabiols, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84147, Telephone: 801-524-5493.

SUPPLEMENTAL INFORMATION: Additional written comments concerning the revised proposed rate adjustment for the CRSP, submitted on or before October 5, 1979, will be considered. Interested persons wishing to submit written comments pertaining to the proposed rate adjustment on CRSP shall mail three (3) copies of such comments to each of the following:

Mr. A. M. Gabiols, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84147, Telephone: 801-524-5493.

Mr. Robert L. McPhail, Administrator, Western Area Power Administration, Department of Energy, P.O. Box 3402, Golden, CO 80401, Telephone: 301-231-1511.

Mr. George S. McIsaac, Assistant Secretary for Resource Applications, Office of Resource Applications, Department of Energy, 12th and Pennsylvania Avenue NW., Washington, DC 20461, Telephone: 202-633-9222.

Issued in Golden, Colorado, August 17, 1979.

Robert L. McPhail,
Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1304-6]

Availability of Environmental Impact Statements

AGENCY: Office of Environmental Review; Environmental Protection Agency.

PURPOSE: This Notice lists the Environmental Impact Statements which have been officially filed with the EPA and distributed to Federal Agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's Regulations (40 CFR Part 1506.9).

PERIOD COVERED: This Notice includes EIS's filed during the week of August 13 to August 17, 1979.

REVIEW PERIODS: The 45-day review period for draft EIS's listed in this Notice is calculated from August 24, and will end on October 9, 1979. The 30-day wait period for final EIS's as calculated from August 24, 1979 will end on September 24, 1979.

EIS AVAILABILITY: To obtain a copy of an EIS listed in this Notice you should contact the Federal agency which prepared the EIS. This Notice will give a contact person for each Federal agency which has filed an EIS during the period covered by the Notice. If a Federal agency does not have the EIS available upon request you may contact the Office of Environmental Review, EPA for further information.

BACK COPIES OF EIS'S: Copies of EIS's previously filed with EPA or CEQ which are no longer available from the originating agency are available from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT: Kathi Weaver Wilson, Office of Environmental Review (A-104), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202) 245-3006.

SUMMARY OF NOTICE: On July 30, 1979, the CEQ Regulations became effective. Pursuant to § 1506.10(a), the 30 day wait period for final EIS's received during a given week will now be calculated from Friday of the following week. Therefore, for all final EIS's received during the week of August 13 through August 17, 1979, the 30 day wait period will be calculated from August 24, 1979. The wait period will end on September 24, 1979.

Appendix I sets forth a list of EIS's filed with EPA during the week of August 13 to August 17, 1979, the Federal

²⁵ Order of November 15, 1971, 46 FPC 1212 (1971) approving interim settlement; Order of November 15, 1972, 48 FPC 1060 (1972) approving another interim settlement agreement; Opinion No. 778, October 8, 1976 prescribing permanent plan, and Opinion 778-a, December 8, 1976 denying rehearing; Order of January 19, 1979 in Docket No. RP72-99 approving settlement; Order of August 2, 1979 denying rehearing.

agency filing the EIS, the name, address, and telephone number of the Federal agency contact for copies of the EIS, the filing status of the EIS, the actual date the EIS was filed with EPA, the title of the EIS, the State(s) and County(ies) of the proposed action and a brief summary of the proposed Federal action and the Federal agency EIS number if available. Commenting entities on draft EIS's are listed for final EIS's.

Appendix II sets forth the EIS's which agencies have granted an extended review period or a waiver from the prescribed review period. The Appendix II includes the Federal agency responsible for the EIS, the name, address, and telephone number of the Federal agency contact, the title, State(s) and County(ies) of the EIS, the date EPA announced availability of the EIS in the Federal Register and the extended date for comments.

Appendix III sets forth a list of EIS's which have been withdrawn by a Federal agency.

Appendix IV sets forth a list of EIS retractions concerning previous Notices of Availability which have been made because of procedural noncompliance with NEPA or the CEQ regulations by the originating Federal agencies.

Appendix V sets forth a list of reports or additional supplemental information on previously filed EIS's which have been made available to EPA by Federal agencies.

Appendix VI sets forth official corrections which have been called to EPA's attention.

Dated: August 21, 1979.

William N. Hedeman, Jr.,
Director, Office of Environmental Review.

Forest Service

Draft

Lake Tahoe Basin, Eldorado, Tahoe, and Toiyabe NFS, several counties in California and Nevada, August 17: Proposed is a land management plan for the Lake Tahoe Basin management unit located in the Eldorado, Tahoe and Toiyabe National Forests within the counties of El Dorado, Placer and Alpine, California and Washoe and Douglas Counties, Nevada. The preferred alternative emphasizes water-oriented recreation where it can be served by the existing utility system. Most new recreational development would be required to be near water attractions such as Lake Tahoe, other lakes, the Truckee River,

and major streams. Other features include: 1) ski development; 2) motorized and nonmotorized dispersed recreation; 3) timber cutting; and 4) placement of roads, and sewer and power lines. (EIS order #90887)

Mt. Baker-Snoqualmie NF Timber Management Plan, several counties in Wash., August 14: Proposed is a ten year timber resource management plan for the Mt. Baker-Snoqualmie National Forest located in King, Pierce, Skagit, Snohomish, and Whatcom Counties, Washington. The preferred alternative includes planting genetically superior stock; fertilization and full stocking control including thinning (both precommercial and commercial); reforestation of backlog; interplanting; and brush, disease, and animal control. The other alternatives considered include: 1) no change, 2) extensive management, and 3) declining flow. (DES-06-05-79-10.) (EIS Order #90881.)

Draft Supplement

Fox unit land management plan, Six Rivers NF, Del Norte County, Calif., August 17: This statement supplements a final EIS, #40600, filed 4-16-74 concerning a land management plan for 30,000 acres of land known as the Fox unit of the Six Rivers National Forest located in Del Norte County, California. The plan divides the unit into seven resource zones of varying sizes. Resource management and development including timber management and associated road construction will occur primarily in three of the zones. The other five zones will remain essentially undeveloped. This statement provides additional information concerning geology, erosion, water quality, and fisheries. (USDA-FS-R5-FES-SUPP(ADM)74-25.) (EIS Order #90888.)

U.S. Army Corps of Engineers

Contact: Mr. Richard Makinen; Office of Environmental Policy, Attn: Daen-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 20 Massachusetts Avenue, Washington, D.C. 20314 (202) 272-0121.

Final

Lynnhaven Inlet, Bay & Connecting Waters, Dredging, Chesapeake County Va., August 16: Proposed is maintenance dredging of Lynnhaven inlet and bay to authorized dimensions which will require the removal of approximately 100,000 cubic yards at 2-3 year intervals. Disposal will be on a 6-acre portion of a 17 acre site which the city of Virginia Beach, Virginia is attempting to acquire. The area is designed for use as a permanent dredged material disposal area in conjunction with a state operated boat launching facility. The material placed at the disposal site will be transported by truck to the ocean front, Virginia Beach for the purposes of sand replenishing. (Norfolk district.) Comments made by: EPA DOI DOC HUD USDA state agencies (EIS order No. 90883.)

Final Supplement

Grand Isle and Vicinity, Beach Erosion, Jefferson County, La., August 17: This statement supplements a final EIS filed in September 1976 concerning beach erosion and hurricane protection for Grand Isle and vicinity located in Jefferson Parish, Louisiana.

The project will consist of a 2,600-foot stone jetty at Caminada Pass to stabilize the western end of Grand Isle and a sandfill dune and berm extending approximately 7.5 miles along the island's gulf shore. Sandfill for the dune and berm will be dredged from nearshore bottoms. Five alternatives are considered. (New Orleans district.) Comments made by: AHP, USDA, DOC, HEW, DOI, DOT, EPA, FERC, State and local agencies (EIS order No. 90889.)

ENVIRONMENTAL PROTECTION AGENCY

Final contact: Mr. Daniel Sullivan, Region II, Environmental Protection Agency, 26 Federal Plaza, New York, New York 10007 (212) 264-1858.

WWT Facilities, Ramapo River Basin, Grants, Orange, Rockland Counties, N.Y., August 16: Proposed is the issuance of construction grants for wastewater treatment facilities in the Ramapo River Basin, Orange and Rockland Counties, New York. The recommended plan would expand and upgrade the wastewater treatment plant (WTP) of the Village of Suffern; would upgrade the WTPS serving the village and hamlet of Tuxedo Park; and continue the present method of wastewater management in other areas. Comments made by: USDA, DOI, HUD, EPA, DOC, State and local agencies (EIS order No. 90884.)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Room 7274, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 (202) 755-6306

Final

Verdemar Housing Complex, Humacao, Puerto Rico, August 13: Proposed is the construction of the Verdemar Housing project in Humacao, Puerto Rico. The residential complex will occupy 98 cuerdas (93.2 acres) of land and will consist of 761 dwelling units. Plans also call for the construction of playlots, parks, lakes, and a cultural center. Comments made by: DOI NRC HUD DOT EPA USDA GSA DOE HEW State agencies (EIS order #90874.)

Plaza Renacimiento, Stage 3, San Juan, Puerto Rico, August 13: The proposed action involves development of 42.61 cuerdas of land in Rio Piedras, San Juan, Puerto Rico. The complete project consists of 10 towers providing 2,500 apartments, approximately, for low and moderate income families. This statement addresses the third stage of the project which includes construction of four towers, a recreational plaza, a swimming pool, a passive park and a cultural center. Application has been made for home mortgage insurance funding through HUD. Comments made by: USDA DOE HEW DOI EPA DOT VA State agencies (EIS order # 90878.)

Section 104(H)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(H) of the 1974 housing and community development act. Copies may be obtained from the office of the appropriate

local executive. Copies are not available from HUD.

Final

High service transmission main, Alexander City, Tallapoosa County, Ala., August 14: Proposed is the issuance of CDBG funds for the construction of a water main to connect the proposed new water treatment facility near Lake Martin, to the presently existing Alexander City water distribution system. The water main will be of adequate size to provide the households, businesses, and industries in Alexander City, Tallapoosa County, Alabama with sufficient potable water for their daily needs and will also provide fire protection. The alternatives considered include: 1) no action, 2) enlargement of present facilities, and 3) construction of new facilities with a new source of supply. (HUD-B-78-NH-01-0001.) Comments made by: USDA FERC EPA AHP DOI State and local agencies (EIS order # 90879.)

Federal Aviation Administration

Final

Fort Wayne Municipal Airport, Baer Field, Allen County, Ind., August 17: Proposed is the expansion of the airport facilities at Fort Wayne Municipal Airport, Baer Field, Fort Wayne, Allen County, Indiana. This proposal will involve the acquisition of approximately 342 acres, extending runway 13/13 and parallel taxiway from 6200 feet to 7200 feet, relocating instrument landing system, and approach light system strengthening the entire 9000 ft. length of runway 4/22, and associated road closings and improvements.

Comments made by: DOT DOI USDA COE (EIS order No. 90891.)

Federal Highway Administration

Final

Dubuque North-West Arterial, U.S. 20 to U.S. 52/IA-3, Dubuque County, Iowa, August 14: The proposed project pertains to the construction of a divided four-lane highway facility beginning at U.S. 20 in the vicinity of its intersection with Crescent Ridge Road in the west-central portion of Dubuque, and a proceeding northerly to intersect with U.S. 52 and IA-3 northerly of West Thirty-second Street, a distance of approximately 5.0 miles. The project is located within the Dubuque metropolitan area in Dubuque County, Iowa. (FHWA-IOWA-EIS-78-01-1.) Comments made by: DOI COE State Agencies, Groups (EIS Order No. 90880.)

Final

IA-14, East High Street to East Linn Street, Marshall County, Iowa, August 15: The proposed study provides for four-lane construction of a 0.9 mile section of existing Iowa 14 in Marshalltown, from just South of East High Street at South Center Street northerly and easterly to East Linn Street at South Third Avenue. The project will require the acquisition of sufficient right-of-way to accommodate the construction of a four-lane facility. The project is located in Marshall County, Iowa. (FHWA IOWA-EIS-77-06-F.) Comments made by: HUD DOI EPA COE State and local agencies, groups (EIS order No. 90882.)

East Loop 363, from U.S. 190 to I-35, Temple City, Bell County, Tex., August 14: Proposed is construction of a two-lane highway with a 24 foot roadway with paved shoulders and interchange structures known as East Loop 363 located near Temple City, Bell County, Texas. The project will begin at U.S. 190 south of Temple and extend approximately 6.7 miles to I-35 north of Temple. The alternatives include alternate routes and no build. (FHWA-TEX-EIS-78-03-F.) Comments made by: DOT COE USDA DOI EPA State and local agencies (EIS Order No. 90878.)

West Seattle Bridge, Spokane Street Corridor, King County, Wash., August 14: The proposed project located in Seattle, King County, Washington, is to construct a replacement bridge system for the West Seattle Corridor. The project area would extend from the vicinity of the Alaskan way viaduct across Harbor Island and the East and West waterways of the Dowamish River and connect with the existing West Seattle Freeway near Puget Ridge. The preferred alternative separates express or through traffic from local traffic by use of a fixed bridge slightly south of the existing alignment. (FHWA-WA-EIS-78-06-F.) Comments made by: HUD DOT DOI DOE COE EPA State and local agencies groups, individuals and businesses (EIS order No. 90877.)

Draft

US Antarctic Program, Continuation, Antarctica, August 17: Proposed is the continuation of the current US Antarctic program. This program is a large multidisciplinary scientific effort consisting of two activities: 1) scientific research and 2) operations support. The scientific research projects conducted at four year-round stations and temporary field camps in Antarctica, and aboard ships in the surrounding oceans. The operations support activity includes transportation of personnel and materials to, from, and within Antarctica; construction and maintenance of stations, field camps and other facilities; and general logistics support for all US scientific activities in the Antarctic. (EIS Order No. 90886.)

NUCLEAR REGULATORY COMMISSION

Contact: Mr. Richard E. Cunningham, Director, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Mail Stop SS-396, Washington, D.C. 20455 (301) 427-4485.

FINAL

Spent Light Water Power Reactor Fuel, August 16: Proposed is a generic EIS on spent fuel storage prepared in response to a directive from the Commissioners published in the Federal Register, September 16, 1975 (40 FR 44801). The Commission directed the staff to analyze alternatives for the handling and storage of spent light water power reactor fuel with particular emphasis on developing long range policy. Accordingly, the scope of this statement examines alternative methods of spent fuel storage as well as the possible restriction or termination of the generation of spent fuel through nuclear power plant shutdown. Pesticide Programs; Filing of Feed Additive Petition

Ciba-Geigy Corp., PO Box 11422, Greensboro, NC 27409, has submitted a petition (FAP 9H5231) to the Environmental Protection Agency (EPA) which proposes that 21 CFR 561.53 be amended by permitting the combined residues of the insecticide profenofos [O-(4-bromo-2-chlorophenyl)-O-ethyl-S-propyl phosphorothioate] and its metabolite converted to 4-bromo-2-chlorophenyl and calculated as O-(4-bromo-2-chlorophenyl)-O-ethyl-S-propyl phosphorothioate in connection with a proposed experimental program involving the application of the insecticide in the growing of soybeans with tolerance limitations of 2.0 parts per million (ppm) in or on soybean meal and hulls. Notice of this submission is given pursuant to the provisions of section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition. Comments may be submitted, and inquiries directed, to Product Manager (PM) 16, Room E-343, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., SW, Washington, DC 20460, telephone number 202/426-9458. Written comments should bear a notation indicating the petition number "FAP 9H5231". Comments may be made at any time while the petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the Product Manager's office from 8:30 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

Dated: August 20, 1979.

Herbert S. Harrison,
Acting Director, Registration Division.

Pesticide Programs; Filing of Pesticide/Food/Feed Additive Petitions

Pursuant to sections 408(d)(1) and 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration.

PP 9F2235. ICI Americas Inc., Concord Pike and New Murphy Road, Wilmington, DE 19897. Proposes that 40 CFR 180.365 be amended by establishing tolerances for the combined residues of the insecticide 2-(dimethylamino)-5,6-dimethyl-4-pyrimidinyl dimethylcarbamate and its metabolites 5,6-dimethyl-2-(formylmethylamino)-4-pyrimidinyl (dimethylamino)-5,6-dimethyl-4-(methylamino)-4-pyrimidinyl dimethylcarbamate (both calculated as parent) in or on the raw agricultural commodities apples at 1.0 part per million (ppm) and cottonseed at 0.05 ppm. The proposed analytical method for determining residues is by gas-liquid chromatography using a nitrogen-specific detector.

FAP 9H5232. ICI Americas Inc. Proposes that 21 CFR 193 be amended by permitting the combined residues of the above insecticide in the commodity cottonseed oil at 0.2 ppm. FAP 9H5232. ICI Americas Inc. Proposes that 21 CFR 561 be amended by permitting the combined residues of the above insecticide in or on the commodities apply pomace and pulp at 2.0 ppm.

Interested persons are invited to submit written comments on these petitions. Comments may be submitted, and inquiries directed, to Product Manager (PM) 16, Room E-343, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., SW,

Washington, DC 20460, telephone number 202/426-9458. Written comments should bear a notation indicating the petition number to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the Product Manager's office from 8:30 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

Dated: August 20, 1978.

Pesticide Programs; Filing of Feed Pesticide Petitions

Pursuant to sections 408(d)(1) and 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration.

PP 9F2231. E. I. du Pont de Nemours and Co., Wilmington, DE 19898. Proposes that 40 CFR 180.253 be amended by establishing tolerances for residues of the insecticide methomyl (S-methyl-N-[(methylcarbamoyl)oxy] thioacetimidate) in or on the raw agricultural commodities peanut hay and forage at 10 parts per million (ppm). The proposed analytical method for determining residues is by microcoulometric gas chromatography.

PP 9F2238. E. I. du Pont de Nemours and Co. Proposes that 40 CFR 180.303 be amended by establishing tolerances for residues of the insecticide oxamyl (methyl N-methyl-N-[(methylcarbamoyl)oxy]-1-thiooxamidate in or on the raw agricultural commodities peanuts and peanut hulls at 0.2 ppm and peanut hay at 10.0 ppm. The proposed analytical method for determining residues is by flame photometric gas chromatography.

Interested persons are invited to submit written comments on these petitions. Comments may be submitted, and inquiries directed, to Product Manager (PM) 12, Room E-335, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, DC 20460, telephone number 202/426-2635. [Docket No. 79N-01901 DEST 5378]

Amphetamines; Drugs for Human Use; Drug Efficacy Study Implementation; Amendment or Previous Notice and Opportunity for Hearing

Correction

In FR Doc. 79-21953, published at page 41552, on Tuesday, July 17, 1979, the following corrections should be made:

1. On page 41552, in the third column, in the paragraph labeled #2, "NDA 5-540 Methedrine Tablets containing" should be corrected to read "NDA 5-504 Methedrine Tablets containing";

2. On page 41553, in the second column, in the paragraph #22, in the fifth line, "table" should be corrected to read "tablet";

3. On page 41553, in the third column, in the third paragraph:

a. In the second line "September 35, 1973" should be corrected to read "September 25, 1973";

b. In the sixteenth line "NDAO." should be corrected to read "NDA.";

c. In the twenty-first line, "58i7" should be corrected to read "587";

4. On page 41556, in the third column, in paragraph #12, in the twenty-third

line "For other used" should be corrected to read "For other uses".

BILLING CODE 4110-03-M

[Docket No. 79N-0304; DESI 1730]

Combination Drugs Containing Butabarbital and Hydrochlorothiazide; Withdrawal of Approval of New Drug Application

AGENCY: Food and Drug Administration.
ACTION: Withdrawal of approval.

SUMMARY: This notice withdraws approval of the new drug application (NDA 13-312) for Butizide-25 and Butizide-50 Prestabs containing butabarbital and hydrochlorothiazide. The basis of the withdrawal is that the drug products lack substantial evidence of effectiveness for their labeled indications. These combination drug products, previously used to treat hypertension, are no longer marketed.

EFFECTIVE DATE: September 4, 1979.

ADDRESS: Requests for the opinion of the applicability of this notice to a specific product should be identified with the reference number DESI 1730 and directed to the Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Douglas I. Ellsworth, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice of opportunity for hearing (DESI 1730, Docket No. FDC-D-534, now Docket No. 79N-0304) published in the Federal Register of December 23, 1972 (37 FR 28433), the agency proposed to issue an order withdrawing approval of the new drug applications for certain drugs containing amobarbital and dioxylone phosphate; phenobarbital and theobromine calcium salicylate; or butabarbital and hydrochlorothiazide, with and without reserpine. The proposed order was based on the lack of substantial evidence of effectiveness according to the fixed-combination drug policy (21 CFR 300.50).

In response to the December 23, 1972 notice, McNeil Laboratories, Inc.,

requested a hearing for Butizide-25 and Butizide-50 Prestabs containing butabarbital and hydrochlorothiazide (NDA 13-312) and Butiserpazide-25 and Butiserpazide-50 Prestabs containing butabarbital, hydrochlorothiazide, and reserpine (NDA 13-313). Approval of the other new drug applications was withdrawn in a Federal Register notice of May 2, 1973 (38 FR 10828), as no other application holder or any other person filed a written notice of appearance and request for a hearing as provided by the December 23, 1972 notice.

Subsequent to the May 2, 1973 notice, McNeil Laboratories, Inc. discontinued the manufacture of Butizide-25 and Butizide-50 Prestabs and withdrew its hearing request concerning these products. Approval of the new drug application for these products is now being withdrawn.

NDA 13-312; Butizide-25 and Butizide-50 Prestabs, prolonged action tablets containing butabarbital and hydrochlorothiazide; McNeil Laboratories, Inc., Camp Hill Rd., Fort Washington, PA 19034.

The request for a hearing concerning Butiserpazide-25 and Butiserpazide-50 is under review and will be the subject of a future notice. The notice that follows, therefore, does not apply to NDA 13-313, and marketing of these products may continue pending a ruling on the hearing request.

Any drug product that is identical, related, or similar to the drug products named above and is not the subject of an approved new drug application is covered by the new drug application reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division Drug Labeling Compliance at the address given above.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053 as amended (21 U.S.C. 355)), and under the authority delegated to him (21 CFR 5.82), finds that, on the basis of new information before him with respect to the drug products, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug products will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

Therefore, pursuant to the foregoing findings, approval of NDA 13-312 and all its amendments and supplements is withdrawn effective September 4, 1979.

Shipment in interstate commerce of the products for which approval is

withdrawn or of any identical, related, or similar product that is not the subject of an approved new drug application will then be unlawful. The products described above that are the subject of a pending hearing request may continue to be marketed.

Dated: August 14, 1979.

Jerome A. Halperin,

Acting Director, Bureau of Drugs.

Newport Research Corp.; Approval of Variance for Laser-Aimed Firearms

Correction

In Fr. Doc. 79-21954, published at page 41549, on Tuesday, July 17, 1979, the following corrections should be made:

1. On page 41551, in the first column, in the first full paragraph, in the eleventh line, "misues" should be corrected to read "misuse";

2. On page 41551, in the second column, in the first full paragraph, in the fifteenth line, "emerging" should be corrected to read "emergency".

BILLING CODE 1505-01-M

[Docket No. 79N-0309; DESI 5079]

Phenylmercuric Nitrate; Withdrawal of Approval of New Drug Application

AGENCY: Food and Drug Administration.
ACTION: Withdrawal of approval.

SUMMARY: This notice withdraws approval of the new drug application (NDA) 5-079 for Merpectogel Vaginal Jelly, formerly manufactured by William P. Poythress & Co., Inc.

EFFECTIVE DATE: August 24, 1979.

FOR FURTHER INFORMATION CONTACT: Suzanne O'Shea, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 5079, Docket No. FDC-D-245, now Docket No. 79N-0309) published in the Federal Register of July 27, 1972 (37 FR 15034), FDA announced its conclusions, based on a report of the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the efficacy of the following drug product:

NDA 5-079; Merpectogel Vaginal Jelly containing phenylmercuric nitrate and pectin; formerly marketed by William P. Poythress and Co., Inc., 16 N. 22nd St., P.O. Box 26946, Richmond, VA 23261.

The drug was classified as effective for maintaining vaginal hygiene; and possibly effective as a dressing for burns, chronic ulcers, and slow-healing wounds, and as a treatment for vaginal infections. The drug was found to lack substantial evidence of effectiveness for its claim related to prevention of postsurgical tissue infection.

Poythress submitted no data in support of the less-than-effective indications. Therefore, all indications initially classified as less-than-effective are now considered as lacking substantial evidence of effectiveness.

On June 20, 1979, Poythress submitted a written request that the new drug application for Merpectogel Vaginal Jelly be withdrawn as the drug product has not been marketed since 1971 and the firm has no further interest in it.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to him (21 CFR 5.82) withdraws approval of new drug application 5-079 and all applicable supplements and amendments upon the applicant's request for withdrawal. The withdrawal is effective August 24, 1979.

Shipment in interstate commerce of the above product will then be unlawful.

Dated: August 14, 1979.

Jerome A. Halperin,

Acting Director, Bureau of Drugs.

Pro-Star Mills Ltd.; Withdrawal of Petition for Affirmation of Gras Status

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: This document announces the withdrawal without prejudice of the petition (GRASP-7G0089) proposing that pea protein concentrate, pea fiber, and pea starch used in food be affirmed as generally recognized as safe (GRAS).

FOR FURTHER INFORMATION CONTACT: Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786 (21 U.S.C. 348(b))), the following notice is issued:

In accordance with § 171.7 *Withdrawal of petition without prejudice* of the procedural food additive regulations (21 CFR 171.7), Pro-

Star Mills Ltd., 817 48th St. East, Saskatoon, Saskatchewan, Canada S7K0X5, has withdrawn its petition (GRASP-7G0089), notice of which was published in the Federal Register of April 7, 1978 (43 FR 14738), proposing that pea protein concentrate, pea fiber, and pea starch used in food be affirmed as GRAS.

Dated: August 13, 1979.

Pennwalt Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: Pennwalt Corporation has filed a petition proposing that the food additive regulations be amended to provide for the safe use of dodecylbenzene sulfonic acid and isopropyl alcohol as components of sanitizing solutions for use on food processing equipment and utensils, and on glass bottles and other glass containers intended for holding milk.

FOR FURTHER INFORMATION CONTACT: Gerard L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1788 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 91-3429) has been filed by Pennwalt Corp., Three Parkway, Philadelphia, PA 19102, proposing that the food additive regulations be amended to provide for the safe use of dodecylbenzene sulfonic acid and isopropyl alcohol as components of sanitizing solutions for use on food processing equipment and utensils, and on glass bottles and other glass containers intended for holding milk.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

[Docket No. 79P-0054]

CGR Medical Corp; Approval of Variance for Lateral Fluoroscopic Automatic Field Limiter

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The agency announces the approval of a variance from the performance standard for diagnostic x-ray systems and their major components for the Lateral Fluoroscopic Automatic Field Limiter, manufactured by CGR Medical Corp. The manufacturer submitted a petition for the variance, and the Director of the Bureau of Radiological Health has determined that the primary x-ray beam may exceed the primary protective barrier under certain conditions not addressed by the standard and that suitable protection will be provided. Thus, critical fluoroscopic procedures may continue uninterrupted when the automatic field limiter's failure necessitates switching to override.

DATES: The variance becomes effective September 24, 1979 and ends September 24, 1981; written objections by September 24, 1979.

ADDRESS: Written objections should be sent to the Hearing Clerk, (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Raymond F. Coakley, Jr., Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: Section 1020.32(a)(1) (21 CFR 1020.32(a)(1)) of the performance standard for diagnostic x-ray systems and their major components requires that a primary protective barrier (PPB) be in position to intercept the entire useful beam before an x-ray tube used for fluoroscopy can produce x-rays. This provision of the standard assures that radiation cannot be produced without the image receptor in place and thus unnecessarily expose patients and attendant personnel. In practice, a system of mechanical and electrical interlocks disables x-ray emission when the PPB is out of position. The Fluoroscopic Automatic Field Limiter manufactured by CGR

Medical Corp., 2519 Wilkens Ave., Baltimore, MD 21203, performs the function of a PPB in this manufacturer's fluoroscopic system. The product restricts the x-ray to the image receptor at all source-to-image-distances (SID) and in all axes for which the system is designed. In one configuration, the system permits (while in compliance with the relevant section of the standard) oblique lateral fluoroscopy. When the procedure is begun with all system components operating properly, the patient and medical personnel are appropriately safeguarded. However, in the case of a system malfunction during a procedure, the patient would be placed in serious jeopardy if the procedure were prematurely terminated by the automatic termination of the x-ray exposure.

In a notice published in the Federal Register of May 9, 1978 (43 FR 19879), the agency proposed to amend the performance standard (21 CFR 1020.32(b)) to permit, in case of system failure, a capability for overriding the automatic x-ray field size adjustment on fluoroscopic x-ray systems, if appropriate labeling is provided. The manufacturer's petition notes that it is possible for a system malfunction to occur wherein the PPB may no longer be fully intercepting the x-ray beam. The proposed override capability would not apply, and the procedure would have to be terminated. In light of this possibility, the manufacturer has requested a variance from § 1020.32 (a)(1) to provide an override capability in case of a system failure in the Fluoroscopic Automatic Field Limiter. The advantages to be derived from this variance are related to patient safety during life-endangering procedures when a field limiting system fails. The procedure would be interrupted only as long as it takes the operator to turn on the override key. Image quality would be maintained because no change in SID would be required. The practitioner would be free to decide to continue or not based on his judgment with respect to patient benefit and attendant risk. With suitable user instructions and warning labels and signals, radiation protection can be maintained.

It must be clearly understood that this variance will allow a procedure which is begun with a fluoroscopic system in compliance with the standard (21 CFR 1020.32) to continue to completion. This override capability will not permit the system to be set up in an unsafe mode in order to perform a procedure for which

the system is not designed. Thus, the PPB will be in proper position and the override switch turned off at the beginning of the lateral fluoroscopy. The override capability allows the procedure to continue when the interlock system later fails but the protective barriers do not. The warning signal is given so that attendant personnel can take whatever precautions they deem necessary.

The Director, Bureau of Radiological Health, agrees that the added override capability is a necessary safety feature and that radiation protection to attendant personnel can be maintained with the use of this product. The capability to complete lateral fluoroscopic procedures is particularly needed because these special procedures would be likely to involve a high percentage of patients who are critically ill. However, adequate warning must be provided to personnel who are in the room when the machine is operating in the override mode, so they will know precautions must be taken to avoid exposure. Therefore, in addition to user instructions and appropriate labeling, two specific requirements must be met: (1) The override switch must be labeled with an appropriate sign warning that its use is hazardous and must occur only in case of Fluoroscopic Automatic Field Limiter failure; and (2) a warning light and/or sound perceptible to all in the x-ray room must continue when the main power switch and the override are both on.

On condition of prior approval of the labeling and warning provision, the Director approves the requested variance from § 1020.32(a)(1) to allow the use of an override capability in case of system failure during a lateral oblique fluoroscopic procedure. The manufacturer is directed to modify, in accordance with § 1010.4(d) (21 CFR 1010.4(d)), the tags, labels, or other certification required by § 1010.2 (21 CFR 1010.2) and permanently affixed to or inscribed upon products that are marketed under this variance, to state the following: "This product complies with Variance No. 79P-0054 effective on September 24, 1979."

The agency has reviewed the potential environmental impact of this variance and has concluded that the action will not significantly affect the quality of the human environment, and that an environmental impact statement is not required. An environmental impact assessment report is on file in the office of the Hearing Clerk, Food and Drug Administration, address above.

Variance No. 79P-0054 becomes effective on September 24, 1979, for the manufacture of 10 product units per

year, and ends September 24, 1981, unless written objections and supporting documentation, identified with Hearing Clerk Docket No. 79P-0054, are filed with the Hearing Clerk (HFA-305), Food and Drug Administration, address above, on or before September 24, 1979, requesting that the variance be modified or not granted. Upon receipt of objections and supporting documentation, the agency will stay the effective date of the variance until the Director, Bureau of Radiological Health, rules on them. Under § 1010.4(c)(3) (21 CFR 1010.4(c)(3)), the applicant will be notified of the stay by certified mail, and a notice of the stay will be published in the Federal Register. FDA will rule on the objections within 60 days. The ruling will be published in the Federal Register and will constitute final agency action subject to judicial review under section 358(d) of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (the act) (42 U.S.C. 263f(d)).

The application for this variance and all related correspondence, except information covered by the confidentiality provisions of section 360A(e) of the act (42 U.S.C. 263i(e)), have been placed on public display in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, and may be seen from 9 a.m. to 4 p.m. Monday through Friday.

Dated: August 16, 1979.
William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming consumer exchange meeting to be chaired by George R. White, District Director, District Office, Atlanta, GA.

DATE: The meeting will be held 1 p.m. to 5 p.m., Thursday, August 30, 1979.

ADDRESS: The meeting will be held at the Carolina Inn, Cameron Ave., Chapel Hill, NC.

FOR FURTHER INFORMATION CONTACT: Faye P. Matlock, Consumer Affairs Officer, Food and Drug Administration, Department of Health, Education, and Welfare, 880 W. Peachtree St., NW., Atlanta, GA 30309, 404-881-7355.Q02

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's Atlanta District Office, and to contribute to the agency's policymaking decisions on vital issues.

Dated: August 17, 1979.
William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

Health Resources Administration

Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1979:

Name: National Advisory Council on Health Professions Education.
Date and Time: September 10-11, 1979, 8:30 a.m.
Place: Conference Room 7-32, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782.
Open September 10, 1979, 8:30 a.m.—12:30 p.m. (10:30 a.m.—12:30 p.m. will be structured study for Council members.)
Closed remainder of meeting.
Purpose: The Council advises the Secretary concerning the programs authorized by the Health Professions Educational Assistance Act of 1976, including recommendations on contracts, grant applications for construction, capitation, special projects, and financial need. These and other programs are designed to enable the health professions education institutions to meet the Nation's health manpower requirements.

Agenda: Agenda items for the open portion of the meeting will include Bureau Update, Update on 1980 Budget, consideration of minutes of previous meeting, and discussion of future meeting dates. The remainder of the meeting will be closed to the public for the review of applications for Grants for Mid-Career Training in Health Administration/Planning. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S. Code, and the Determination by the Administrator, Health Resources Administration, pursuant to Public Law 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. Robert L. Belsley, Bureau of Health Manpower, Room 4-27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, Telephone (301) 436-6564.

Agenda items are subject to change as priorities dictate.

Dated: August 13, 1979.
James A. Walsh,
Associate Administrator for Operations and Management.

BILLING CODE 4110-83-M

Office of Education

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Orientation Ad Hoc Committee of the National Advisory Council on Adult Education. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, Sec. 10(a)(2)).
DATE: September 11, 1979, Noon to 10:00 p.m.; September 12, 1979, 8:00 a.m. to Noon.

ADDRESS: Holiday Inn, 1000 East 6th Street, Reno, Nevada.

FOR FURTHER INFORMATION CONTACT: Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St., N.W., Washington, D.C. 20004 (202/376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee shall be open to the public.

The proposed agenda includes:

Orientation Meeting and Procedures—New Presidential Appointees.
 Orientation Materials.
 Committee Structures.
 Orientation Meeting Format with Urban Policy Meeting.

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the National Advisory Council on Adult Education, 425 13th St., NW., Suite 323, Washington, D.C. 20004.

Signed at Washington, D.C., on August 21, 1979.

Gary A. Eyre,
Executive Director, National Advisory Council on Adult Education.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D-79-579]

Certain HUD Employees in Denver Regional Office, Region VIII; Redefinition of Authority To Administer Oaths and Verify Complaints

Section A. Authority to Administer Oaths and Verify Complaints. The incumbents of the following positions in the Department of Housing and Urban Development, Denver Regional Office, are hereby authorized to administer oaths under Section 811(a) of Title VIII (Fair Housing) of the Civil Rights Act of 1968 (Pub. L. 90-284 (42 U.S.C. 3611(a))) and to verify complaints filed under the Civil Rights Act of 1968:

1. Director, Fair Housing and Equal Opportunity Compliance Division.
2. Director, Program Compliance and Operations Division.
3. Equal Opportunity Specialists.
4. Equal Opportunity Program Assistant.

Section B. Superseding. This redefinition of authority supersedes the redefinition effective January 22, 1973 (38 FR 6422, March 9, 1973).

Redefinition of Authority by the Assistant Secretary for Fair Housing and Equal Opportunity effective April 2, 1976 (41 FR 14208, April 2, 1976).

Effective date: This redefinition of authority shall be effective July 1, 1979.

Sandra K. Woods

Regional Director for Fair Housing and Equal Opportunity, Denver Regional Office.

BILLING CODE 4210-01-M

[Docket No. D-79-581]

Deputy Regional Administrator, Region IX, San Francisco; Designation

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Deputy Regional

Administrator during the absence of the Deputy Regional Administrator, with all the powers, functions and duties redelegated or assigned to the Deputy Regional Administrator: *Provided*, That no officer is authorized to serve as Acting Deputy Regional Administrator unless the preceding officer in this designation is unable to act by reason of absence; *Provided, further*, That in the absence of both the Regional Administrator and the Deputy Regional Administrator, if the officer first designated below is serving as Acting Regional Administrator by virtue of other designations, the second officer designated below shall serve as Acting Deputy Regional Administrator.

1. Regional Counsel.
2. Director, Office of Regional Administration.

(Delegation of Authority to Designate Acting Regional Officers, 27 FR 4319, May 4, 1962.)

This designation shall be effective on May 1, 1979.

Emma D. McFarlin,

Regional Administrator, Region IX, San Francisco.

BILLING CODE 4210-01-M

[Docket No. D-79-580]

Regional Director, Fair Housing and Equal Opportunity, Denver Regional Office; Redefinition of Authority With Respect To Fair Housing

Section A. Authority with respect to fair housing. The Regional Director, Fair Housing and Equal Opportunity, Denver Regional Office, is authorized to exercise the power and authority of the Secretary, Housing and Urban Development, under Title VIII (Fair Housing) of the Civil Rights Act of 1968, Pub. L. 90-284 (42 U.S.C. 3601-3619), except the authority to:

1. Make studies and publish reports under Section 808(e) of the Act (42 U.S.C. 3608(d)); and
2. Issue rules and regulations.

Section B. Authority to Redelegate. The Regional Director, Fair Housing and Equal Opportunity is further authorized to redelegate to subordinate employees in the Regional Office the authority of the Secretary to administer oaths under Section 811(a) of the Act (42 U.S.C. 3611(a)) and to verify complaints filed under the Civil Rights Act of 1968.

Section C. Superseding. This redefinition of authority supersedes the redefinition published at 38 FR 11821, June 19, 1971.

Redefinition of Authority by Assistant Secretary for Fair Housing

and Equal Opportunity effective April 2, 1976 (41 FR 14208, April 2, 1976).

Effective date: This redelegation of authority shall be effective, July 1, 1979.

Betty Miller,

Regional Administrator, Region VIII, (Denver).

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F-19155-20]

Alaska Native Claims Selection and Easement Conformance; Notice for Publication

By decision dated June 26, 1978, among other things, certain lands were determined proper for regional selection and approved for interim conveyance or patent to Doyon, Limited, under the provisions of section 12(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611(a) (1976) (ANCSA). Additionally, that decision reserved certain public easements to the United States pursuant to section 17(b) of the ANCSA.

The decision of June 26, 1978, states that, "These reservations (section 17(b) easements) have not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation *Calista, et al v. Andrus, et al*, and implementation of the Secretary's new easement policy." On November 27, 1978, new section 17(b) easement regulations were published in the *Federal Register* as final rule making (43 FR 56326). The process of review by the Bureau of Land Management to bring easements into conformance with the regulations is now complete.

Accordingly, the decision of June 26, 1978, is modified by deleting paragraph 12 of the listed reservations to the United States and substituting the following new paragraph:

"Pursuant to sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (1976)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-21779-20, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, and four-wheel drive vehicles.

60 Foot Road—The uses allowed on a sixty (60) foot wide road easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

Easements to Be Reserved:

a. (EIN 2 C5) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 36, T. 16 N., R. 17 E., Copper River Meridian, southeasterly through Sec. 1, T. 15 N., R. 17 E., Copper River Meridian, to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

b. (EIN 5 C5, L) An easement for an existing access trail fifty (50) feet in width from the Alaska Highway in Sec. 19, T. 16 N., R. 18 E., Copper River Meridian, easterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

c. (EIN 14 C5, L) An easement for an existing access trail twenty-five (25) feet in width from the Alaska Highway in Sec. 11, T. 14 N., R. 19 E., Copper River Meridian, northerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 40 C4) An easement for a proposed access trail fifty (50) feet in width from Sec. 36, T. 16 N., R. 19 E., Copper River Meridian, southeasterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

e. (EIN 49b K) An easement one hundred (100) feet in width for an existing road and utility line from the Beaver Creek Relay Site in Sec. 28, T. 15 N., R. 19 E., Copper River Meridian, northerly to the AFTAC site in Sec. 21, T. 15 N., R. 19 E., Copper River Meridian. The uses allowed for the utility line are those activities associated with the operation and maintenance of the utility line facility and the uses allowed for the road are those listed above for a sixty (60) foot wide road easement. The uses are limited to the U.S. Government, its agents or assignees.

f. (EIN 52 C4, C5, E) An easement for a proposed access trail fifty (50) feet in width from a point in Sec. 31, T. 13 N., R. 18 E., Copper River Meridian, westerly

to public lands in Sec. 1, T. 12 N., R. 17 E., Copper River Meridian. The uses allowed are those listed above for a fifty (50) foot wide trail easement."

Except as modified by this decision, the decision of June 26, 1978, stands as written.

Notice of this decision is being published once in the *Federal Register* and once a week, for four (4) consecutive weeks, in the Fairbanks Daily News-Miner. Any person who claims a property interest in land which is adversely affected by the modification set forth in this decision (as to conformed section 17(b) easements), may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate and any parties who failed or refused to sign the return receipt shall have until September 23, 1979 to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision as to the issue of section 17(b) easements, shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

If an appeal is taken, the adverse party to be served with a copy of the notice of appeal is:

Doyon, Limited, First and Hall Streets, Fairbanks, Alaska 99701.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirement for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

Sue A. Wolf,

Acting Chief, Division of ANCSA Operations.

BILLING CODE 4310-84-M

Proposed 5-Year Outer Continental Shelf Oil and Gas Lease Sale Schedule; Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has

prepared a draft environmental statement relating to a proposed Five-Year Outer Continental Shelf Oil and Gas Lease Sale Schedule, prepared according to section 18 of the Outer Continental Shelf Lands Act, as amended (92 Stat. 632).

Single copies of the draft environmental statement can be obtained from the Office of the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, 28 Federal Plaza, Suite 32-120, New York, New York 10007; Office of the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Hale Boggs Federal Building, Suite 841, 500 Camp Street, New Orleans, Louisiana 70130; Office of the Manager, Pacific Outer Continental Shelf Office, Bureau of Land Management, 7663 Federal Building, 300 North Los Angeles Street, Los Angeles, California 90012; Office of the Manager, Alaska Outer Continental Shelf Office, Bureau of Land Management, P.O. Box 1159, Anchorage, Alaska 99510, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental statement will also be available for review in public libraries located throughout the coastal States. Information regarding the location of libraries where copies of the statement will be available may be obtained from the OCS Offices listed above.

In accordance with 43 CFR 3314.1, public hearings will be held in New York, New York; New Orleans, Louisiana, Los Angeles, California; Anchorage, Alaska; and Washington, D.C. for the purpose of receiving comments and suggestions relating to the proposed lease schedule. The exact locations and dates of the hearings will be announced at a later date. Comments will be accepted until October 15, 1979.

After a public hearing is held and comments have been received and analyzed, a final environmental statement will be prepared.

Ed Hastey,

Associate Director, Bureau of Land Management.

Approved: August 21, 1979.

Larry E. Meierotto,
Secretary of the Interior.

BILLING CODE 4310-84-M

[W-68635]

Wyoming; Application

August 16, 1979.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct two 4½ inch O.D. pipelines, two 4' x 6' meter houses and related metering and dehydration facilities for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 17 N., R. 94 W.,

Sec. 4, N½SW¼;

Sec. 10, E½NW¼.

The proposed pipelines will transport natural gas from the Chorney-Federal #4-1 Well in the SW¼ of section 4 and the Madrid-Federal #10-1 Well in the NW¼ of section 10 to points of connection with existing pipelines. The proposed 4' x 6' metering houses and related metering and dehydration facilities are to be located entirely within the 50 foot right-of-way in the SW¼ of section 4 and the NW¼ of section 10, all within T. 17 N., R. 94 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301.

Harold G. Stinchcomb,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Bureau of Reclamation

Sioux Falls Unit, South Dakota

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for Sioux Falls Unit, South Dakota. This statement (INT DES 79-49,

dated July 30, 1979) was made available to the public on July 30, 1979.

The draft environmental statement covers impacts of constructing a reservoir on Slip Up Creek near the city of Sioux Falls, and associated pumping plans and pipelines for municipal water, recreation, and fish and wildlife development.

A public hearing will be held in Sioux Falls, South Dakota, at the Howard Johnson Motor Lodge on September 27 at 9:30 to 12:30 a.m., 2 to 5 p.m. and 7 p.m. until all presentations have been made, to receive views and comments from interested organizations or individuals relating to the environmental impacts of this project. Oral statements at the hearing will be limited to a period of 15 minutes. Speakers will not be allowed to trade their time to obtain a longer oral presentation; however, the person authorized to conduct the hearing may allow any speaker to provide additional oral comment after all persons wishing to make comment have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request, whenever possible, and any scheduled speaker not present when called will lose his or her privilege in the scheduled order and his name will be recalled at the end of the scheduled speakers. Requests for scheduled presentation will be accepted up to 4 p.m. on September 25, and any subsequent requests will be handled on a first-come, first-served basis following the scheduled presentation.

Organizations or individuals desiring to present their statement at the hearing should contact the Project Manager, Missouri-Oahe Projects Office, Bureau of Reclamation, P.O. Box 825, 450 Dakota Avenue South, Huron, South Dakota 57350, telephone (605) 352-8651, extension 242, and announce their intention to participate. Written comments from those unable to attend, and from those wishing to supplement their oral presentation at the hearing should be sent on or before October 2, 1979, so that they can be included in the hearing record.

Dated: August 16, 1979.

Clifford I. Barrett,

Acting Commissioner.

Issuance of Permit for Marine Mammals and Endangered Species

On June 15, 1979, a Notice was published in the Federal Register (44 FR 34649), that an application has been filed with the Fish and Wildlife Service by Donald B. Siniiff and John R. Tester, University of Minnesota, Minneapolis, Minnesota 55455, for a permit to conduct research on sea otters (*Enhydra lutris*) in Alaska and California.

Notice is hereby given that on August 6, 1979, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Fish and Wildlife Service issued a permit PRT 2-4114, to capture 20 sea otters in California and 300 in Alaska, attach telemetry devices and/or tags to the animals, collect blood samples and conduct other experiments as described in the application, subject to certain conditions set forth in the permit.

The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Room 601, 1000 N. Glebe Road, Arlington, Virginia.

Dated: August 14, 1979.

DEPARTMENT OF JUSTICE

Consent Judgment in Clean Air Act Enforcement Action

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States of America v. The Connecticut Charcoal Company* has been lodged with the United States District Court for the District of Connecticut. The decree requires that Connecticut Charcoal design and place into operation pollution abatement facilities to bring it beehive reduction kilns into compliance with the Connecticut air pollution regulations for particular matter and fugitive dust. The company has also agreed to pay to the United States a twelve thousand dollar civil penalty.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent judgment. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. Connecticut Charcoal Company*, D.J. Ref. 90-5-2-1-169.

The proposed consent decree may be examined at the office of the United States Attorney, 722 U.S.P.O. and Courthouse, 5th & Walnut Streets, Cincinnati, Ohio 45202, at the Region V office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Pollution Control Section, Land and Natural Resources Division, Department of Justice (Room 2625), Ninth Street and Pennsylvania Avenue, NW, Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division, Department of Justice.

James W. Moorman,
Assistant Attorney General, Land and
Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Mine Safety and Health Administration
[Docket No. M-79-18-M]Cotter Corp.; Petition for Modification
of Application of Mandatory Safety
Standard

Cotter Corporation, 8305 West

Alameda Parkway, Suite 201, Lakewood, Colorado 80226 has filed a petition to modify the application of 30 CFR 57.11-55 (emergency hoisting facilities) to its SM 18, CJP 21, CFR 7 and CJD 9 Mines located in Nucla, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. As an alternative to locating an emergency hoisting facility at each of the above mines, the petitioner proposes to maintain a portable, truck-mounted emergency hoisting unit.
2. The truck-mounted unit will include a hoist, headframe and capsule.
3. Each of the affected mines is within a 25 mile radius of Nucla, Colorado where the emergency hoisting unit will be located. Travel time to any mine within the radius would be about one hour.
4. The petitioner also proposes to install refuge stations adjacent to the bottom of the mines' ventilation raises which are designated as escapeways to be served by the portable hoisting unit. These refuge stations will provide a safe place for personnel to assemble.
5. The petitioner believes that its alternative will achieve no less protection for its personnel than that provided by the standard as well as providing the following advantages:
 - (a) The portable hoisting unit will be of superior quality to fixed hoists as it will not be subjected to weather and other natural hazards which affect readiness.
 - (b) The central location of the portable hoisting unit allows for its maintenance and operation to be handled by personnel well familiar with them.
 - (c) The portable hoisting unit is adaptable to use in ventilation raises not normally designated, but capable of being used, as escapeways.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 24, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 15, 1979.

Harlan-Cumberland Coal Co.; Petition
for Modification of Application of
Mandatory Safety Standard

Harlan-Cumberland Coal Company, Grays Knob, Kentucky 40829 has filed a petition to modify the application of 30 CFR 75.1910 (canopies) to its No. 2 Mine located in Harlan County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The petition concerns the installation of cabs or canopies on two shuttle cars in the petitioner's mine.
2. The petitioner believes that cabs or canopies on its shuttle cars would result in a diminution of safety for the following reasons:
 - (a) Cabs or canopies would restrict the operator's field of vision, possibly resulting in injuries to persons working in the face area.
 - (b) Cabs or canopies could catch and tear loose roof bolts, damaging the roof support.
3. For these reasons, the petitioner requests relief from the application of the standard to its shuttle cars.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 24, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 17, 1979.

Robert B. Lagather,
Assistant Secretary for Mine Safety and
Health.

BILLING CODE 4510-43-M

[Docket No. M-79-23-M]

Hecla Mining Co.; Petition for
Modification of Application of
Mandatory Safety Standard

Hecla Mining Company, Post Office Box 320, Wallace, Idaho 83837 has filed a petition to modify the application of 30 CFR 57.19-71 (hoisting procedures) to its Lucky Friday Mine and Star Mine located in Shoshone County, Idaho. The petition is filed under section 101(c) of

the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The standard prohibits miners from riding in skips or buckets with materials, supplies or tools.
2. During shaft sinking at the petitioner's mines, blasting at the bottom of the shafts could destroy timbers installed at the bottom of the shaft.
3. Accordingly, shaft guides are not generally installed all the way to the bottom of the shaft during construction, making it necessary for workers to guide the hoisting bucket onto chairs and thus onto the shaft guides.
4. If this procedure were not followed, the bucket could swing into loose rock and turn over, spilling loose supplies onto workers at the bottom of the shaft.
5. The petitioner requests permission for its workers to ride in skips or buckets with supplies, materials or tools during shaft sinking and shaft repair operations to prevent unattended materials from falling down the shaft on top of workers below.
6. As part of its alternative method, the petitioner proposes the following: (a) Supplies, materials and tools will be securely fastened during transit.
(b) Two miners will ride in the skip or bucket at all times when such items are hoisted.
(c) A special signal will be given to alert the hoistman that such items are being so hoisted.
7. The petition further details hoisting procedures for specific items of material, supplies and tools.
8. The petitioner believes that its alternative method will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 24, 1979. [Docket No. M-79-99-C]

Rushton Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Rushton Mining Company, Post Office Drawer 589, Philipsburg, Pennsylvania 16868 has filed a petition to modify the application of 30 CFR 75.1405 (automatic couplers) to its Rushton Mine located in Centre County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. In September 1976, the petitioner received a favorable decision on its proposal (Docket No. M-74-106) to couple and uncouple its off-track haulage equipment with a levered-pin system. This system eliminates the necessity of miners passing between cars or manually directing the coupling of a link and pin coupling assembly.
2. With its present petition, the petitioner requests modification of stipulations in the 1976 decision and order. The petitioner requests permission to use a second hole in its supply car bumper for off-track coupling. This second hole provides for greater maneuverability in hauling.
3. In addition, by pinning the second hole during off-track coupling, the operator does not have to go between equipment nor leave his position to set the levered-pin normally used for on-track coupling.
4. The use of the second hole for on-track haulage will be prohibited.
5. The petitioner believes that its alternative will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Spring Branch Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Spring Branch Coal Company, Beisden, Wyoming County, West Virginia has filed a petition to modify the application of 30 CFR 75.1710-1 (canopies) to its Millam Fork No. 1 Mine located in Wyoming County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The petition concerns the use of cabs or canopies on electric face equipment in the petitioner's mine.
2. The coal seam the petitioner is mining varies from 40 to 48 inches in height.
3. The petitioner believes that the application of the standard to its mine will result in a diminution of safety. Due to numerous undulations in the coal seam, cabs or canopies would catch on the roof of the mine.
4. For this reason, the petitioner requests relief from the application of the standard to its mine.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 24, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Westmoreland Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Westmoreland Coal Company, Big Stone Gap, Virginia 24219 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations) to its Prescott No. 2 Mine located in Wise County, Virginia. The petition is filed under section 101(c) of the Federal Mine

Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. Due to adverse roof conditions, the petitioner is unable to travel a specified return airway at its mine.
2. The return air from the airway is coursed directly to the outside of the mine and is not used for any additional ventilation requirements.
3. As an alternative to making weekly examinations for hazardous conditions in the return airway, the petitioner proposes to establish two checkpoints to determine the quantity and quality of the return air.
4. The petitioner believes that its alternative will achieve no less protection for its miners than that provided by the standard.

[TA-W-5590-5592]

Avondale Mills; Notice of Negative Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of investigations regarding certifications of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigations were initiated on June 18, 1979 in response to worker petitions received on June 12, 1979 which were filed on behalf of workers and former workers producing cotton yarn at the Eufaula, Alabama and Ozark, Alabama plants and dyed cotton and acrylic yarn at the Tifton, Georgia plant of Avondale Mills. In the following determination, without regard to

whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of customers purchasing yarn from the Eufaula, Alabama, Ozark, Alabama and Tifton, Georgia plants of Avondale Mills. The survey revealed that none of the responding customers with decreased purchases of yarn from the plants had increased their purchases of imported yarn.

Conclusion

After careful review, I determine that all workers of the Eufaula, Alabama, Ozark, Alabama and Tifton, Georgia plants of Avondale Mills are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 16th day of August 1979.

C. Michael Abo,
Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5551, 5552]

Bata Shoe Co., Inc.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 12, 1979 in response to a worker petition received on June 7, 1979 which was filed on behalf of workers and former workers producing rubber canvas and vinyl footwear for men, women, and children at the Belcamp, Maryland and Elkins, West Virginia facilities of Bata Shoe Company, Incorporated. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Average employment of hourly workers at the Belcamp facility of Bata Shoe Company increased in 1977 and in 1978 compared to the preceding year and remained stable in the January-May 1979 period compared to the same period of 1978. Average employment of hourly workers at the Elkins plant increased in 1978 compared to 1977 and in the January-May 1979 period compared to the same period of 1978. Workers who were on lay-off status in June 1979 at the Elkins plant are being recalled in August, 1979.

The Belcamp and Elkins plants of Bata Shoe Company form an integrated production unit. Production of finished pairs of rubber canvas and vinyl footwear at the Belcamp and the Elkins plants increased in 1978 compared to 1977 and increased in the first five months of 1979 compared to the corresponding period of 1978.

Conclusion

After careful review, I determine that all workers of the Belcamp, Maryland and Elkins, West Virginia facilities of the Bata Shoe Company, Incorporated are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of August 1979.

James F. Taylor,
Director, Office of Management, Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5575]

Bernardi Fashions, Inc.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on June 15, 1979 in response to a worker

petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Bernardi Fashions, Jersey City, New Jersey. The investigation revealed that the correct corporate title is Bernardi Fashions, Incorporated. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Bernardi began producing ladies' winter coats in July 1977. Employment at Bernardi increased in July-December 1978 compared to July-December 1977. Production increased from quarter to quarter throughout 1978 and 1979, with the exception of a seasonal decline in the first quarter of each year.

Coat manufacturers for whom Bernardi performed contract work were surveyed. Manufacturers who reduced orders with Bernardi in January-June 1979 compared to January-June 1978 did not purchase imported ladies' coats nor did they utilize foreign contractors. These manufacturers did not experience declining sales during the comparable time period.

Conclusion

After careful review, I determine that all workers of Bernardi Fashions, Incorporated, Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5561]

Comfort Products Co.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility

requirements of section 222 of the Act must be met.

The investigation was initiated on June 14, 1979, in response to a worker petition received on June 1, 1979, which was filed on behalf of workers and former workers producing men's, women's and children's house slippers at Comfort Products Company, Worcester, Massachusetts. The investigation revealed that the plant produces primarily men's, women's and children's house slippers. It is concluded that all of the requirements have been met.

U.S. imports of vinyl slide casual shoes which are included the house slippers category have increased absolutely in 1978 and continued to rise in 1979.

A Departmental survey of the customers of Comfort Products Company revealed that customers accounting for a significant proportion of the subject firms sales decreased their purchases of men's and women's slippers and increased their purchases of casual shoes "Browsabouts" type which are directly competitive with domestically produced slippers. This is consistent with the Trade and Industry analysis which reported increases of the competitive vinyl slide casual shoe in 1978 and which has continued to rise in 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's, men's and children's house slippers produced at Comfort Products Company, Worcester, Massachusetts contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Comfort Products Company, Worcester, Massachusetts who became totally or partially separated from employment on or after October 14, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 13th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

The Finney Co.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on July 20, 1979 in response to a worker petition received on July 12, 1979 which was filed on behalf of workers and former workers producing outdoor television (TV) antennas at the Clinton, Kentucky plant of The Finney Company D.B.A. Finney Manufacturing Company. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation revealed that the Clinton, Kentucky plant of The Finney Company produces only outdoor TV antennas. U.S. imports of outdoor TV antennas are negligible.

Conclusion

After careful review, I determine that all workers at the Clinton, Kentucky plant of The Finney Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning

Gant, Inc.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on June 28, 1979 in response to a worker petition received on June 18, 1979 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of workers and former workers producing men's shirts and women's blouses and sportswear at the New Haven, Connecticut plant of Gant Incorporated. The investigation was expanded to include workers and former workers producing men's shirts and women's blouses at the San Antonio, Texas (TA-W-5650-A) and Salisbury, Maryland (TA-W-5650-B) plants of Gant, Incorporated. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' woven dress and sport shirts increased from 1977 to 1978 and rose in the first quarter of 1979 compared to the first quarter of 1978. U.S. imports of men's and boys' knit dress and sport shirts, excluding T-shirts, increased from 1977 to 1978. U.S. imports of women's, misses' and children's blouses and shirts increased from 1977 to 1978.

Company imports by Gant, Inc. of men's and boys' shirts and apparel increased from 1977 to 1978. A Department survey revealed that surveyed customers reduced purchases from Gant, Inc. and increased purchases imports in the first half of 1979 compared to the first half of 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's shirts and women's blouses produced at Gant, Incorporated contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Gant, Incorporated, New

Haven, Connecticut who became totally or partially separated from employment on or after September 28, 1978; all workers of Gant, Incorporated, San Antonio, Texas who became totally or partially separated from employment on or after November 7, 1978; and all workers of Gant, Incorporated, Salisbury, Maryland who became totally or partially separated from employment on or after June 14, 1978 and on or before June 30, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

Genoa Fashions, Inc.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 15, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Genoa, Hoboken, New Jersey. The investigation revealed that the company's full name is Genoa Fashions, Incorporated. It is concluded that all of the requirements have been met.

Imports of women's, misses', and children's coats and jackets increased absolutely and relative to domestic production in 1977 compared with 1976 and in 1978 compared with 1977.

Genoa Fashions began producing ladies' coats in March, 1978. A Department survey revealed that a coat manufacturer providing Genoa Fashions with most of its contract work decreased orders with Genoa in the second quarter of 1979 compared with the like period in the previous year. This manufacturer reported decreasing orders with other domestic contractors in 1978 compared with 1977 and in the

first six months of 1979 compared with the first six months of 1978. The manufacturer further indicated increased orders with foreign contractors and increased purchases of imports in 1978 compared with 1977 and during January-June 1979 compared with January-June 1978. In the future, the coat manufacturer expects to increase its purchases of imported coats.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' coats produced at Genoa Fashions, Incorporated, Hoboken, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Genoa Fashions, Incorporated, Hoboken, New Jersey who became totally or partially separated from employment on or after October 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 14th day of August 1979.

C. Michael Abo,
Director, Office of Foreign Economic
Research.

[TA-W-5707]

Georgia Pacific Corp.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on July 2, 1979 which was filed by the International Woodworkers Union on behalf of workers and former workers producing sanded Douglas fir plywood at Georgia Pacific Corporation, Coos Bay Division, Coos Bay, Oregon.

The investigation revealed that the complete name of the plant referred to in the petition is the Georgia Pacific Corporation, Coos Bay Division, Douglas fir plywood plant. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation indicated that imports of softwood plywood, compared to domestic production, are negligible. The ratio of imports to domestic production was less than 0.2 percent from 1975 through 1978. U.S. imports of softwood plywood decreased absolutely and relative to domestic production in the first three months of 1979 compared to the same period in 1978.

The petition alleges that increasing exports of logs from the U.S. have led to a shortage of raw logs available to the mill for processing into finished plywood. However, the export of logs cannot be considered to have adversely affected the domestic production of plywood within the meaning of Section 222(3) of the Trade Act of 1974.

Conclusion

After careful review, I determine that all workers of Georgia Pacific Corporation, Coos Bay Division, Douglas fir plywood plant, Coos Bay, Oregon are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration, and Planning.

[TA-W-5408]

Gold Seal Garter Corp.; Notice of Affirmative Determination Regarding Application for Reconsideration

On July 10, 1979, an official of the Undergarment and Negligee Workers Union requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance in the case of workers and former workers of Gold Seal Garter Corporation, New York City, New York. This

determination was published in the Federal Register on June 29, 1979, (44 FR 38014).

In issuing the negative determination, the Department cited increasing sales in 1978 relative to 1977 as supporting the conclusion that increased imports of articles like or directly competitive with articles produced by the workers' firm had not contributed importantly to the separation of workers at the firm. The petitioning union attributes the increase in 1978 firm sales to the addition of an article to the firm's product line whose manufacture was contracted out to another domestic firm. Further, the petitioner states that, in 1978 at least one major customer substituted imported articles for those formerly purchased from the workers' firm thus necessitating a reduction in the firm's work force.

Conclusion

After review of the application, I conclude that this claim of the petitioner is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted. Signed at Washington, D.C., this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

[TA-W-5630, 5642, 5643 and 5643A]

Harwood Cos. Inc.; Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979, in response to worker petitions received on June 18, 1979, which were filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing men's underwear and shorts at Adele Manufacturing Corporation, Phillip Manufacturing Company and Rio Grande Manufacturing Corporation, Rio Grande, Puerto Rico. The investigation revealed that Adele Manufacturing

Corporation and Phillip Manufacturing Company produce men's and boys' undershorts and that Rio Grande Manufacturing Corporation produces men's and boys' undershorts and athletic shorts. The investigation also revealed that all of the subject firms are subsidiaries of Harwood Companies, Incorporated.

The investigation was expanded to include workers producing undershorts at the Abingdon, Virginia plant of the Marion-Harwood Manufacturing Company, which is also a subsidiary of the Harwood Companies, Incorporated. In the following determination, without regard to whether any of the other criteria have been met for workers producing undershorts at Rio Grande Manufacturing Corporation, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The decline in production of athletic shorts at Rio Grande Manufacturing Corporation was due to the seasonal pattern of sales and production for this product. Retail sales peak in the spring. Production correspondingly peaks in late fall and early winter. The Harwood Manufacturing Company Division of the Harwood Companies, Incorporated reduced production of athletic shorts at its Rio Grande Manufacturing Corporation and other Division locations in spring 1979 in response to this seasonal pattern.

The Division began producing athletic shorts in November 1977. Division sales of the product increased in the first half of 1979 compared with the first half of 1978. The Division does not import athletic shorts.

For all workers of Adele Manufacturing Corporation and Phillip Manufacturing Company, and for workers producing men's and boys' undershorts at Rio Grande Manufacturing Corporation and the Abingdon, Virginia plant of Marion-Harwood Manufacturing Company, all of the criteria have been met.

U.S. imports of men's and boys' underwear increased in 1978 compared with 1977.

The Harwood Manufacturing Company Division began importing men's and boys' undershorts in December 1978. These imports constituted a significant proportion of the Division's sales of undershorts in the first five months of 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the men's and boys' undershorts produced at Adele Manufacturing Corporation, Phillip Manufacturing Company and Rio Grande Manufacturing Corporation, Rio Grande, Puerto Rico and at the Abingdon, Virginia plant of Marion-Harwood Manufacturing Company contributed importantly to the decline in

sales of production and to the total or partial separation of workers of those firms. In accordance with the provisions of the Act, I make the following certification:

The specified groups of workers at the following plants of the companies in the Harwood Manufacturing Company Division of the Harwood Companies, Incorporated who became totally or partially separated from employment on or after November 18, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Company	Plant location	Workers certified
Adele Manufacturing Corporation	Rio Grande, Puerto Rico	All workers.
Phillip Manufacturing Company	Rio Grande, Puerto Rico	All workers.
Rio Grande Manufacturing Corporation	Rio Grande, Puerto Rico	Workers producing undershorts.
Marion-Harwood Manufacturing Corporation	Abingdon, Virginia	Workers producing undershorts.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management, Administration and Planning.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a)

of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 4, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 4, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC this 17th day of August 1979.

Harold A. Brett,

Acting Director, Office of Trade Adjustment Assistance.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or

subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 4, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 4, 1979.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, DC 20210.

Signed at Washington, DC this 20th day of August 1979.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

J & M Fashions, Inc.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at J and M, Union City, New Jersey. The investigation revealed that the correct name of the company is J & M Fashions, Incorporated. In the following determination, without regard to whether any of the criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or

threat thereof, and to the absolute decline in sales or production.

The value of J & M Fashion's sales increased in 1978 compared to 1977. A survey of the manufacturers for whom J & M performed contracts in 1977, 1978 and the first half of 1979 was conducted. None of the manufacturers reduced orders with J & M from 1977 to 1978. Manufacturers that decreased purchases from J & M did not increase purchases of imported ladies' coats or experience decreasing sales in the first half of 1979 compared to the same period in 1978.

Conclusion

After careful review, I determine that all workers of J & M Fashions, Incorporated, Union City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

J. Z. Coat Co.; Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding

certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 27, 1979 in response to a worker petition received on June 21, 1979 which was filed June 5, 1979 on behalf of workers and former workers producing ladies' coats at J. Z. Coat Company, Jersey City, New Jersey. The investigation revealed that the plant primarily produces ladies' coats, jackets and suit jackets. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed in the Department's investigation revealed that the decline in production and employment at J. Z. Coat Company in December 1978 and in the first four months of 1979 can be attributed to the seasonal patterns characteristic to the women's coat industry.

Production at J. Z. Coat Company increased in 1978 compared to 1977 and during the first six months of 1979 compared to the same period in 1978.

Employment of workers at J. Z. Coat Company increased substantially during the first six months of 1979 compared to the same period in 1978.

Conclusion

After careful review, I determine that all workers of J. Z. Coat Company, Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 20th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

Lancer of California; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 5, 1979 in response to a worker petition received on June 29, 1979 which was filed on behalf of workers and former workers producing men's jeans, jackets, pants and shirts at the Los Angeles, California facility of Lancer of California. The investigation revealed that the plant primarily produces men's knit and woven shirts. It is concluded that all of the requirements have been met.

Imports of men's and boys' woven and knit sport, dress, business and uniform shirts increased absolutely in 1978 compared to 1977. Imports of men's and boys' woven dress, business, sport and uniform shirts continued to increase absolutely in the first quarter of 1979 compared to the like 1978 period.

The percentage of total company sales of shirts accounted for by company imports increased in the first half of 1979 compared to the like 1978 period. The company terminated all domestic production of men's shirts in April 1979. Several former customers of men's shirts domestically produced by Lancer reported in a survey conducted by the Department that they had increased purchases of imported shirts in 1978

compared to 1977 and/or in the first half of 1979 compared to the like 1978 period.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the men's shirts produced at Lancer of California in Los Angeles, California contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Lancer of California in Los Angeles, California engaged in employment related to the production of men's shirts who became totally or partially separated from employment on or after December 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

L. B. Evans' Son Co., Wakefield, Mass.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 14, 1979, in response to a worker petition received on June 11, 1979, which was filed on behalf of workers and former workers producing slippers and shoes at L. B. Evans' Son Company, Wakefield, Massachusetts. The investigation revealed that the plant produces primarily men's slippers and shoes. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of house slippers decreased absolutely and relative to domestic production in 1978 compared to 1977 and in the January through March period of 1979 compared to the same period of 1978. U.S. imports of men's dress and casual footwear, except athletic, decreased absolutely in 1978 compared to 1977 and decreased absolutely and relative to domestic production in the January through March period of 1979 compared to the same period of 1978.

In a Department survey, customers of L. B. Evans' Son Company who decreased purchases from the subject firm and increased imports of men's slippers and shoes represented an insignificant proportion of the firm's decline in sales.

Conclusion

After careful review, I determine that all workers of L. B. Evans' Son Company, Wakefield, Massachusetts are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 13th day of August 1979.

M.C.M. Coat Co., Inc., Hoboken, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 15, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at M.C.M., Hoboken, New Jersey. The investigation revealed that the correct corporate title is M.C.M. Coat Company, Incorporated. Without regard to whether any of the other criteria have been met, the following criterion had not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Manufacturers for whom M.C.M. Coat Company did contract work reported that, during the period under investigation they either increased contract work with M.C.M. or decreased their reliance upon foreign sources for ladies' coats while decreasing purchases of ladies' coats from M.C.M.

Conclusion

After careful review, I determine that all workers of M.C.M., Coat Company, Incorporated, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

Metaltex, Inc., Bayonne, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on May 29, 1979 in response to a worker petition received on May 22, 1979 which was filed on behalf of workers and former workers producing make-up mirrors and bathroom accessories at Metaltex Inc., Bayonne, New Jersey. The investigation revealed that Metaltex also produced dresser sets (sets of brushes, combs and mirrors). Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Average annual employment by Metaltex Inc. remained the same in 1978 from 1977. Total sales of domestically manufactured products by Metaltex increased in 1978 from 1977. Sales by Metaltex in the first five months of 1979 consisted primarily of bathroom accessories. Sales of bathroom accessories by Metaltex increased during January-May 1979 compared to January-May 1978.

Conclusion

After careful review, I determine that all workers of Metaltex Inc., Bayonne, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

Modern Coat Co., Union City, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Modern, Union City, New Jersey. The investigation revealed that the company's name is the Modern Coat Company. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Department survey of the manufacturer for whom the Modern

Coat Company performs contract work revealed that manufacturer's business with Modern remained constant from 1977 to 1978 and decreased insignificantly in the first six months of 1979 compared to the first six months of 1978. While the manufacturer's business with foreign suppliers showed no change in the first six months of 1979 compared to the first six months of 1978, its business with other domestic suppliers increased substantially during that period.

Conclusion

After careful review, I determine that all workers of the Modern Coat Company, Union City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 16th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

[TA-W-5624]

National Mines Corp., Pocahontas Division, Wyoming County, W. Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 19, 1979 in response to a worker petition received on June 12, 1979 which was filed by the United Mine Workers of America on behalf of workers and former workers mining coal at the Pocahontas Division, Wyoming County, West Virginia of the National Mines Corporation. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

The Pocahontas Division of the National Mines Corporation did not produce or sell any coal in the first quarter of 1978 because of the strike by the United Mine Workers of America.

Sales of coal by the Pocahontas Division increased in the second, third, and fourth quarters of 1978 compared to the same quarters in 1977 and increased during April through July 1979 compared to April through July 1978.

The Pocahontas Division sells all of its coal to a single domestic steel producer. This steel producer significantly increased purchases of domestic coke in 1978 compared to 1977 and in the first half of 1979 compared to the first half of 1978.

Conclusion

After careful review, I determine that all workers of the National Mines Corporation, Pocahontas Division, Wyoming County, West Virginia are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1979.

James F. Taylor,

Director, Office of Management, Administration and Planning.

Nickoletta, Jersey City, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July 18, 1979 in response to a worker petition received on July 12, 1979 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing ladies coats at Nickoletta, Jersey City, New Jersey. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation indicated that declines in business and employment levels at Nickoletta in late 1978 and 1979 were the result of seasonal fluctuations.

Nickoletta began to perform contract work for manufacturers in April 1978, the start of the production season for the 1978 fall sales season. Quarterly declines in business and employment levels in late 1978 and early 1979 are attributable to seasonal fluctuations in the industry. Business and employment levels in the second quarter of 1978 represent the start of the production season for the 1979 fall sales season. A partial quarter comparison of production in May-June 1978 and May-June 1979 shows an increase in the quantity and the value of coats produced at Nickoletta in the 1979 period.

Conclusion

After careful review, I determine that all workers of Nickoletta, Jersey City, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 16th day of August 1979.

C. Michael Aho,

Director, Office of Foreign Economic Research.

Park Fashions, Inc., Hoboken, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Park Fashions, Hoboken, New Jersey. The investigation revealed that the correct name of the company is Park Fashions, Incorporated. In the following determination, without regard to whether any of the other criteria have

been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A survey of the only manufacturer for whom Park Fashions worked in 1978 and 1979 was conducted. This manufacturer increased the value of its total domestic contracts for ladies' coats and sales in 1979 compared to 1978.

Conclusion

After careful review, I determine that all workers of Park Fashions, Incorporated, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

BILLING CODE 4510-28-M

[TA-W-5525]

Phelps Dodge Puerto Rico Corp., Carolina, P.R.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 7, 1979 in response to a worker petition received on June 1, 1979 which was filed by the Teamsters on behalf of workers and former workers producing telephone and high voltage cable at the Carolina, Puerto Rico plant of the Phelps Dodge Corporation. The investigation revealed that the plant primarily produces building wire and that the correct name of the petitioner's firm is the Phelps Dodge Puerto Rico Corporation. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced

by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation revealed that customers which decreased purchases from the Phelps Dodge Puerto Rico Corporation and increased purchases of imported wire and cable represented an insignificant proportion of the firm's total sales.

The Office of Trade Adjustment Assistance conducted a survey of some of the customers of cable and wire of the Phelps Dodge Puerto Rico Corporation. Only one of the customers reported purchases of imported cable and wire in 1977 or 1978 and that customer accounted for an insignificant percentage of the firm's total 1978 sales. None of the respondents stated that the availability of imported wire and cable had affected their purchases from domestic sources.

Production and sales of the Phelps Dodge Puerto Rico Corporation increased from 1977 to 1978. Evidence indicates that the plant was closed in December 1978 because of a low projected demand for the products as a result of the declining level of capital construction in Puerto Rico. The demand for high voltage cable, communications cable and building wire is dependent upon the level of capital construction in the producer's market area. Because of transportation costs, it was not feasible to produce in Puerto Rico for markets on the U.S. mainland.

The ratio of imports of power wire and cable to domestic production in terms of value was 6.8 percent in 1978. Imports of power wire and cable into Puerto Rico declined marginally from 1977 to 1978. The ratio of imports of communication wire and cable, building wire, appliance wire and cordage to total domestic production was 2.5 percent in 1978. Additionally, the U.S. has a positive balance of trade in both of the above categories.

Conclusion

After careful review, I determine that all workers of the Phelps Dodge Puerto Rico Corporation in Carolina, Puerto Rico are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,

Director, Office of Management,
Administration and Planning.

Poughkeepsie Finishing Corp., Paterson, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 19, 1979 in response to a worker petition received on May 28, 1979 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers dyeing fabric at the Paterson, New Jersey plant of Poughkeepsie Finishing Corporation. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A Departmental survey was conducted with the converters for whom the Paterson, New Jersey plant of Poughkeepsie Finishing Corporation dyed fabric. The survey revealed that converters, accounting for a significant portion of the Paterson plant's total sales, did not purchase imported dyed fabric or employ foreign dyers during the 1976-June 1979 period.

Conclusion

After careful review, I determine that all workers of the Paterson, New Jersey plant of Poughkeepsie Finishing Corporation are denied eligibility to

apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of August 1979.

James F. Taylor,

Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5571]

Roanoke Fashions Co., Chilhowie, Va.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 14, 1979 in response to a worker petition received on June 11, 1979 which was filed on behalf of workers and former workers producing beach jackets, jogger shorts, "T" shirts, sweat shirts and girls' rompers at the Chilhowie, Virginia plant of Roanoke Fashions Company, Roanoke, Virginia. Roanoke Fashions Company is a subsidiary of Tultex Corporation. The investigation revealed that the plant produces men's and ladies' fleece-knit jackets, sport shirts, tops, turtlenecks, sweatshirt-look coverups, shorts, warm-up suits and ladies' rompers. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Chilhowie plant of Roanoke Fashions Company produced fleece-knit jackets on a contractual basis from May, 1977 through December, 1978. The plant produced the Roanoke Fashions product line of tops and shorts from June, 1978 through the present.

The Chilhowie plant of Roanoke Fashions Company produced fleece-knit

jackets on a contractual basis for one manufacturer. A Departmental survey revealed that this manufacturer did not employ any foreign contractors nor purchase imported fleece-knit jackets in 1977, 1978 or 1979. The Department of Labor then conducted a survey of the major retail customers purchasing fleece-knit jackets from the manufacturer. This survey revealed that the majority of customers did not import fleece-knit jackets. Those surveyed customers who purchased imported fleece-knit jackets increased their purchases from the manufacturer in the January through June period of 1979 compared to the same period in 1978.

With respect to the production of the Roanoke Fashions product line of tops and shorts at the Chilhowie plant, evidence revealed that the Chilhowie plant was producing this product line for less than one year at the time of the investigation. The Chilhowie plant began production of the Roanoke Fashions line of tops and shorts in July 1978. Production increased in both quantity and value in the fourth quarter of 1978 and in the first quarter of 1979 compared to the preceding quarter. Production declined in quantity, but increased in value in the second quarter of 1979 compared to the first quarter of 1979. Due to the short length of time that the new product line was in operation at Chilhowie, it is not possible to statistically measure the impact of imports or the effects of seasonality on this product line.

Conclusion

After careful review, I determine that all workers of the Chilhowie, Virginia plant of Roanoke Fashions Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 13th day of August 1979.

James F. Taylor,

Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W- 4921, 4921A, and 4921B]

J. Schoeneman Co., Winchester, Va., Wilmington, Del., and Chambersburg, Pa.; Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to apply for Worker Adjustment Assistance on May 11, 1979, applicable to all workers of the

Winchester, Virginia; Wilmington, Delaware and Chambersburg, Pennsylvania plants of J. Schoeneman, Incorporated. The Notice of Certification was published in the Federal Register on May 25, 1979, (44 FR 30490).

On the basis of additional information, the Office of Trade Adjustment Assistance, on its own motion, reviewed the certification. The review of the case revealed that, in addition to the three previously certified plants, J. Schoeneman's warehouse and administrative facility in Owings Mills, Maryland is an integral part of the company's production process for the manufacture of men's suits and sportcoats.

The intent of the certification is to cover all workers who were affected by the decline in production and sales of men's suits and sportcoats at J. Schoeneman, Incorporated, related to import competition. The certification, therefore, is revised to include all workers of the company's warehouse and administrative facility at Owings Mills, Maryland.

The revised certification applicable to TA-W-4921, 4921A and 4921B is hereby issued as follows:

All workers of the Winchester, Virginia; Wilmington, Delaware and Chambersburg, Pennsylvania plants of J. Schoeneman, Incorporated, and the company's warehouse and administrative facility in Owings Mills, Maryland, who became totally or partially separated from employment on or after March 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,

Director, Office of Management,
Administration and Planning.

Singer Co., Elizabeth, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on July

10, 1979 in response to a worker petition received on July 5, 1979 which was filed by the International Union of Electrical Radio and Machine Workers on behalf of workers and former workers producing domestic and industrial sewing machines at the Elizabeth, New Jersey plant of the Singer Company. The investigation revealed that domestic and industrial sewing machine parts are also produced at the Elizabeth plant. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

Average employment of production workers at the Elizabeth plant increased from 1976 to 1977, from 1977 to 1978, and during the first five months of 1979 compared to the first five months of 1978. Average weekly hours worked per employee increased from 1976 to 1977, decreased slightly from 1977 to 1978, and increased during the first five months of 1979 compared to the first five months of 1978. There is no immediate threat of separation of workers at this plant.

Conclusion

After careful review, I determine that all workers of the Elizabeth, New Jersey plant of the Singer Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1979.

James F. Taylor,

Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5626]

Tucker Knits, Inc., Secaucus, N.J.; Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 19, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' knitted garments at Tucker Knits, Secaucus, New Jersey. The investigation revealed that the company name is Tucker Knits, Incorporated. Tucker Knits, Incorporated produces ladies' pantsuits. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Tucker Knits, Incorporated produces ladies' pantsuits. The Office of Trade Adjustment Assistance updated a survey with Tucker's major customers and with those who had reduced purchases from Tucker. The updated survey revealed that imported pantsuits were a significant proportion of only one respondent's total purchases. However, this customer represented an insignificant influence on Tucker's total sales for 1978. Most of the customers who decreased business with Tucker also decreased their purchases of pantsuits from other domestic sources and from foreign sources in 1978 versus 1977 or in the first quarter of 1979 compared to the same period of 1978.

Tucker Knits is the parent company of M. Jensen, Incorporated and Raoul, Incorporated and manages Just Mort, Incorporated. M. Jensen, Incorporated (TA-W-5711), Just Mort, Incorporated and Raoul, Incorporated (TA-W-5741) are currently the subjects of ongoing investigations. Determinations on these cases will be forthcoming.

Conclusion

After careful review, I determine that all workers of the Tucker Knits, Incorporated, Secaucus, New Jersey, engaged in employment related to the production of ladies' pantsuits are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5628]

Wall Tube & Metal Products Co., Newport, Tenn.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 19, 1979 in response to a worker petition received on June 15, 1979 which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel products, including bumpers and parts for pickups and utility trucks at Wall Tube and Metal Products Company, Newport, Tennessee. The investigation revealed that the petition was filed specifically on behalf of workers producing step bumpers. It is concluded that all of the requirements have been met.

Imports of step bumpers increased in 1979 from 1978.

Wall Tube and Metal Products Company lost a contract with a truck manufacturer for step bumpers for the 1980 model year. That contract represented the major portion of their step bumper production for the 1979 model year. The investigation revealed that the truck manufacturer has contracted with a foreign firm for step bumpers for the 1980 model year. Following the loss of this contract and the resulting decline in production, a large number of workers in the Automotive Division were separated in July 1979.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with step bumpers produced at Wall Tube and Metal Products Company, Newport, Tennessee contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Wall Tube and Metal Products Company, Newport, Tennessee, who are engaged in employment related to

the production of step bumpers who became totally or partially separated from employment on or after July 1, 1979 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

BILLING CODE 4510-28-M

[TA-W-5649]

Winer Manufacturing Co., Hammond, Ind.; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

The investigation was initiated on June 22, 1979 in response to a worker petition received on June 18, 1979 which was filed on behalf of workers and former workers producing grain leather coats, sheep skin coats, split cow coats, and wool coats at the Winer Manufacturing Company, Hammond, Indiana. It is concluded that all of the requirements have been met.

U.S. imports of leather coats and jackets increased absolutely and relative to domestic production in 1978 compared to 1977 and increased absolutely in the first quarter of 1979 compared to the first quarter of 1978. U.S. imports of men's and boys' outercoats and jackets increased absolutely and relative to domestic production during 1978 and 1977 before declining slightly in 1978.

Winer began importing leather outercoats in 1979 while reducing its production of leather outercoats. A Department survey revealed that surveyed customers increased purchases of imported cloth outercoats in the first half of 1979 compared to the first half of 1978 while decreasing purchases from Winer Manufacturing.

Conclusion

After careful review of the facts obtained in the investigation, I conclude

that increases of imports of articles like or directly competitive with men's leather and cloth outercoats produced at the Winer Manufacturing Company, Hammond, Indiana contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Winer Manufacturing Company, Hammond, Indiana who became totally or partially separated from employment on or after June 20, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1979.

James F. Taylor,
Director, Office of Management,
Administration and Planning.

NATIONAL SCIENCE FOUNDATION

Advisory Council, Meeting, Task Group #7

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Task Group No. 7 of the NSF Advisory Council.

Place: Room 523, National Science Foundation, 1800 G Street, NW, Washington, D.C. 20550.

Date: Tuesday, September 11, 1979.

Time: 9:00 a.m. until 5:00 p.m.

Type of Meeting: Open.

Contact Person: Mr. Bruce B. Darling, NSF Liaison, Task Group #7 of the NSF Advisory Council, National Science Foundation, Room 518, 1800 G Street, NW, Washington D.C. 20550, Telephone (202) 632-4384.

Purpose of task group: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Advisory Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

Summary minutes: May be obtained from the contact person at above stated address.

AGENDA: The Task Group is asked to study the effects on basic research of existing mechanisms for assuring technical, financial, and social accountability, and to recommend ways in which the balance between accountability, and to recommend ways in which the balance between accountability and effectiveness in research can be optimized.

Joyce F. Laplante,

Acting Committee Management Coordinator.

Dated: August 21, 1979.

Advisory Council, Steering Committee, Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting.

Name: Steering Committee of the NSF Advisory Council

Place: Room 523, National Science Foundation, 1800 G Street, NW, Washington, D.C. 20550

Date and Time: September 12, 1979—9:00 a.m. to 5:00 p.m.

Type of meeting: Open

Contact person: Mr. Bruce Darling, Executive Secretary, NSF Advisory Council, National Science Foundation, Room 518, 1800 G Street, NW, Washington, D.C. 20550. Telephone: (202) 632-4384.

Purpose of steering committee: The purpose of the Steering Committee, composed of members of the NSF Advisory Council, is to assist the Chairperson and Foundation staff in planning Council activity and related matters not requiring the formation of a separate task group.

Summary minutes: May be obtained from the contact person at above stated address.

Agenda: To review with cognizant NSF staff the issues being studied by the four task groups and other issues of general concern. Dated: August 21, 1979.

Joyce F. Laplante,

Acting Committee Management Coordinator.

BILLING CODE 7555-01-M

Advisory Committee for Ocean Sciences, Subcommittee for Ocean Sciences Research; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee for Ocean Sciences Research of the Advisory Committee for Ocean Sciences.

Date and Time: September 10-14, 1979, 9:00 a.m. to 5:00 p.m. each day.

Place: U.S. Naval Academy, Michelson Hall, Rm. 330, Annapolis, MD 21402.

Type of Meeting: Closed.

Contact person: Dr. M. Grant Gross, International Decade of Ocean Exploration section, Room 606, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-7356.

Purpose of Subcommittee: To provide the IDOE with additional expertise in the review and evaluation of large and intermediate-sized oceanographic research efforts related to Pacific Equatorial Ocean Dynamics (PEQUOD), Seasonal Equatorial Atlantic Experiment (SEQUAL), and Biology and Eastern Equatorial Dynamics (BEED) Projects.

Agenda: September 10-11: Pacific Equatorial Ocean Dynamics (PEQUOD) September 12: Seasonal Equatorial Atlantic Experiment (SEQUAL) September 13-14: Biology and Eastern Equatorial Dynamics (BEED).

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Joyce F. Laplante,

Acting Committee Management Coordinator.

BILLING CODE 7555-01-M

Advisory Committee Ocean Sciences, Subcommittee for Oversight and Evaluation; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee for Oversight and Evaluation of the Advisory Committee for Ocean Sciences.

Date and Time: September 10-14, 1979, 9:00 a.m. to 5:00 p.m. each day.

Place: Rooms 628 and 338, National Science Foundation, 1800 G St., N.W., Washington, D.C. 20550.

Type of Meeting: Closed.

Contact person: Dr. Dirk Frankenberg, Director, Division of Ocean Sciences, Rm. 609, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-5813.

Purpose of subcommittee: To provide expert assistance in carrying out external oversight which is concerned with the examination of decisions made, procedures and policies in effect and focuses on operations and activities, priorities, program balance, and selection of awards.

Agenda: September 10-12: Submarine Geology and Geophysics Review—Room 628; September 12-14: Physical Oceanography Review—Room 338.

Reason for Closing: The meeting will deal with a review of grants and declinations in which the Committee will review materials containing the names of applicant institutions and principal investigators and privileged information contained in declined proposals. This meeting will also include a review of peer review documentation pertaining to applicants. Any non-exempt material that may be discussed at this meeting (proposals that have been awarded) will be inextricably intertwined with the discussion of exempt materials and no further separation is practical. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b (c), the Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, July 6, 1979.

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 01/01-0297]

Hampshire Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an Application has been filed with the Small Business Administration, pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1979)), under the name of Hampshire Capital Corporation (Applicant) for a License to operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended (Act), and the Rules and Regulations promulgated thereunder.

The Applicant is incorporated under the laws of the State of New Hampshire and it will commence operations with a capitalization of at least \$500,000, which amount will be raised from the private sale of shares of Common Stock, \$1.00 Par Value, of the Applicant to a limited number of investors.

The Applicant will have its principal place of business at 48 Congress Street, Portsmouth, New Hampshire 03801 and it intends to conduct its operations primarily in the State of New Hampshire.

The Officers, Directors and present and prospective owners of ten or more percent of the Applicants' Common Stocks are:

Name, Address and Title or Relationship to Applicant

Philip G. Baker, Wild Rose Lane, New Castle, New Hampshire, President and Director and 10% Stockholder.
William A. Darling, Birch Knolls, Cape Elizabeth, Maine, Treasurer, and Chairman.
Charles L. Hildreth, Jr., 10 Falls Road, Falmouth, Maine, 10% Stockholder.
The Emery-Waterhouse Company, Rand Road, P.O. Box 659, Portland, Maine, 30% Stockholder.

In the event the private sale of the Applicants' Common Stock results in additional investors owning ten or more percent of such stock, their identity will be published in the Federal Register, and the newspaper mentioned below.

The Business Investment Advisory Corporation (Business), a newly formed corporation with its principal place of business located at 48 Congress Street, Portsmouth, New Hampshire, will be

employed as the Applicants' Investment Adviser/Manager. Philip G. Baker, listed above, is President, a Director and the owner of 82 percent of the voting securities of Business. The other Officers, Directors and owners of the balance of the voting securities of Business are:

Name, Address and Relationship

Harry F. Calamin, 320 Leslie Drive, Portsmouth, New Hampshire, Treasurer and Director.
Thomas E. Flynn, 2575 Ocean Blvd., Rye Beach, New Hampshire, Clerk and Director.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management including adequate profitability and financial soundness in accordance with the Act and SBA Regulations.

Notice is hereby given that any person may within, 15 days after the date of publication of this Notice, submit written comments on the Applicant to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published by the Applicant in a newspaper of general circulation in Portsmouth, New Hampshire.

(Catalogue of Federal Domestic Assistance Program No. 59.011 Small Business Investment Companies)

Dated: August 17, 1979.

Peter F. McNeish,
Acting Associate Administrator for Finance and Investment.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco, and Firearms

[Notice No. 79-5]

Advisory Committee on Explosives Tagging; Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. 1 section 10(a)(2)), notice is hereby given that a closed meeting of the Advisory Committee on Explosives Tagging will be held on September 20, 1979, at the Federal Building, 1200 Pennsylvania Avenue, NW, Washington, DC, room 5041, beginning at 9:30 a.m. (EDT).

The Advisory Committee will discuss detailed proprietary, scientific, and technical data concerning various candidate explosive tagging systems that can be used in the detection and identification of explosives. The information which will be presented and discussed during the meeting will constitute trade secrets and commercial or financial information obtained from a person and privileged or confidential within the ambit of 5 U.S.C. section 552b(c)(4). Accordingly, the meeting of the Advisory Committee will, under authority of section 10(d) of the Federal Advisory Committee Act (5 U.S.C. App. 1 section 10(d)), not be open to the public.

All communications regarding this meeting of the Advisory Committee should be addressed to the Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Attention: Mr. James K. Syverson, Committee Manager, room 5205.

Signed: August 7, 1979.

G. R. Dickerson,

Director.

BILLING CODE 4810-31-M

INTERSTATE COMMERCE COMMISSION

[MC 99532 (Sub-4)]

Arnie's Motor Freight, Inc. (Altoona, IA); Decision

Decided: August 13, 1979.

Applicant seeks a Certificate of Registration as evidence of the right to conduct operations in interstate and foreign commerce which do not exceed the scope of its intrastate authority. Applicant holds a State motor common carrier certificate issued by the Iowa Department of Transportation in No. C-130 dated May 29, 1979, which authorizes the operations in intrastate commerce reflected in the appendix to this decision. This certificate supersedes and revokes the prior State certificates on which applicant's Certificate of Registration in No. MC-99532 (Sub-Nos. 1, 2, and 3) issued February 1, 1971, November 22, 1972, and November 6, 1973, respectively, are based.

The authority granted, to a certain extent, exceeds the scope of the authority as published in the Federal Register. Because it is possible persons who have relied upon the notice of the application as published may have an interest in and would be prejudiced by the lack of proper notice of the authority described in the appendix to this decision, a notice of the authority

actually granted will be published in the Federal Register. Issuance of a Certificate of Registration in this proceeding will be withheld for a period of 30 days from the date of that publication. During that period any proper party in interest may file a petition for leave to intervene in this proceeding, setting forth in detail the precise manner in which it has been prejudiced.

While the application was opposed at the State level, no party in interest has filed a petition for reconsideration with this Commission.

We find: That provisions of 49 USC 10931 have been satisfied. This decision does not significantly affect the human environment.

It is ordered: Notice of the authority granted in this decision will be published in the Federal Register. In the event a petition for leave to intervene is filed, this decision shall be void. Otherwise, this decision shall become final on September 24, 1979.

The application is granted to the extent set forth in the appendix.

Operations may begin only following the service of a certificate of registration which will be issued if applicant complies with the following requirements set forth in the Code of Federal Regulations: insurance (49 CFR 1043), designation of process agent (49 CFR 1044), and tariffs (49 CFR 1311).

Applicant must comply with these requirements within 90 days after the date this decision becomes final, or the grant of authority will be void. The Certificate of Registration in No. MC-99532 (Sub-Nos. 1, 2, and 3) will be revoked concurrently with the issuance of the new one.

Note—This decision does not constitute authority to operate.

By the Commission, Review Board Number 4, Members FitzPatrick, Fisher, and Reed.
Agatha L. Mergenovich,
Secretary.

Appendix—No. MC 99532 (Sub-4).

Arnie's Motor Freight, Inc., Altoona, IA

Description of the transportation service authorized to be conducted solely within the State of Iowa, in intrastate commerce, as a common carrier by motor vehicle, pursuant to Certificate of Public Convenience and Necessity No. C-130, dated May 29, 1979, by the Iowa Department of Transportation: General commodities (except liquid products, in bulk, in tank vehicles), between Allmen, Altoona, Baxter, Bondurant, Cambridge, Clemons, Colfax, Colo., Collins, Des Moines, Elkhart, Fernald, Haverhill, Ira, Kelly, Maxwell, Melbourne, Mingo, Mitchellville, McCallsburg, Nevada, Rhodes, Runnels, St.

Anthony, Sheldahl, Shipley, Slater, State Center, and Zearing, IA.

Assignment of Hearings

August 20, 1979.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 119767 (Sub-350F), Beaver Transport Co., now assigned for Prehearing Conference on September 10, 1979 at Chicago, IL, and will be held in Room No. 280, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 720 (Sub-58F), Bird Trucking Company, Inc., MC 139577 (Sub-27F), Adams Transit, Inc., MC 114457 (Sub-466F), Dart Transit Company, now assigned for hearing on September 11, 1979 at Madison, WI, and will be held at the Rear Lecture Room, Madison Public Library, 201 West Mifflin Street.

MC-FC-77634, A M & M Incorporated, Transferee and Record Truck Line, Inc. Transferor, MC 133220 (Sub-12F), A M & M Incorporated (Reentitled), MC 133220 (Sub-13F), A M & M Incorporated (Reentitled), now assigned for hearing on September 11, 1979 at Washington, DC, is postponed to September 24, 1979 (5 days), at Atlanta, GA, in a hearing room to be later designated.

MC 107445 (Sub-20F), Underwood Machinery Transport, Inc., now assigned for hearing on October 15, 1979 at Chicago, IL, is canceled and reassigned to October 15, 1979 (1 week) at Indianapolis, ID, in a hearing room to be later designated.

MC 125156 (Sub-2F), Dawson's Charter Service, Inc., now assigned for hearing on September 5, 1979 at Washington, DC, is postponed to October 10, 1979 at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 112963 (Sub-82F), Roy Bros., Inc., now assigned for hearing on September 12, 1979 (3 days), at Boston, MA, is postponed to October 29, 1979 (1 week) at Boston, MA, in a hearing room to be later designated.

MC 121658 (Sub-14F), Steve D Thompson Trucking, Inc., now assigned for hearing on September 11, 1979 (2 days), at the Holiday Inn, 6th and Broadway, Little Rock, AR, and continued to September 13, 1979 (2

days), at the Ramada Inn, 1311 U.S. Highway, 165 By Pass, Monroe, LA. I&S No. 9217, Increased Rates On Coal, Arco, TN, now assigned for hearing on September 5, 1979 is postponed to September 6, 1979 (2 days) at the Offices of the Interstate Commerce Commission, Washington, DC.

MC F 13803 F, Spector Industries, Inc., d.b.a. Spector Freight System-Control-Spector Freight System of Canada Limited, now being assigned for hearing on November 5, 1979 (2 days), at Chicago, IL, in a hearing room to be designated later.

MC 146468 F, Nankin Auto Parts Transport, Inc., now being assigned for hearing on November 7, 1979 (2 days), at Chicago, IL, in a hearing room to be designated later.

MC 108119 (Sub-125F), E. L. Murphy Trucking Company, now being assigned for hearing on November 9, 1979 (1 day), at Chicago, IL, in a hearing room to be designated later.

MC 135812 (Sub-1F), Professional Driver Services, Inc., and MC 140245 F, Professional Driver Services, Inc., Contract Carrier Application, now being assigned for Prehearing Conference on September 21, 1979 at the Offices of the Interstate Commerce Commission in Washington, DC.

MC 115093 (Sub-17F), Mercury Motor Xpress, Inc., now being assigned for Prehearing Conference on October 2, 1979 at the Offices of the Interstate Commerce Commission in Washington, DC.

MC 107012 (Sub-366F), North American Van Lines, Inc., now being assigned for hearing on November 5, 1979 (3 days), at Boston, MA, in a hearing room to be designated later.

MC 30844 (Sub-632F), Kroblin Refrigerated Express, Inc., Application dismissed. MC 107107 (Sub-473F), Alterman Transport Lines, Inc., transferred to Modified Procedure.

MC 108119 (Sub-124F), E. L. Murphy Trucking Company, now assigned for hearing on October 30, 1979 (1 day), at Chicago, IL, location of hearing room will be designated later.

MC-F-13826, H & W Motor Express Company, now assigned for hearing on October 31, 1979 (3 days), at Chicago, IL, location of hearing room will be designated later.

MC 112893 (Sub-55F), Bulk Transport Company, now assigned for hearing on November 5, 1979 (1 day), at Chicago, IL, location of hearing room will be designated later.

MC 119741 (Sub-143), Green Field Transport Company, Inc., now assigned for hearing on November 6, 1979 (2 days), at Chicago, IL, location of hearing room will be designated later.

MC 146110F, Small Shipment Express of

Illinois, Inc., now assigned for hearing on November 8, 1979 (2 days), at Chicago, IL, location of hearing room will be designated later.

BILLING CODE 7035-01-M

[No. MC 111231 (Sub-No. 236) F]

Jones Truck Lines, Inc., Extension—St. Louis Steel; Springfield, AR

Decided: July 28, 1979.

Applicant seeks a certificate of public convenience and necessity authorizing the operations substantially as described in the appendix. The evidence has been considered under the modified procedure. The application is opposed by Steel Haulers, Inc., a motor common carrier. Applicant filed a rebuttal statement.

Pertinent Facts

Hyman-Michaels Company and Sauk Steel Co., Inc., both maintain facilities in the Chicago, IL, commercial zone. Hyman-Michaels ships scrap iron while Sauk distributes steel bars. Each month they consign respectively five and five to six shipments to Oklahoma destinations and will tender to applicant two and two to three such monthly loads. Each firm gives representative Oklahoma destinations.

American Sheet and Strip Steel Corporation, Manufacturers Steel Supply Co., Inc., and Southwest Steel Supply Co., Inc., all conduct operations in the St. Louis, MO—East St. Louis, IL, commercial zone. Each markets various types of steel articles in Oklahoma points. American presently ships only about 1 such load a month but is hiring a salesman to cover that territory and expects to increase pertinent monthly volumes to three or four movements. Shipper plans to tender half of this traffic to applicant.

Manufacturers presently has "limited" shipments into Oklahoma due to availability of similar products from Oklahoma based producers at a lower price but speculates that traffic to that State may increase due to market conditions. If the application is granted, Jones will receive a proportionate share of such freight. All of manufacturers' Oklahoma shipments will be destined to points near Norman.

Southwest ships about 200 tons a month into the area to be served here and gives representative destinations for this traffic. It plans to tender three or four loads a month to applicant.

Each shipper requires truckload service and all except Hyman-Michaels need occasional multiple deliveries. All

have used the services of Steel Haulers, and will continue to use this protestant if the authority sought is granted. The Chicago-based shippers and Southwest as well, find that Steel Haulers is sometimes unable to supply equipment. Sauk has been forced to transport shipments to Oklahoma in private carriage due to protestant's inability to furnish vehicles.

Applicant not only requests authority from St. Louis to points in Oklahoma, but also seeks to tack the sought rights with certain authority (identified in the Federal Register publication as Certificate Sub-No. 41) to transport "steel and steel products between St. Louis and its commercial zone on the one hand, and, on the other, Chicago."

Applicant operates terminals at St. Louis, Chicago, and points throughout Oklahoma. It offers all services for which shippers express a need. Jones presently handles this traffic to portions of Oklahoma assertedly by tacking certain of its authorities which are not identified by Sub-Nos. During October and November 1978, it handled seven shipments from St. Louis and 78 shipments from Chicago to the sought destinations. Movements which it could not transport directly were interlined with a non-party carrier, but this arrangement has deteriorated and Jones seeks direct authority to replace the interline operation. Of the October and November 1978, shipments, applicant interlined eleven. All moved from Chicago. During the same period in 1977, it interlined four shipments from each origin.

Steel Haulers has authority to handle iron and steel articles from Chicago and St. Louis to points in Oklahoma. It maintains terminals at those points and one near Tulsa, OK. Protestant operates a substantial fleet of equipment and offers all services which shippers desire. It has not transported any traffic for Manufacturers during 1978, and has handled minimal amounts of traffic for the other supporting shippers here. During the last quarter of 1978, it transported 129 shipments from St. Louis to Oklahoma, and derived over \$70,000 from this transportation. Steel Haulers averages 89 movements a month from Chicago to Oklahoma. Its earnings from such traffic in the last three months of 1978 exceeded \$17,000. Steel Haulers points out that a grant of this application would enable Jones to gain authority to serve two major steel producing areas on the basis of a need shown by a few small firms. Protestant fears diversion of traffic which it handles for large shippers of steel at the involved origins. Protestant would not object to a grant of

authority if it were limited to the facilities of the supporting shippers.

Discussion and Conclusions

Although the evidence of Manufacturers is too indefinite and speculative to show even a future need for applicant's operation, the remaining shipper's testimony is sufficient to establish a requirement for additional service to Oklahoma from both origins. Significant quantities of traffic are involved, and shippers require periodic split deliveries. Applicant has demonstrated the ability to serve the supporting firms. Protestant has handled some freight for the interested shippers but this has not been substantial and its statement that it would not object to a grant limited to the pertinent facilities indicates little interest in the involved traffic. Protestant's real concern seems to be in protecting the revenues it enjoys from large shippers at St. Louis and Chicago. However, we note that applicant can presently transport much of this traffic directly by tacking of various authorities,¹ and has interlined some to Oklahoma points it does not cover directly. Steel Haulers, therefore, is presently a competitor for the involved freight. For this reason, and because the opposing carriers have not shown the significance of the involved traffic in relation to their overall revenues, we see little probability that a grant to serve additional Oklahoma points directly without a plantsite restriction will materially harm protestants to an extent contrary to the public interest. We will grant the authority as sought from St. Louis to Oklahoma without further discussion.

In the application as filed and published, Jones generally asks the right to tack the authority sought here with its Sub-No. 41 authority. That certificate does enable the carriage of general commodities (with exceptions) between Chicago and St. Louis. The same franchise also contains irregular-route authority to transport steel and steel products from Chicago, and various other points in St. Louis. It would be inappropriate to allow tacking with the pertinent irregular-route rights since this would allow service not only from Chicago, but also at numerous other origins where applicant has made no showing of need. Also one Chicago shipper distributes only iron articles which could not move under "steel products" authority. In order to meet the

¹ We admonish applicant for not identifying the franchises which allow this service, but a review of the extensive list of authorities attached to its statement reveals it has regular-route general commodity rights which would permit much of the sought service.

needs shown on this record and to avoid granting authority from many points at which *Jones* service is not required, we will deny applicant's tacking request and instead grant specific authority to serve Chicago as an origin. Since applicant has demonstrated only one way movements of traffic, the grant will be limited accordingly.

The Federal Register publication did not make it clear that tacking was sought to serve Chicago so issuance of the authority here will be withheld until publication in the Federal Register of a notice of the authority actually granted and the disposition of any timely filed petitions to intervene by parties prejudiced by the inclusion of this additional origin.

We find: The present and future public convenience and necessity require operation by applicant, performing the service described in the appendix. Applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. An appropriate certificate should be granted. This decision does not significantly affect the quality of the human environment.

It is ordered: The application is granted to the extent set forth in the appendix.

Operations may begin only following the service of a *certificate* which will be issued after satisfaction of the republication condition in the appendix if applicant complies with the following requirements set forth in the Code of Federal Regulations: insurance (49 CFR 1043), designation of process agent (49 CFR 1044), and tariffs (49 CFR 1310).

Applicant must comply within 90 days after the date of service of this decision, or the grant of authority shall be void.

By the Commission, Review Board Number 2. Members Boyle, Eaton, and Liberman.
Agatha L. Mergenovich,
Secretary.

Appendix

Authority to conduct the following operations will be issued in an appropriate document. This decision does not constitute authority to operate.

To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting iron and steel articles, from St. Louis, MO, and Chicago, IL, to points in Oklahoma.

CONDITION: Issuance of the certificate authorized here will be withheld until publication in the Federal Register of a notice of the grant of authority set forth above and

the disposition of any petitions to intervene filed within 90 days of such publication.

BILLING CODE 7035-01-M

[MC 143983]

Mel-Kris Trucking Corp. Contract Carrier Application; Paterson, N.J.

Decided: July 5, 1979.

Applicant seeks a permit to operate as a contract carrier by motor vehicle, authorizing the operations described in the appendix. The evidence has been considered under the modified procedure.¹ The application is opposed by Interstate Dress Carriers, Inc. (IDC), a motor common carrier. Applicant filed a reply argument.

Pertinent Facts

Applicant here seeks its initial permanent operating rights from the Commission. It maintains a terminal at Paterson, NJ, and will begin operations by leasing two tractors, five trailers, and one straight truck. It has been serving shipper for many years within the New York, NY, commercial or "exempt" zone. If the instant application is approved, applicant will provide shipper with expedited and timed pickups and deliveries (including inside pickups and deliveries if necessary), reconsign and divert shipments, perform loading, unloading, and warehousing services at its Paterson terminal, and effect a local pickup and delivery service in the New York, NY, commercial zone in conjunction with a line-haul transportation service between Paterson and Glens Falls, NY.

Supporting shipper, Native Textiles, A Division of Carisbrook Industries, Inc., manufactures textiles and textile products at pertinent plants situated at Dallas, PA, and Glens Falls, NY. At present, shipper uses its own equipment to transport its finished products and related materials, equipment, and supplies from the Dallas facility to applicant's facilities in New York City, where the shipments are distributed by applicant locally or for export. Native also transports these same commodities, as well as freight originating in the New

¹ This is the second decision by this Board. Because the original statements failed by applicant and its supporting shipper were significantly deficient in certain respects, and because applicant failed to demonstrate the operational feasibility of its service proposal or to provide any financial data, by decision served January 31, 1979, this proceeding was reassigned for further processing under the modified procedure. Applicant and shipper were afforded a period of time in which to submit evidence conforming to Rule 247(f)(3) of the Commission's General Rules of Practice. Protestant was afforded additional time to respond.

York City area, from New York City to its Glens Falls Plant. The traffic then moves back by shipper to New York City and subsequently to Dallas in a continuous round-robin operation.

Native requires the services of a carrier which will not only effect a local pickup and delivery service in the New York City commercial zone, but will also perform a linehaul transportation service between the New York area and its Glens Falls facility (the latter service replacing its own private operations). As proposed herein, traffic originating at Native's Dallas, PA, plant destined to the New York commercial zone (and ultimately to Glens Falls), will continue to be transported in shipper's own vehicles to applicant's Paterson terminal. Applicant will then make local pickups and deliveries in the New York commercial zone and also provide power equipment to pull shipper's trailers from the New York area to Glens Falls. The parties envision that, at some point, applicant will supply a portion of the trailer equipment as well. At Glens Falls this pattern will be reversed. If this application is granted, Native will tender to applicant all of the subject traffic. Native asserts existing carriers cannot provide the dedicated service applicant proposes. However, it goes on to say that any carriers currently being used at its plants will continue to be used in accordance with customer routings.

IDC asserts it holds pertinent authority to transport materials and supplies used in the manufacture of wearing apparel between New York City and Glens Falls, NY. It also alleges it can provide direct service between Dallas, PA, and Glens Falls, NY, with no need for an intermediate stop at Paterson, NJ, as required in applicant's proposal. We note, however, that protestant merely provides an appendix containing all of its operating authorities and fails to indicate specifically its pertinent operating rights in conflict with the authority sought here. IDC directs its evidence to a great extent at shipper's traffic moving to and from Dallas, PA, but this service is not sought in the application.

IDC contends that applicant's proposed service is for common rather than contract carriage. It argues it is in a position to satisfy shipper's transportation requirements. IDC submits it is currently handling substantial traffic from Native's Glens Falls facility to customers situated throughout the New York commercial zone and fears unwarranted diversion by applicant of this traffic and the resulting revenues should the sought

authority be approved. No traffic studies, however, are presented.

Discussion and Conclusions

Applicant's proposal constitutes contract carriage under 49 U.S.C. 10102(12), inasmuch as applicant has no other interstate authority and since the character of the evidence submitted indicates that it will assign equipment to the exclusive use of the supporting shipper, the only person it will be serving as a contract carrier. See, for example, *Royal Transports, Inc., Contr. Car. Applic.*, 120 M.C.C. 783, 789 (1974).

Applicant will provide service to but one shipper, the strongest showing possible under the first criterion of 49 U.S.C. 10923(b)(2). It will perform a personalized, "house carrier" service for shipper including effecting prompt, scheduled, and inside pickups and deliveries, reconsigning and warehousing shipments, and coordinating a local pickup and delivery service in the New York area with a line-haul service between Glens Falls, NY, and applicant's terminal at Paterson, NJ. The sole protestant, IDC, simply has not shown it is in a position to match the type of dedicated, tailored transportation service applicant proposes here.

IDC avers it is presently transporting traffic from Native's Glens Falls plant to New York area destinations. However, we note that protestant fails to specifically document such service making it impossible for us to accurately assess any harm it may suffer as a result of a grant of authority in this proceeding. In any event, we conclude that the advantages to Native of having applicant's proposed superior operation outweigh any potentially detrimental effects which may befall IDC.

A denial of the application would adversely affect applicant to the extent it would be prevented from joining the ranks of regulated carriers. Such a decision also would deprive Native of the services of a carrier willing to devote its operations to shipper's expressed for-hire transportation needs. The changing character of Native's transportation needs does not appear to be a significant factor here.

Weighing in balance the evidence in light of the criteria of 49 U.S.C. 10923(b)(2), we conclude that the application should be granted to the extent set forth in the appendix.

Certain additional matters concerning the scope of authority sought and granted must be considered. In its initial verified statement on further modified procedure, applicant requests that the authority sought be amended to include materials, equipment, and supplies used

in the manufacture and sale of textiles and textile products (except in bulk). The supporting shipper has, in fact, clearly demonstrated a need for the movement of such commodities and the grant will include appropriate authority. Additionally, applicant requests that the base point originally sought, Paterson, NJ, be changed to New York, NY, in order to allow it to provide the service shown to be required by shipper. We agree that this change is necessary and to deny the request would be to deprive shipper of a substantial portion of the service it needs. Paterson's commercial zone does not include New York City and thus a grant to serve Paterson would not allow applicant to perform the pickups and deliveries within the geographical area known as the New York, NY, commercial zone shown to be needed by shipper. A grant to serve New York, NY, would, however, include all points in the New York City commercial zone, including Paterson, and would allow applicant not only to operate to its Paterson facilities but also to make pickups and deliveries within the New York commercial zone with regard to traffic moving, respectively, to or from Glens Falls. See 49 CFR 1041.20 and 1048.101.

However, in making these changes in the application, we rather substantially have broadened the scope of the authority as originally sought and published. Accordingly, a notice of the authority actually granted will be published in the Federal Register and issuance of a permit will be withheld for a period of 30 days from the date of publication, during which period any proper party in interest may file an appropriate petition for leave to intervene in this proceeding, setting forth in detail the precise manner in which it has been prejudiced.

We find: Operation by applicant, as a contract carrier by motor vehicle, performing the service described in the appendix, will be consistent with the public interest and the transportation policy of 49 U.S.C. 10101. Applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. An appropriate permit should be granted. This decision does not significantly affect the quality of the human environment.

It is ordered: The application is granted to the extent set forth in the appendix.

Operations may begin only following the service of a *Permit* which will be issued after republication and if applicant complies with the following requirements set forth in the Code of

Federal Regulations: insurance (49 CFR 1043), designation of process agent (49 CFR 1044), contracts (49 CFR 1053), and freight rate schedules (49 CFR 1307).

Compliance with these requirements must be made within 90 days after the date of service of this decision or the grant of authority in this decision shall be void.

By the Commission, Review Board Number 2. Members Boyle, Eaton, and Liberman (Board Member Eaton not participating).

Agatha L. Mergenovich,
Secretary.

Appendix

AUTHORITY SOUGHT: To transport textiles and textile products, between Paterson, NJ, on the one hand, and, on the other, Glens Falls, NY, under continuing contract(s) with Native Textiles, Inc.

SERVICE AUTHORIZED: Authority to conduct the following operations will be issued in an appropriate document. This decision does not constitute authority to operate.

To operate as a *contract carrier*, by motor vehicle, in interstate of foreign commerce, over irregular routes, transporting (1) *textiles and textile products*, and (2) *materials, equipment, and supplies* used in the manufacture and sale of the commodities in (1) above (except commodities in bulk), between New York, NY, on the one hand, and, on the other, Glens Falls, NY, under continuing contract(s) with Native Textiles, Division of Carisbrook Industries, Inc., of New York, NY.

CONDITION: Issuance of the permit authorized here will be withheld for a period of 30 days from the date of publication in the Federal Register of a notice of the authority granted by this decision.

[FR Doc. 79-26364 Filed 8-23-79; 8:45 am]

BILLING CODE 7035-01-M

[Ex Parte No. 368]

Increased Freight Rates and Charges, Nationwide—1979; Decision

Decided: August 16, 1979.

By petition and verified statements filed July 28, 1979, United States Railroads sought authority to increase freight rates and charges generally by 9 percent within Eastern Territory, 7.5 percent within Western Territory and between the West and East, and 6.4 percent within Southern Territory and between Southern Territory and the East or West. The railroads sought to make the proposed increase effective October 1, 1979.

In a decision served August 9, 1979, the Commission ordered that any person opposing or wishing to comment on the proposed increase should file and serve verified statements on or before September 8, 1979. (44 FR 47854, August 15, 1979) The Commission further

ordered that respondents should file and serve their replies to protests as other pleadings and rebuttal evidence on or before September 12, 1979. The Commission added that in the event the railroads did not file their tariff prior to August 13, 1979, the due dates specified for the filing of protests and for the filing of replies would be extended.

The railroads did not file their tariff on August 13, 1979. They anticipate filing the tariff on August 20, 1979. Therefore, we extend the due date for the filing of protests from September 8, 1979 to September 11, 1979, and we extend the due date for the filing of replies from September 12, 1979 to September 17, 1979. These extended deadlines will provide sufficient time for all parties to file their pleadings without unnecessary delay. However, these extended procedural dates subtract from the period the Commission has for rendering a decision. The railroads are placed on notice that the Commission may, if the circumstances warrant, require that the October 1, 1979 proposed effective date be postponed for a period of time equal to the delay in filing the tariff.

It is ordered: The due date for the filing of protests is extended to September 11, 1979. The due date for the filing of replies is extended to September 17, 1979.

By the Commission, Chairman O'Neal.
Agatha L. Mergenovich,
Secretary.

1

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 9 a.m., August 23, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue N.W., Washington, D.C. 20428.

SUBJECT: 18a. Dockets 35893, 36005, 36020, 36024, 36031, 36033, 36035, 36036, 36049, 36052, 36054, and 36057; Boston/Philadelphia/Washington-Orlando Show-Cause Proceeding (Memo No. 8927-A, BDA, BIA, OGC).

STATUS: Open.

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary (202) 673-5068.

SUPPLEMENTARY INFORMATION:

Immediate action is required in this matter because the Philadelphia-Orlando awards have a direct bearing on a pending court proceeding, and the General Counsel has been requested to produce evidence of the Board's action as soon as possible. Accordingly, the following Members have voted that agency business requires the addition of Item 18a to the August 23, 1979 agenda and that no earlier announcement of this addition was possible:

Chairman Marvin S. Cohen
Member Elizabeth E. Bailey
Member Gloria Schaffer

BILLING CODE 6320-01-M

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (eastern time), Tuesday, August 28, 1979.

PLACE: Commission conference room, No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

MATTERS TO BE CONSIDERED:

Open to the Public

1. Modification of various state and local agency fiscal year 1979 charge resolution contracts.
2. Revised draft annual report required by Executive Order 12067.
3. Affirmative Action instructions for Federal Agencies for fiscal year 1980.
4. Two sole source contracts to obtain information pursuant to a court order.
5. Report on Commission operations by the Executive Director.

Closed to the Public

1. Litigation authorization; General Counsel recommendations.
2. Decision on request to appeal 01790595.
3. Decision on request to appeal 05790024.

Note.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson,
Executive Officer, Executive Secretariat,
at (202) 634-6748.

3

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at 4:30 p.m. on Tuesday, August 21, 1979, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to (1) consider a Legal Division memorandum dated August 14, 1979, in connection with an appeal from an initial partial denial under the Freedom of Information Act; and (2) reconsider a decision of the Board in a section 8(b) proceeding under the Federal Deposit Insurance Act (12 U.S.C. 1818(b)) against an insured State nonmember bank for alleged violation of 12 CFR 329.8(f).

In calling the meeting, the Board determined, on motion of Chairman Irvine H. Sprague, seconded by Director John G. Heimann (Comptroller of the Currency), and concurred in by Director

William M. Isaac (Appointive), that Corporation business required its consideration of these matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of these matters in a meeting open to public observation; and that these matters were eligible for consideration in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

Dated: August 22, 1979.

TIME AND DATE: 10 a.m., August 29, 1979.

PLACE: Room 12126, 1100 L Street, NW., Washington, D.C. 20573.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions Open to the Public

1. Monthly report of actions taken pursuant to authority delegated to the Managing Director.
2. Report on United States Lines, Inc., proposed 2.9 percent rate increase in Pacific Coast/Hawaii trade.
3. Appeal of Pacific Coast European Conference of staff action rejecting the filing of tariff matter.
4. Rules published by the Japan/Korea-Atlantic and Gulf Freight Conference pertaining to chassis availability and demurrage charges that result when chassis are not made available.
5. Acceptability of the city of New York as a self-insurer for purposes of General Order 40.
6. Possible rulemaking with respect to issues raised in Docket No. 77-11: Petition for Declaratory Order of Pacific Cruise Conference.
7. Universal Transcontinental Corporation and J. S. Stass Co. Division of Universal Transcontinental Corporation—Possible shipper connection.

Portions Closed to the Public

1. Show cause proceedings regarding failure to self police under General Order 7—Consideration of records.
2. Docket No. 79-46: Expedited surcharges for recovery of carriers increased fuel costs in the foreign commerce of the United States—Consideration of record.
3. Agreement No. 10286—WINAC Pool: Status report on Commission's directives in Docket No. 77-43.

NATIONAL RAILROAD PASSENGER CORPORATION.

Board of Directors Meeting.

Additional Agenda Item for Meeting.

In accordance with rule 4d. of Appendix A of the Bylaws of the

National Railroad Passenger Corporation, notice is given that the following item will be added to the agenda for the Board of Directors meeting of August 29, 1979:

4. *Commitment Approval Requests*—79-114 Establish New Service—Chicago to Indianapolis.

Board members Edwards, Boyd, Head, Kling, Langdon, Quinn and Nathan determined by recorded vote that the business of the Corporation requires the change in subject matter by addition of the agenda item, and affirmed that no earlier announcement of the change was possible, and directed the issuance of this notice at the earliest practicable time. Board members Dunlop, Lamphier, Luna, Mills, Neel and Goldschmidt were not reached for the vote.

The revised agenda to be discussed at the meeting follows:

Agenda—National Railroad Passenger Corporation—Meeting of the Board of Directors—August 29, 1979

(9 a.m.) Closed Session

1. Internal personnel matters.
2. Litigation matters.

(10 a.m.) Open Session

3. Approval of minutes of regular meeting of July 25, 1979.
4. Commitment approval requests:
 - 79-106 PCB handling/storage facilities—Wilmington, Del.
 - 79-112 Construct new station—Borie, Wyo.
 - 79-113 Modify station trackage—Temple, Tex.
 - 79-114 Establish new service—Chicago to Indianapolis.
5. Superliner inaugural/board trip.
6. Board committee reports:
 - Audit.
 - Finance.
 - Northeast corridor improvement project.
 - Organization and compensation.
 - Legal affairs.
 - Ad hoc bylaws revision.
7. Approval of preparation for October 1 route system.
8. President's report.
9. New business.
10. Adjournment.

Inquiries regarding the agenda for the August 29, 1979 Board meeting should be directed to the Corporate Secretary at (202) 383-3973.

Elyse G. Wander,
Corporate Secretary,
August 22, 1979.

Part III

Department of Health, Education, and Welfare

Food and Drug Administration

Classification of General Hospital and
Personal Use Devices; Development of
General Provisions

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 880]

[Docket No. 78N-1267]

Classification of General Hospital and
Personal Use Devices; Development of
General ProvisionsAGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The agency is proposing general rules applicable to the classification of all general hospital and personal use devices. The Medical Device Amendments of 1976 require the Food and Drug Administration (FDA) to classify all medical devices intended for human use into three categories: class I, general controls; class II, performance standards; and class III, premarket approval. In the preamble to this proposal, FDA describes the development of the proposed regulations classifying individual general hospital and personal use devices, which are being published elsewhere in this issue of the Federal Register. The preamble also describes the activities of the General Hospital and Personal Use Device Classification Panel, an FDA advisory committee that makes recommendations to FDA concerning the classification of general hospital and personal use devices.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Device Classification System

The Medical Device Amendments of 1976 (Pub. L. 94-295), hereinafter called the amendments, establish a comprehensive system for the regulation of medical devices intended for human use. Section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c), establishes three categories (classes) of devices, depending on the

regulatory controls needed to provide reasonable assurance of their safety and effectiveness. The three categories are as follows: Class I, general controls; class II, performance standards; class III, premarket approval.

Most devices are not classified under section 513 of the act until after FDA has (1) received a recommendation from a device classification panel (an FDA advisory committee); (2) published the Panel's recommendation for comment, along with a proposed regulation classifying the device; and (3) published a final regulation classifying the device. These steps must precede the classification of any device that was in commercial distribution before May 28, 1976 (the date of enactment of the amendments) and that was not previously regarded by FDA as a new drug under section 505 of the act (21 U.S.C. 355). A device that is first offered for commercial distribution after May 28, 1976, and that is substantially equivalent to a device classified under this scheme, is classified in the same class as the device to which it is substantially equivalent.

A device that FDA previously regarded as a new drug, or a newly offered device that is not substantially equivalent to a device that was in commercial distribution before the amendments, is classified by statute into class III. These two types of devices are classified into class III without any FDA rulemaking proceedings. The agency determines whether new devices are substantially equivalent to previously offered devices by means of the premarket notification procedure in section 510(k) of the act (21 U.S.C. 360(k)) and Part 807 of the regulations (21 CFR Part 807).

Related Regulations

In the Federal Register of July 28, 1978 (43 FR 32988), FDA issued final regulations describing the procedures for classifying devices intended for human use. These regulations, which were proposed in the Federal Register of September 13, 1977 (42 FR 46028), supplement the agency's regulations in Part 14 (21 CFR Part 14) governing the use of advisory committees. The agency also issued interim device classification procedures in a notice published in the Federal Register of May 19, 1975 (40 FR 21848).

Activities of Panel

Anticipating enactment of the amendments, FDA established several advisory committees to make preliminary recommendations on device classification. The General Hospital and Personal Use Device Classification

Panel (the Panel) was originally chartered on October 15, 1974, as the Panel on Review of General Hospital and Personal Use Devices. On January 28, 1976, FDA placed a report of the Panel's tentative classification recommendations on file with the office of the Hearing Clerk (HFA-305), Food and Drug Administration, and announced the availability of the report to the public by notice published in the Federal Register of June 25, 1976 (41 FR 26245).

On August 9, 1976, the Panel and other preamendments device classification panels were rechartered to reflect their new responsibilities under the amendments. The agency directed each panel to reconsider its preamendments classification recommendations in light of the new requirements. In 1976 and 1977, the Panel reviewed all devices that FDA had referred to it to make certain that its recommendations were in accord with the amendments.

Throughout the Panel's deliberations, interested persons were given an opportunity to present their views, data, and other information concerning the classification of general hospital and personal use devices. The Panel also invited experts to testify and sought information on many devices from the published literature.

In October 1977, the Panel submitted to FDA a preliminary report of its recommendations. The report included a roster of current and former Panel members and consultants and listed all meeting dates. The agency placed a copy of the report in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, and announced its availability to the public by notice published in the Federal Register of November 29, 1977 (42 FR 60792). At meetings held on March 2-3, 1978, May 22-25, 1978, November 6, 1978, and January 15, 1979, the Panel changed its previous recommendations concerning the classification of several devices and made classification recommendations for several devices not previously considered by the Panel. An addendum to the Panel report showing these changes has been placed in the office of the Hearing Clerk (HFA-305), Food and Drug Administration. Also available in the office of the Hearing Clerk are summary minutes from all Panel meetings, verbatim transcripts of meetings held after May 28, 1976 (the date of enactment of the amendments), and all references cited in individual general hospital and personal use device proposed classification regulations. Interested persons may review these documents in the office of the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

List of General Hospital and Personal
Use Devices

In 1972 FDA surveyed device manufacturers to identify the devices for which classification regulations would be needed. Following this survey, FDA developed a list of general and miscellaneous devices. The Panel supplemented the list using its members' knowledge of general and miscellaneous devices in use. Devices that were solely for experimental or investigational use or that were not generally available were not included.

The agency is proposing to establish a new part 880 in Title 21 of the Code of Federal Regulations. Part 880 will consist of sections identifying each general hospital and personal use device with a brief narrative description and stating the classification of that device. A list of the general hospital and personal use devices appears elsewhere in this preamble.

Individual General Hospital and
Personal Use Device Classification
Regulations

Elsewhere in this issue of the Federal Register, FDA is issuing 99 individual proposed regulations to classify each general hospital and personal use device. The agency is proposing to classify 54 general hospital and personal use devices into class I (general controls), 42 general hospital and personal use devices into class II (performance standards), 2 general hospital and personal use devices into class III (premarket approval), and one general hospital use device into class I when mechanically operated and into class II when AC-powered. The agency also is publishing the recommendations of the Panel regarding these devices, as required by section 513(c)(2) and (d)(1) of the act (21 U.S.C. 360c(c)(2) and (d)(1)).

Published Panel Recommendations

Each published Panel recommendation concerning a general hospital and personal use device includes the information described below.

1. *Identification.* Both the Panel recommendation and the proposed FDA classification regulation include a brief narrative identification of the generic type of device. The identification statement is necessarily broad because it applies to a category or type of device rather than to a specific device. As explained in proposed § 880.1, any

manufacturer of a newly offered device who files a premarket notification submission under section 510(k) of the act and Part 807 of the regulations cannot show merely that the device is accurately described by the section title and identification provisions of a classification regulation. Although a new device may be described accurately by the title and identification in a classification regulation, it is nevertheless in class III under section 513(f) of the act if it is not substantially equivalent to a preamendments device (or to a postamendments device that has already been reclassified from class III into class I or class II). It is not practical for FDA to publish an identification of each type of device that is so detailed as to anticipate every product feature that may be relevant in determining whether a new device is substantially equivalent to previous devices classified by the regulation. The agency believes that this problem was recognized in, and addressed by, the premarket notification procedures in section 510(k) of the act. Accordingly, any manufacturer who submits a premarket notification submission should state why the manufacturer believes the device is substantially equivalent to other devices in commercial distribution, as required by § 807.87 (21 CFR 807.87), and whether the device is described in a classification regulation.

2. *Recommended classification.* Each Panel's recommendation describes whether the device is recommended for classification into class I (general controls), class II (performance standards), or class III (premarket approval).

For each device recommended for classification into class I, the Panel considered whether the device should be exempt from any requirements under certain sections of the act: section 510 (21 U.S.C. 360, registration), section 519 (21 U.S.C. 360i, records and reports), and section 520(f) (21 U.S.C. 360j(f), good manufacturing practice requirements). Although the Panel did not recommend that any device be granted total general exemptions at this time from section 510 or section 519 of the act, the Panel did recommend that the manufacturers of several class I devices be exempted from premarket notification procedures under section 510(k) of the act and part 807 of the regulations (21 CFR Part 807). The Panel also recommended that manufacturers of several class I devices be exempted from the good manufacturing practice regulation in Part 820 (21 CFR Part 820) and thus from the records and reports requirements in that regulation. The agency's policy

concerning these exemption recommendations is discussed below in the section of this proposal concerning "Exemptions for Class I Devices."

A Panel recommendation that a device be classified into class II includes the Panel's recommended priority ("high," "medium," or "low") for establishing a performance standard for the device. Similarly, each Panel recommendation that a device be classified into class III includes the Panel's recommended priority ("high," "medium," or "low") for application of premarket approval requirements to that device. As explained below in the section of this notice concerning "Priorities for Class II and III Devices," FDA is not, however, proposing the establishment of agency priorities at this time.

3. *Summary of reasons for recommendation.* The summary of reasons for the Panel's recommendation explains why the Panel believes that a particular device meets the statutory criteria for classification into class I, II, or III.

Except in those instances in which FDA's classification proposal differs from the Panel's recommendation, the agency is adopting the Panel's summary of reasons as the agency's statement of the reasons for issuing the regulations, as required by section 517(f) of the act (21 U.S.C. 360g(f)).

The summary of reasons for a recommendation identifies any device that is an implant or a life supporting or life sustaining device. The summary of reasons for any implant or life supporting or life sustaining device that is not recommended for classification into class III also explains why the Panel determined that classification of the device into class III is not necessary to provide reasonable assurance of its safety and effectiveness. The agency provides a similar explanation in the "Proposed Classification" section of the preamble to any proposal to classify an implant or a life supporting or life sustaining device into a class other than class III.

4. *Summary of data on which the recommendation is based.* In many cases, the Panel based its recommendations on the Panel members' personal knowledge of, and clinical experience with, the devices under review. The Panel particularly relied upon clinical experience and judgment when considering a simple device that had been used extensively and was accepted widely before the amendments were enacted. The legislative history of the amendments makes clear that the term "data" has special meaning in section 513(c)(2)(A)

of the act, which requires that a Panel recommendation summarize the data upon which a recommendation is based. As used in that section, "data" refers not only to the results of scientific experiments, but also to less formal evidence, other scientific information, or judgments of experts (House Committee on Interstate and Foreign Commerce, Medical Device Amendments of 1976, H.R. Rept. No. 94-853, 94th Congress, 2d Session 40 (1976)). The agency has determined that clinical experience and judgment is valid scientific evidence for classifying certain devices.

In several cases, FDA sought more data and information concerning the classification of a device than were cited by the Panel. References to these data and information are found in the "Proposed Classification" section of the preambles to individual general hospital and personal use device regulations. FDA is adopting as the agency's statement of the basis for issuing the regulation under section 517(f) of the act the Panel's summary of the data on which a recommendation to classify a device is based, together with any additional data and information cited in the preamble to the proposed classification regulation.

5. *Risks to health.* In identifying the risks to health presented by general hospital and personal use devices, the Panel recognized that few devices are completely free of risk. The Panel listed the risks it considered most significant, especially those that are unique to the individual device. In some cases, FDA has identified additional risks to health presented by a device. These additional risks are set out in the section of the preamble concerning the "Proposed Classification" of a particular device.

The Panel's classification recommendation for a number of devices that are recommended for classification into class I identify one or more risks to health that are presented by these devices. In these cases, the Panel believed that these risks to health could be addressed adequately by labeling, other general controls, or both. In most of these cases FDA agrees with the Panel's belief that general controls are adequate to control these risks to health.

Because the classification recommendations and FDA regulations do not identify all risks to health presented by general hospital and personal use devices, future regulations establishing performance standards under section 514 of the act (21 U.S.C. 360d) or requiring premarket approval under section 515(b) of the act (21 U.S.C. 360e(b)) may identify additional risks to

health to be addressed by FDA requirements.

Proposed Classification

Each proposed regulation to classify a general hospital and personal use device states whether FDA agrees with the Panel's recommendation, describes the agency's proposed classification of the device, and proposes a new section in part 880 in which the device classification will be codified.

The agency cautions that the final classification of a device may differ from the proposal. Factors that may cause such a change include comments, the agency's reconsideration of existing data and information, and the agency's consideration of new data and information.

Priorities for Class II and Class III Devices

For a device that the Panel recommends be classified into class II or class III, section 513(c)(2)(A) of the act requires that the Panel recommendation include, to the extent practicable, a recommendation for the assignment of a priority for application to the device of a performance standard or premarket approval requirements. In developing its advice concerning priorities ("high," "medium," or "low") of devices recommended for classification into class II or class III, the Panel compared the device with other general hospital and personal use devices, based on information available to the Panel members concerning the relative importance of use of the device and the relative risks presented by the device. The Panel recommended assignment of a "high priority" only to those class II or class III devices that the Panel believed should receive the agency's immediate attention.

The agency is not proposing at this time to establish priorities for development of performance standards for class II devices or application of premarket approval requirements to class III devices. Section 513(d)(3) of the act authorizes, but does not require, establishment of these priorities. At a later date, however, the agency will establish priorities for the development of standards for class II devices and the application of premarket approval requirements to class III devices. These priorities will be based on the classification panels' recommendations, available resources, and other relevant factors. The agency's priorities will be reflected in the agency's annual budget request and other publicly available documents and may be published in the Federal Register.

The agency intends to proceed as quickly as the statute and classification panel resources permit to require premarket approval of devices classified into class III. There are two factors affecting the length of time necessary before FDA requires submission of premarket approval applications for any particular device that is classified by an FDA regulation into class III: the number of devices reviewed by a panel and the priority of a particular device in relation to other class III devices considered by classification panel. For example, where FDA classifies into class III only a few devices within a Panel's specialty area, FDA may at the same time also publish regulations under section 515(b) of the act requiring premarket approval for many of the class III devices considered by the Panel, regardless of whether of a high, medium, or low priority. Where practical, FDA will publish these section 515(b) regulations during the grace period (at least 30 months) following classification during which a device classified into class III by FDA regulation may lawfully remain on the market without a premarket approval application. The grace period is provided for in section 501(f) of the act (21 U.S.C. 351(f)).

Exemptions for Class I Devices

Section 513 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c) provides that FDA may exempt a device recommended for classification into class I from a requirement under the following sections of the act: section 510 (21 U.S.C. 360), registration; section 519 (21 U.S.C. 360i), records and reports; and section 520(f) (21 U.S.C. 360j(f)), good manufacturing practices.

Under section 510 of the act, a person "engaged in the manufacture, preparation, propagation, compounding or processing of * * * a device or devices" must register with FDA (section 510 (b) through (i)), file a list of devices (section 510(j)), and notify FDA at least 90 days before beginning commercial distribution of a device (section 510(k)). (See Part 807 (21 CFR Part 807).) Section 510(g)(4) authorizes the agency to exempt a device from section 510 if it finds that compliance with that section is not necessary for the protection of the public health. In § 807.65 (21 CFR 807.65), FDA has exempted certain classes of persons from section 510 of the act. Several device classification panels have recommended that manufacturers of certain class I devices also be exempted from all or some of the requirements of section 510. The agency has determined that protection of the public health requires that manufacturers of medical

devices, other than those already exempt under § 807.65, register and list their products with FDA to ensure that the agency can identify these manufacturers and their products and conduct necessary inspections.

The agency has determined, however, for certain devices, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions. Thus, the agency has proposed to exempt certain devices from Subpart E of Part 807 of the regulations, which implements section 510(k) of the act. The agency does not, at this time, anticipate that premarket approval will be required for these devices. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice of new products within this generic type of device.

Section 519 of the act authorizes FDA to issue regulations requiring device manufacturers, importers, and distributors to establish and maintain such records, make such reports, and provide such information as the agency may reasonably require to assure that devices are not adulterated or misbranded and to otherwise assure their safety and effectiveness. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation under Part 820 (21 CFR Part 820), published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations in accordance with section 519 of the act, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempted from the requirements, and FDA will issue exemptions that are appropriate.

The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from most requirements of the device

GMP regulation. As explained below, the exemption will not extend to two device GMP records requirements.

The device GMP regulation was published in final form in the Federal Register of July 21, 1978. At the time of the Panel's recommendations, the GMP regulation had not yet been promulgated, and the agency had not yet developed criteria for exempting a class I device from GMP requirements. The agency has now decided that, if any one of the following criteria is met, FDA will consider exempting from the GMP regulation a class I device that is not labeled or otherwise represented as sterile. The agency will not, however, exempt a device from § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, or § 820.198 (21 CFR 820.198), with respect to complaint files. The criteria are:

1. FDA has determined, based on adequate information about current practices in the manufacture of the device and about user experience with the device, that application of the GMP regulation is unlikely to improve the safety and effectiveness of the device.

2. FDA has determined that all possible defects relating to the safety and effectiveness of the device are readily detectable before use, either through visual examination by the user or routine testing before use, e.g., testing a clinical laboratory reagent with positive and negative controls.

3. FDA has determined that any defect in the device that is not readily detectable will not result in a device failure that could have an adverse effect on the patient or other user.

FDA has determined that no device that is labeled or otherwise represented as sterile will be exempted from the device GMP regulation. Such a device must be subject to the entire GMP regulation to ensure that manufacturers adequately reduce the bioburden (number of microorganisms) on the device and its components during the manufacturing process. This reduction is accomplished through adherence to a comprehensive quality assurance program as is required by the GMP regulation, with adequate environmental controls, trained personnel, appropriate maintenance and calibration of sterilization equipment, recordkeeping concerning lot sterility, strict packaging and labeling controls, and other quality assurance measures.

The agency also has determined that no exemption from the device GMP

regulation will extend to § 820.180, with respect to general requirements concerning records, or § 820.198, with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest, and that compliance with these sections is not unduly burdensome for device manufacturers. To ensure that device manufacturers have adequate systems for complaint investigation and followup, all such manufacturers are required to comply with the complaint file requirements of § 820.198. All device manufacturers also are required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

In general, FDA has not initiated proposals to exempt manufacturers of class I devices from requirements under sections 510, 519, or 520(f) but has acted on the basis of exemption recommendations of the device classification panels. Manufacturers and other interested persons may submit comments on the appropriateness of exemptions of manufacturers of class I devices that are not the subject of panel exemption recommendations. FDA will consider granting exemptions from the requirement of premarket notification and from the GMP regulation (other than §§ 820.180 and 820.198) according to the policies and criteria discussed above. Comments requesting additional exemptions should be supported by information showing that the exemption of manufacturers of a device from the premarket notification requirement or the GMP regulation (other than §§ 820.180 and 820.198), or both, is consistent with the policies and criteria discussed above.

List of General Hospital and Personal Use Devices

The following is a list of the general hospital and personal use devices that FDA is proposing to classify, the section in the Code of Federal Regulations under which the regulation classifying the device will be codified, the docket number of the proposed classification regulation, and the proposed classification of each device.

Section	Device	Docket No.	Class
SUBPART C—GENERAL HOSPITAL AND PERSONAL USE MONITORING DEVICES			
880.2200	Liquid crystal forehead temperature strip	78N-1268	I
880.2400	Bed-patient monitor	78N-1269	I
880.2420	Electronic monitor for gravity flow infusion system	78N-1270	I
880.2440	Neonatal ventilatory effort monitor (apnea detector)	78N-1271	I
880.2460	AC-powered spinal fluid pressure monitor	78N-1272	I
880.2500	Spinal fluid pressure manometer	78N-1273	I
880.2700	Stand-on patient scale	78N-1274	I
880.2720	Patient scale	78N-1275	I
880.2740	Surgical sponge scale	78N-1276	I
880.2800	Sterilization indicator	78N-1277	I
880.2900	Clinical color change thermometer	78N-1278	I
880.2910	Clinical electronic thermometer	78N-1280	I
880.2920	Clinical mercury thermometer	78N-1281	I
SUBPART F—GENERAL HOSPITAL AND PERSONAL USE THERAPEUTIC DEVICES			
880.5025	I.V. container	78N-1284	I
880.5045	Recirculating air cleaner	78N-1285	I
880.5065	Urine collection bag for infants	78N-1286	I
880.5075	Elastic bandage	78N-1287	I
880.5090	Liquid bandage	78N-1288	I
880.5100	AC-powered adjustable hospital bed	78N-1289	I
880.5110	Hydraulic adjustable hospital bed	78N-1290	I
880.5120	Manual adjustable hospital bed	78N-1291	I
880.5130	Infant radiant warmer	78N-1292	I
880.5140	Pediatric hospital bed	78N-1293	I
880.5150	Nonpowered flotation therapy mattress	78N-1294	I
880.5160	Therapeutic medical binder	78N-1295	I
880.5180	Burn sheet	78N-1297	I
880.5200	Intravascular catheter	78N-1298	I
880.5210	Intravenous catheter securement device	78N-1299	I
880.5240	Adhesive tape and bandage	78N-1301	I
880.5270	Neonatal eye pad	78N-1302	I
880.5300	Medical absorbent fiber	78N-1303	I
880.5375	Infant oxygen hood	78N-1305	I
880.5400	Neonatal incubator	78N-1306	I
880.5410	Neonatal transport incubator	78N-1307	I
880.5420	Pressure infuser for I.V. bag	78N-1308	I
880.5430	Nonelectrically powered fluid injector	78N-1308	I
880.5440	Intravascular administration set	78N-1309	I
880.5450	Patient care reverse isolation chamber	78N-1310	I
880.5475	Jet lavage	78N-1311	I
880.5500	AC-powered patient lift	78N-1312	I
880.5510	Nonelectrical patient lift	78N-1313	I
880.5550	Alternating pressure air flotation mattress	78N-1314	I
880.5560	Heated water mattress	78N-1315	I
880.5570	Hypodermic single lumen needle	78N-1316	I
880.5630	Nipple shield	78N-1317	I
880.5640	Lamb feeding nipple	78N-1318	I
880.5680	Infant position holder	78N-1319	I
880.5700	Neonatal phototherapy unit	78N-1320	I
880.5725	Infusion pump	78N-1321	I
880.5740	Suction snakebite kit	78N-1361	I
880.5760	Chemical cold pack snakebite kit	78N-1362	I
880.5780	Medical support stocking	78N-1322	I
880.5800	I.V. set stopcock	78N-1323	I
880.5820	Scrotal support	78N-1324	I
880.5860	Piston syringe	78N-1325	I
880.5900	Nasogastric tube	78N-1327	I
880.5910	Fluid delivery tubing	78N-1328	I
880.5950	Umbilical occlusion device	78N-1329	I
SUBPART G—GENERAL HOSPITAL AND PERSONAL USE MISCELLANEOUS DEVICES			
880.6025	Absorbent tipped applicator	78N-1330	I
880.6050	Ice bag	78N-1332	I
880.6060	Disposable bedding	78N-1333	I
880.6070	Bed board	78N-1334	I
880.6080	Cardiopulmonary resuscitation board	78N-1335	I
880.6085	Hot/cold water bottle	78N-1336	I
880.6100	Aerator cabinet	78N-1338	I
880.6140	Medical chair and table	78N-1340	I
880.6150	Ultrasonic cleaner for medical instruments	78N-1341	I
880.6175	Specimen container	78N-1342	I
880.6185	Cast cover	78N-1343	I
880.6190	Mattress cover	78N-1344	I
880.6200	Ring cutter	78N-1345	I
880.6230	Tongue depressor	78N-1346	I
880.6250	Patient examination glove	78N-1347	I

880.6850	Sterilization wrap	78N-1363	I
880.6860	Ethylene oxide gas sterilizer	78N-1364	I
880.6870	Dry heat sterilizer	78N-1365	I
880.6880	Steam sterilizer	78N-1366	I
880.6900	Hand-carried stretcher	78N-1367	I
880.6910	Wheeled stretcher	78N-1368	I
880.6920	Syringe needle introducer	78N-1369	I
880.6960	Irrigating syringe	78N-1368	I
880.6970	Liquid crystal vein locator	78N-1371	I
880.6980	Vein stabilizer	78N-1372	I

Devices Considered by Other Panels

The FDA has determined that three devices that were reviewed by classification Panels other than the General Hospital and Personal Use Device Classification Panel are more appropriately published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. Therefore, in proposals appearing elsewhere in this issue of the Federal Register, FDA is publishing the recommendations of the Anesthesiology Device Classification Panel for AC-powered spinal fluid pressure monitors, of the Obstetrical and Gynecological Device Classification Panel for nipple shields, and of the Physical Medicine Device Classification Panel for cast covers.

Devices Considered by Two or More Panels

Many devices were reviewed by two or more device classification panels. For these devices, FDA will publish each panel's recommendations and a single proposed classification regulation. The following devices were considered by the General Hospital and Personal Use Device Classification Panel and by other panels:

1. The Anesthesiology Device Classification Panel recommends that temperature monitors (self-contained) be classified into class II. The General

Hospital and Personal Use Device Classification Panel recommends that liquid crystal forehead fever indicators be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying liquid crystal forehead temperature strips into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

2. The Anesthesiology Device Classification Panel recommends that infusion rate monitors be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that electronic gravity flow infusion line monitors be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying electronic monitors for gravity flow infusion systems into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

3. The Anesthesiology Device Classification Panel recommends that spinal fluid pressure monitors be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that spinal pressure manometers be classified into class II. The agency has

determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying spinal fluid pressure manometers into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

4. The General Hospital and Personal Use Device Classification Panel recommends that biological sterilization indicators and physical/chemical sterilization indicators be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying sterilization indicators into class II and is publishing the Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

5. The General and Plastic Surgery Device Classification Panel recommends that liquid crystal thermometers be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that clinical color change thermometers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying clinical color change thermometers into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

6. The Anesthesiology Device Classification Panel recommends that temperature monitors (with probe) be classified into class II. The General and Plastic Surgery Device Classification Panel recommends that temperature monitors be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that clinical electronic thermometers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying clinical electronic thermometers into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

7. The General and Plastic Surgery Device Classification Panel recommends that fluid column thermometers be

classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that clinical mercury thermometers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying clinical mercury thermometers into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

8. The Physical Medicine Device Classification Panel recommends that manual flotation therapy beds be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that silicone mattresses be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying nonpowered flotation therapy beds into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

9. The Obstetric and Gynecological Device Classification Panel recommends that breast binders and OB/GYN abdominal binders be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that abdominal binders and perineal binders be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying therapeutic medical binders into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

10. The Cardiovascular Device Classification Panel recommends that long-term vascular catheters be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that intravascular catheters and umbilical artery catheters be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying intravascular catheters into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

11. The General and Plastic Surgery Device Classification Panel recommends that adhesive tapes and bandages be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that adhesive strip skin closures be classified into class I. The agency has determined

that these devices are the same. Therefore, the agency is proposing a single regulation classifying adhesive tapes and bandages into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

12. The Anesthesiology Device Classification Panel recommends that manual infusion apparatus be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that I.V. bag pressure infusion devices be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying pressure infuser for I.V. bags into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

13. The Anesthesiology Device Classification Panel recommends that transfusion sets be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that intravascular administration sets be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying intravascular administration sets into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

14. The Physical Medicine Device Classification Panel recommends that alternating pressure mattresses be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that alternating pressure air flotation mattresses be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying alternating pressure air flotation mattresses into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

15. The Anesthesiology Device Classification Panel recommends that powered infusion apparatus except radiographic dye injection be classified into class II. The Cardiovascular Device Classification Panel recommends that cardiovascular infusion pumps be classified into class II. The General Hospital and Personal Use Device

Classification Panel recommends that perfusion units and infusion pumps be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying infusion pumps into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

16. The Cardiovascular Device Classification Panel recommends that medical support stockings be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that elastic stockings be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying medical support stockings into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

17. The Gastroenterological and Urological Device Classification Panel recommends that scrotal supports be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that scrotal supports be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying scrotal supports into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

18. The Dental Device Classification Panel recommends that luer-lock drug syringes be classified into class I. The Ophthalmic Device Classification Panel recommends that ophthalmic syringes be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that piston syringes be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying piston syringes into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

19. The Anesthesiology Device Classification Panel recommends that nasogastric tubes be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that feeding tubes and Levine tubes be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying nasogastric tubes into class I and is publishing both Panel recommendations in a proposal

appearing elsewhere in this issue of the Federal Register.

20. The Dental Device Classification Panel recommends that cotton applicators be classified into class I. The General and Plastic Surgery Device Classification Panel recommends that cotton/dye applicators be classified into class I. The Gastroenterology and Urology Device Classification Panel recommends that gastro/urology applicators be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that absorbent-tipped applicators be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying absorbent-tipped applicators into class I and is publishing the four Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

21. The General Hospital and Personal Use Device Classification Panel recommends that manual nonwheeled chairs, blood donor chairs, examination and treatment chairs, and geriatric chairs be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying nonelectric nonwheeled chairs and tables into class I and is publishing the Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

22. The Dental Device Classification Panel recommends that tongue depressors be classified into class I. The General and Plastic Surgery Device Classification Panel recommends that tongue blades be classified into class I. The Ear, Nose, and Throat Device Classification Panel recommends that wooden tongue depressors be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that tongue depressors be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying tongue depressors into class I and is publishing the four Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

23. The Physical Medicine Device Classification Panel recommends that heel protectors be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that skin pressure protectors be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying skin

pressure protectors into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

24. The Anesthesiology Device Classification Panel recommends that the connecting flexible aspirating tubes, rigid suction tips, and sterile specimen traps be classified into class I. The Anesthesiology Device Classification Panel recommends that suction regulators (with gauge), be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that suction catheters and tips, vacuum collection bottles, and vacuum regulators, be classified into class I. The General and Plastic Surgery Device Classification Panel recommends that noninvasive tubing be classified into class I. The agency has determined that these devices are components of the wall vacuum powered operating room suction apparatus, a device that the General and Plastic Surgery Device Classification Panel recommended be classified into class II. Therefore, the agency is proposing a single regulation classifying vacuum powered body fluid suction apparatus into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

25. The General and Plastic Surgery Device Classification Panel recommends that packs, sterilization wrappers, bags and accessories be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that sterilization wraps be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying sterilization wraps into class II and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

26. The Dental Device Classification Panel recommends that ethylene oxide gas sterilizers be classified into class II. The General and Plastic Surgery Device Classification Panel recommends that ethylene oxide sterilizers be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that gas sterilizers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying ethylene oxide gas sterilizers into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

27. The Dental Device Classification Panel recommends that autoclaves be

classified into class II. The General and Plastic Surgery Device Classification Panel recommends that autoclave sterilizers be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that steam sterilizers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying steam sterilizers into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

28. The General and Plastic Surgery Device Classification Panel recommends that stretchers be classified into class I. The General Hospital and Personal Use Device Classification Panel recommends that hand-carried stretchers be classified into class I. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying hand-carried stretchers into class I and is publishing both Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

29. The Physical Medicine Device Classification Panel recommends that mechanical wheeled stretchers be classified into class I. The Anesthesiology Device Classification Panel recommends that patient carts be classified into class II. The General Hospital and Personal Use Device Classification Panel recommends that wheeled stretchers be classified into class II. The agency has determined that these devices are the same. Therefore, the agency is proposing a single regulation classifying wheeled stretchers into class II and is publishing the three Panel recommendations in a proposal appearing elsewhere in this issue of the Federal Register.

30. The General Hospital and Personal Use Device Classification Panel and other Panels listed below made classification recommendations concerning the following devices:

Device	Other panel
Nasal cannula.....	Anesthesiology.
Neonatal ventilator respirator.....	Anesthesiology.
Manual pulmonary resuscitator.....	Anesthesiology.
Neonatal invasive oxygen analyzer.....	Anesthesiology.
Oxygen mask.....	Anesthesiology.
Venturi oxygen mask.....	Anesthesiology.
Mechanical oxygen regulator.....	Anesthesiology.
Pediatric aerosol tent.....	Anesthesiology.
Inflation cuff.....	Cardiovascular.
Aneroid blood pressure manometer.....	Cardiovascular.
Mercury blood pressure manometer.....	Cardiovascular.
Manual cuff inflating air pump.....	Cardiovascular.
DC-powered stethoscope.....	Cardiovascular.
Mechanical stethoscope.....	Cardiovascular.
Invasive neonatal blood pressure monitor.....	Cardiovascular.
Ultrasonic/doppler neonatal blood pressure monitor.....	Cardiovascular.
Neonatal heart rate monitor.....	Cardiovascular.

Device	Other panel
Manual external cardiac compressor.	Cardiovascular.
Powered external cardiac compressor.	Cardiovascular.
Blood lancet.	General and Plastic Surgery.
Laminar airflow unit.	General and Plastic Surgery.
AC-powered operating room table.	General and Plastic Surgery.
Surgical isolation unit.	General and Plastic Surgery.
Operating room lamp.	General and Plastic Surgery.
Manual operating room table.	General and Plastic Surgery.
Surgical glove.	General and Plastic Surgery.
Dressing.	General and Plastic Surgery.
Operating room gown.	General and Plastic Surgery.
Kelly pad.	General and Plastic Surgery.
Ostomy drainage bag, with adhesive.	Gastroenterology and Urology.
Prophylactic (condom).	Obstetrical and Gynecology.
Wheeled gynecatic chair.	Physical Medicine.
Silicone chair cushion.	Physical Medicine.
Chemical cold pack.	Physical Medicine.
Chemical hot pack.	Physical Medicine.
Electric heating pad.	Physical Medicine.
Heat lamp.	Physical Medicine.
AC-powered flotation bed.	Physical Medicine.

At this time, FDA is not publishing the General Hospital and Personal Use Device Classification Panel's recommendations to classify the devices listed above. Those devices reviewed by the Cardiovascular Device Classification Panel were proposed for classification in the Federal Register of March 9, 1979 (44 FR 13284). With respect to the prophylactic (condom), FDA published the recommendations of this Panel and of the Obstetrical and Gynecological Device Classification Panel in the Federal Register of April 3, 1979 (44 FR 19894).

The Physical Medicine Device Classification Panel recommended that electric heating pads be classified as powered heating pads and proposed that the device be classified into class II. The Physical Medicine Device Classification Panel recommendation and a proposed classification regulation for powered heating pads will publish in the Federal Register in the near future. The agency will publish the other recommendations listed above and proposed classification regulations when it publishes the recommendations of the Anesthesiology Device Classification Panel, General and Plastic Surgery Device Classification Panel, and Gastroenterology and Urology Device Classification Panel.

Electrical Safety

For many of the devices that the Panel recommends be classified into class II (performance standards), the only aspect of the devices that needs to be addressed by a performance standard is

electrical safety, the Panel referred to two voluntary electrical safety standards that address safety problems presented by these devices (Refs. 1 and 2).

References

The following information has been placed in the office of the Hearing Clerk (HFA-305) (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Association for the Advancement of Medical Instrumentation, "American National Standard: Safe Current Limits for Electromedical Apparatus," ANSI/AAMI SCL 12/78, Association for the Advancement of Medical Instrumentation, Arlington, VA, 1978.

2. Underwriters Laboratory, "UL 544: Standard for Medical and Dental Equipment," Underwriters Laboratory, Northbrook, IL, 1972.

Environmental Impact

The FDA has carefully considered the environmental effects of proposed § 880.1 and of the proposed general hospital and personal use device classification regulations, and, because the proposed actions will not significantly affect the quality of the human environment, FDA has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk (HFA-305), Food and Drug Administration (address above).

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)), and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes that Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new Part 880, consisting of Subpart A, to read as follows:

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

Subpart A—General Provisions

Sec.

880.1 Scope.

Authority: Secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c and 701(a)).

Subpart A—General Provisions

§ 880.1 Scope.

(a) This part sets forth the classification of general hospital and personal use devices intended for human use.

(b) The identification of a device in a regulation in this part is not a precise description of every device that is, or

will be, subject to the regulation. A manufacturer who submits a premarket notification submission for a device under Part 807 of this chapter cannot show merely that the device is accurately described by the section title and identification provision of a regulation in this part, but shall state why the device is substantially equivalent to other devices, as required by § 807.87 of this chapter.

(c) To avoid duplicative listings, a general hospital and personal use device that has two or more types of uses (e.g., used both as a diagnostic device and as a therapeutic device) is listed in the subpart representing one use of the device, rather than in two or more subparts.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit one copy. Comments shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1268]

Medical Devices; Classification of Liquid Crystal Forehead Temperature Strips

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying liquid crystal forehead temperature strips into class II

(performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the recommendation of the Anesthesiology Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTAL INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of liquid crystal forehead temperature strips:

1. Identification: A liquid crystal forehead temperature strip is a device applied to the forehead that is used to indicate the presence or absence of fever, or to monitor body temperature changes. The device displays the color changes of heat sensitive liquid crystals corresponding to the variation in the surface temperature of the skin. The liquid crystals, which are cholesteric esters, are sealed in plastic. The General Hospital and Personal Use Device Classification Panel identified this generic type of device as the "forehead liquid crystal fever indicator." The Anesthesiology Device Classification Panel identified this generic type of device as the "self-contained temperature monitor."

2. Recommended classification: Class II (performance standards).
The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a high priority. The Anesthesiology Device Classification Panel recommends that

establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that liquid crystal forehead temperature strips be classified into class II because the Panel believes that performance standards are needed to assure that this device accurately shows the presence or absence of fever. The Panel believes that the accuracy of and any limitations of the device should be stated in the labeling.

The Panel recommends that the device labeling warn users to confirm body temperature by using alternative devices if there is any reason to suspect the accuracy of the device's temperature data. The Panel believes that general controls would not provide sufficient control over these characteristics. The Anesthesiology Device Classification Panel recommends that the device be classified into class II because the Panel believes that performance standards are needed to assure the accuracy of the forehead temperature data generated by the device, especially when the device is used for the detection of malignant hyperpyrexia (rapid rise in body temperature that occurs in some patients undergoing general anesthesia).

The Panel also believes that materials used in the device should meet a biocompatibility standard. The Panel recommends that the labeling of the device state whether the device is to be used for quantitative or qualitative measurement. The Panel believes that general controls would not provide sufficient control over these characteristics. Both Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Anesthesiology Device Classification Panel based its recommendation on presentations at the January 24, 1978 Panel meeting (Ref. 1).

The General Hospital and Personal Use Device Classification Panel had recommended that the device be classified into class III (premarket approval) at the May 22-23, 1978 Panel meeting because the Panel was unaware of any data correlating the forehead temperature with the body core temperature. The Panel reconsidered its recommendation at the November 6, 1978 Panel meeting and recommended that the device be classified into class II (performance standards). The Panel based its recommendation on presentations by guest speakers and several manufacturers of the device concerning the use of liquid crystal technology for forehead temperature monitoring. At the Panel meeting, the Panel also reviewed several articles in the literature. The information in the articles indicates that forehead temperature changes correspond to body core temperature changes (Refs. 2 through 4).

5. Risks to health: (a) Misdiagnosis and inappropriate therapy: If the device is inaccurate, misdiagnosis of fever or lack of fever, or misdiagnosis of malignant

hyperpyrexia, may occur and subsequent inappropriate therapy may result. (b) Skin or eye irritation: The chemicals in the device may cause skin or eye irritation in the patient.

Proposed Classification

The agency agrees with the recommendation of both Panels and is proposing that liquid crystal forehead temperature strips be classified into class II (performance standards). However, FDA is concerned that the room environment and the physical condition of the patient can affect the patient's forehead temperature and thus the effectiveness of the device. The clinical trials for one of these devices shows that the forehead temperature is significantly lower than the body core temperature (Ref. 3). These trials also show that the temperature difference varies from patient to patient and the average temperature difference is from 3° to 8° F. Because the normal forehead temperature varies from patient to patient and because the forehead temperature can be affected by external factors, FDA is concerned about possible false negative data (where the patient has a fever but the device indicates that the patient's temperature is normal) generated by the device. FDA is also concerned about whether adequate labeling can be written for use of the device by the lay public. The agency is not at this time requiring any mandatory labeling for the device; it will consider the appropriateness of such labeling when additional information is obtained. The agency believes that the concerns expressed above can adequately be controlled through a performance standard and appropriate labeling. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

FDA has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for "forehead liquid crystal fever indicators" and the recommendation of the Anesthesiology Device Classification Panel for "self-contained temperature monitors," and has concluded that this generic device should be named "liquid crystal forehead temperature strip" and be published in the part of the Code of Federal Regulations for general hospital and personal use devices.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 by adding new Subpart C and § 880.2200, to read as follows:

Subpart C—General Hospital and Personal Use Monitoring Devices

§ 880.2200 Liquid crystal forehead temperature strip.

(a) *Identification.* A liquid crystal forehead temperature strip is a device applied to the forehead that is used to indicate the presence or absence of fever, or to monitor body temperature changes. The device displays the color changes of heat sensitive liquid crystals corresponding to the variation in the surface temperature of the skin. The liquid crystals, which are cholesteric esters, are sealed in plastic.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1269]

Medical Devices; Classification of Bed-Patient Monitors

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying bed-patient monitors into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of bed-patient monitors:

1. Identification: A bed patient monitor is a battery-powered device placed under a mattress and used to indicate by an alarm or other signal when a patient attempts to leave the bed.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that bed-patient monitors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel believes that the requirements of the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(f)) and the misbranding provisions under section 502 of the act (21 U.S.C. 352) are sufficient to assure the reliability of the alarm and thus reduce the risk of patient injury.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device. The Panel had recommended at the March 2-3, 1978 Panel meeting that the device be classified into class II (performance standards) because the Panel believed that performance standards are needed to assure the reliability of the alarm. The Panel changed its recommendation at the November 6, 1978 Panel meeting and recommended that the device be classified into class I (general controls) with no exemptions because the agency informed the Panel that general controls, specifically the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)) and misbranding provisions under section 502 of the act (21 U.S.C. 352), were sufficient to assure the reliability of the alarm.

5. Risks to health: Patient injury: Failure of the alarm system to alert attendant personnel that the patient is attempting to leave the bed could allow the patient to be in a hazardous situation and suffer an injury.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that bed-patient monitors be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to control the risks to health. The agency believes that the requirements of the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(f)) and the misbranding provisions under section 502 of the act (21 U.S.C. 352) are sufficient to assure the reliability of the alarm. The good manufacturing provision regulation was published in the Federal Register of July 21, 1978 (43 FR 31508). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2400, to read as follows:

§ 880.2400 Bed-patient monitor.

(a) *Identification.* A bed-patient monitor is a battery-powered device placed under a mattress and used to indicate by an alarm or other signal when a patient attempts to leave the bed.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk document number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1270]

Medical Devices; Classification of Electronic Monitors for Gravity Flow Infusion Systems

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying electronic monitors for gravity flow infusion systems into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the recommendation of the Anesthesiology Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of electronic monitors for gravity flow infusion systems:

1. Identification: An electronic monitor for gravity flow infusion systems is a device used to monitor the amount of fluid being infused into a patient. The device consists of an electronic transducer and equipment for signal amplification, conditioning, and display. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "electronic gravity flow infusion line monitor." The Anesthesiology Device Classification Panel considered this generic type of device under the name "infusion rate monitor."

2. Recommended classification: Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Anesthesiology Device Classification Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that electronic monitors for gravity flow infusion systems be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard. The Panel also believes that performance standards are needed for this device to assure the accurate monitoring of parenterally administered fluids. The Panel believes that general controls would not provide sufficient control over these characteristics. The Anesthesiology Device Classification Panel recommends that this device be classified into class II because the Panel believes that the device must be

accurate and must not generate incorrect data that may lead to inappropriate therapy. Performance characteristics including the accuracy and any limitations of the device's function should be maintained at a generally accepted satisfactory level and should be made known to the user through labeling. Materials used in the fluid pathway of the device should meet a generally accepted satisfactory level of tissue and/or blood compatibility and be of such a nature that toxic substances will not be leached out in the infused fluids. The Panel believes that general controls would not provide sufficient control over these characteristics. Both Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel based their recommendations upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Inappropriate therapy: Inaccuracy of the device may result in the generation of inaccurate data that may lead to inappropriate therapy. Inaccurate administration data may allow unsafe levels of drugs to be administered. (b) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock. (c) Toxic reaction: If any material in the device leaches into the intravenous fluid, a toxic reaction may occur.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that electronic monitors for gravity flow infusion systems be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for "electronic gravity flow infusion line monitors" and the recommendation of the Anesthesiology Device Classification Panel for "infusion rate monitors" and has concluded that it is more appropriate for the device to be named "electronic monitor for gravity flow infusion systems" and to be published in the part of the Code of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2420, to read as follows:

§ 880.2420 Electronic monitor for gravity flow infusion systems.

(a) *Identification.* An electronic monitor for gravity flow infusion systems is a device used to monitor the amount of fluid being infused into a patient. The device consists of an electronic transducer and equipment for signal amplification, conditioning, and display.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk document number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.
William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1271]

Medical Devices; Classification of Neonatal Ventilatory Effort Monitors (Apnea Detectors)

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying neonatal ventilatory effort monitors (apnea detectors) into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of

the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of neonatal ventilatory effort monitors (apnea detectors):

1. *Identification:* A neonatal ventilatory effort monitor (apnea detector) is a device that monitors the ventilatory efforts (body movements necessary to move or attempt to move air in and out of the lungs) of an infant by means of a motion sensitive transducer, a change of thoracic impedance, or other suitable means. An abnormal pause in breathing efforts (interpreted as apnea) or a departure from a set rate of breathing efforts may be detected by the device, which then activates an alarm. The device may include movement transducers, thoracic impedance electrodes, and electronic signal amplification, conditioning, and display equipment. The Panel identified this generic type of device under the name "nursery apnea/respiration monitor."

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that neonatal ventilatory effort monitors (apnea detectors) be classified into class II because the Panel believes a performance standard is necessary for this device to control the electrical energy output properties of the impedance type of monitor, to assure the accurate determination of the respiration rate, and to assure that an abnormal change in the breathing effort rate is detected and not masked by other physiological signs, such as those from cardiac activity. The Panel believes that general controls would not

provide sufficient control over these characteristics. Although the device is potentially hazardous to health if it fails, the Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that the device have an indicator or an alarm that will notify the user if the sensor becomes dislodged. The Panel also recommends that the number of false alarms associated with the use of this device be minimized by a suitable design. The Panel recommends that the labeling contain specific information for the use of this device with infants and a warning of the limitations of this device. The Panel recommends that other monitors, such as cardiac monitors, be used in conjunction with this advice.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also reviewed the final report of the Emergency Care Research Institute concerning the hazards associated with this device (Ref. 1).

5. *Risks to health:* (a) Infant death: Poor device design, construction, or device malfunction may lead to the failure of the device to detect an abnormal pause in ventilatory efforts (apnea), which could result in infant death. (b) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock. (c) Inappropriate therapy: Inappropriate therapy may result if the device is not accurate in determining the breathing rate.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that neonatal ventilatory effort monitors (apnea detectors) be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Medical Devices; Classification of AC-Powered Spinal Fluid Pressure Monitors

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered spinal fluid

pressure monitors into class II (performance standards). FDA is also publishing the recommendation of the Anesthesiology Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Anesthesiology Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of AC-powered spinal fluid pressure monitors:

1. *Identification:* An AC-powered spinal fluid pressure monitor is an electrically powered device used to measure the spinal fluid pressure by use of a transducer, which converts the spinal fluid pressure into an electrical signal. The device includes signal amplification, conditioning and display equipment.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that AC-powered spinal fluid pressure monitors be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard. The Panel believes that a performance standard is needed to ensure that the materials used in the transducer are biocompatible. The Panel believes that the transducer must be sterilizable to reduce the risk of infection. The Panel also believes that a performance

standard must ensure that the device is accurate to prevent generation of erroneous data which might lead to inappropriate therapy. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* (a) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock. (b) Infection: If the device is unable to be sterilized because of poor design or inappropriate materials, it may introduce microorganisms that could cause infection in the patient. (c) Inappropriate therapy: Inaccuracy of the device may result in the generation of incorrect data that may lead to inappropriate therapy. (d) Adverse tissue reaction: Certain materials in the device may not be compatible with living tissue or body fluids and could cause an adverse tissue reaction.

Proposed Classification

FDA agrees with the recommendation of the Anesthesiology Device Classification Panel and is proposing that AC-powered spinal fluid pressure monitors be classified into class II (performance standards). The agency has concluded that this device should be published in the part of the Code of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device. Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2460, to read as follows:

§ 880.2460 AC-powered spinal fluid pressure monitor.

(a) *Identification.* An AC-powered spinal fluid pressure monitor is an electrically powered device used to measure the spinal fluid pressure by the use of a transducer, which converts spinal fluid pressure into an electrical signal. The device includes signal

amplification, conditioning, and display equipment.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m.; Monday through Friday.

Dated: August 9, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1273]

Medical Devices; Classification of Spinal Fluid Pressure Manometers

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying spinal fluid pressure manometers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the recommendation of the Anesthesiology Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTAL INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of spinal fluid pressure manometers:

1. Identification: A spinal fluid manometer is a device used to measure the spinal fluid pressure. The device uses a hollow needle, which is inserted into the spinal column fluid space, to connect the spinal fluid to a graduated column so that the pressure can be measured by reading the height of the fluid. The General Hospital and Personal Use Device Classification Panel identified this generic type of device as "spinal pressure manometer." The Anesthesiology Device Classification Panel identified this generic type of device as "spinal fluid pressure monitor."

2. Recommended classification: Class II (performance standards). The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel recommend that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel recommend that spinal fluid pressure manometers be classified into class II because the Panels believe that the accuracy of the device must be controlled to assure that the device correctly displays the patient's spinal fluid pressure. The Panels also believe that a biocompatibility standard is needed for materials used in the device to avoid an adverse tissue reaction. The Panels believe that the device must be sterilizable to reduce the risk of infection. The Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device. The General Hospital and Personal Use Device Classification Panel had recommended at the February 7-8, 1977 Panel meeting that the

device be classified into class I (general controls). The Panel reconsidered its recommendation at the November 6, 1978 Panel meeting and, upon review of the Anesthesiology Device Classification Panel recommendation, recommended that the device be classified into class II (performance standards) because the Panel believes that a standard is needed to assure the accuracy and biocompatibility of the device.

5. Risks to health: (a) Infection: If the device is unable to be sterilized because of poor design or inappropriate materials, it may introduce microorganisms that could cause infection in the patient. (b) Inappropriate therapy: Generation of inaccurate spinal fluid pressure data may lead to inappropriate therapy. (c) Adverse tissue reaction: Certain materials in the device may not be compatible with living tissue or body fluids and could cause an adverse tissue reaction.

Proposed Classification

FDA agrees with the recommendation of the General Hospital and Personal Use Device Classification Panel and the recommendation of the Anesthesiology Device Classification Panel and is proposing that spinal fluid pressure manometers be classified into class II (performance standards). The agency has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel for spinal pressure manometers and the Anesthesiology Device Classification Panel for spinal fluid pressure monitors, and has concluded that it would be more appropriate for the generic device to be named "spinal fluid pressure manometer" and published in the part of the Code of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. The agency believes that the accuracy and reproducibility of the spinal fluid pressure data generated by the device must be controlled through a performance standard to avoid possible inappropriate therapy. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2500, to read as follows:

§ 880.2500 Spinal fluid pressure manometer.

(a) *Identification.* A spinal fluid pressure manometer is a device used to measure spinal fluid pressure. The device uses a hollow needle, which is inserted into the spinal column fluid space, to connect the spinal fluid to a graduated column so that the pressure can be measured by reading the height of the fluid.

(b) *Classification.* Class I (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk document number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1274]

Medical Devices; Classification of Stand-On Patient Scales

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying stand-on patient scales into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of stand-on patient scales:

1. Identification: A stand-on patient scale is a device used to weigh a patient who is able to stand on the scale platform. The Panel identified this generic type of device under the name "body weight scale".

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification regulations under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that stand-on patient scales be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification regulations under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the GMP regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. In addition, the Panel recommends that the labeling state the accuracy of the device and how frequently the device should be recalibrated.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the stand-on patient scale be classified into class I (general controls). The

agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a stand-on patient scale be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a stand-on patient scale, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a stand-on patient scale. The agency does not, at this time, anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a stand-on patient scale be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a stand-on patient scale must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that

manufacturers of a stand-on patient scale must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2700, to read as follows:

§ 880.2700 Stand-on patient scale.

(a) *Identification.* A stand-on patient scale is a device used to weigh a patient who is able to stand on the scale platform.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complain files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1275]

Medical Devices; Classification of Patient Scales

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical patient scales into class I (general controls) and AC-powered patient scales into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that these devices be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the devices. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of patient scales:

1. Identification: A patient scale is a device used to measure the weight of a patient who cannot stand on a scale. This generic device includes devices placed under a bed or chair to weigh both the support and the patient, devices where the patient is lifted by a sling from a bed to be weighed, and devices where the patient is placed on the scale platform to be weighed. The device may operate mechanically or it may be AC-powered and may include transducers, electronic signal amplification, conditioning and display equipment.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions for these devices.

3. Summary of reasons for recommendation: The Panel recommends that patient scales be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. The Panel also recommends that the labeling of the devices state the accuracy of the devices, and how frequently the devices should be recalibrated.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the devices.

5. Risks to health: (a) Patient injury: If the sling or lifting mechanism is defective, the patient could be dropped and injured. (b) Inappropriate therapy: If the device is inaccurate, inappropriate therapy could be administered to the patient. (c) Electrical shock: If the AC-powered patient scales is not designed or constructed properly or if it malfunctions, users can receive an electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation as it applies to mechanical patient scales and is proposing that mechanical patient scales be classified into class I (general controls) with no exemptions. FDA believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of mechanical patient scales. However, the agency believes that a performance standard is necessary for AC-powered patient scales because the electrical properties of the device must be controlled through an electrical safety standard. Therefore, the agency is proposing that AC-powered patient scales be classified into class II (performance standards). The agency believes that general controls alone are insufficient to control the risks to health presented by the AC-powered device. A performance standard would provide reasonable assurance of the safety and effectiveness of the AC-powered device. The agency also believes that there is sufficient information to establish a performance standard for the AC-powered patient scale.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2720, to read as follows:

§ 880.2720 Patient scale.

(a) *Identification.* A patient scale is a device used to measure the weight of a patient who cannot stand on a scale. This generic device includes devices placed under a bed or chair to weigh both the support and the patient, devices where the patient is lifted by a sling from a bed to be weighed, and devices where the patient is placed on the scale platform to be weighed. The device may operate mechanically or it may be AC-powered and may include transducers, electronic signal amplification, conditioning and display equipment.

(b) *Classification.* (1) Class I (general controls) for a mechanical patient scale. (2) Class II (performance standards) for an AC-powered patient scale.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

[Docket No. 78N-1276]

Medical Devices; Classification of Surgical Sponge Scales

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying surgical sponge scales into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of surgical sponge scales:

1. Identification: A surgical sponge scale is a nonelectrically powered device used to weigh surgical sponges that have been used to absorb blood during surgery so that, by comparison with the known dry weight of the sponges, an estimate may be made of the blood lost by a patient during surgery. The Panel identified this generic type of device under the name "sponge scale."

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification regulations under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that surgical sponge scales be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes the FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel recommends that information regarding the accuracy of the device be included in the labeling.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members'

personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that surgical sponge scales be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a surgical sponge scale be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a surgical sponge scale, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a surgical sponge scale. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a surgical sponge scale be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device.

The agency believes, however, that manufacturers of a surgical sponge scale must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a surgical sponge scale must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulations is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in subpart C by adding new § 880.2740, to read as follows:

§ 880.2740 Surgical sponge scale.

(a) *Identification.* A surgical sponge scale is a nonelectrically powered device used to weigh surgical sponges that have been used to absorb blood during surgery so that, by comparison with the known dry weight of the sponges, an estimate may be made of the blood lost by a patient during surgery.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1277]

Medical Devices; Classification of Sterilization Indicators

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying sterilization indicators into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of sterilization indicators:

1. Identification: A sterilization indicator is a device used to show by visible or measurable evidence that a treated medical product was sufficiently exposed to a

sterilization agent to allow the user to assume that the product is sterile. The Panel identified this generic type of device under the names "biological sterilization indicator" and "physical/chemical sterilization indicator".

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that sterilization indicators be classified into class II because the Panel believes that the accuracy and effectiveness of the device must be controlled through a standard. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel also recommends that the labeling of the device include explicit instructions for use and include a description of any performance limitations.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Infection: If the sterilization indicator shows that sterility was achieved before the product has been exposed sufficiently to the sterilization agent to ensure sterility, a nonsterile product may be used in treating a patient, causing an infection. (b) Adverse effect to patient from a deteriorated product: If the sterilization indicator does not show sterility until the treated products have received excessive exposure to a sterilization agent, the treated products may deteriorate and the resulting physical or chemical changes in the product may adversely affect the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that sterilization indicators be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2800, to read as follows:

§ 880.2800 Sterilization indicator.

(a) *Identification.* A sterilization indicator is a device used to show by visible or measurable evidence that a treated medical product was sufficiently exposed to a sterilization agent to allow the user to assume that the product is sterile.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1279]

Medical Devices; Classification of Clinical Color Change Thermometers

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying clinical color change thermometers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. FDA is also publishing the recommendation of the General and Plastic Surgery Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken

under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of clinical color change thermometers:

1. Identification: A clinical color change thermometer is a device used to measure oral or rectal body temperature by displaying the color changes of heat sensitive liquid crystals. It is a disposable device with the liquid crystals (cholesteric esters) sealed in plastic at the end of a plastic strip. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name of "clinical color change thermometer." The General and Plastic Surgery Device Classification Panel identified this generic type of device as the "liquid crystal thermometer."

2. Recommended classification: The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class II (performance standards) and that establishing a performance standard for this device be a medium priority. The General and Plastic Surgery Device Classification Panel recommends that this device be classified into class I (general controls) and that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i).

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that clinical color change thermometers be classified into class II because the Panel believes that the accuracy of the device must be controlled through a standard. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes

that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that the labeling state the accuracy of the device. The accuracy of the device may be affected by high humidity, heat, or prolonged storage. Therefore, the Panel also recommends that the labeling state how the device should be stored until use. The General and Plastic Surgery Device Classification Panel recommends that this device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This Panel also recommends that the device be exempt from records and reports requirements under section 519 of the act because the Panel believes that FDA does not need to receive records and reports for this device.

4. Summary of data on which the recommendation is based: Both Panels based their recommendations upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel identified the following risk to health: (a) Misdiagnosis and inappropriate therapy: If the device is inaccurate, a potential exists for misdiagnosis and subsequent inappropriate therapy. The General and Plastic Surgery Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with the recommendation of the General Hospital and Personal Use Device Classification Panel and is proposing that the clinical color change thermometer be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for clinical color change thermometers and the recommendations of the General and Plastic Surgery Device Classification Panel for liquid crystal thermometers, and has concluded that it is more appropriate for the device to be named the "clinical color change thermometer" and to be published in the Part of the Code of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

The agency disagrees with the recommendation of the General and Plastic Surgery Device Classification

Panel that clinical color change thermometers be classified into class I because performance standards are necessary to assure the accuracy of the device in its measurement of body temperature. Because the agency has decided that the clinical color change thermometer should be classified in class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the recommendation of the General and Plastic Surgery Device Classification Panel that this device be exempt from records and reports requirements under section 519 of the act (21 U.S.C. 360i). Even if the device were classified into class I, the agency could not exempt manufacturers of the device from records and reports requirements under section 519 of the act because FDA believes that the agency cannot properly issue exemptions from regulations that have not yet been promulgated. When the agency proposes device regulations that include records and reports requirements, interested persons can submit comments requesting that certain classes of manufacturers be exempted from those requirements, and FDA will issue any exemptions that are appropriate. At this time, FDA is only proposing exemptions from records and reports requirements in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). The agency is not proposing to exempt manufacturers of the clinical color change thermometer from the records and reports requirements in the GMP regulation, because compliance with these requirements is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation, including the records and reports provisions, will help prevent production of clinical color change thermometers having defects that could harm users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2900, to read as follows:

§ 880.2900 Clinical color change thermometer.

(a) *Identification.* A clinical color change thermometer is a device used to measure oral or rectal body temperature by displaying the color changes of heat sensitive liquid crystals. It is a

disposable device with the liquid crystals (cholesteric esters) sealed in plastic at the end of a plastic strip.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26045 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1280]

Medical Devices; Classification of Clinical Electronic Thermometers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying clinical electronic thermometers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel, the Anesthesiology Device Classification Panel, and the General and Plastic Surgery Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Anesthesiology Device Classification Panel, and the General and Plastic Surgery Device Classification Panel, FDA advisory committee, made the following recommendations with respect to the classification of clinical electronic thermometers:

1. *Identification:* A clinical electronic thermometer is a device used to measure the body temperature of a patient by means of a transducer coupled with an electronic signal amplification, conditioning, and display unit. The transducer may be in a detachable probe with or without a disposable cover. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "clinical electronic thermometer." The Anesthesiology Device Classification Panel and the General and Plastic Surgery Device Classification Panel identified this generic type of device under the name "temperature monitor."

2. *Recommended classification:* Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Anesthesiology Device Classification Panel and the General and Plastic Surgery Device Classification Panel recommend that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel recommend that clinical electronic thermometers be classified into class II because the Panels believe that the accuracy of the device must be controlled through a standard. The General Hospital and Personal Use Device Classification Panel believes that a standard is also needed to control the materials used in the probe to reduce the risk of puncturing the colon and the Panel also recommends that the labeling state the accuracy of the device and include instructions for proper cleaning. The Anesthesiology Device Classification Panel recommends that this device be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard to assure that the patient is not

shocked or burned by excessive leakage current through the probe. This Panel believes that a standard is needed to control the design and materials of the probe to prevent tissue damage due to improper size or shape. The Panel also recommends that the use of the device be restricted to trained personnel under the direction of a physician. All three Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panels based their recommendations upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel identified the following risk to health: (a) Misdiagnosis and inappropriate therapy: If the device is inaccurate, erroneous readings could result that may lead to misdiagnosis and inappropriate therapy. The General Hospital and Personal Use Device Classification Panel identified the following additional risks to health: (b) Infection: If the disposable covers for the probe are not impervious to microorganisms and/or are not easy to attach and remove, there is a possibility of infection in the patient. (c) Puncture of colon: If the rectal probe and cover are not made of a soft material, puncture of the colon may result. The Anesthesiology Device Classification Panel identified the following risks to health: (d) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock. (e) Tissue damage: Improper size or shape of the probe may result in tissue damage.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that clinical electronic thermometers be classified into class II (performance standards). The agency has reviewed the recommendation of the Anesthesiology Device Classification Panel and the recommendation of the General and Plastic Surgery Device Classification Panel for temperature monitors, and the recommendation of the General Hospital and Personal Use Device Classification Panel for clinical electronic thermometers, and has concluded that it is more appropriate for the device to be named the "clinical electronic thermometer" and to be published in the part of the Code of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard

would provide reasonable assurance of the safety and effectiveness of the device. The agency believes that there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2910, to read as follows:

§ 880.2910 Clinical electronic thermometer.

(a) *Identification.* A clinical electronic thermometer is a device used to measure the body temperature of a patient by means of a transducer coupled with an electronic signal amplification, conditioning, and display unit. The transducer may be in a detachable probe with or without a disposable cover.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-26046 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1281]

Medical Devices; Classification of Clinical Mercury Thermometers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying clinical mercury thermometers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into

class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. FDA is also publishing the recommendation of the General and Plastic Surgery Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendation with respect to the classification of clinical mercury thermometers:

1. *Identification:* A clinical mercury thermometer is a device used to measure oral, rectal, or axillary body temperature using the thermal expansion of mercury. The General and Plastic Surgery Device Classification Panel identified this generic type of device under the name "fluid column thermometer." The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "clinical mercury thermometer."

2. *Recommended classification:* The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class II (performance standards) and that establishing a performance standard for this device be a medium priority. The General and Plastic Surgery Device Classification Panel

recommends that this device be classified into class I (general controls) and that this device be exempt from records and reports regulations under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i).

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class II because the Panel believes that the accuracy of the device must be controlled through a standard to assure the correct measurement of the patient's body temperature. The Panel believes that general controls would not provide sufficient control over this characteristic.

The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that the labeling include a warning against ingestion of mercury if the thermometer breaks. The Panel also recommends that the labeling state the accuracy of the device.

The General and Plastic Surgery Device Classification Panel recommends that the device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from records and reports regulations under section 519 of the act because the Panel believes that FDA does not need to receive records and reports for this device.

4. Summary of data on which the recommendation is based: Both Panels based their recommendations upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel identified the following risks to health: (a) Misdiagnosis and inappropriate therapy: if the device is inaccurate, a potential exists for misdiagnosis and subsequent inappropriate treatment. (b) Mercury poisoning: If the thermometer breaks and mercury is ingested, mercury poisoning could result. The General and Plastic Surgery Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with the recommendation of the General Hospital and Personal Use Device Classification Panel and is proposing that clinical mercury thermometers be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for clinical mercury thermometers and the recommendation of the General and Plastic Surgery Device Classification Panel for fluid column thermometers, and has concluded that it is more appropriate for the device to be named the "clinical mercury thermometer" and to be published in the part of the Code

of Federal Regulations for general hospital and personal use devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

The agency disagrees with the recommendation of the General and Plastic Surgery Device Classification Panel that clinical mercury thermometers be classified into class I because FDA believes that performance standards are necessary to assure the accuracy of the device in its measurement of body temperature.

Because the agency has decided that clinical mercury thermometers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the recommendation of the General and Plastic Surgery Device Classification Panel that this device be exempt from records and reports requirements under section 519 of the act (21 U.S.C. 360i). Even if the device were classified into class I, the agency could not exempt manufacturers of the device from records and reports requirements under section 519 of the act because FDA believes that the agency cannot properly issue exemptions from regulations that have not yet been promulgated. When the agency proposes device regulations that include records and reports requirements, interested persons can submit comments requesting that certain classes of manufacturers be exempted from those requirements, and FDA will issue any exemptions that are appropriate. At this time, FDA is only proposing exemptions from records and reports requirements in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508).

The agency is not proposing to exempt manufacturers of the clinical mercury thermometer from the records and reports requirements in the GMP regulation, because compliance with these requirements is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation, including the records and reports provision, will help prevent production of clinical mercury thermometers having defects that could harm users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.2920, to read as follows:

§ 880.2920 Clinical mercury thermometer.

(a) *Identification.* A clinical mercury thermometer is a device used to measure oral, rectal, or axillary body temperature using the thermal expansion of mercury.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26047 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1284]

Medical Devices; Classification of I.V. Containers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying I.V. containers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of I.V. containers.

1. Identification: An I.V. container is a sterile container for a fluid mixture to be administered to a patient. The Panel identified this generic type of device under the name "empty admixture container."

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that I.V. containers be classified into class II because the Panel believes that standards are needed to assure that the material used in the device does not leach toxic substance into the liquid mixtures. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also recommends that the device be used only by, or on the order of, a physician. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Adverse tissue reactions: If the plastic material of the container leaches toxic substances into the liquid, an adverse tissue reaction could occur when the liquid enters the patient. (b) Infection: If the device is not sterile, pathogenic organisms could cause an infection in the patient. (c) Inappropriate therapy: If a part of the liquid mixture adheres to the walls of the container, the patient could receive inappropriate therapy.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that I.V. containers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 by adding Subpart F and new § 880.5025, to read as follows:

Subpart F—General Hospital and Personal Use Therapeutic Devices

§ 880.5025 I.V. container.

(a) *Identification.* An I.V. container is a container for a fluid mixture to be administered to a patient.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1285]

Medical Devices; Classification of Recirculating Air Cleaners

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for

public comments a proposed regulation classifying recirculating air cleaners into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of recirculating air cleaners:

1. Identification: A recirculating air cleaner is a device used to remove particles from the air by electrostatic precipitation or filtration. The Panel identified this generic type of device under the name "recirculating room air cleaner".

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that recirculating air cleaners be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard to prevent electrical shock and unnecessary electrical arcing, which produces ozone. The Panel also believes a standard is needed to assure that the device dissipates heat adequately so that burns are avoided. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes

that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. Also, the Panel considered an article evaluating high efficiency particulate air filters, which was prepared by the Wilmot Castle Co. under a contract with the Jet Propulsion Laboratory (Ref. 1). The Article concludes that: (a) Areas of particulate penetration may be related to increased velocity of particles through holes in the filter media or frames; (b) the efficiency level of a filter should be tested before each use; and (c) high-efficiency particulate air filters having an efficiency rating exceeding 99.99 percent can remove from a gas stream all particles of a size greater than 0.5 micrometers.

5. Risks to health: (a) Inappropriate therapy: Inappropriate therapy may result if the device is used for therapeutic purposes and does not remove enough particles from the air. Ineffective particle removal may result from an insufficient electrical charge, in the case of the electrostatic type of cleaner, or from a dirty filter, in the case of the filter type of air cleaner. (b) Burns: If the device does not dissipate heat adequately, it may cause skin burns upon contact. (c) Ozone toxicity: If there is electrical arcing in the electrostatic air cleaner, the device will produce ozone and thus may cause ozone toxicity. (d) Electrical shock: Improper device design and construction or device malfunction can result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the recirculating air cleaner be classified into class II (performance standards). FDA believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. FDA is concerned about the effectiveness of the device in removing particles from the air. The literature reports that the devices can be very effective in removing particles from the air (Ref. 1). Therefore, FDA believes a performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

[Docket No. 78N-1286]

Medical Devices; Classification of Urine Collection Bags for Infants

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying urine collection bags for infants into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken

under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of urine collection bags for infants:

1. Identification: A urine collection bag for an infant is a disposable device attached to the infant by an adhesive material and used to collect the infant's urine. The Panel identified this generic type of device under the name "newborn urine collection bag."
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.
3. Summary of reasons for recommendation: The Panel recommends that urine collection bags for infants be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.
4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device.
5. Risks to health: Skin irritation: The adhesive material used to attach the bag may irritate the skin.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that urine collection bags for infants be classified into class I (general controls) with no exemptions. The FDA is concerned that the adhesive material used in the bag may irritate the skin. However, the FDA believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5065, to read as follows:

§ 880.5065 Urine collection bag for an infant.

(a) *Identification.* A urine collection bag for an infant is a disposable device attached to the infant by an adhesive material and used to collect the infant's urine.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1287]

Medical Devices; Classification of Elastic Bandages

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying elastic bandages into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of elastic bandages:

1. Identification: An elastic bandage is a device consisting of either a long flat strip or a tube of elasticized material that is used to support and compress a part of a patient's body.
2. Recommended classification: Class I (general controls): The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).
3. Summary of reasons for recommendation: The Panel recommends that elastic bandages be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel recommends that the device be nonirritating and porous and that it provide proper support by exerting uniform pressure. The Panel recommends that the labeling describe the proper usage of the device and state whether it is sterilizable.
4. Summary of data on which the recommendation is based: The Panel based its recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.
5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that elastic bandages be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of an elastic bandage be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an elastic bandage, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an elastic bandage. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of an elastic bandage be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an

elastic bandage, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an elastic bandage must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of an elastic bandage that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5075, to read as follows:

§ 880.5075 Elastic bandage.

(a) *Identification.* An elastic bandage is a device consisting of either a long flat strip or a tube of elasticized material that is used to support and compress a part of a patient's body.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1288]

Medical Devices; Classification of Liquid Bandages

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying liquid bandages into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20856.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of liquid bandages:

1. *Identification:* A liquid bandage is a sterile liquid or semiliquid used to cover an opening in the skin or as a dressing for burns. The device is also used as a topical skin protectant.

2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.

3. *Summary of reasons for recommendation:* The Panel recommends that liquid bandages be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the device be hypoallergenic to reduce the risk of skin irritation, and that it be porous to allow the passage of vapor.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* (a) Skin irritation: The device may irritate the skin. (b) Infection: If the device is not sterile, an infection could occur.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the liquid bandage be classified into class I (general controls) with no exemptions. The agency believes general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5090, to read as follows:

§ 880.5090 Liquid bandage.

(a) *Identification.* A liquid bandage is a sterile liquid or semiliquid used to cover an opening in the skin or as a dressing for burns. The device is also used as a topical skin protectant.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20856, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[21 CFR Part 880]

[Docket No. 78N-1289]

Medical Devices; Classification of AC-Powered Adjustable Hospital Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered adjustable hospital beds into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Springs, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of AC-powered adjustable hospital beds:

1. *Identification:* An AC-powered adjustable hospital bed is a device consisting

of a bed with a built-in electric motor and remote controls that can be operated by the patient to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. *Summary of reasons for recommendation:* The Panel recommends that the AC-powered adjustable hospital bed be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standards. The Panel also believes that standards are needed to assure that the device's controls are readily accessible to the patient and do not require the patient to lean over the bed's side to manipulate them; that operation of the device's controls require minimal physical effort, even by geriatric and arthritic patients; that the device has a manual override in the event of a power failure; and that the side rails have a safety lock. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* (a) Electrical shock: Improper design and construction or device malfunction can result in electrical shock. (b) Patient falls and injuries: If the side rail latch fails or if the patient must lean over the bed's side to operate the device's controls, the patient could fall from the bed and be injured.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the AC-powered adjustable hospital beds be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5100, to read as follows:

§ 880.5100 AC-powered adjustable hospital bed.

(a) *Identification.* An AC-powered adjustable hospital bed is a device consisting of a bed with a built-in electric motor and remote controls that can be operated by the patient to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

Medical Devices; Classification of Hydraulic Adjustable Hospital Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hydraulic adjustable hospital beds into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of hydraulic adjustable hospital beds:

1. Identification: A hydraulic adjustable hospital bed is a device consisting of a bed with a hydraulic mechanism operated by an attendant to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.
2. Recommendation classification: Class I (general controls). The Panel recommends no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that the hydraulic adjustable hospital bed be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the side rails have a safety lock.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Patient falls and injuries: If the side rail latch fails, the patient could fall from the bed and be injured.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the hydraulic adjustable hospital bed be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5110, to read as follows:

§ 880.5110 Hydraulic adjustable hospital bed.

(a) *Identification.* A hydraulic adjustable hospital bed is a device consisting of a bed with a hydraulic mechanism operated by an attendant to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1291]

Medical Devices; Classification of Manual Adjustable Hospital Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying manual adjustable hospital beds into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of manual adjustable hospital beds:

1. Identification: A manual adjustable hospital bed is a device consisting of a bed with a manual mechanism operated by an attendant to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.
2. Recommended classification: Class I (general controls). The Panel recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(f)).
3. Summary of reasons for recommendation: The Panel recommends that manual adjustable hospital beds be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, this device.

5. Risks to health: Patient falls and injuries: If the side rail latch fails, the patient could fall from the bed and be injured.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that manual adjustable hospital beds be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a manual adjustable hospital bed be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act,

FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a manual adjustable hospital bed must still be required to comply with the complaint file requirement of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a manual adjustable hospital bed must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposed to amend Part 880 in Subpart F by adding new § 820.5120, to read as follows:

§ 820.5120 Manual adjustable hospital bed.

(a) *Identification.* A manual adjustable hospital bed is a device consisting of a bed with a manual mechanism operated by an attendant to adjust the height and surface contour of the bed. The device includes moveable and latchable side rails.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written

comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-1292]

Medical Devices; Classification of Infant Radiant Warmers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying infant radiant warmers into class III (premarket approval). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of infant radiant warmers:

1. Identification: An infant radiant warmer is a device consisting of an infrared heating element placed over an infant to maintain the infant's body temperature by means of radiant heat. The device may contain a temperature monitoring sensor, a heat output control mechanism to regulate the infant's body temperature, and an alarm to alert operators of the device's failure. The device may be placed over a pediatric hospital bed or it may be built into the bed as a complete unit. The Panel considered this generic type of device under the name "neonatal open bed with radiant heat."
2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.
3. Summary of reasons for recommendation: The Panel recommends that infant radiant warmers be classified into class III because the Panel believes that the device is life sustaining and life supporting and because sufficient scientific and medical data do not exist from which adequate performance standards governing the device's safety and effectiveness can be established. Sufficient information does not exist on the relationship between levels of infrared radiation and maintenance of a proper infant body temperature. The Panel believes that there is a lack of information to determine a safe maximum energy output from the infrared radiation to keep the infant warm and at the same time not to cause insensible water loss in the infant. The Panel believes that long-term studies on the effects of infrared radiation are needed to assess the possibility that the device causes infant eye damage. Therefore, the Panel recommends that the device be subject to premarket approval to ensure that manufacturers demonstrate satisfactory performance and that the device is safe and effective. In addition, the Panel recommends that the device be used only on the order of a physician.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, this device. Under contract with FDA, the Emergency Care Research Institute has developed a proposed standard for infant radiant warmers (Ref. 8). However, this standard does not address the concerns identified by the Panel for classifying the product in class III. The proposed standard states that the maximum energy output of the device should be stated in the labeling of the device. However, the proposed standard does not recommend an upper limit on the energy output of the device, an omission which the Panel regards as a serious deficiency. The

Panel has discussed this device at several Panel meetings (August 23, 1976, October 3, 1977, and May 22-23, 1978) and has consistently concluded that there is insufficient information to establish performance standards for the device.

5. Risks to health: (a) Electrical shock: Improper design and construction or device malfunction can result in electrical shock. (b) Possible eye damage: The long-term effects of infrared radiation on the infant eye are unknown. (c) Patient injury: If the device is not designed for stability, it may fall and injure the infant. If the energy output of the device is too high, it could burn the infant. (d) Hospital staff burns: If the device is constructed of material that absorbs radiant heat, it could burn hospital staff. (e) Insensible (not easily perceived) water loss: Radiant heat causes vessel dilation, which in turn may produce insensible water loss in an infant. (f) Hyperthermia or hypothermia: If the temperature sensor or probe becomes dislodged or is improperly placed, hyperthermia or hypothermia in the infant could result.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that infant radiant warmers be classified into class III (premarket approval). The agency has reviewed the Panel recommendation and has obtained additional data and information describing the application of radiant heat to minimize heat loss in infants. A lack of information in the literature substantiates the Panel's belief that there is insufficient information to determine the relationship between the level of infrared radiation and maintenance of a proper body temperature in the infant. The literature confirms the Panel's concern that radiant heat may cause insensible water loss in infants. Williams and Oh show that insensible water loss in newborn infants placed under a radiant warmer is significantly greater than the insensible water loss of infants placed in a standard incubator (Ref. 1). Similar results were found by Wu and Hodgman in their studies comparing insensible water loss in infants of different birthweights. Their studies show that insensible water loss increases when the infants are exposed to radiant heat. Also, insensible water loss is greater in infants with birthweights lower than 1500 grams (g) than it is in infants with birthweights of 1500 g or more (Ref. 2). The Panel has also expressed concern about possible damage due to radiant heat. There is disagreement in the literature about whether there is enough data to determine the risk of retinal injury from infrared radiation. One article that evaluates radiant warmers concludes that although the infrared radiation emitted by the warmers is

entirely absorbed by the cornea of the eye, radiation exposure of up to 0.3 watts per square centimeter (W/cm^2) appears to be a safe limit for an infant under a radiant warmer, because the infant's blinking prevents the corneal epithelium from drying out. These studies also show that $0.04 W/cm^2$ of near infrared radiation (wavelengths from 0.7 to 3.0 micrometers) for 12 minutes is a safe limit for an infant under a radiant warmer. These studies show, however, that high intensity near infrared radiation that is focused on the retina for a sufficient length of time can cause retinal damage (Ref. 3). Another article that evaluates radiant warmers warns that until more is known about the biological effects of infrared radiation on infants, these devices should be used with caution and with consideration of whether the benefits outweigh the risks. The article mentions such effects as hyperthermia, insensible water loss, burns, and potential eye damage. The article states that measurements of near infrared emissions still need to be done for most radiant warmers; that these measurements are needed to evaluate the risk of retinal damage; and that further research is needed to determine the levels of infrared radiation that could cause retinal injury (Ref. 4). The literature also describes frequent mechanical failures, such as alarm failure or detachment of parts, with these devices (Refs. 3, 5, 6, and 7).

Therefore, the agency has concluded that the infant radiant warmer presents a potential unreasonable risk of illness or injury to the patient. In addition, the device is purported or represented to be for a use in supporting or sustaining human life. Insufficient information exists to determine that general controls alone can provide reasonable assurance of the safety and effectiveness of the device, and insufficient information exists to establish a performance standard that would provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposed to amend Part 880 in Subpart F by adding new § 880.5130, to read as follows:

§ 880.5130 Infant radiant warmers.

(a) *Identification.* An infant radiant warmer is a device consisting of an infrared heating element placed over an infant to maintain the infant's body temperature by means of radiant heat. The device may also contain a temperature monitoring sensor, a heat output control mechanism to regulate the infant's body temperature and an alarm to alert operators of the device's failure. The device may be placed over a pediatric hospital bed or it may be built into the bed as a complete unit.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

[Docket No. 78N-1293]

Medical Devices; Classification of Pediatric Hospital Beds

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pediatric hospital beds into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20856.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of pediatric hospital beds:

1. Identification: A pediatric (open) hospital bed is a device consisting of a bed or crib designed for the use of a pediatric patient, with fixed end rails and movable and latchable side rails. The contour or the bed surface may be adjustable.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.
3. Summary of reasons for recommendation: The Panel recommends that the pediatric hospital bed be classified into

class II because the Panel believes that a performance standard is necessary for this device to assure that the side rail does not drop suddenly and injure the infant. The Panel suggests that a safety device be installed to prevent the infant from lowering the side rail. In addition, the Panel recommends that certain characteristics of the bed, such as distance between the vertical slats of the safety rail and the distance between the mattress and bed frame, be standardized. Also, a standard should prohibit the use of lead paint on this device. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, this device. They also considered the results of a survey by the Consumer Product Safety Commission of crib-related injuries (Ref. 1). This survey showed the need for a standard governing certain characteristics of pediatric hospital beds. The Commission has published safety regulations for full-size cribs intended for use in the home (16 CFR Part 1508) and for non-full-size cribs intended for use in and around the home and for travel and other purposes (16 CFR Part 1509). Although these regulations do not apply to cribs intended for use in general pediatric care, many provisions of the regulations may be suitable for application to such cribs.

5. Risks to health: (a) Injury to infant: If the side rail drops suddenly, the infant could be injured. The infant could also be injured from falling out of the crib. (b) Suffocation: If there is too much space between the mattress and the bed frame, the infant's head may become lodged between the two and the infant may suffocate. (c) Head injuries: If the vertical slats of the rails are too far apart, the infant's head could become lodged between the slats and be injured. (d) Lead poisoning: If lead paint is used on the bed and the infant eats the paint, the infant may suffer lead poisoning.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the pediatric hospital bed be classified into class II (performance standards). The agency has reviewed the Panel recommendation and has obtained additional data and information regarding pediatric hospital beds. A review of the medical literature substantiates the need for developing a standard to assure the safety and effectiveness of pediatric hospital beds. A study of infant deaths in Wayne County, Michigan showed that during a 30-month period, 15 infants died of accidental asphyxia when their heads or necks got trapped between the vertical

crib slats or between the crib rail and mattress (Ref. 2).

The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

1. Nelson, Theresa. "Hazard Analysis of Injuries Relating to Cribs, Full Size Cribs (1504) and Portable Cribs (1929)," NHC-1504-75-H007, U.S. Consumer Product Safety Commission, Bureau of Epidemiology, December 1975.
2. Bass, M., "Asphyxial Crib Death," *New England Journal of Medicine*, 296(10):555-556, 1977.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5140, to read as follows:

§ 880.5140 Pediatric hospital bed.

(a) *Identification.* A pediatric hospital bed is a device consisting of a bed or crib designed for the use of a pediatric patient, with fixed end rails and movable and latchable side rails. The contour of the bed surface may be adjustable.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. [Docket No. 78N-1294]

Medical Devices; Classification of Nonpowered Flotation Therapy Mattresses

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nonpowered flotation therapy mattresses into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of

nonpowered flotation therapy mattresses:

1. Identification: A nonpower flotation therapy mattress is a mattress containing air or fluid designed to support a patient and avoid excess pressure on local body areas. The device is used to treat and prevent decubitus ulcers (bed sores). The Physical Medicine Device Classification Panel considered this generic type of device under the name "manual flotation therapy bed". The General Hospital and Personal Use Device Classification Panel considered this generic type of device under the name "silicone mattress."

2. Recommended classification: Class I (general controls). The General Hospital and Personal Use Device Classification Panel recommends that silicone mattresses be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The Physical Medicine Device Classification Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: Both Panels recommend that nonpowered flotation therapy mattresses be classified into class I (general controls) because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The General Hospital and Personal Use Device Classification Panel recommends that silicone mattresses be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The General Hospital and Personal Use Device Classification Panel also recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation are based: The Physical Medicine Device Classification Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on a review of the literature. Lilla, Friedrichs, and Vistnes describe the pressure distribution characteristics of water beds and their advantages over conventional hospital innerspring mattresses in the prevention of decubitus ulcers (Ref. 1). Dewis, Caplan, and Pache describe the beneficial effects of a water mattress on large chronic decubitus ulcers in a group of severely debilitated, bedridden patients (Ref. 2). The authors conclude that the obvious improvement outweighs the minor inconvenience involved in the use of water mattresses for these debilitated patients. The General Hospital and Personal Use Device Classification Panel members based their recommendation on their personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel

identified the following risk to health: Infection: If the mattress is difficult to clean, a risk of infection exists. The Physical Medicine Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with both Panels' recommendations and is proposing that nonpowered flotation therapy mattresses be classified into class I (general controls).

The agency disagrees with the recommendation of the Physical Medicine Device Classification Panel that there be no exemptions for this device. In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a nonpowered flotation therapy mattress be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a nonpowered flotation therapy mattress, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a nonpowered flotation therapy mattress. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a nonpowered flotation therapy mattress be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21

CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a nonpowered flotation therapy mattress must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a nonpowered flotation therapy mattress must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Lilla, J., R. Friedrichs, and L. Vistnes. "Flotation Mattress for Preventing and Treating Tissue Breakdown." *Geriatrics*, 30(9):71-75, 1975.

Medical Devices; Classification of Therapeutic Medical Binders

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying therapeutic medical binders into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the Obstetrical and Gynecological Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Obstetrical and Gynecological Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of therapeutic medical binders:

1. Identification: A therapeutic medical binder is a device, usually made of cloth, that can be secured by ties so that it support the underlying part of the body and/or holds a dressing in place. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the names "perineal binder" and "abdominal binder." The Obstetrical and Gynecological Device Classification Panel identified this generic type of device under the names "breast binder" and "abdominal binder."

2. Recommended classification: Class I (general controls). The General Hospital and Personal Use Device Classification Panel recommends that the device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The Obstetrical and Gynecological Device Classification Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: Both Panels recommend that therapeutic medical binders be classified into class I because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The General Hospital and Personal Use Device Classification Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation are based: Both Panel based their recommendations on their Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that therapeutic medical binders be classified into class I (general controls). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for the abdominal binder and the perineal binder and the recommendation of the Obstetrical and Gynecological Device Classification Panel for the breast binder and the Ob-Gyn abdominal binder, and has concluded that the device should be named "therapeutic medical binder" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

The agency disagrees with the recommendation of Obstetrical and Gynecological Device Classification Panel that there be no exemptions for his device.

In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a therapeutic medical binder be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a therapeutic medical binder, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a therapeutic medical binder. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a therapeutic medical binder be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a therapeutic medical binder, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a therapeutic medical binder must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a therapeutic medical binder that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5160, to read as follows:

§ 880.5160 Therapeutic medical binder.

(a) *Identification.* A therapeutic medical binder is a device, usually made of cloth, that can be secured by ties so that it supports the underlying part of the body and/or holds a dressing in place. This generic type of device

includes the abdominal binder, breast binder, and perineal binder.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter, if the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1297]

Medical Devices; Classification of Burn Sheets

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying burn sheets into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of burn sheets:

1. *Identification:* A burn sheet is a device made of a porous material that is wrapped around a burn victim to provide warmth or a barrier against contaminants.
2. *Recommended classification:* Class I (general controls). The Panel recommends that there be no exemptions.
3. *Summary of reasons for recommendation:* The Panel recommends that burn sheets be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the label state whether the device is nonflammable, does not shed, is sufficiently porous to allow passage of air and moisture but impermeable to fluids, does not tear, and is sterilizable. The Panel also recommends that the label have instructions for sterilizing the device.
4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.
5. *Risks to health—Infection:* If the device is labeled as sterile and it is not sterile, pathogenic organisms may cause an infection in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the burn sheet be classified into class I (general controls) with no exemptions. FDA agrees with the Panel's labeling recommendations. However, FDA is deferring a decision on whether the labeling should be voluntary or mandatory until additional information is obtained. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21

U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5180, to read as follows:

§ 880.5180 Burn sheet.

(a) *Identification.* A burn sheet is a device made of a porous material that is wrapped around a burn victim to provide warmth or a barrier against contaminants.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
*Acting Associate Commissioner for
Regulatory Affairs.*

[FR Doc. 79-26060 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1298]

Medical Devices; Classification of Intravascular Catheters

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intravascular catheters into class II (performance standards). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel and the Cardiovascular Device Classification Panel that intravascular catheters be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation

based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20856.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Cardiovascular Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of intravascular catheters:

1. *Identification:* An intravascular catheter is a device consisting of a slender tube constructed of metal, rubber, or plastic, that is inserted into the patient's vascular system for short-term use (less than 30 days) to sample blood, monitor blood pressure, or administer fluids intravenously. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "intravascular catheter" and "umbilical artery catheter." The Cardiovascular Device Classification Panel identified this generic type of device under the name "long-term vascular catheter."
2. *Recommended classification:* Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a low priority. The Cardiovascular Device Classification Panel recommends that establishing a performance standard for this device be a high priority.
3. *Summary of reasons for recommendation:* The General Hospital and Personal Use Device Classification Panel recommends that the intravascular catheter be classified into class II because the device contacts the patient's vascular system, and standards are necessary to assure that the material used in the device is compatible with body tissues and blood. The Panel also recommends that the device be flexible, sterile, and radiopaque, and that it have standard diameters. The Panel believes that general controls would not provide sufficient control over these characteristics. In addition, the labeling should state whether the device is sterilizable or sterile disposable, and state the internal and external diameters of the catheter. The Panel recommends that the device be used only by, or on the order of,

a physician. The Cardiovascular Device Classification Panel recommends that the long-term vascular catheter be classified into class II because the materials used in this life-supporting device should meet a generally accepted, satisfactory level of tissue and blood compatibility, surface finish, cleanliness, and mechanical performance. The long-term vascular catheter is in direct contact with the bloodstream for extended periods of time (but less than 30 days). In addition, the Panel believes that the catheter tip should be designed to minimize the risk of vessel perforation or rupture. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that, although the device is life supporting, sufficient scientific and medical data exist on the basis of which adequate standards can be established to assure the device's safety and effectiveness. Both panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations are based: Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Blood vessel occlusion: Breakage of the catheter due to poor mechanical properties of the device materials could cause blood vessel occlusion. (b) Adverse tissue reaction: If the material used in the device is not compatible with body tissue, an adverse tissue reaction could occur. (c) Thromboembolic complications: If the material used in the device is not compatible with blood, there could be thromboembolic complications. (d) Blood vessel rupture: If the catheter size is not indicated correctly, a catheter may be used that is too large for the blood vessel and rupture the vessel. Also, if the catheter is too stiff, it may rupture the vessel. (e) Infection: The introduction of pathogenic organisms associated with a nonsterile device may cause an infection in the patient.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that intravascular catheters be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for the intravascular catheter and the umbilical artery catheter, and the recommendation of the Cardiovascular Panel for the long-term vascular catheter and has concluded that the device should be named "intravascular catheter" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health

presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. Although this device is life supporting, the agency believes that premarket approval is unnecessary for this device because there is sufficient information to establish a standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5200, to read as follows:

§ 880.5200 Intravascular catheter.

(a) *Identification.* An intravascular catheter is a device consisting of a slender tube constructed of metal, rubber, or plastic, that is inserted into the patient's vascular system for short-term use (less than 30 days) to sample blood, monitor blood pressure, or administer fluids intravenously.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-28061 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1299]

Medical Devices; Classification of Intravenous Catheter Securement Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intravenous catheter securement devices into class I (general controls). FDA is also publishing the

recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Springs, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intravenous catheter securement devices:

1. Identification: An intravenous catheter securement device is a device with an adhesive backing that is placed over a needle or catheter and is used to keep the hub of the needle or the catheter flat and securely anchored to the skin.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that the intravenous catheter securement devices be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Inappropriate therapy: If the device is not securely attached to the skin, the needle or catheter could slip out of the blood vessel, resulting in loss of therapy that may be critical to the patient. (b) Skin irritation: The adhesive backing on the device may irritate the skin.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that intravenous catheter securement devices be classified into class I (general controls) with no exemptions. The agency is concerned about possible vessel trauma if the intravenous catheter securement device fails to anchor the needle or the catheter to the skin and the needle on the catheter moves after insertion. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5210, to read as follows:

§ 880.5210 Intravenous catheter securement device.

(a) *Identification.* An intravenous catheter securement device is a device with an adhesive backing that is placed over a needle or catheter and is used to keep the hub of the needle or the catheter flat and securely anchored to the skin.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1301]

Medical Devices; Classification of Adhesive Tapes and Bandages

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying adhesive tapes and bandages into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of adhesive tapes and bandages:

1. Identification: An adhesive tape and bandage is a device which consists of a strip of material or plastic, coated on one side with an adhesive, and may include a pad of surgical dressing without a disinfectant. The device is used to cover and protect wounds, to hold together the skin edges of a wound, to support an injured part of the body, and to secure objects to the skin. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "adhesive strip skin closure." The General and Plastic Surgery Device Classification Panel identified this generic type of device under the name "adhesive tape and bandage."

2. Recommended classification: Class I (general controls). Both Panels recommend that there be no exemptions.

3. Summary of reasons for recommendations: Both Panels recommend that the device be classified into class I because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. Also, the General Hospital and Personal Use Device Classification Panel recommends that the adhesive material used in the device be hypoallergenic, to reduce skin irritations, and that, the device be porous, to allow the passage of air and moisture.

4. Summary of data on which the recommendations are based: Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Both Panels identified the following risk to health: Skin irritation: The adhesive material used on the strip may irritate the skin.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that adhesive tapes and bandages be classified into class I (general controls) with no exemptions. The agency has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel for adhesive strip skin closures and the recommendation of the General and Plastic Surgery Device Classification Panel for adhesive tapes and bandages and has concluded that the device should be named "adhesive tapes and bandages" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency is concerned that if the device is labeled as sterile and it is not sterile, then there is a possibility of an infection in the patient. However, the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5240, to read as follows:

§ 880.5240 Adhesive tape and bandage.

(a) *Identification.* An adhesive tape and bandage is a device which consists of a strip of material or plastic, coated on one side with an adhesive, and may include a pad of surgical dressing without a disinfectant. The device is used to cover and protect wounds, to hold together the skin edges of a wound,

to support an injured part of the body, and to secure objects to the skin.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1302]

Medical Devices; Classification of Neonatal Eye Pads

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying neonatal eye pads into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: The written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices, (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia

Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of neonatal eye pads:

1. Identification: A neonatal eye pad is an opaque device used to cover and protect the eye of an infant during therapeutic procedures, such as phototherapy.
2. Recommended classification: Class I (general controls). The Panel recommends that this device, if it is not labeled as sterile, be exempt from the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that neonatal eye pads be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act, if the device is not labeled as sterile, because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that manufacturers voluntarily assure that the device is nonirritating and impenetrable to light rays. Furthermore, the Panel believes that proper cleaning instructions should be provided in the labeling.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Infection: If the device is labeled as sterile and it is not sterile, pathogenic organisms could cause an infection in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that neonatal eye pads be classified into class I (general controls) because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a neonatal eye pad be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as

sterile be exempt, in the manufacture of the device, from all requirements, in the GMP regulation except § 820.180 (21 CFR § 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a neonatal eye pad, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a neonatal eye pad must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has a access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a neonatal eye pad that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act, (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5270, to read as follows:

§ 880.5270 Neonatal eye pad.

(a) *Identification.* A neonatal eye pad is an opaque device used to cover and protect the eye of an infant during therapeutic procedures, such as phototherapy.

(b) *Classification.* Class I (general controls). If the device is not labeled or otherwise represented as sterile, it is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug

Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

[Docket No. 78N-1303]

Medical Devices; Classification of Medical Absorbent Fibers

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying medical absorbent fibers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides

background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of medical absorbent fibers:

1. Identification: A medical absorbent fiber is a device made from cotton or synthetic fiber in the shape of a ball or pad used for applying medication to, or absorbing small amounts of body fluids from, the patient's body surface.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that medical absorbent fibers be classified into class I because the Panel believes that the general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation upon the Panel members' personal knowledge of, and clinical experience with, the device. The Panel members believe that the device should meet United States Pharmacopeia requirements for the absorbency and purity of absorbent cotton.

5. Risks to health: (a) Tissue irritation: Tissue irritation could occur if the material is impure or sheds. (b) Infection: If the device is labeled as sterile and it is not sterile, pathogenic organisms could cause infection in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that medical absorbent fibers be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5300, to read as follows:

§ 880.5300 Medical absorbent fiber.

(a) *Identification.* A medical absorbent fiber is a device made from cotton or synthetic fiber in the shape of a ball or a pad used for applying medication to, or absorbing small amounts of body fluids from, the patient's body surface.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1305]

Medical Devices; Classification of Infant Oxygen Hoods

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying infant oxygen hoods into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

**SUPPLEMENTARY INFORMATION:
Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of infant oxygen hoods:

1. Identification: An infant oxygen hood is a device consisting of a rigid transparent enclosure with an open bottom placed over an infant's head. The device is connected to an external source of oxygen to maintain an oxygen-rich atmosphere for the infant.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that infant oxygen hoods be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that infant oxygen hoods be classified into class I (general controls) because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The external oxygen source to which infant oxygen hoods are connected is subject to regulations applicable to inhaled gases.

The agency disagrees with the Panel recommendation that manufacturers of infant oxygen hoods be exempt from premarket notification under section 510(k) of the act. Under section 10(g)(4) of the act, the agency may exempt a manufacturer from compliance with section 510 of the act only upon a finding that compliance is not necessary for the protection of the public health. In

the case of infant oxygen hoods, the agency cannot make the required finding. To protect the public health, the agency needs to require manufacturers of this device to register and to list their products with FDA, so that the agency can identify the firms and products that it regulates and can conduct necessary inspections and investigations concerning safety, effectiveness, adulteration, or misbranding. Premarket notification by these manufacturers assures that FDA learns of new products, and of significant modifications of existing products, for which premarket approval is required.

In response to the Panel's recommendation that manufacturers of an infant oxygen hood be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an infant oxygen hood must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an infant oxygen hood must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5375, to read as follows:

§ 880.5375 Infant oxygen hood.

(a) *Identification.* An infant oxygen hood is a device consisting of a rigid transparent enclosure with an open bottom placed over an infant's head. The device is connected to an external source of oxygen to maintain an oxygen-rich atmosphere for the infant.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
*Acting Associate Commissioner for
Regulatory Affairs.*

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1306]****Medical Devices; Classification of
Neonatal Incubators**

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying neonatal incubators into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: It is proposed that the final regulation based on this proposal

become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of neonatal incubators:

1. Identification: A neonatal incubator is a device consisting of a rigid boxlike enclosure in which an infant may be kept in a controlled environment for medical care. The device may include an AC-powered heater, a fan to circulate the warmed air, a container for water to add humidity, a control valve through which oxygen may be added, and access ports for nursing.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that neonatal incubators be classified into class II because the Panel believes that although the device is life sustaining and life supporting, sufficient scientific and medical data exist to establish an adequate performance standard governing the safety and effectiveness of the device. The Panel recommends that the standard address noise levels, electrical safety, accuracy and reliability of temperature control, and accuracy of oxygen delivery. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also recommends that the labeling provide instructions for cleaning and sterilizing the device. In addition, the Panel recommends that the device be used only by or on the order of a physician. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also based its recommendation on the infant warmer and incubator standard developed by the Emergency Care Research Institute under contract with FDA (Ref. 7).

5. Risks to health: (a) Hearing loss: If noise levels of the air fan are not controlled, the infant may suffer hearing loss. (b) Electrical shock: Improper design and construction or device malfunction can result in electrical shock. (c) Hypothermia or hyperthermia: If the temperature level in the device is not adequately controlled, Hypothermia (lowering of body temperature below 98.6° F) or hyperthermia (elevation of body temperature above 98.6° F) in the infant could result. (d) Hyperoxia or hypoxia: If the flow meters in the device do not accurately control the amount of oxygen delivered, the infant may suffer hyperoxia (excessive oxygen in body tissues) or hypoxia (inadequate oxygen in body tissues), which could lead to retrolental fibroplasia (blindness and other eye damage) and possible brain damage. (e) Infection: If the device is not able to be cleaned and sterilized properly, there is a risk to the infant of infection.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that neonatal incubators be classified into class II (performance standards). The Agency recognizes that neonatal incubators have been successfully used in neonatal care for many years. In appropriate applications, the benefits of the use of this device far outweigh the risks. The agency agrees with the Panel's belief that, although the device is life sustaining and life supporting, sufficient scientific and medical data exist to establish a standard to provide reasonable assurance of the safety and effectiveness of the device. FDA believes that a performance standard is necessary because general controls alone are insufficient to control the risks to health presented by the device.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying neonatal transport incubators into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of neonatal transport incubators:

1. Identification: A neonatal transport incubator is a device consisting of a portable rigid boxlike enclosure with insulated walls in which an infant may be kept in a controlled environmental while being transported for medical care. The device may include straps to secure the infant, a battery-operated heater, an AC-powered battery charger, a fan to circulate the warmed air, a container for water to add humidity, and provision for a portable oxygen bottle.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that neonatal transport incubators be classified into class II because the Panel believes that, although the device is life sustaining and life supporting, sufficient scientific and medical data exist to establish an adequate performance standard to assure the safety and effectiveness of the device. The Panel recommends that the standard address noise levels, electrical safety, accuracy and reliability of temperature control, and accuracy of oxygen delivery. The Panel also recommends that the duration of the device's portable power supply last at least 1 hour, that the device be designed to minimize radiant heat loss, and that the device include restraining belts for the infant. The Panel believes that general controls would not provide sufficient control over the device characteristics. The Panel also recommends that the labeling provide instructions for cleaning and sterilizing the device. In addition, the Panel recommends that the device be used only by or on the order of a physician.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also based its recommendation on the infant warmer and incubator standard developed by the Emergency Care Research Institute under contract with FDA (Ref. 1).

5. Risks to health: (a) Infant fatality: Because the device provides total support to the infant, a failure of its power source could result in death. (b) Radiant heat loss: If the device is not designed to minimize radiant heat loss, the patient could become hypothermic. (c) Injury during transportation: If restraining belts are not included with the device to secure the infant, there is a possibility of injury during transportation. (d) Hearing loss: If noise levels of the air fan are not controlled, the infant may suffer hearing loss.

(e) Electrical shock: Improper device design and construction or device malfunction can result in electrical shock. (f) Hypothermia or hyperthermia: If the temperature level in the device is not adequately controlled, hypothermia or hyperthermia in the infant could result. (g) Hyperoxia or hypoxia: If the flow meters in the device do not accurately control the amount of oxygen delivered, the infant may suffer hyperoxia (excessive oxygen in body tissues) or hypoxia (inadequate oxygen in body tissues), which could lead to retrolental fibroplasia (blindness and other eye damage) and possible brain damage. (h) Infection: If the device is not able to be cleaned and sterilized properly, there is a risk to the infant of infection.

Proposed Classification

FDA agrees with the Panel recommendation and its proposing that neonatal transport incubators be classified into class II (performance standards). The agency recognizes that neonatal transport incubators have been successfully used in neonatal care for many years. In appropriate applications, the benefits of using this device far outweigh the risks. The agency agrees with the Panel's belief that, although the device is life sustaining and life supporting, sufficient scientific and medical data exist to establish a standard to provide reasonable assurance of the safety and effectiveness of the device. FDA believes that a performance standard is necessary because general controls alone are insufficient to control the risks to health presented by the device.

[Docket No. 78N-1308]

Medical Devices; Classification of Pressure Infusors for I.V. Bags

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pressure infusors for I.V. bags into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: The written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices, (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of pressure infusors for I.V. bags:

1. Identification: A pressure infusor for an I.V. bag is a device consisting of an inflatable cuff which is placed around an I.V. bag. When the device is inflated, it increases the pressure on the I.V. bag to assist the infusion of the fluid. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "intravenous (I.V.) bag pressure infusion device." The Anesthesiology Device Classification Panel identified this generic type of device under the name "manual infusion apparatus."

2. Recommended classification: Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Anesthesiology Device Classification Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: Both Panels recommend that pressure infusors for I.V. bags be classified into class II because the Panels believe that a performance standard is needed for this device to assure accuracy in the amount of pressure exerted by the device on the bag. The Panels believe that general controls would not provide sufficient control over this characteristic. The Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

4. Summary of data on which the recommendations are based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device. The General Hospital and Personal Use Device Classification Panel also based its recommendation on an article in the literature that describes a device for maintaining constant pressure in a pressure infusor (Ref. 1).

5. Risks to health: (a) Inappropriate therapy: If the cuff is not large enough to exert even pressure on the I.V. bag, or if the valve or connectors in the cuff fail, the flow rate may decrease causing inappropriate therapy. The General Hospital and Personal Use Device Classification Panel identified the following additional risk to health: (b) Air embolism: Overinflation of the device may cause the plastic I.V. bag to rupture and allow air to be infused, resulting in air embolism.

Proposed Classification

FDA agrees with the Panel's recommendations and is proposing that the pressure infusor for I.V. bags be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for the intravenous (I.V.) bag pressure infusion device and the recommendation of the Anesthesiology Device Classification Panel for the manual infusion apparatus and has concluded that the device should be named "pressure infusor for I.V. bags" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Houghton, I. T., "A Constant Pressure Infusor," *Anaesthesia*, 31:73-75, 1976.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F

by adding new § 880.5420, to read as follows:

§ 880.5420 Pressure infusor for an I.V. bag.

(a) *Identification.* A pressure infusor for an I.V. bag is a device consisting of an inflatable cuff which is placed around an I.V. bag. When the device is inflated, it increases the pressure on the I.V. bag to assist the infusion of the fluid.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. [Docket No. 78N-1308]

Medical Devices; Classification of Nonelectrically Powered Fluid Injectors

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nonelectrically powered fluid injectors into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective

30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of nonelectrically powered fluid injectors:

1. Identification: A nonelectrically powered fluid injector is a nonelectrically powered device used to give a hypodermic injection by means of a narrow, high velocity jet of fluid which can penetrate the surface of the skin and deliver the fluid to the body. It may be used for mass inoculations.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that nonelectrically powered fluid injectors be classified into class II because the Panel believes that a performance standard is needed for this device to assure the accuracy of the amount of fluid administered to the patient and the accuracy of the pressure of the injection. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel recommends that FDA determine which drugs can be administered with this device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device, manufacturers' presentations and data presented at the November 6, 1978 Panel meeting (Ref. 1), and articles in the literature which evaluate the use of jet injectors for mass immunizations (Refs. 2 through 5).

5. Risks to health: (a) Inappropriate therapy: If the amount of fluid administered to the patient is inaccurate, the patient will receive inappropriate therapy. Also, if the pressure of the injection is inaccurate, fluid may be injected at a different level below the

surface of the skin from that intended. This could alter the absorption of the fluid, which could lead to inappropriate therapy.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that nonelectrically powered fluid injectors be classified into class II (performance standards). The agency has reviewed the Panel recommendation that FDA determine which drugs can be administered with this device and has determined that each drug must be considered individually for administration with nonelectrically powered fluid injectors. The agency will consider at a later date which drugs can be administered with the device. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5430, to read as follows:

§ 880.5430 Nonelectrically powered fluid injector.

(a) *Identification.* A nonelectrically powered fluid injector is a nonelectrically powered device used to give a hypodermic injection by means of a narrow, high velocity jet of fluid which can penetrate the surface of the skin and deliver the fluid to the body. It may be used for mass inoculations.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

[Docket No. 78N-1309]

Medical Devices; Classification of Intravascular Administration Sets

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intravascular administration sets into class II (performance standards). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that infusion line filters, a component of intravascular administration sets, be classified into class I (general controls). The effect of classifying a device into class I is to

require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of intravascular administration sets:

1. Identification: An intravascular administration set is a device used to administer fluids from a container to a patient's vascular system through a needle or catheter inserted into a vein. The device may include the needle or catheter, tubing, a flow regulator, a drip chamber, an infusion line filter, connectors between parts of the set, a side tube with a cap to serve as an injection site, and a hollow spike to penetrate and connect the tubing to an I.V. bag or other infusion fluid container. The General Hospital and Personal Use Device Classification Panel identified this device as the "intravascular administration set." The Anesthesiology Device Classification Panel identified this device as the "transfusion set" and described it as a device, sometimes in kit form, used to deliver blood to a patient. The General Hospital and Personal Use Device Classification Panel identified as infusion line filter, a component of an intravascular administration set, as a device connected to the infusion line tubing to prevent bacteria and particulates from entering the patient's vascular system.

2. Recommended classification: Class II (performance standards.) The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Anesthesiology Device Classification Panel

recommends that establishing a performance standard for this device be a high priority. The General Hospital and Personal Use Device Classification Panel recommends that the infusion line filter be classified into class I (general controls). The Panel also recommends that there be no exemptions for the infusion line filter.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class II because the Panel believes that a performance standard is needed to assure the compatibility of the connectors (components of the device that connect with other intravenous devices). The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also recommends that there be some mechanism for controlling the flow rate (the rate at which the device permits fluids to flow into the vascular system). The Panel also recommends that the labeling state the length of time that the infusion line filter is effective and describe the proper use of the filter.

The Anesthesiology Device Classification Panel recommends that the device be classified into class II because the device must operate effectively in life-threatening situations. The Panel notes that use of materials in the device that are not biocompatible may cause toxic, pyrogenic, or allergic reactions, and recommends a biocompatibility standard to control these hazards. The Panel also recommends that the standard assure the effectiveness of the filter, to minimize pulmonary thromboembolism, and that the device be designed so that air can be completely flushed from the system to prevent air emboli. Materials and connections must be leakproof to prevent introduction of air. Like the General Hospital and Personal Use Device Classification Panel, the Anesthesiology Device Classification Panel believes that standardization of connectors also is needed. The Panel also notes that a nonsterile device may introduce organisms and cause infection; however, use of a standard sterilization procedure can adequately control this hazard. The infusion rate should be adequately controllable to prevent over or under infusion. Both Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The General Hospital and Personal Use Device Classification Panel recommends that the infusion line filter be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendations are based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Both Panels identified the following risks to health: (a) Infection: The spike can become contaminated and cause infection when connecting the device

to an infusion fluid container. Contamination and infection can occur when the outside shield or cap is removed to add medication. Also, if the infusion line filter is ineffective in removing pathogenic organisms, an infection could occur. (b) Inappropriate therapy: If there is an inadvertent change in the flow rate because of a faulty flow-rate controller or because the set has become disconnected, with resulting loss of medication, inappropriate therapy could result. (c) Adverse tissue reaction: The use of materials in the device that have not demonstrated sufficient tissue compatibility may cause an adverse tissue reaction. (d) Air embolism: If air cannot be flushed from the system or if a leak occurs in the tubing or at the connectors, an air embolism could result. The Anesthesiology Device Classification Panel also identified the following additional risk to health: (e) Pulmonary thromboembolism: If filtration of the intravascular fluid by the device is inadequate, harmful particles could enter the body, causing pulmonary thromboembolism.

Proposed Classification

FDA agrees with the recommendations of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel and is proposing that intravascular administration sets be classified into class II (performance standards). The agency disagrees with the recommendation of the General Hospital and Personal Use Device Classification Panel that infusion line filters be classified into class I (general controls) because the agency has concluded that this device is a component of intravascular administration sets and, therefore, should be classified in the same class as the device of which it is a part. The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for intravascular administration sets and the recommendation of the Anesthesiology Device Classification Panel for transfusion sets and has concluded that the device should be named "intravascular administration set" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5440, to read as follows:

§ 880.5440 Intravascular administration set.

(a) *Identification.* An intravascular administration set is a device used to administer fluids from a container to a patient's vascular system through a needle or catheter inserted into a vein. The device may include the needle or catheter, tubing, a flow regulator, a drip chamber, an infusion line filter, connectors between parts of the set, a side tube with a cap to serve as an injection site, and a hollow spike to penetrate and connect the tubing to an I.V. bag or other infusion fluid container.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

(Docket No. 78N-1310)

Medical Devices; Classification of Patient Care Reverse Isolation Chambers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying patient care reverse isolation chambers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into

class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of patient care reverse isolation chambers:

1. Identification: A patient care reverse isolation chamber is a device consisting of a roomlike enclosure designed to prevent the entry of harmful airborne material. This device protects a patient who is undergoing treatment for burns or is lacking a normal immunosuppressive defense due to therapy or congenital abnormality. The device includes fans and air filters which maintain an atmosphere of clean air at a pressure greater than the air pressure outside the enclosure.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that patient care reverse isolation chambers be classified into class II because the Panel believes that a performance standard is necessary to assure that the filters in the device are effective in preventing the passage of microorganisms. Performance characteristics, including the accuracy and reliability of, and any limitations on, the device's functions, should be described in the labeling. Hospital personnel should take precautions to ensure that dust and other particulates do not plug the device's filters and thus reduce air flow or change the air

flow pattern. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also considered an article evaluating particulate air filters prepared by the Wilmot Castle Co. under a contract with the Jet Propulsion Laboratory (Ref. 1). The article concludes that: (a) Areas of particulate penetration may be related to increased velocity of particles through holes in the filter media or frames; (b) the efficiency level of a filter should be tested before each use; and (c) high efficiency particulate air filters having an efficiency exceeding 99.99 percent can remove from a gas stream all particles of a size greater than 0.5 micrometer.

Risks to health: (a) Infection: If the device's filter is not effective in preventing the passage of microorganisms, microorganisms may come into contact with the patient and cause infection. Also, if the air flow pattern is interrupted by dust or other particulates plugging the filters or by a power failure, organisms transmitted from the hospital staff could cause infection in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that patient care reverse isolation chambers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

(Docket No. 78N-1311)

Medical Devices; Classification of Jet Lavages

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying jet lavages into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device.

After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of jet lavages:

1. Identification: A jet lavage is a device used to clean a wound by a pulsatile jet of sterile fluid. The device consists of the pulsing head, tubing to connect to a container of sterile fluid, and a means of propelling the fluid through the tubing, such as an electric roller pump.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that the jet lavage be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members'

personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Bacteremia (the presence of bacteria in the blood): If the sterile fluid pressure is too high, the fluid impact could force bacteria into an open blood vessel and bacteremia could result. (b) Soft tissue trauma: If the fluid pressure is too high, soft tissue trauma may result.

Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that jet lavages be classified into class II (performance standards). The agency believes that a performance standard is needed for this device because general controls alone are insufficient to control the risks to health presented by the device. The agency believes that a performance standard is needed to control the fluid pressure generated by the device to reduce the risk of bacteremia and soft tissue trauma. Because most of the devices are a.c. electrically powered, the agency also believes that the electrical properties of the device must be controlled through an electrical safety standard. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide such assurance.

Because the agency has decided that jet lavages should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification under section 510(k) of the act or from the good manufacturing practice regulation under section 520(f) of the act.

FDA disagrees with the Panel's recommendation that manufacturers of jet lavages be exempt from all requirements under section 510 of the act. Under section 510(g)(4), the agency may exempt a manufacturer from section 510 only upon a finding that compliance with this section is not necessary for the protection of the public health. In the case of jet lavages, the agency cannot make the required finding. To protect the public health, the agency needs to require manufacturers of this device to register and to list their products with FDA, so that the agency is able to identify the firms manufacturing this device and to conduct necessary inspections. Premarket notification by these manufacturers assures that FDA learns of new products, and of significant modifications of existing products, for which premarket approval is required.

Because the agency is proposing that jet lavages be classified into class II,

FDA disagrees with the Panel's recommendation that manufacturers of jet lavages be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act. The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of jet lavages having defects that could harm users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drug proposes to amend Part 880 in Subpart F by adding new § 880.5475, to read as follows:

§ 880.5475 Jet lavage.

(a) *Identification.* A jet lavage is a device used to clean a wound by a pulsatile jet of sterile fluid. The device consists of the pulsing head, tubing to connect to a container of sterile fluid, and a means of propelling the fluid through the tubing, such as an electric roller pump.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1312]

Medical Devices; Classification of AC-Powered Patient Lifts

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered patient lifts into class II (performance standards). FDA is also publishing the recommendation of the General Hospital Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of AC-powered patient lifts:

1. Identification: An AC-powered patient lift is an electrically powered device, either fixed or mobile, used to lift and transport a patient in the horizontal or other required position from one place to another, as from a bed to a bath. The device includes straps and slings to support the patient.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that AC-powered patient lifts be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also recommends that the labeling provide instructions for the use of the device in the

presence of water or other liquids, and state the weight capacity of the device. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Infection: The straps or slings should be disposable or cleanable to prevent the spread of infection.

(b) Electrical shock: Improper design and construction or device malfunction can result in electrical shock. (c) Patient injury: If the device carries a load that exceeds its weight capacity, it may break and injure the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the AC-powered patient lift be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency believes that there is sufficient information to establish a standard to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5500, to read as follows:

§ 880.5500 AC-powered patient lift.

(a) *Identification.* An AC-powered patient lift is an electrically powered device either fixed or mobile, used to lift and transport patients in the horizontal or other required position from one place to another, as from a bed to a bath. The device includes straps and slings to support the patient.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this

document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1313]

Medical Devices; Classification of Nonelectrical Patient Lifts

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nonelectrical patient lifts into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation with respect to the classification of nonelectrical patient lifts:

1. Identification: A nonelectrical patient lift is a hydraulic or mechanically powered device, either fixed or mobile, used to lift and transport a patient in the horizontal or other required position from one place to another, as from a bed to a bath. The device includes straps and slings to support the patient.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that the nonelectrical patient lift be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that the labeling state the weight capacity of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Patient injury: If the device carries a load that exceeds its weight capacity, it may break and may injure the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that nonelectrical patient lifts be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5510, to read as follows:

§ 880.5510 Nonelectrical patient lift.

(a) *Identification.* A nonelectrical patient lift is a hydraulic or mechanically powered device, either fixed or mobile, used to lift and transport a patient in the horizontal or other required position from one place to another, as from a bed to a bath. The device includes straps and slings to support the patient.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be

seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26075 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1314]

Medical Devices; Classification of Alternating Pressure Air Flotation Mattresses

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying alternating pressure air flotation mattresses into class II (performance standards). FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the alternating pressure mattress be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that alternating pressure air flotation mattresses be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of alternating pressure air flotation mattresses:

1. Identification: An alternating pressure air flotation mattress is a mattress with multiple air cells that can be filled and emptied in an alternating pattern by an associated control unit, to provide regular, frequent, and automatic changes in the distribution of body pressure. The device is used to prevent and treat decubitus ulcers (bed sores). The Physical Medicine Device Classification Panel identified this generic type of device under the name "alternating pressure mattress." The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "alternating pressure air flotation mattress."

2. Recommended classification: The Physical Medicine Device Classification Panel recommends that the alternating pressure mattress be classified into class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority. The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class I (general controls). The Panel recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Physical Medicine Device Classification Panel recommends that the alternating pressure mattress be classified into class II (performance standards) because the Panel believes that there is a potential hazard of electrical shock in any AC-powered device. Therefore, an electrical safety standard is needed to control the electrical properties of the device. The Panel also expresses concern that an air leak may cause the device to fail. This hazard would not be recognized readily by a patient who has a sensation loss. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also recommends that the labeling warn users to check the mattress regularly for loss of air pressure. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance. The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and

effectiveness of the device. The Panel recommends that the labeling state the maximum weight capacity of the device and warn users to check the mattress regularly to make sure it is functioning properly. The Panel recommends that the device be exempt from good manufacturing practices under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendations are based: Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The Physical Medicine Device Classification Panel identified this risk to health: (a) Electrical shock: Improper design and construction or device malfunction can result in electrical shock. The General Hospital and Personal Use Device Classification Panel identified this risk to health: (b) Infection: If the mattress is difficult to clean, a risk of infection exists.

Proposed Classification

FDA agrees with the Physical Medicine Device Classification Panel recommendation and is proposing that the alternating pressure air flotation mattress be classified into class II (performance standards). The agency has reviewed the recommendations of the Physical Medicine Device Classification Panel for the alternating pressure mattress and the recommendation of the General Hospital and Personal Use Device Classification Panel for the alternating pressure air flotation mattress, and has concluded that the device should be named "alternating pressure air flotation mattress" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices.

FDA disagrees with the recommendation of the General Hospital and Personal Use Device Classification Panel that this device be classified into class I (general controls) because the agency believes that a standard is needed to control the electrical properties of the device. Because the agency has determined that alternating pressure air flotation mattresses should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the recommendation of the General Hospital and Personal Use Device Classification Panel that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard

would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5550, to read as follows:

§ 880.5550 Alternating pressure air flotation mattress.

(a) *Identification.* An alternating pressure air flotation mattress is a mattress with multiple air cells that can be filled and emptied in an alternating pattern by an associated control unit, to provide regular, frequent, and automatic changes in the distribution of body pressure. The device is used to prevent and treat decubitus ulcers (bed sores).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1316]****Medical Devices; Classification of Heated Water Mattresses**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying heated water mattresses into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The

effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of heated water mattresses:

1. Identification: A heated water mattress is a device consisting of a mattress of suitable size, filled with water which can be heated or in some cases cooled, and used for therapy. The device includes electrical heating and water circulating components, and an optional cooling component. The temperature control may be manual or automatic.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that the heated water mattress be classified into class II because the Panel believes that a performance standard is needed for this device to assure proper temperature control. The Panel also believes that the electrical properties of this device must be controlled through an electrical safety standard. The Panel believes that general controls would not provide sufficient control over these characteristics. In addition, the Panel recommends that the device be cleanable. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Patient burns: If the temperature control mechanism fails, the device may become overheated and burn the patient. Hot water leaking from the mattress also could burn the patient. (b) Infection: If a mattress is difficult to clean, there is a risk of infection. (c) Electrical shock: Improper design and construction or device malfunction could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the heated water mattress be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide such assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5560, to read as follows:

§ 880.5560 Heated water mattress.

(a) *Identification.* A heated water mattress is a device consisting of a mattress of suitable size, filled with water which can be heated or in some cases cooled, and used for therapy. The device includes electrical heating and water circulating components, and an optional cooling component. The temperature control may be manual or automatic.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26077 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1316]****Medical Devices; Classification of Hypodermic Single Lumen Needles**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hypodermic single lumen needles into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of hypodermic single lumen needles:

1. Identification: A hypodermic single lumen needle is a device consisting of a tube

that is sharpened at one end and shaped at the other end with a female connector (hub) to mate with the male connector (nozzle) of a piston syringe or an intravascular administration set. It is used to inject fluids into, or withdraw fluids from, parts of the body below the surface of the skin.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that hypodermic single lumen needles be classified into class II because the Panel believes that a performance standard is needed for this device to assure proper connection between the "female" connector (hub) of the needle and the "male" connector (nozzle) of the syringe. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Leakage of medication: Improper connection could cause leakage of medication at the connecting site and failure of therapy. Also, leakage of medication could cause drug hypersensitivity in the administering health care personnel exposed to the medication. (b) Infections: Improper sterilization of the device may result in infection in the patient. (c) Tissue trauma: If the needle point is not properly finished and sharp, there is a possibility of tissue trauma.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that the hypodermic single lumen needle be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5570, to read as follows:

§ 880.5570 Hypodermic single lumen needle.

(a) *Identification.* A hypodermic single lumen needle is a device consisting of a tube that is sharpened at one end and shaped at the other end with a female connector (hub) to mate with the male connector (nozzle) of a piston syringe or an intravascular administration set. It is used to inject fluids into, or withdraw fluids from, parts of the body below the surface of the skin.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26078 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1317]

Medical Devices; Classification of Nipple Shields

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nipple shields into class I (general controls). FDA is also publishing the recommendation of the Obstetrical and Gynecological Device Classification Panel that nipple shields be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Obstetrical and Gynecological Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of nipple shields:

1. Identification: A nipple shield is a device consisting of a cover used to protect the nipple of a nursing woman.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that nipple shields be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. These simple devices have been widely used for many years.

5. Risks to health: (a) Skin irritation: The material used in this device may irritate the skin.

Proposed Classification

FDA agrees with the Obstetrical and Gynecological Device Classification Panel recommendation and is proposing that the nipple shield be classified into class I (general controls) with no exemptions. The agency has concluded that because this device has many general uses, its classification should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F

by adding new § 880.5630, to read as follows:

§ 880.5630 Nipple shield.

(a) *Identification.* A nipple shield is a device consisting of a cover used to protect the nipple of a nursing woman.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26079 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1318]

Medical Devices; Classification of Lamb Feeding Nipples

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying lamb feeding nipples into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A Proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of lamb feeding nipples:

1. Identification: A lamb feeding nipple is a device intended to be used as a feeding nipple for infants with oral or facial abnormalities.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that lamb feeding nipples be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that lamb feeding nipples be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a lamb feeding nipple be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing

under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a lamb feeding nipple, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a lamb feeding nipple. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a lamb feeding nipple be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a lamb feeding nipple, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a lamb feeding nipple must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and

complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a lamb feeding nipple that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5640, to read as follows:

§ 880.5640 Lamb feeding nipple.

(a) *Identification.* A lamb feeding nipple is a device intended to be used as a feeding nipple for infants with oral or facial abnormalities.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 9, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

(Docket No. 78N-1319)

**Medical Devices; Classification of
Infant Position Holders**

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying infant position holders into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of infant position holders:

1. Identification: An infant position holder is a device used to hold an infant in a desired position for therapeutic and diagnostic purposes, e.g., in a crib under a radiant warmer. The Panel considered this generic type of device under the name "tiltable cradle bed."

2. Recommended classification: Class I (general controls). The Panel recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that infant position holders be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under

section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel members based their recommendation on their personal knowledge of, and clinical experience with, this device.

5. Risks to health: Patient injury: If the device is not stable or if the straps holding the infant cannot be made secure, the infant may fall and be injured.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that infant position holders be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of an infant position holder be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an infant position holder must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an infant position holder must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5680, to read as follows:

§ 880.5680 Infant position holder.

(a) *Identification.* An infant position holder is a device used to hold an infant in a desired position for therapeutic and diagnostic purposes, e.g., in a crib under a radiant warmer.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. to 4 p.m., Monday through Friday.

Dated: August 9, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

(Docket No. 78N-1320)

**Medical Devices; Classification of
Neonatal Phototherapy Units**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying neonatal phototherapy units into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to ensure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being

taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of neonatal phototherapy units:

1. Identification: A neonatal phototherapy unit is a device used to treat or prevent hyperbilirubinemia (elevated serum bilirubin level). The device consists of one or more lamps that emit a specific spectral band of light, under which an infant is placed for therapy. This generic type of device may include supports for the patient and equipment and component parts.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that neonatal phototherapy units be classified into class II because the Panel believes that a performance standard is needed to ensure that the lamp in the device emits the most effective spectral band of light and does not emit ultraviolet light, which could increase the risk of skin cancer. The Panel believes that a performance standard is needed to regulate the amount and intensity of light administered to the patient and to ensure that the lamp is a proper distance from the patient. Also, if the neonatal phototherapy unit includes a dosimeter (a device that measures the dosage of light administered to the patient), the dosimeter should be accurate. Furthermore, the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard. The Panel recommends that the labeling state the spectral band of the lamp, describe the recommended maintenance schedule for the device, and include a chart describing recommended doses for therapy. The Panel also

recommends that the labeling include warnings that insensible (imperceptible) water loss in the patient increases during therapy, that the patient may develop hyperthermia (body temperature above 38.6° F) during therapy, and that the patient's eyes should be protected during therapy. The Panel also recommends that the lamp be shielded to prevent injury to the patient from falling glass if the lamp breaks. The Panel recommends that this device be used only by, or under the direction of, a physician. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device, on presentations made at the January 15, 1979, Panel Meeting (Ref. 7), and on several articles in the literature (Refs. 2 and 3). Sisson et al. conducted a controlled study to evaluate the effect of three types of fluorescent lamps on serum bilirubin concentrations in three groups of newborn infants with physiologic jaundice (Ref. 2). Each group consisted of 24 infants. The study found that the lamp that most effectively reduced serum bilirubin concentrations was a special blue lamp with narrow spectral emissions of 420 to 470 nanometers. The energy output of this lamp was 2.90 microwatts per square centimeter. In 1972 the National Research Council of the National Academy of Sciences established a committee on phototherapy of the newborn infant. A preliminary report of the committee was published in 1974 (Ref. 3). The report stated that there are adequate data to show that the serum bilirubin concentration in a premature infant can be prevented from rising if phototherapy is used for as long as 72 hours, starting on the first day of life. The report stated that the use of light meters to measure exposures during phototherapy is inappropriate because these meters are designed to measure illuminance, which does not show the amount of electromagnetic radiation absorbed by the infant. The report recommends that spectral irradiance, spectral transmittance, and spectral absorbance be used to determine the amount of electromagnetic radiation absorbed by the infant. Spectral irradiance is the radiative power density of the incident light expressed in watts per square centimeter per unit wavelength over the entire spectral range to which the patient is exposed. Spectral transmittance is the amount of incident light transmitted through the epidermis and other tissues to the sites of photochemical reactions. Spectral absorbance is the amount of transmitted light absorbed by molecules that initiate photochemical reactions. The committee recommends that for the present, phototherapeutic dosage be defined as the product of spectral irradiance and time (Ref. 3).

5. Risks to health: (a) Burns: If the patient touches the lamp or if the lamp emits

radiation in the infrared or ultraviolet spectrum, burns could result. (b) Eye injury: If the patient's eyes are not shielded, eye injury could result from radiation exposure. (c) Hyperthermia (body temperature above 98.6° F): If the patient is constantly exposed to the radiation, hyperthermia could result. (d) Toxicity reaction: The radiation emitted by the lamp may cause toxic substances to be formed in and leached from plastic intravenous (I.V.) tubing. These substances could be carried by the I.V. fluid into the patient's blood system, resulting in a toxicity reaction. (e) Skin cancer: If the device emits radiation in certain regions of the ultraviolet spectrum, there could be a risk of skin cancer. (f) Insensible (not easily perceived) water loss: The heat from the radiation of this device may cause insensible water loss in the patient. (g) Electrical shock: Improper device design and construction or device malfunction could result in an electrical shock. (h) Inability to absorb lactose, resulting in diarrhea: Phototherapy treatment may inhibit the patient's intestinal lactase, preventing absorption of lactose and resulting in diarrhea. (i) Thrombocytopenia (subnormal number of platelets in the blood): Phototherapy may cause thrombocytopenia. (j) Inappropriate therapy: The level of serum bilirubin does not decrease in some infants who are treated with phototherapy, resulting in jaundice. Without appropriate patient monitoring, a delay of a necessary exchange blood transfusion could result. (k) Bronze baby syndrome: Infants undergoing phototherapy can develop bronze baby syndrome (a brown-black discoloration of the skin, serum, and urine). (l) Patient injury: If the lamp breaks, the patient could be injured by glass.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that neonatal phototherapy units be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

[Docket No. 78N-1321]

Medical Devices; Classification of Infusion Pumps

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying infusion pumps into class II (performance standards). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel, the Cardiovascular Device Classification Panel, and the Anesthesiology Device Classification Panel that infusion pumps

be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Cardiovascular Device Classification Panel, and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of infusion pumps:

1. Identification: An infusion pump is a device used to pump fluids into a patient in a controlled manner. The device may use a piston pump, a roller pump, or a peristaltic pump and may be powered electrically or mechanically. The device may include means to detect a fault condition, such as air in or blockage of the infusion line, and to activate an alarm. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the names "infusion pump" and "perfusion unit." The Cardiovascular Device Classification Panel identified this generic type of device under the name "cardiovascular infusion pump." The Anesthesiology Device Classification Panel identified this generic type of device under the name "powered infusion apparatus (except radiographic dye injection)."

2. Recommended classification: Class II (performance standards). The Cardiovascular Device Classification Panel recommends that establishing a performance standard for this device be a high priority. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel recommend that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: All three Panels recommend that infusion pumps be classified into class II because the electrical properties of this device must be controlled through an electrical safety standard. In addition, the Cardiovascular Device Classification Panel believes that a performance standard is necessary to assure accurate, controlled delivery of fluids to the patient without inadvertent administration of other substances (e.g., air). The General Hospital and Personal Use Device Classification Panel recommends that a performance standard assure accuracy of the rate of flow of fluids, according to a standard test method which would be established by the performance standard. The Panel also believes that the labeling should describe the accuracy of the flow rate, according to such a method. In addition, the Panel recommends that the labeling for the perfusion unit state the size of catheter, needle, and filter that should be used with the device and describe the degree of accuracy of drug delivery that can be expected. The General Hospital and Personal Use Device Classification Panel also expresses concern that the hypersensitivity of some pump alarms causes them to be activated by slight vibrations, resulting in a high rate of false positive alarms. The Panel also recommends that users check any emergency battery supply for the device at regular and frequent intervals to avoid the risk of a power failure. The Anesthesiology Device Classification Panel recommends that a performance standard control the device's design and the materials used in the device, to assure that all connections and components are leak-free, to prevent air emboli from entering the patient, to assure proper infusion pressure without extravasation (overflow of fluid into the surrounding tissues), and to control the infusion rate to prevent administration of an inappropriate dosage. All three Panels believe that general controls would not provide sufficient control over these characteristics. All three Panels believe that general controls would not provide sufficient control over these characteristics. All three Panels believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations are based: All three Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device. The Cardiovascular Device Classification Panel also based its recommendation on the summary of a report prepared by the Utah Biomedical Test Laboratory under contract with FDA (Ref. 1). This report describes the results of a study conducted by the Laboratory on the technical characteristics of angiographic injectors and infusion and withdrawal pumps. The report recommends that a standard for infusion pumps address accuracy of fluid delivery, range of infusion parameters, warmup time, battery operation, and safety features.

5. Risks to health: All three Panels identified the following risks to health: (a) Electrical microshock, macroshock, or arrhythmias: Because the device is frequently used in close proximity to conductive beds and catheters to the heart, electrical leakage current could cause electrical microshock, macroshock, or arrhythmia. (b) Inaccurate drug administration: If the device fails to deliver a drug at the prescribed flow rate, overdosage or underdosage will result. (c) Air embolism: If the pump is unable to detect when the reservoir is empty or when there is leakage from a connection or component, air may be infused into the patient. The General Hospital and Personal Use Device Classification Panel identified the following additional risk to health: (d) Alarm failure: If the alarm is overly sensitive to the environment, it may be activated for a reason other than the reason for which it was designed, resulting in a high rate of false positive alarms. As a result, some personnel may disregard the alarm as a signal of patient distress. The Anesthesiology Device Classification Panel identified the following additional risk to health: (e) Extravasation: Overpressurization by the device may cause extravasation (overflow of fluid into surrounding tissues) in the patient.

Proposed Classification

FDA agrees with the three Panels and is proposing that infusion pumps be classified into class II (performance standards). The agency has reviewed the recommendation of the Cardiovascular Device Classification Panel for cardiovascular infusion pumps, the recommendation of the General Hospital and Personal Use Device Classification Panel for infusion pumps and perfusion units, and the recommendation of the Anesthesiology Device Classification Panel for powered infusion apparatus, and has concluded that the device should be named "infusion pump" and its classification be published in the part of the Code of Federal Regulation for General Hospital and Personal Use Devices.

The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Reference

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

Medical Devices; Classification of Suction Snakebite Kits

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying suction snakebite kits into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all

devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of suction snakebite kits:

1. Identification: A suction snakebite kit is a device consisting of a knife, suction device, and tourniquet used for first-aid treatment of snakebites by removing venom from the wound.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that suction snakebite kits be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the labeling state that the device should be used within 5 minutes after a bite has been inflicted, and that the tourniquet should not be applied too tightly or for a prolonged period of time.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device, and on several articles in the literature that evaluate the different types of treatment of snakebites (Refs. 1 through 6).

5. Risks to health: (a) Infection: If the knife is not sterile, the wound may become infected. (b) Inadequate removal of venom: If the vacuum pressure of the suction device is inadequate, the venom may not be removed. (c) Local tissue necrosis: If the tourniquet is applied too tightly or for a prolonged period, necrosis of local tissue may occur.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that suction snakebite kits be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78-1382]

Medical Devices; Classification of Chemical Cold Pack Snakebite Kits

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying chemical cold pack snakebite kits into class III (premarket approval). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to provide for each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each application includes information concerning safety and effectiveness tests of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A Proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of chemical cold pack snakebite kits:

1. Identification: A chemical cold pack snakebite kit is a device consisting of a chemical cold pack and tourniquet used for first-aid treatment of snakebites.

2. Recommended classification: Class III (Premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that chemical cold pack snakebite kits be classified into class III because the use of cold therapy for the first-aid treatment of snakebites has not been proven to be safe and effective. The Panel believes that a performance standard would not provide reasonable assurance of the safety and effectiveness of the device and that there is insufficient information to establish a standard to provide such assurance. The device, therefore, should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on several articles in the literature that evaluate different types of treatment for snakebites (Refs. 1, 2, and 3). Most of the literature shows that cryotherapy (the use of cold therapy for the treatment of snakebites) is inappropriate. Clement and Pietrusko found high rates of amputation, local tissue destruction, and prolonged disability in patients treated by this method (Ref. 1). A National Academy of Sciences report stated that doubts about the safety and effectiveness of short-term cold therapy for treatment of snakebites have not been resolved (Ref. 2). The report also stated that the use of cold therapy for a long period of time appears to be dangerous. Watt reported that, among children who had to have amputations because of snakebites, 75 percent had received cryotherapy for the snakebites (Ref. 3).

5. Risks to health: Local tissue damage: Exposure of tissue to cold temperatures for long periods of time can freeze the tissue and cause local tissue damage, sometimes necessitating limb amputations.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that chemical cold pack snakebite kits be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because the device has not been proven to be a safe and effective method of first aid treatment of snakebites, and its use has been associated with an unduly high rate of amputation, local tissue destruction, and other disabilities in snakebite victims. The agency believes that insufficient information exists to

determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard to provide this assurance.

References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

[Docket No. 78N-1322]

Medical Devices; Classification of Medical Support Stockings

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying medical support stockings into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that this device be classified into class I (general controls). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. FDA is also publishing the recommendation of the Cardiovascular Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Cardiovascular Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of medical support stockings:

1. Identification: A medical support stocking is a device used to help prevent

pooling of blood in the leg. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "elastic stocking." The Cardiovascular Device Classification Panel identified this generic type of device under the name "medical support stocking."

2. Recommended and classification: The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class I (general controls). The Panel recommends that there be no exemptions. The Cardiovascular Device Classification Panel recommends that this device be classified into class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that manufacturers voluntarily assure that the device is made of a porous material to permit the passage of moisture and air. The Panel also recommends that the label state the size of stocking required for various leg sizes and describe the different uses of the device. The Cardiovascular Device Classification Panel recommends that this device be classified into class II because the Panel believes that the elastic material used in the device, which comes in direct contact with the patient's skin, should meet a generally accepted, satisfactory level of tissue compatibility, and should be subject to controls on surface finish and cleanliness, which may affect tissue compatibility. This Panel also believes that a standard should assure that the device provides enough pressure on the leg to help prevent blood pooling, and that the pressure should be greatest on the distal portions of the leg. In addition, a standard should prohibit the use of a restrictive band at the top of the stocking which would tend to increase, rather than decrease, blood pooling. The Cardiovascular Device Classification Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations are based: Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The Cardiovascular Device Classification Panel identified the following risk to health: Occlusion of a blood vessel: An ineffective design of the device can allow, rather than prevent, pooling of blood and thus increase the danger of thrombus formation and embolization. The General Hospital and Personal Use Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with the General Hospital and Personal Use Device Classification Panel recommendation and is proposing that medical support stockings be classified into class I (general controls) with no exemptions. The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for the elastic stocking and the recommendation of the Cardiovascular Device Classification Panel for the medical support stocking and has concluded that the device should be named "medical support stocking" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency disagrees with the recommendation of the Cardiovascular Device Classification Panel that medical support stockings be classified into class II. FDA believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. FDA believes that adequate labeling, including the size of the device and a description of the different uses of the device, and compliance by manufacturers with the good manufacturing practice regulation will assure the quality of the device and assure that the device does not increase the risk of embolic complications.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5780, to read as follows:

§ 880.5780 Medical support stocking.

(a) *Identification.* A medical support stocking is a device used to help prevent pooling of blood in the leg.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1323]

Medical Devices; Classification of I.V. Set Stopcocks

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying I.V. set Stopcocks into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of I.V. set stopcocks:

1. *Identification:* An I.V. set stopcock is a device consisting of an outer valve shell to which two or more tubes can be connected and an inner movable valve which, when

turned to different positions, interconnects the several fluid paths from the tubes to permit or prevent the flow of fluid between tubes.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that I.V. set stopcocks be classified into class II because the Panel believes that a standard is needed to assure proper connection between the "female" and "male" connectors of the stopcock, and the corresponding "male" and "female" connectors of the tubing. The Panel also believes the label of the device should indicate the pathways for the flow of fluids. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Inappropriate therapy: Fluid leakage at the connection site or erroneous indication of fluid path through the stopcock could cause a failure to deliver the appropriate amount of fluid to the patient, resulting in inappropriate therapy.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that I.V. set stopcocks be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5800, to read as follows:

§ 880.5800 I.V. set stopcock.

(a) *Identification.* An I.V. set stopcock is a device consisting of an outer valve shell to which two or more tubes can be connected and an inner movable valve which, when turned to different positions, interconnects the several fluid paths from the tubes to permit or prevent the flow of fluid between tubes.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

Medical Devices; Classification of Scrotal Supports

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying scrotal supports into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. FDA is also publishing the recommendation of the Gastroenterological-Urological Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Gastroenterological-Urological Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of scrotal supports:

1. *Identification:* A scrotal support is a device consisting of a pouch attached to an elastic waistband used to support the scrotum (the sac that contains the testicles) for therapeutic purposes.

2. Recommended classification: The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The Gastroenterological-Urological Device Classification Panel recommends that this device be classified into class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that scrotal supports be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that the device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Gastroenterological-Urological Device Classification Panel recommends that this device be classified into class II because the Panel believes that materials used in the device should be compatible with the skin. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable

assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations are based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel identified no risks to health. The Gastroenterological-Urological Device Classification Panel identified the following risk to health: Skin irritation: Materials used in the construction of the device may irritate the skin.

Proposed Classification

FDA agrees with the General Hospital and Personal Use Device Classification Panel recommendation that scrotal supports be classified into class I (general controls). FDA has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel and the Gastroenterological-Urological Device Classification Panel for scrotal supports. The agency has concluded that the classification of scrotal supports should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency disagrees with the recommendation of the Gastroenterological-Urological Device Classification Panel that scrotal supports be classified into class II (performance standards) because the history of use of this device shows that the risk of skin irritation by materials used in the device is minimal. FDA believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a scrotal support be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a scrotal support, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this

device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a scrotal support. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the General Hospital and Personal Use Device Classification Panel's recommendation that manufacturers of a scrotal support be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a scrotal support must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a scrotal support must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5820, to read as follows:

§ 880.5820 Scrotal support.

(a) *Identification.* A scrotal support is a device consisting of a pouch attached to an elastic waistband used to support the scrotum (the sac that contains the testicles) for therapeutic purposes.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

[Docket No. 78N-1325]

Medical Devices; Classification of Piston Syringes

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying piston syringes into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. FDA is also publishing the recommendations of the Dental Device Classification Panel and the Ophthalmic Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only

the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Dental Device Classification Panel, and the Ophthalmic Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of piston syringes:

1. *Identification:* A piston syringe is a device consisting of a calibrated hollow barrel and a movable plunger. At one end of the barrel there is a male connector for fitting the female connector (hub) of a hypodermic single lumen needle. The device is used to inject fluids into or withdraw fluids from the body. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the name "piston syringe." The Dental Device Classification Panel identified this generic type of device under the name "luer-lock drug syringe." The Ophthalmic Device Classification Panel identified this generic type of device under the name "ophthalmic syringe."

2. *Recommended classification:* The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class II (performance standards) and that establishing a performance standard for the device be a medium priority. The Dental Device Classification Panel recommends that the device be classified into class I (general controls) and that the device be exempt from registration, device listing, and premarket notification under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), records and reports under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

The Ophthalmic Device Classification Panel recommends that the device be classified into class I (general controls) and that there be no exemptions.

3. *Summary of reasons for recommendation:* The General Hospital and Personal Use Device Classification Panel recommends that the device be classified into class II because the Panel believes that a standard is needed to assure a proper connection between the male connector (nozzle) of the syringe and the female connector (hub) of needle. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Dental Device Classification Panel recommends that the device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years, uses materials in contact with the body that are generally acceptable or that have known and acceptable properties, and is safe and effective without additional control requirements imposed under a performance standard. The Panel recommends that the device be exempt from registration, device listing, and premarket notification under section 510 of the act because the Panel believes that FDA does not need to know who manufactures this simple device. The Dental Device Classification Panel also recommends that the device be exempt from records and reports requirements under section 519 of the act because the Panel believes that requiring this information will not serve a useful purpose. The Panel also recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Ophthalmic Device Classification Panel recommends that the device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also believes that the composition of materials used in the device should be specified in the labeling and that manufacturers should voluntarily assure that the device is sterilizable.

4. *Summary of data on which the recommendations are based:* All three Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* The General Hospital and Personal Use Device Classification Panel identified the following risks to health: (a) Infection: Inadequate sterilization of the device may cause infection in the patient. (b) Inappropriate therapy: If the measurement markings on the barrel of the syringe are not accurate, administration of an incorrect drug dosage could cause inappropriate therapy. (c) Toxic reactions: If the material used in the construction of the syringe is not compatible

with the body or interacts with fluids used in the device, a toxic reaction could occur. (d) Leakage of fluid: If the connection between the needle and the syringe is not tight, leakage of fluids could occur. The Dental Device Classification Panel and the Ophthalmic Device Classification Panel identified no risks to health.

Proposed Classification

FDA agrees with the recommendation of the General Hospital and Personal Use Device Classification Panel and is proposing that piston syringes be classified into class II (performance standards). The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for piston syringes, the recommendation of the Dental Device Classification Panel for luer-lock drug syringes, and the recommendation of the Ophthalmic Device Classification Panel for ophthalmic syringes, and has concluded that the device should be named "piston syringe" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency disagrees with the recommendation of the Dental Device Classification Panel and the Ophthalmic Device Classification Panel that the device be classified into class I. The agency believes that a performance standard is needed to assure accurate measurement marking on the syringe barrel, use of biocompatible materials in the device, and incorporation of a standard type of connector. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance. Because the agency has decided that piston syringes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the recommendation of the Dental Device Classification Panel that this device be exempt from registration, device listing, and premarket notification under section 510 of the act, records and reports requirements under section 519 of the act, and good manufacturing practice regulation under section 520(f) of the act.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5860, to read as follows:

§ 880.5860 Piston syringe.

(a) *Identification.* A piston syringe is a device consisting of a calibrated hollow barrel and a movable plunger. At one end of the barrel there is a male connector for fitting the female connector (hub) of a hypodermic single lumen needle. The device is used to inject fluids into or withdraw fluids from the body.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1327]

Medical Devices; Classification of Nasogastric Tubes

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying nasogastric tubes into class I (general controls). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of nasogastric tubes:

1. *Identification:* A nasogastric tube is a device inserted through the patient's nose into the upper gastrointestinal tract to provide liquid nourishment to the patient, or to remove air or liquid. The General Hospital and Personal Use Device Classification Panel identified this generic type of device under the names "feeding tube" and "Levine tube." The Anesthesiology Device Classification Panel identified this generic type of device under the name "nasogastric tube."

2. *Recommended classification:* Class I (general controls). Both Panels recommend that there be no exemptions.

3. *Summary of reasons for recommendation:* The Anesthesiology Device Classification Panel recommends that the device be classified into class I (general controls) because the Panel believes that if the use of this device is restricted to trained personnel, general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. Similarly, the General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the labeling of the device state the tube size, whether the device is sterilizable or sterile disposable, and whether the material used is nontoxic.

4. *Summary of data on which the recommendations are based:* Both Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* Both Panels identified the following risks to health: (a) Injury to

gastrointestinal tract and nasal mucosa: If the device is not of proper size, shape, and flexibility, injury to internal mucosa could result. The General Hospital and Personal Use Device Classification Panel identified these additional risks to health: (b) Infection: If the device is not sterilized properly, infection could result. (c) Tissue irritation: If the material used in the device is not biocompatible, tissue irritation may occur.

Proposed Classification

FDA agrees with both Panels' recommendations and is proposing that nasogastric tubes be classified into class I (general controls) with not exemptions. The agency has reviewed the recommendation of the General Hospital and Personal Use Device Classification Panel for feeding tubes and Levine tubes and the recommendation of the Anesthesiology Device Classification Panel for nasogastric tubes and has concluded that the device should be named "nasogastric tube" and its classification should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The Agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding § 880.5900, to read as follows:

§ 880.5900 Nasogastric tube.

(a) *Identification.* A nasogastric tube is a device inserted through the patient's nose into the upper gastrointestinal tract to provide liquid nourishment to the patient, or to remove air or liquid.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

[Docket No. 78N-1328]

Medical Devices; Classification of Fluid Delivery Tubing

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying fluid delivery tubing into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of fluid delivery tubing:

1. *Identification:* Fluid delivery tubing is a device consisting of a flexible tube used in conjunction with other devices to deliver fluids to a patient's vascular system.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. *Summary of reasons for recommendation:* The Panel recommends that fluid delivery tubing be classified into class II because the Panel believes that a performance standard is needed to assure that the material used in the device does not leach toxic substances into the fluid and that the tubing is sterilizable, kink resistant, and flexible. The Panel recommends that the labeling give instructions for sterilization. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* Toxic reaction: If the device leaches toxic substances into the fluid, a toxic reaction might occur in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that fluid delivery tubing be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish standards to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5910, to read as follows:

§ 880.5910 Fluid delivery tubing.

(a) *Identification.* Fluid delivery tubing is a device consisting of a flexible tube used in conjunction with other devices to deliver fluids to a patient's vascular system.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be

submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1329]

Medical Devices; Classification of Umbilical Occlusion Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying umbilical occlusion devices into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA

advisory committee, made the following recommendation with respect to the classification of umbilical occlusion devices:

1. Identification: An umbilical occlusion device is a clip, tie, tape, or other article used to close the blood vessels in the umbilical cord of a newborn infant.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions for this device.

3. Summary of reasons for recommendation: The Panel recommends that umbilical occlusion devices be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the labeling state whether the device is sterile or sterilizable.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Bleeding: Failure of the device to occlude the blood vessels in the umbilical cord properly may result in bleeding.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that umbilical occlusion devices be classified into class I (general controls) with no exemptions. FDA is aware that there is a possibility of infection if the device is not sterile. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart F by adding new § 880.5950, to read as follows:

§ 880.5950 Umbilical occlusion device.

(a) *Identification.* An umbilical occlusion device is a clip, tie, tape, or other article used to close the blood vessels in the umbilical cord of a newborn infant.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this

document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26092 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-0

[21 CFR Part 880]

[Docket No. 78N-1330]

Medical Devices; Classification of Absorbent Tipped Applicators

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying absorbent tipped applicators into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel, the Gastroenterology and Urology Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the

Gastroenterology and Urology Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of absorbent tipped applicators:

1. Identification: An absorbent tipped applicator is a device that consists of an absorbent swab on a wooden, paper, or plastic stick. The device is used to apply medication or to take specimens from a patient. The Gastroenterology and Urology Device Classification Panel identified this generic type of device under the name "gastro/urology applicators." The Dental Device Classification Panel identified this generic type of device under the name "cotton applicators." The General and Plastic Surgery Device Classification Panel identified this generic type of device under the name "cotton/dye applicators."

2. Recommended classification: Class I (general controls). The General Hospital and Personal Use Device Classification Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and, if the device is not labeled as sterile, exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The Gastroenterology and Urology Device Classification Panel recommends that this device be exempt from registration, device listing, and premarket notification under section 510 of the act and exempt from good manufacturing practice regulations under section 520(f) of the act. The Dental Device Classification Panel recommends that this device be exempt from premarket notification regulations under section 510(k) of the act, records and reports regulations under section 519 of the act (21 U.S.C. 360(i)) and good manufacturing practice regulations under section 520(f) of the act. The General and Plastic Surgery Device Classification Panel recommends that there be no exemptions for this device.

3. Summary of reasons for recommendation: The Panels recommend that absorbent tipped applicators be classified into class I because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Gastroenterology and Urology Device Classification Panel recommends that this device be exempt from registration, device listing, and premarket notification regulations under section 510 of the act because the Panel believes that FDA does not need to know who is manufacturing this simple device. The General Hospital and Personal Use Device Classification Panel and the Dental Device Classification Panel recommend that this device be exempt from premarket notification under section 510(k) of the act because the Panels believe that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panels recommend that this device be exempt from

the good manufacturing practice regulation under section 520(f) of the act because the Panels believe that the quality of the device is easily discernible and defects are readily apparent to the user. The General Hospital and Personal Use Device Classification Panel recommends that the device labeling warn users that improper use may cause puncture wounds. The Gastroenterology and Urology Device Classification Panel recommends that this device be used by or under the direction of a physician when used for gastroenterology or urology purposes.

4. Summary of data on which the recommendation is based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Infection: If the device is labeled as sterile and is not sterile, pathogenic organisms could cause infection in the patient.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that absorbent tipped applicators be classified into class I (general controls). The agency has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel for absorbent tipped applicators, the General and Plastic Surgery Device Classification Panel for cotton dye applicators, the Dental Device Classification Panel for cotton applicators, and the Gastroenterology and Urology Device Classification Panel for gastro/urology applicators, and has concluded that the device should be named "absorbent tipped applicator" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Gastroenterology and Urology Device Classification Panel recommendation that manufacturers of absorbent tipped applicators be exempt from section 510 of the act, and in response to the General Hospital and Personal Use Device Classification Panel and the Dental Device Classification Panel that absorbent tipped applicators be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not

necessary for the protection of the public health. In the case of registration and listing by manufacturers of an absorbent tipped applicator, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an absorbent tipped applicator. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Dental Device Classification Panel's recommendation that manufacturers of an absorbent tipped applicator be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of an absorbent tipped applicator be exempt from the device good manufacturing practice (GMP)

regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 with respect to general requirements concerning records, and § 820.198 with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an absorbent tipped applicator, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an absorbent tipped applicator must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of an absorbent tipped applicator that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 by adding new Subpart G and § 880.6025, to read as follows:

Subpart G—General Hospital and Personal Use Miscellaneous Devices

§ 880.6025 Absorbent tipped applicator.

(a) *Identification.* An absorbent tipped applicator is a device that consists of an absorbent swab on a wooden, paper, or plastic stick. The device is used to apply medications or to take specimens from a patient.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If

the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1332]

Medical Devices; Classification of Ice Bags

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ice bags into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ice bags:

1. Identification: An ice bag is a device in the form of a container intended to be filled with ice used to apply dry cold to an area of the body for therapeutic purposes. The device may include a holder that keeps the bag in place against an external area of a patient.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that ice bags be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be sterilizable if reuse is possible.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Cross-infection: If the device is not capable of being sterilized for reuse, cross-infection could occur between patients.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ice bags be classified into class I (general controls). The history of use of the device has shown that there is minimal risk of crossinfection caused by the device. Therefore, the agency believes that general controls are sufficient to provide reasonable

assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of an ice bag be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an ice bag, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an ice bag. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of an ice bag be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an ice bag, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency

also believes that manufacturers of an ice bag must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of an ice bag that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6050, to read as follows:

§ 880.6050 Ice bag.

(a) *Identification.* An ice bag is a device in the form of a container intended to be filled with ice that is used to apply dry cold therapy to an area of the body for therapeutic purposes. The device may include a holder that keeps the bag in place against an external area of the patient.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

Medical Devices; Classification of Disposable Bedding

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying disposable bedding into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. It is proposed that the final regulation based on this proposal become effective 30 days after the date of publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of disposable bedding:

1. Identification: Disposable bedding is a device intended to be used by one patient for a period of time and then discarded. This generic type of device includes disposable bed sheets, bed pads, pillows and pillowcases, blankets, and emergency rescue blankets.

2. Recommended classification: Class I (general controls). The Panel recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that disposal bedding be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the material used in the bedding be non-irritating to the skin.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, the device.

5. Risks to health: Skin irritation: The device could cause skin irritation to the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that disposable bedding be classified into class I (general controls). The history of use of the device has shown that there is minimal risk of skin irritation caused by the device. Therefore, the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of disposable bedding be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of disposable bedding, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems

for complaint investigation and followup. The agency also believes that manufacturers of disposable bedding must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of disposable bedding that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6060, to read as follows:

§ 880.6060 Disposable bedding.

(a) *Identification.* Disposable bedding is a device intended to be used by one patient for a period of time and then discarded. This generic type of device includes disposable bedsheets, bedpads, pillows and pillowcases, blankets, and emergency rescue blankets.

(b) *Classification.* Class I (general controls). If the device is not labeled or otherwise represented as sterile, it is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before (October 23, 1979) submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

Medical Devices; Classification of Bed Boards

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying bed boards into class I (general controls). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of bed boards:

1. Identification: A bed board is a device consisting of a stiff board used to increase the firmness of a bed for therapeutic purposes.

2. Recommended classification: Class I (general controls). The Panel recommends

that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that bed boards be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that bed boards be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a bed board be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a bed board, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a bed board. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will

provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a bed board be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a bed board must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a bed board must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defect, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6070, to read as follows:

§ 880.6070 Bed board.

(a) *Identification.* A bed board is a device consisting of a stiff board used to increase the firmness of a bed for therapeutic purposes.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning

records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

[Docket No. 78N-1335]

Medical Devices; Classification of Cardiopulmonary Resuscitation Boards

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cardiopulmonary resuscitation boards into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health,

Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, and FDA advisory committee, made the following recommendation with respect to the classification of cardiopulmonary resuscitation boards:

1. Identification: A cardiopulmonary resuscitation board is a device consisting of a rigid board which is placed under a patient to act as a support during cardiopulmonary resuscitation.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that cardiopulmonary resuscitation boards be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel recommends that the device be unbreakable, splinter-free, and of the proper length.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that cardiopulmonary resuscitation boards be classified into class I (general controls) because the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a cardiopulmonary resuscitation board be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing

under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulation (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a cardiopulmonary resuscitation board, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a cardiopulmonary resuscitation board. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a cardiopulmonary resuscitation board be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a cardiopulmonary resuscitation board must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a cardiopulmonary resuscitation board must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate

device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6080, to read as follows:

§ 880.6080 Cardiopulmonary resuscitation board.

(a) *Identification.* A cardiopulmonary resuscitation board is a device consisting of a rigid board which is placed under a patient to act as a support during cardiopulmonary resuscitation.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

[Docket No. 78N-1336]

Medical Devices; Classification of Hot/Cold Water Bottles

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hot/cold water bottles into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-350), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of hot/cold water bottles:

1. *Identification:* A hot/cold water bottle is a device in the form of a container intended to be filled with hot or cold water used to apply heat or cold to an area of the body for therapeutic purposes.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that hot/cold water bottles be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a

manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel recommends that the material used in this device be leakproof. In addition, the Panel recommends that there be labeling as to correct usage, e.g., a warning that boiling water should not be used.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that hot/cold water bottles be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a hot/cold water bottle be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a hot/cold water bottle, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a hot/cold water bottle. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a hot/cold water bottle be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a

manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a hot/cold water bottle must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a hot/cold water bottle must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6085, to read as follows:

§ 880.6085 Hot/cold water bottle.

(a) *Identification.* A hot/cold water bottle is a device in the form of a container intended to be filled with hot or cold water used to apply heat or cold to an area of the body for therapeutic purposes.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four

copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Date: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26098 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1338]

Medical Devices; Classification of Aerator Cabinets

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying aerator cabinets into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation.

The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of aerator cabinets:

1. Identification: An aerator cabinet is a device consisting of a cabinet with a ventilation system designed to circulate and exchange the air in the cabinet to assist residual ethylene oxide (ETO) to escape from wrapped medical devices that have undergone ETO sterilization.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that aerator cabinets be classified into class II because the Panel believes that the electrical properties of the aerator cabinet must be controlled through an electrical safety standard. The Panel also believes that performance standards are needed to assure adequate air movement within the aerator cabinet and to assure proper venting of the aerator cabinet. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Burns: Medical devices that contain residual ETO may cause burns where they contact the skin or body. (b) Hemolysis (destruction of red blood cells) and tissue damage: Implantable devices that contain residual ETO may cause hemolysis and localized tissue damage. (c) Electric shock: Improper device design and construction or device malfunction can result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that aerator cabinets be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

In the Federal Register of June 23, 1978 (43 FR 27474), FDA proposed to amend Parts 211 and 821 (21 CFR Parts 211 and 821) to establish maximum residue limits and maximum levels of exposure of ethylene oxide and its two major reaction products, ethylene chlorohydrin

and ethylene glycol. This proposal would impose restrictions on the continued use of ethylene oxide as a sterilant for certain drug products and medical devices for human use by: (1) Establishing maximum residue limits for ethylene oxide and its two major reaction products, ethylene chlorohydrin (2-chloroethanol) and ethylene glycol, in drug products for human and veterinary use, including biological products for human use, and in medical devices for human use; and (2) establishing maximum daily levels of exposure for drug products for ethylene oxide and its two major reaction products. FDA proposed this action because residues of ethylene oxide and its two major reaction products in drug products and devices for which ethylene oxide is used as a sterilant may produce toxic reactions in patients, and because of the potential risk of mutagenicity from exposure to these residues. The restrictions imposed by this proposed rule concern aerator cabinets because this device is used to assist residual ethylene oxide and its reaction products to escape from treated products.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6100 as follows:

§ 880.6100 Aerator cabinet.

(a) *Identification.* An aerator cabinet is a device consisting of a cabinet with a ventilation system designed to circulate and exchange the air in the cabinet to assist residual ethylene oxide (ETO) to escape from wrapped medical devices that have undergone ETO sterilization.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

[21 CFR Part 880]

[Docket No. 78N-1340]

Medical Devices; Classification of Medical Chairs and Tables

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying medical chairs and tables into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A notice elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of medical chairs and tables:

1. Identification: A medical chair or table is a device consisting of a chair or table without wheels and not electrically powered which, by reason of special shape or attachments,

such as food trays or headrests, or special features, such as a built-in raising and lowering mechanism or removable arms, is designed for the use of blood donors, geriatric patients, or patients undergoing treatment or examination. The Panel identified this generic type of device under the names "blood donor chair," "examination and treatment chair," and "geriatric chair."

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that medical chairs and tables be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be sufficiently stable that it does not tip over and sufficiently durable that it does not collapse.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that medical chairs and tables be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a medical chair or table be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a

medical chair or table, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a medical chair or table. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a medical chair or table be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a medical chair or table must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a medical chair or table must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G

by adding new § 880.6140, to read as follows:

§ 880.6140 Medical chair and table.

(a) *Identification.* A medical chair or table is a device consisting of a chair or table without wheels and not electrically powered which, by reason of special shape or attachments, such as food trays or headrests, or special features such as a built-in raising and lowering mechanism or removable arms, is designed for the use of blood donors, geriatric patients, or patients undergoing treatment or examination.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1341]

Medical Devices; Classification of Ultrasonic Cleaners for Medical Instruments

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultrasonic cleaners for medical instruments into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device

into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of ultrasonic cleaners for medical instruments:

1. Identification: An ultrasonic cleaner for medical instruments is a device used to clean medical instruments by the emission of high frequency soundwaves.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that ultrasonic cleaners for medical instruments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel also recommends that the device labeling advise users to check periodically the level of energy emitted by the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultrasonic cleaners for medical instruments be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide

reasonable assurance of the safety and effectiveness of the device.

In addition to the Medical Device Amendments of 1976 (Pub. L. 94-295), FDA has authority under the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602) to establish and implement an electronic product radiation control program that includes performance standards for electronic products and their related accessories. Within this program, radiation emission performance standards have been, and will continue to be, set and enforced for certain medical devices that emit electronic product radiation. At this time, performance standards have been promulgated for diagnostic x-ray systems and their major components (§ 1020.30(21 CFR 1020.30)), radiographic equipment (§ 1020.32 (21 CFR 1020.32)), laser products, whether used medically or not (§§ 1040.10 and 1040.11 (21 CFR 1040.10 and 1040.11)), and ultrasonic therapy products (§ 1050.10 (21 CFR 1050.10)). The agency will use its authority over radiation-emitting electronic medical products under the Medical Device Amendments of 1976 and/or the Radiation Control for Health and Safety Act of 1968, as appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6150, to read as follows:

§ 880.6150 Ultrasonic cleaner for medical instruments.

(a) *Identification.* An ultrasonic cleaner for medical instruments is a device used to clean medical instruments by the emission of high frequency soundwaves.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26101 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1342]

Medical Devices; Classification of Specimen Containers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying specimen containers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of specimen containers:

1. Identification: A specimen container is a device, usually sterile, used for the collection and transport of body waste, body exudate, or tissue samples.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that specimen containers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that the device be made of an inert material to prevent chemical reactions with the specimen, be unbreakable and sterilizable, and be designed with a secure closure to maintain the integrity of the contents.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Inappropriate therapy: Lack of sterility or leakage of the container may result in contamination or deterioration of the sample and lead to erroneous test results which could result in inappropriate therapy.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that specimen containers be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6175, to read as follows:

§ 880.6175 Specimen container.

(a) *Identification.* A specimen container is a device, usually sterile, used for the collection and transport of body waste, body exudate, or tissue samples.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1343]

Medical Devices; Classification of Cast Covers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cast covers into class I (general controls). FDA is also publishing the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Physical Medicine Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cast covers:

1. Identification: A cast cover is a device made of waterproof material that is placed over a cast to protect it from getting wet during a shower or a bath.

2. Recommended classification: Class I (general controls). The Panel recommends

that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), from records and reports regulations under section 519 of the act (21 U.S.C. 360i), and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that cast covers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. Because this is a simple device with no known potential risks to health, the Panel believes that it should be exempt from sections 510(k), 519, and 520(f) of the act.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Physical Medicine Device Classification Panel recommendation and is proposing that cast covers be classified into class I (general controls). The agency has concluded that cast covers should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a cast cover be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a cast cover, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a cast cover. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will

provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of a cast cover be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of a cast cover be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a cast cover must still be required to comply with the complaint file requirements of § 820.198

to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a cast cover must still be required to comply with the general requirements concerning records in 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.6185, to read as follows:

§ 880.6185 Cast cover.

(a) *Identification.* A cast cover is a device made of waterproof material that is placed over a cast to protect it from getting wet during a shower or a bath.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

(Docket No. 78N-1344)

**Medical Devices; Classification of
Mattress Covers**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mattress covers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305) Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mattress covers:

1. *Identification:* A mattress cover is a device usually made of plastic used to protect a mattress. The device may contain a germicide and may be electrically conductive.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that

mattress covers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the panel believes that FDA does not need to receive a premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be impermeable to fluids.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risk to health:* Crossinfection: If the device is not capable of being cleaned or sterilized for reuse, crossinfection could occur between patients.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that mattress covers be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The agency disagrees with the Panel recommendation that manufacturers of a mattress cover be exempt from premarket notification under section 510(k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from compliance with section 510(k) of the act only upon a finding that compliance is not necessary for the protection of the public health. In the case of mattress covers, the agency cannot make the required finding. To protect the public health, FDA needs to require premarket notification by these manufacturers to assure that the agency learns of new products, and significant modifications of existing products, for which premarket approval is required.

In response to the Panel's recommendation that manufacturers of a mattress cover be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.189 (21 CFR 820.189), with respect to complaint files. Based on available information about current practices used in the

manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a mattress cover, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a mattress cover must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a mattress cover that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.6190, to read as follows:

§ 880.6190 Mattress cover.

(a) *Identification.* A mattress cover is a device usually made of plastic used to protect a mattress. The device may contain a germicide and may be electrically conductive.

(b) *Classification.* Class I (general controls). If the device is not labeled or otherwise represented as sterile, it is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.189, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this

document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26104 Filed 8-23-79; 8:45 am]

(Docket No. 78N-1345)

**Medical Devices; Classification of Ring
Cutters**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ring cutters into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A Proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ring cutters:

1. Identification: A ring cutter is a device used to cut a ring on a patient's finger so that the ring can be removed. The device incorporates a guard to prevent injury to the patient's finger.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that ring cutters be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ring cutters be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a ring cutter be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a ring cutter, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive

premarket notification submissions concerning a ring cutter. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a ring cutter be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a ring cutter must still be required to comply with the complaint file requirements of § 820.198 to ensure that these requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a ring cutter must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.6200, to read as follows:

§ 880.6200 Ring cutter.

(a) *Identification.* A ring cutter is a device used to cut a ring on a patient's finger so that the ring can be removed. The device incorporates a guard to prevent injury to the patient's finger.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1346]

Medical Devices; Classification of Tongue Depressors

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying tongue depressors into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel, the General and Plastic Surgery Device Classification Panel, the Dental Device Classification Panel, and the Ear, Nose, and Throat Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979.

It is proposed that the final regulation based on this proposal become effective

30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the General and Plastic Surgery Device Classification Panel, the Dental Device Classification Panel, and the Ear, Nose, and Throat Device Classification Panel, FDA advisory committees, made the following recommendation regarding the classification of tongue depressors:

1. Identification: A tongue depressor is a device used to displace the tongue to facilitate examination of the surrounding organs and tissues. The General and Plastic Surgery Device Classification panel identified this generic type of device under the name "tongue blades." The Dental Device Classification Panel identified this generic type of device under the name "tongue depressors." The Ear, Nose, and Throat Device Classification Panel identified this generic type of device under the name "wooden tongue depressors."

2. Recommended classification: Class I (general controls). The General Hospital and Personal Use Device Classification Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and, if the device is not labeled as sterile, exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The General and Plastic Surgery Device Classification Panel recommends that there be no exemptions for this device. The Dental Device Classification Panel recommends that this device be exempt from premarket notification under section 510(k) of the act, records and reports regulations under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act. The Ear, Nose, and Throat Device Classification panel recommends that this device be exempt from premarket notification under section 510(k) of the act.

3. Summary of reasons for recommendation: The Panels recommend that tongue depressors be classified into class I because the Panels believe that general controls are sufficient to provide reasonable

assurance of the safety and effectiveness of the device. The Panels recommend that this device be exempt from premarket notification under section 510(k) of the act because the Panels believe that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panels recommend that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panels believe that the quality of the device is easily discernible and that defects are readily apparent to the user. The Dental Device Classification panel recommends that this device be exempt from records and reports regulations under section 519 of the act because the Panel believes that FDA does not need to receive records and reports for this simple device. The General Hospital and Personal Use Device Classification Panel recommends that the device should be sanitized, although not necessarily sterilized. The Panel also recommends that the device be smooth and durable.

4. Summary of data on which the recommendations are based: The panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risk to health: Infection: If the device is labeled as sterile and it is not sterile, pathogenic organisms could cause an infection in the patient.

Proposed Classification

FDA agrees with the Panel's recommendations and is proposing that tongue depressors be classified into class I (general controls).

The agency has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel for tongue depressors, the General and Plastic Surgery Device Classification Panel for tongue blades, the Dental Device Classification Panel for tongue depressors, and the Ear, Nose, and Throat Device Classification Panel for wooden tongue depressors, and has concluded that the device should be named "tongue depressor" and its classification be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a tongue depressor be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency

may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a tongue depressor, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a tongue depressor. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of a tongue depressor be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of a tongue depressor be exempt from the device good manufacturing practice

(GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a tongue depressor, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a tongue depressor must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a tongue depressor that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6230, to read as follows:

§ 880.6230 Tongue depressor.

(a) *Identification.* A tongue depressor is a device used to displace the tongue to facilitate examination of the surrounding organs and tissues.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements

concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1347]

Medical Devices; Classification of Patient Examination Gloves

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying patient examination gloves into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia

Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of patient examination gloves:

1. Identification: A patient examination glove is a disposable device worn on the examiner's hand or finger to prevent contamination between patient and examiner.
2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and, if the device is not labeled as sterile, exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).
3. Summary of reasons for recommendation: The Panel recommends that patient examination gloves be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be clean, although not necessarily sterile, and that glove size be stated on the label to assure proper fit.
4. Summary of data on which the recommendations are based: The Panel based its recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.
5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that patient examination gloves be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a patient examination glove be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be

subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a patient examination glove, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a patient examination glove. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a patient examination glove be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a patient examination glove even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a patient examination glove must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to

complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a patient examination glove that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6250, to read as follows:

§ 880.6250 Patient examination glove.

(a) *Identification.* A patient examination glove is a disposable device worn on the examiner's hand or finger to prevent contamination between patient and examiner.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it is also exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

[Docket No. 78N-1348]

Medical Devices; Classification of Examination Gowns

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying examination gowns into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of examination gowns:

1. Identification: An examination gown is a device made of cloth, paper, or other material that is draped over or worn by a patient as a body covering during a medical examination.
2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).
3. Summary of reasons for recommendation: The Panel recommends that

examination gowns be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the material used in the device be flame retardant.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that examination gowns be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of an examination gown be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an examination gown, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an examination gown. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of an examination gown be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180) with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an examination gown, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an examination gown must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of an examination gown that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6265, to read as follows:

§ 880.6265 Examination gown.

(a) *Identification.* An examination gown is a device made of cloth, paper, or other material that is draped over or worn by a patient as a body covering during a medical examination.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If

the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26108 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1363]

Medical Devices; Classification of Medical Insoles

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying medical insoles into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of medical insoles:

1. Identification: A medical insole is a device placed inside a shoe to relieve the symptoms of athlete's foot infection by absorbing moisture.
2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.
3. Summary of reasons for recommendation: The Panel recommends that medical insoles be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on an article describing the use of insoles containing activated charcoal to reduce excessive perspiration of the foot (Ref. 1). The article states that in patients who had worn the insoles for over 4 weeks, there was a decrease in perspiration of the foot.
5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that medical insoles be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

[21 CFR Part 880]

[Docket No. 78N-1364]

Medical Devices; Classification of AC-Powered Examination Lights

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered examination lights into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective

30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of AC-powered examination lights:

1. Identification: An AC-powered examination light is an electrically powered device that illuminates body surfaces and cavities during a medical examination.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that AC-powered examination lights be classified into class II because the Panel believes that the electrical properties of the device must be controlled through an electrical safety standard. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.
5. Risks to health: (a) Burns: If the device overheats and touches the patient, it may cause a burn. (b) Electrical shock: Improper device design and construction or device malfunction can result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that AC-powered examination lights be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide

this assurance. The agency also believes that there is sufficient information to establish a performance standard for this device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6320, to read as follows:

§ 880.6320 AC-powered examination light.

(a) *Identification.* An AC-powered examination light is an electrically powered device that illuminates body surfaces and cavities during a medical examination.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26110 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1350]

Medical Devices; Classification of Battery-Powered Examination Lights

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying battery-powered examination lights into class I (general controls). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendations with respect to the classification of battery-powered examination lights:

comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendations with respect to the classification of battery-powered examination lights:

1. *Identification:* A battery-powered examination light is a battery-powered device that illuminates body surfaces and cavities during a medical examination.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that battery-powered examination lights be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that battery-powered examination lights be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a battery-powered examination light be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a battery-powered examination light, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a battery-powered examination light. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a battery-powered examination light be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device.

The agency believes, however, that manufacturers of a battery-powered examination light must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a battery-powered examination light must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart C by adding new § 880.6350, to read as follows:

§ 880.6350 Battery-powered examination light.

(a) *Identification.* A battery-powered examination light is a battery-powered device that illuminates body surfaces and cavities during a medical examination.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1351]

Medical Devices; Classification of Patient Lubricants

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying patient lubricants into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of patient lubricants:

1. *Identification:* A patient lubricant is a device used to lubricate a body orifice to facilitate entry of a diagnostic or therapeutic device. The Panel identified this generic type of device under the name "lubricants."

2. *Recommended classification:* Class I (general controls). The Panel recommends that the device be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that patient lubricants be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from the GMP regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that patient lubricants be classified into class I (general controls). The agency believes that there is a risk of skin irritation or a toxicity reaction associated with this device if inappropriate chemicals are used in the manufacture of this device. Therefore, the agency disagrees with the Panel recommendation that manufacturers of patient lubricants be exempt from the GMP regulation under section 520(f) of the act. The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of patient lubricants having defects that could cause harm to users.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6375, to read as follows:

880.6375 Patient lubricant.

(a) *Identification.* A patient lubricant is a device used to lubricate a body orifice to facilitate entry of a diagnostic or therapeutic device.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written

comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26112 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[Docket No. 78N-1386]

Medical Devices; Classification of Liquid Medication Dispensers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying liquid medication dispensers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the

development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of liquid medication dispensers:

1. **Identification:** A liquid medication dispenser is a disposable device used to issue a measured amount of liquid medication. The Panel made a recommendation regarding the classification of "liquid medication dispensers" and regarding "graduated liquid medication containers."

The Panel identified a liquid medication dispenser as a disposable graduated syringe, with a tip that will not accept a standard syringe needle, intended to dispense liquid medication into the mouth of a patient. The Panel identified a graduated liquid medication container as a disposable device consisting of a beaker or an open-end vessel with graduation marks used to measure and dispense liquid medication.

2. **Recommended classification:** Class I (general controls). The Panel recommends that there be no exemptions for liquid medication dispensers. The Panel recommends that graduated liquid medication containers be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. **Summary of reasons for recommendation:** The Panel recommends that liquid medication dispensers and graduated liquid medication containers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. The Panel also recommends that these devices be made of an inert material. The Panel recommends that graduated liquid medication containers be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that the graduated liquid medication container be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, liquid medication dispensers and graduated liquid medication containers.

5. **Risks to health:** (a) Incorrect dosage: Inaccuracy in the calibration of the dispenser or the container will cause an incorrect dosage of medication to be dispensed to the patient. (b) Adverse reaction: If the medication leaches toxic substances from the dispenser or the container, the patient may suffer an adverse reaction.

Proposed Classification

FDA agrees with the Panel recommendations and is proposing that the generic type device, liquid medication dispenser, be classified into class I (general controls). FDA has reviewed the recommendation of the Panel for the "liquid medication dispenser" and the "graduated liquid medication container" and has concluded that these devices are essentially the same and that it is more appropriate for the agency to publish one classification regulation for the generic type of device and that the generic type device should be named the "liquid medication dispenser." The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the generic type of the device. The agency believes that the history of use of the generic type of device has shown that there is minimal risk of adverse reaction due to leaching of toxic substances. The agency also believes that the misbranding provisions under section 502 of the act (21 U.S.C. 352) are sufficient to assure the accuracy of the calibration of the device.

The agency disagrees with the Panel recommendation that there be no exemption for the device they identified as "liquid medication dispensers"; however, FDA agrees in part with the Panel recommendation that the device they identified as "graduated liquid medication containers" be exempt from sections 510(k) and 520(f) of the act.

Therefore, FDA is proposing that the manufacturers of the generic type device FDA has named "liquid medication dispenser" be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a liquid medication dispenser, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a liquid medication dispenser. The agency does not at this time anticipate that premarket approval will be required for

this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a liquid medication dispenser be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a liquid medication dispenser must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a liquid medication dispenser must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6430, to read as follows:

§ 880.6430 Liquid medication dispenser.

(a) **Identification.** A liquid medication dispenser is a device used to issue a measured amount of liquid medication.

(b) **Classification.** Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the

exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1353]

Medical Devices; Classification of Skin Pressure Protectors

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying skin pressure protectors into class I (general controls). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices

(HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of skin pressure protectors:

1. **Identification:** A skin pressure protector is a device used to reduce pressure on the skin over a bony prominence to reduce the likelihood of the patient's developing decubitus ulcers (bedsores). This generic type of device includes a device that the Physical Medicine Device Classification Panel identified as the "heel protector," a device worn on the heels or elbows of immobile patients to lessen the likelihood of decubitus ulcers (bedsores).

2. **Recommended classification:** Class I (general controls). The General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel recommend that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)). The Physical Medicine Device Classification Panel recommends that this device be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360(i)).

3. **Summary of reasons for recommendation:** The General Hospital and Personal Use Device Classification Panel and the Physical Medicine Device Classification Panel recommend that this device be classified into class I because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The General Hospital and Personal Use Device Classification Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel also recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Physical Medicine Device Classification Panel believes that this is a simple device with no known potential risks to health and, therefore, should be exempt from sections 510(k), 519, and 520(f) of the act. The Physical Medicine Device Classification Panel believes that the safety and effectiveness of the device can be

adequately controlled without premarket notification, the regulation of manufacturing methods, and documentation.

4. Summary of data on which the recommendations are based: The Panel based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel identified the following risks to health: (a) Skin irritation: The material used in the device may irritate the patient's skin. (b) Infection: If the device is not cleanable or sterilizable, an infection in the patient could result. The Physical Medicine Device Classification Panel identified no risks to health presented by the device.

Proposed Classification

FDA agrees with Panels' recommendations and is proposing that skin pressure protectors be classified into class I (general controls). FDA has reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel for skin pressure protectors and the Physical Medicine Device Classification Panel for heel protectors and has concluded that because there are many general uses for this type of device, the device should be described under of general identification for the "skin pressure protector" and that its classification will be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The history of use of the device indicates that there is minimal risk of skin irritation or infection caused by the device. Therefore, the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a skin pressure protector be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a skin pressure protector, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA

receive premarket notification submissions concerning a skin pressure protector. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the recommendation of the Physical Medicine Device Classification Panel that manufacturers of skin pressure protectors be exempt from records and reports regulations under section 519 of the act. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of a skin pressure protector be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the

manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a skin pressure protector must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a skin pressure protector must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6450, to read as follows:

§ 880.6450 Skin pressure protector.

(a) *Identification.* A skin pressure protector is a device used to reduce pressure on the skin over a bony prominence to reduce the likelihood of the patient's developing decubitus ulcers (bedsores).

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before (October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the

hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1354]

Medical Devices; Classification of Ultraviolet Air Purifiers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultraviolet air purifiers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultraviolet air purifiers:

1. Identification: An ultraviolet air purifier is a device used to destroy bacteria in the air by exposure to ultraviolet radiation.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that ultraviolet air purifiers be classified into class II because the Panel believes that performance standards are needed to assure that the device reduces the level of bacteria in the air and to control the electrical properties of the device. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel recommends that the labeling contain a warning that overexposure to the ultraviolet radiation emitted by the device may cause injury to the eye or skin. The Panel also recommends that the labeling indicate the degree of effectiveness of the device. The Panel also recommends that users have the ultraviolet bulb checked regularly to determine its output of ultraviolet radiation. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

Risks to health: (a) Ozone toxicity: The device may produce ozone, which may cause ozone toxicity. (b) Injury of the skin or eye: Overexposure to ultraviolet radiation emitted by the device may cause injury to the skin or eye. (c) Infection: Failure of the device to eliminate bacterial contamination sufficiently in air could result in patient infection. (d) Electrical injury: Improper device design and construction or device malfunction can result in electrical injury.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultraviolet air purifiers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

In addition to the Medical Device Amendments of 1976 (Pub. L. 94-295), FDA has authority under the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602) to establish and implement an electronic product radiation control program that includes performance standards for electronic products and their related accessories.

Within this program, radiation emission performance standards have been, and will continue to be, set and enforced for certain medical devices that emit electronic product radiation. At this time, performance standards have been promulgated for diagnostic x-ray systems and their major components (§ 1020.30 (21 CFR 1020.30)), radiographic equipment (§ 1020.32 (21 CFR 1020.32)), laser products, whether used medically or not (§§ 1040.10 and 1040.11 (21 CFR 1040.10 and 1040.11)), and ultrasonic therapy products (§ 1050.10 (21 CFR 1050.10)). The agency will use its authority over radiation emitting electronic medical products under the Medical Device Amendments of 1976 and/or the Radiation Control for Health and Safety Act of 1968, as appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6500, to read as follows:

§ 880.6500 Ultraviolet air purifier.

(a) *Identification.* An ultraviolet air purifier is a device used to destroy bacteria in the air by exposure to ultraviolet radiation.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26115 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1355]

Medical Devices; Classification of Ultraviolet Water Purifiers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultraviolet water purifiers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultraviolet water purifiers:

1. Identification: An ultraviolet water purifier is a device used to destroy bacteria in water by exposure to ultraviolet radiation.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that ultraviolet water purifiers be classified into class II because the Panel believes that performance standards are necessary to assure that the device reduces the level of bacteria in water and to control the electrical properties of the device. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel recommends that the labeling contain a warning that overexposure to the

ultraviolet radiation emitted by the device may cause injury to the eye or skin. The Panel also recommends that the labeling indicate the degree of effectiveness of the device. In addition, the Panel recommends that users have the ultraviolet bulb checked regularly to determine its output of ultraviolet radiation. The Panel believes that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Ozone toxicity: The device may produce ozone, which may cause ozone toxicity. (b) Injury to the skin and eye: Overexposure to ultraviolet radiation emitted by this device may cause injury of the skin or eye. (c) Infection: Failure of the device to eliminate bacterial contamination sufficiently in water could result in patient infection. (d) Electrical shock: Improper device design and construction or device malfunction could result in electrical shock.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultraviolet water purifiers be classified into class II (performance standards). The agency believes that performance standards are necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

In addition to the Medical Device Amendments of 1976 (Pub. L. 94-295), FDA has authority under the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602) to establish and implement an electronic product radiation control program that includes performance standards for electronic products and their related accessories. Within this program, radiation emission performance standards have been, and will continue to be, set and enforced for certain medical devices that emit electronic product radiation. At this time, performance standards have been promulgated for diagnostic x-ray systems and their major components (§ 1020.30 (21 CFR 1020.30)), radiographic equipment (§ 1020.32 (21 CFR 1020.32)), laser products, whether used medically or not, (§§ 1040.10 and 1040.11 (21 CFR 1040.10 and 1040.11)), and ultrasonic therapy products (§ 1050.10 (21 CFR 1050.10)). The agency will use its authority over radiation emitting electronic medical products

under the Medical Device Amendments of 1976 and/or the Radiation Control for Health and Safety Act of 1968, as appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6710, to read as follows:

§ 880.6710 Ultraviolet water purifier.

(a) *Identification.* An ultraviolet water purifier is a device used to destroy bacteria in water by exposure to ultraviolet radiation.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

(FR Doc. 79-26116 Filed 8-22-79; 8:46 am)
BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1356]****Medical Devices; Classification of Body Waste Receptacles**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying body waste receptacles into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of body waste receptacles:

1. Identification: A body waste receptacle is a device not attached to the body used to collect the body wastes of a bed patient. The Panel identified this generic type of device under the names "emesis basins," "bedpans" and "urinals."

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that body waste receptacles be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel also recommends that the device be exempt from the good manufacturing practices regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be sterilizable and, if made of metal, rustproof, have no rough edges, and be able to support the patient if necessary.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members'

personal knowledge of, and clinical experience with, the device.
5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that body waste receptacles be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a body waste receptacle be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a body waste receptacle, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a body waste receptacle. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a body waste receptacle be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the

safety and effectiveness of the device. The agency believes, however, that manufacturers of a body waste receptacle must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a body waste receptacle must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 882 in Subpart G by adding new § 880.6730, to read as follows:

§ 880.6730 Body waste receptacle.

(a) *Identification.* A body waste receptacle is a device not attached to the body used to collect the body wastes of a bed patient.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1357]

Medical Devices; Classification of Vacuum-Powered Body Fluid Suction Apparatus

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying vacuum-powered body fluid suction apparatus into class II (performance standards). FDA is also publishing: the recommendation of the General and Plastic Surgery Device Classification Panel that this device be classified into class II; the recommendation of the General Hospital and Personal Use Device Classification Panel that suction catheters and tips, vacuum collection bottles, and vacuum regulators, which are components of the device, be classified into class I; the recommendation of the Anesthesiology Device Classification Panel that connecting flexible aspirating tubes, rigid suction tips, and sterile specimen traps, which are components of the device to be classified into class I; the recommendation of the General and Plastic Surgery Device Classification Panel that noninvasive tubing, which is tubing, a component of the device, be classified into class I; and the recommendation of the Anesthesiology Device Classification Panel that the suction regulator (with gage), which is a component of the device, be classified into class II (performance standards). The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General and Plastic Surgery Device Classification Panel, the General Hospital and Personal Use Device Classification Panel, and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of the vacuum-powered body fluid suction apparatus and its components:

1. Identification: A vacuum-powered body fluid suction apparatus is a device used to aspirate, remove, or sample body fluids. The device is powered by an external source of vacuum. This generic type of device includes vacuum regulators, vacuum collection bottles, suction catheters and tips, connecting flexible aspirating tubes, rigid suction tips, specimen traps, noninvasive tubing and suction regulators (with gage). The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel considered components of this device as separate generic types of devices and under separate classification recommendations for the vacuum regulator, the suction regulator, the vacuum collection bottle, the sterile specimen trap, the suction catheter and tip, the rigid suction tip, and the connecting flexible aspirating tube. The General and Plastic Surgery Device Classification Panel considered a component of this device as a separate generic type of device and made a separate classification recommendation for noninvasive tubing. These Panels identified the vacuum regulator and the suction regulator (with gage) as a device used to control the vacuum pressure in a suction system, the vacuum collection bottle and the sterile specimen trap as a device used for the collection of aspirated fluids, the suction catheter and tip and rigid suction tip as a device used for the aspiration of fluids, and the connecting flexible aspirating tube as a device used to conduct fluids from the suction tip to the collection bottle.

2. Recommended classification: The General and Plastic Surgery Device Classification Panel recommends that the vacuum powered body fluid suction apparatus be classified into class II (performance standards) and that establishing a performance standard for this device be a low priority. The Panel recommends that noninvasive tubing be classified into class I (general controls) and that the device be exempt from records and reports regulations under 519 of the act (21

U.S.C. 360i). The General Hospital and Personal Use Device Classification Panel recommends that the suction catheter and tip, the vacuum collection bottle, and the vacuum regulator be classified into class I (general controls). The Panel recommends that the vacuum collection bottle be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The Panel recommends that there be no exemption for the suction catheter and tip or the vacuum regulator. The Anesthesiology Device Classification Panel recommends that the suction regulator (with gage) be classified into class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority. The Panel recommends that the rigid suction tips, sterile specimen trap, and connecting flexible aspirating tube be classified into class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The General and Plastic Surgery Device Classification Panel recommends that this device be classified into class II because the Panel believes that a standard is needed to assure that the vacuum regulator is accurate and that the suction catheter and tip will not collapse during use. The Anesthesiology Device Classification Panel recommends that suction regulators (with gage) be classified into class II because the Panel believes that a performance standard is needed to assure that the device is accurate. The two Panels believe that general controls would not provide sufficient control over these characteristics. The Anesthesiology Device Classification Panel recommends that connecting flexible aspirating tubes, rigid suction tips, and sterile specimen traps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The General Hospital and Personal Use Device Classification Panel recommends that suction catheters and tips, vacuum collection bottles, and vacuum regulators be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that vacuum collection bottles be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that vacuum collection bottles be exempt from good manufacturing practice regulations under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and defects are readily apparent to the user. The Panel also recommends that the suction catheter and tip be supplied sterile. The General and Plastic Surgery Device Classification Panel recommends that noninvasive tubing be classified into class I because the Panel believes that general controls are sufficient to

provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that the device be exempt from the records and reports regulations under section 519 of the act because the Panel believes that FDA does not need to receive records and reports for this simple device.

4. Summary of data on which the recommendations are based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General and Plastic Surgery Device Classification Panel and the Anesthesiology Device Classification Panel identified the following risk to health: (a) Tissue damage: If the vacuum regulator does not regulate the vacuum pressure properly, or if the suction catheter and tip is not of appropriate size, shape, and rigidity, tissue damage could result. The Anesthesiology Device Classification Panel identified the following additional risks to health: (b) Misdiagnosis and inappropriate therapy: Contamination of the sterile specimen trap used to collect specimens for laboratory analysis may result in the generation of inaccurate diagnostic information and thus in inappropriate therapy. (c) Infection: A lack of sterility of the rigid suction tip may cause an infection in the patient. (d) Inadequate fluid removal: Faulty connections or leaks in the rigid suction tip or the connecting flexible aspirating tube may result in inadequate fluid removal.

Proposed Classification

FDA agrees with the recommendation of the General and Plastic Surgery Device Classification Panel and is proposing that the vacuum-powered body fluid suction apparatus be classified into class II (performance standards). The agency has also reviewed the recommendations of the General Hospital and Personal Use Device Classification Panel, the Anesthesiology Device Classification Panel, and the General and Plastic Surgery Device Classification Panel for vacuum regulators, suction regulators (with gage), vacuum collection bottles, sterile specimen traps, suction catheters and tips, rigid suction tips, connecting flexible aspirating tubes, and noninvasive tubing, and has concluded that because these devices are components of the generic type vacuum-powered body fluid suction apparatus, they should be classified in the same regulation as the device of which they are parts. The agency also believes it is more appropriate for the classification of the vacuum-powered body fluid suction apparatus to be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A

performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

The agency disagrees with the General Hospital and Personal Use Device Classification Panel recommendation that suction catheters and tips, vacuum collection bottles, and vacuum regulators be classified into class I. The agency also disagrees with the Anesthesiology Device Classification Panel that connecting flexible aspirating tubes, rigid suction tips, and sterile specimen traps be classified into class I. The agency also disagrees with the General and Plastic Surgery Device Classification Panel that noninvasive tubing be classified into class I. The agency is proposing that the vacuum-powered body fluid suction apparatus be classified into class II. Therefore, the components of the apparatus would also be classified into class II.

Because the agency has decided that the vacuum-powered body fluid suction apparatus should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the recommendation of the General Hospital and Personal Use Device Classification Panel that the vacuum collection bottle, a component of the device, be exempt from premarket notification under section 510(k) of the act and from the good manufacturing practice regulation under section 520(f) of the act and the agency is not required to publish a regulation adopting or rejecting the recommendation of the General and Plastic Surgery Device Classification Panel that noninvasive tubing, a component of the device, be exempt from the records and reports regulations under section 519 of the act.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6740, to read as follows:

§ 880.6740 Vacuum-powered body fluid suction apparatus.

(a) *Identification.* A vacuum-powered body fluid suction apparatus is a device used to aspirate, remove, or sample body fluids. The device is powered by an external source of vacuum. This generic type of device includes vacuum regulators, vacuum collection bottles, suction catheters and tips, connecting flexible aspirating tubes, rigid suction

tips, specimen traps, noninvasive tubing and suction regulators (with gage).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[Docket No. 78N-1358]

Medical Devices; Classification of Protective Restraints

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying protective restraints into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.
DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health,

Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of protective restraints:

1. Identification: A protective restraint is a device, usually a wristlet, ankle, or other type of strap, that limits a patient's movements to the extent necessary for treatment, examination, or protection of the patient.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that protective restraints be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDS does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device be flame retardant, strong, nonconstricting, and cleanable.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Constriction of blood supply or restriction of respiration: If the device straps can slip and tighten, they could constrict the blood supply to an arm or leg or restrict respiration.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that protective restraints be classified into class I (general controls). The history of use of the device has shown that there is minimal risk of constriction of the patient's blood supply to an arm or leg or restriction of the patient's respiration caused by the device. Therefore, the agency believes that general controls

are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a protective restraint be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a protective restraint, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a protective restraint. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a protective restraint be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a protective restraint must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a

protective restraint must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6760, to read as follows:

§ 880.6760 Protective restraint.

(a) *Identification.* A Protective restraint is a device, usually a wristlet, ankle, or other type of strap, that limits a patient's movements to the extent necessary for treatment, examination, or protection of the patient.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-56, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-27119 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1359]

Medical Devices; Classification of AC-Powered Patient Transfer Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered patient transfer devices into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of AC-powered patient transfer devices:

1. Identification: An AC-powered patient transfer device is a device consisting of a wheeled stretcher and an AC-powered mechanism that has a broad flexible band stretched over long rollers that can advance itself under a patient and transfer the patient with minimal disturbance in a horizontal position to the stretcher. The Panel identified this generic type of device under the name "AC-powered patient roller."

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that AC-powered patient transfer devices be classified into class II because the Panel believes the electrical properties of the device must be controlled through an electrical safety standard. The Panel believes that general controls would not provide sufficient control over this device characteristic. The Panel believes that the device labeling should state the maximum weight capacity of the device and include cleaning instructions. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Electrical shock: Improper device design and construction or device malfunction can result in electrical shock. (b) Infection: If the device cannot be properly cleaned, an infection to the patient could result.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that AC-powered patient transfer devices be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6775, to read as follows:

§ 880.6775 AC-powered patient transfer device.

(a) *Identification.* An AC-powered patient transfer device is a device consisting of a wheeled stretcher and an AC-powered mechanism that has a broad flexible band stretched over long rollers that can advance itself under a patient and transfer the patient with minimal disturbance in a horizontal position to the stretcher.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26120 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1360]

Medical Devices; Classification of Manual Patient Transfer Devices

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying manual patient transfer devices into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia

Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of manual patient transfer devices:

1. Identification: A manual patient transfer device is a device consisting of a wheeled stretcher and a mechanism on which a patient can be placed so that the patient can be transferred with minimal disturbance in a horizontal position to the stretcher. The Panel identified this generic type of device under the name "manual patient roller."

2. Recommended classification: Class I (general controls). The Panel recommends that the device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that manual patient transfer devices be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that the device labeling state the maximum weight capacity of the device and include cleaning instructions.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Infection: If the device cannot be properly cleaned, an infection in the patient could result.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that manual patient transfer devices be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a

manual patient transfer device be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a manual patient transfer device, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a manual patient transfer device. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a manual patient transfer device be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a manual patient transfer device must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a manual patient transfer device must still be required to comply with the general requirements

concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6785 as follows:

§ 880.6785 Manual patient transfer device.

(a) *Identification.* A manual patient transfer device is a device consisting of a wheeled stretcher and a mechanism on which a patient can be placed so that the patient can be transferred with minimal disturbance in a horizontal position to the stretcher.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1361]

Medical Devices; Classification of Washers for Body Waste Receptacles

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying washers for body waste receptacles into class I (general controls). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of washers for body waste receptacles:

1. Identification: A washer for body waste receptacles is a device used to clean and sanitize a body waste receptacle, such as a bedpan. The device consists of a wall-mounted plumbing fixture with a door through which a body waste receptacle is inserted. When the door is closed the body waste receptacle is cleaned by hot water or steam and/or germicide. The Panel identified this generic type of device under the name "mechanical bedpan sanitizer."

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that washers for body waste receptacles be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user. The Panel also recommends that washers for body waste receptacles with a germicide cycle (a cycle in which a chemical germicide is automatically added to the wash water) allow sufficient time for the germicide to act so that bacterial concentration is reduced. The Panel also recommends that the device include a system for odor control.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Contamination: If a body waste receptacle is inadequately cleaned and sanitized, there is a possibility of contaminating patients or attendants. (b) Burns: If steam can escape from the device, there is a possibility that operating personnel may be burned.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that washers for body waste receptacles be classified into class I (general controls). The history of use of the device has shown that there is minimal risk of contamination or burns caused by the device. Therefore, the agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a washer for body waste receptacles be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a washer for body waste receptacles, the agency cannot make the required finding. To protect the public health, the

agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a washer for body waste receptacles. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a washer for body waste receptacles be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a washer for body waste receptacles must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a washer for body waste receptacles must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6800, to read as follows:

§ 880.6800 Washer for body waste receptacles.

(a) *Identification.* A washer for body waste receptacles is a device used to clean and sanitize a body waste receptacle, such as a bedpan. The device consists of a wall-mounted plumbing fixture with a door through which a body waste receptacle is inserted. When the door is closed the body waste receptacle is cleaned by hot water or steam and/or germicide.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.
William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.
[FR Doc. 79-26122 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1362]****Medical Devices; Classification of Disposable Scissors**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying disposable scissors into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final

regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of disposable scissors:

1. *Identification:* Disposable scissors are a disposable general cutting device. This generic type of device does not include surgical scissors. The Panel identified this generic type of device under the name "general hospital scissors."

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)).

3. *Summary of reasons for recommendation:* The Panel recommends that disposable scissors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that disposable scissors be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable

assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of disposable scissors be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of disposable scissors, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning disposable scissors. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6820, to read as follows:

§ 880.6820 Disposable scissors.

(a) *Identification.* Disposable scissors are a disposable general cutting device. This generic type of device does not include surgical scissors.

(b) *Classification.* Class I (general controls). The device is exempt from premarket notification procedures in Subpart E of Part 807 of this chapter.

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this

document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26123 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1363]****Medical Devices; Classification of Sterilization Wraps**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying sterilization wraps into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory

committees, made the following recommendation with respect to the classification of sterilization wraps:

1. *Identification:* A sterilization wrap is a bag or wrap in which a device is placed, sterilized, and kept sterile until use. The General and Plastic Surgery Device Classification Panel identified this generic type of device as the "pack, sterilization wrapper, bag, and accessories."

2. *Recommended classification:* Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The General and Plastic Surgery Device Classification Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panels recommend that the sterilization wrap be classified into class II because the Panels believe that the material properties of this device must be controlled through a standard to assure that the device performs as an adequate sterilization wrap and that the device will maintain the sterility of the enclosed product until it is used. The General and Plastic Surgery Device Classification Panel recommends that the standard address the particulate (lint) shedding properties of the device. The General Hospital and Personal Use Device Classification Panel recommends that the standard address the permeability and wetting properties of the wrap material, the device's shelflife, and the device's sealing and opening properties. The Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The General Hospital and Personal Use Device Classification Panel recommends that the device labeling state which sterilization method (ethylene oxide or steam) is appropriate.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* Both Panels identified the following risk to health: (a) Infection: If the sterilization wrap fails to maintain the sterility of the enclosed device, a patient using the device may get an infection. The General Hospital and Personal Use Device Classification Panel identified the following additional risk to health: (b) Adverse toxic reaction: If the sterilization wrap does not allow escape of residual ethylene oxide from an enclosed sterilized device, a patient on whom the device is used may experience an adverse toxic reaction. The General and Plastic Surgery Device Classification Panel identified the following additional risk to health: (c) Foreign body reaction: Lint shed from the device may be transferred to the product (e.g., surgical instruments, etc.) which is enclosed by this device and then to the patient, causing a foreign body reaction.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that sterilization wraps be classified into class II (performance standards). FDA has concluded that it would be more appropriate for this device to be named "sterilization wrap" and for its classification to be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6850, to read as follows:

§ 880.6850 Sterilization wrap.

(a) *Identification.* A sterilization wrap (pack, sterilization wrapper, bag, and accessories) is a bag or wrap in which a device is placed, sterilized, and kept sterile until use.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26124 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1364]****Medical Devices; Classification of Ethylene Oxide Gas Sterilizers****AGENCY:** Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ethylene oxide (ETO) gas sterilizers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. The actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of ethylene oxide gas sterilizers:

1. Identification: An ethylene oxide gas sterilizer is a device that uses ethylene oxide (ETO) to sterilize medical products. The General Hospital and Personal Use Device

Classification Panel identified this generic type of device as the "gas sterilizer." The Dental Device Classification Panel identified this generic type of device as the "ethylene-oxide gas sterilizer." The General and Plastic Surgery Device Classification Panel identified this generic type of device as the "ethylene oxide sterilizer."

2. Recommended classification: Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Dental Device Classification Panel recommends that establishing a performance standard for this device be a low priority. The General and Plastic Surgery Device Classification Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The three Panels recommend that the device be classified into class II because the Panels believe that a performance standard is necessary to assure that this device sterilizes medical products properly. The Panels also recommend that ethylene oxide sterilization be used only when steam sterilization cannot be employed. The Panels believe that qualified personnel must be trained in the use of ethylene oxide gas sterilizers to assure familiarity with certain procedures that need to be carried out in the sterilization process. The General Hospital and Personal Use Device Classification Panel recommends that the labeling of the device include directions for the installation of an ETO exhaust system and describe the need for periodic performance testing using a sterilization indicator. The General and Plastic Surgery Device Classification Panel believes that manufacturers need to agree on the length of time required to sterilize and aerate certain medical products and that aerators should be a required part of a gas sterilizer, particularly when products made of rubber or certain plastics are to be sterilized. All three Panels believe that general controls would not provide sufficient control over these characteristics. The Panels believe that a standard would provide a reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendations are based: The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device, on their knowledge of the literature that relates to sterilization and the use of ETO, and on the Association for the Advancement of Medical Instrumentation standard for E-O sterilization (Ref. 1).

5. Risks to health: The General Hospital and Personal Use Device Classification Panel and the Dental Device Classification Panel identified the following risks to health: (a) Infection: If the device fails to sterilize medical products adequately, patients exposed to the products may experience infection. The General and Plastic Surgery Device Classification Panel and the General Hospital and Personal Use Device

Classification Panel identified the following risk to health: (b) Tissue burns, skin and mucosal membrane irritation, toxic reactions, or dermatitis: If the ETO gas is not properly removed after the sterilization procedures, residual gas may be absorbed by the sterilized product. A patient exposed to this contaminated product could, as a result, experience tissue burns, skin and mucosal membrane irritation, toxic reactions, or dermatitis.

Proposed classification

FDA agrees with the Panels' recommendations and is proposing that ethylene oxide gas sterilizers be classified into class II (performance standards). FDA has concluded that it would be more appropriate for the device to be called "ethylene oxide gas sterilizer" and for its classification to be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

In the Federal Register of June 23, 1978 (43 FR 27474), FDA proposed to amend Parts 211 and 821 (21 CFR Parts 211 and 821) to establish maximum residual limits and maximum levels of exposure of ethylene oxide and its two major reaction products, ethylene chlorohydrin and ethylene glycol. This proposal would impose restrictions on the continued use of ethylene oxide as a sterilant for certain drug products and medical devices for human use by (1) establishing maximum residue limits for ethylene oxide and its two major reaction products, ethylene chlorohydrin (2-chloroethanol) and ethylene glycol, in drug products for human and veterinary use, including biological products for human use, and in medical devices for human use, and (2) establishing maximum daily levels of exposure for drug products for ethylene oxide and its two major reaction products. This amendment was proposed because residues of ethylene oxide and its two major reaction products in drug products and devices for which ethylene oxide is used as a sterilant may produce toxic reactions in patients, and because of the potential risk of mutagenicity from exposure to these residues. The restrictions imposed by this proposed rule would apply to ethylene oxide gas sterilizers because gas sterilizers use ethylene oxide as a sterilant.

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1365]****Medical Devices; Classification of Dry-Heat Sterilizers****AGENCY:** Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dry-heat sterilizers into class II (performance standards). The FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the

device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation with respect to the classification of dry-heat sterilizers:

1. Identification: A dry-heat sterilizer is a device that uses dry heat to sterilize medical products.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that dry-heat sterilizers be classified into class II because the Panel believes that performance standards are necessary to assure that the device maintains the correct temperature for a length of time adequate for proper sterilization of medical products. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also recommends that the labeling of the device provide proper instructions for its use and describe the need for periodic performance testing using a sterilization indicator. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device, and that there is sufficient information to establish a standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on reports of

studies of dry-heat sterilization that were sponsored by the National Aeronautics and Space Administration (NASA) (Refs. 1 through 5). These reports describe recent progress made in research on dry-heat sterilization and some of the problems associated with this sterilization method.

5. Risks to health: Infection: If the dry-heat sterilizer fails to maintain the correct temperature for a length of time adequate to sterilize medical products properly, patients exposed to the products may experience infection.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dry-heat sterilizers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

BILLING CODE 4110-03-M

[21 CFR Part 880]

(Docket No. 78N-1366)

Medical Devices; Classification of Steam Sterilizers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying steam sterilizers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Dental Device Classification Panel, and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of steam sterilizers:

1. *Identification:* A steam sterilizer is a device that uses pressurized steam to sterilize medical products. The General Hospital and Personal Use Device Classification Panel identified this generic type of device as the "steam sterilizer." The Dental Device Classification Panel identified this generic type of device as the "autoclave." The General and Plastic Surgery Device Classification Panel identified this generic type of device as the "autoclave sterilizer."

2. *Recommended classification:* Class II (performance standards). The General Hospital and Personal Use Device Classification Panel recommends that establishing a performance standard for this device be a medium priority. The Dental Device Classification Panel recommends that establishing a performance standard for this device be a low priority. The General and Plastic Surgery Device Classification Panel recommends that establishing a performance standard for this device be a high priority.

3. *Summary of reasons for recommendation:* The three Panels recommend that steam sterilizers be classified into class II because the Panels believe that a performance standard is necessary to assure that the device properly sterilizes medical products. Adequate sterilization depends upon the parameters of time, temperature, and steam saturation. The Panels believe that general controls would not provide control over these characteristics. The General Hospital and Personal Use Device Classification Panel recommends that the device labeling describe the need for periodic performance testing using a sterilization indicator. The General and Plastic Surgery Device Classification Panel recommends that the device be properly designed and only trained personnel operate the device.

4. *Summary of data on which the recommendations are based:* The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* The three Panels identified the following risk to health: (a) Infection: If the device fails to sterilize medical products adequately, patients exposed to the products may experience infection. The General and Plastic Surgery Device Classification Panel also identified the following risk to health: (b) Steam burns to personnel: If the device is improperly designed, it could cause steam burns to operating personnel.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that steam sterilizers be classified into class II (performance standards). FDA has concluded that the device should be named the "steam sterilizer" and that its classification should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6880, to read as follows:

§ 880.6880 Steam sterilizer.

(a) *Identification.* A steam sterilizer (autoclave) is a device that uses pressurized steam to sterilize medical products.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26127 Filed 8-23-79; 8:45 am]

BILLING CODE 4110-03-M

[21 CFR Part 880]

(Docket No. 78N-1367)

Medical Devices; Classification of Hand-Carried Stretchers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hand-carried stretchers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel and the General and Plastic Surgery Device Classification Panel, FDA advisory committees, made the following recommendations with respect to the classification of hand-carried stretchers:

1. *Identification:* A hand-carried stretcher is a device consisting of a lightweight frame, or of two poles with a cloth or metal platform, on which a patient can be carried.

2. *Recommended classification:* Class I (general controls). The Panels recommend no exemptions for this device.

3. *Summary of reasons for recommendation:* The Panels recommend that hand-carried stretchers be classified into class I because the Panels believe that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The General Hospital and Personal Use Device Classification Panel recommends that the labeling of the device state the maximum weight that the device can support. The Panel further recommends that the device be of a suitable size to fit into all ambulances.

4. *Summary of data on which the recommendations are based:* The Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panels' recommendations and is proposing that hand-carried stretchers be classified into class I (general controls). FDA has concluded that the classification of the device should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

FDA disagrees with the Panel recommendation that there be no exemptions for hand-carried stretchers. The agency is proposing that manufacturers of a hand-carried stretcher be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)). FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a hand-carried stretcher must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and

followup. The agency also believes that manufacturers of a hand-carried stretcher must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6900, to read as follows:

§ 880.6900 Hand-carried stretcher.

(a) *Identification.* A hand-carried stretcher is a device consisting of a lightweight frame, or of two poles with a cloth or metal platform, on which a patient can be carried.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

[FR Doc. 79-26126 Filed 8-23-79; 8:45 am]
BILLING CODE 4110-03-M

[21 CFR Part 880]

(Docket No. 78N-1368)

Medical Devices; Classification of Wheeled Stretchers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying wheeled stretchers into class II (performance standards). FDA is also publishing the recommendations of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel that this device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. Additionally, FDA is publishing the recommendation of the Physical Medicine Device Classification Panel that this device be classified into class I. The effect of classifying a device into class I is to require that the device only meet the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, the Physical Medicine Device Classification Panel, and the Anesthesiology Device Classification Panel, FDA advisory committees, made the following recommendations regarding the classification of wheeled stretchers:

1. Identification: A wheeled stretcher is a device consisting of a platform mounted on a wheeled frame that is designed to transport patients in a horizontal position. The device may have side rails, supports for fluid infusion equipment, and patient securement straps. The frame may be fixed or collapsible for use in an ambulance. The General

Hospital and Personal Use Device Classification Panel identified this generic type of device as the "wheeled stretcher." The Physical Medicine Device Classification Panel identified this generic type of device as the "mechanical wheeled stretcher." The Anesthesiology Device Classification Panel identified this generic type of device as the "patient cart."

2. Recommended classification: The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel recommend that this device be classified into class II (performance standards) and that establishing a performance standard for the device be a medium priority. The Physical Medicine Device Classification Panel recommends that this device be classified into class I (general controls) and the Panel recommends that there be no exemptions for the device.

3. Summary of reasons for recommendation: The General Hospital and Personal Use Device Classification Panel recommends that this device be classified into class II (performance standards) because the Panel believes that a standard should control the bumper height, require lockable wheels and self-locking side rails with safety latches, and assure adequate weight capacity for most patients. The Panel also recommends that the standard assure that the device's center of gravity be sufficiently low that the device is stable and does not topple over, and that the device's wheels be large enough so that they cannot get trapped in the space between the floor and an elevator. The Anesthesiology Device Classification Panel recommends that this device be classified into class II because the Panel believes that a performance standard should assure that the device has no sharp edges or protrusions that could injure the patient or personnel, to require the device to have side rails and restraint straps that are properly placed and sufficiently strong to prevent the patient from falling from the cart, and to require the device to have adequate brakes. The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel believe that general controls would not provide sufficient control over these characteristics. The Panels also believe that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Physical Medicine Device Classification Panel recommends that this device be classified into class I (general controls) because the Panel believes that the device presents no risks to health and that general controls are, therefore, sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendations are based: The three Panels based their recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: The General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel identified the following risks of injury

to the patient: The patient may fall from the device and be injured if the side rails fail, if the device is unstable and topples over, if the wheels get trapped in the space between the floor and an elevator and cause the patient to be thrown, if the patient tries to get off a device that lacks lockable wheels, if the device collapses under the patient's weight, or if the device's restraint straps are weak or improperly placed. The patient could also be injured if the device has sharp edges, protrusions, or improper brakes. The Physical Medicine Device Classification Panel identified no risks to health presented by the device.

Proposed Classification

FDA agrees with the recommendations of the General Hospital and Personal Use Device Classification Panel and the Anesthesiology Device Classification Panel and is proposing that wheeled stretchers be classified into class II (performance standards). FDA has concluded that the advice should be named the "wheeled stretcher" and that its classification should be published in the part of the Code of Federal Regulations for General Hospital and Personal Use Devices.

FDA disagrees with the recommendation of the Physical Medicine Device Classification Panel that the device be classified into class I (general controls). The agency believes that a standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device, especially the risk of falls due to inadequate device design. A performance standard would provide reasonable assurance of safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (12 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6910, to read as follows:

§ 880.6910 Wheeled stretcher.

(a) *Identification.* A wheeled stretcher is a device consisting of a platform mounted on a wheeled frame that is designed to transport patients in a horizontal position. The device may have side rails, supports for fluid infusion equipment, and patient securement straps. The frame may be fixed or collapsible for use in an ambulance.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1369]****Medical Devices; Classification of Syringe Needle Introducers**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying syringe needle introducers into class II (performance standards). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health,

Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of syringe needle introducers:

1. Identification: A syringe needle introducer is a device that uses a spring-loaded mechanism to drive a hypodermic needle into a patient to a predetermined depth below the skin surface.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that syringe needle introducers be classified into class II because the Panel believes that a standard is needed to control the force of the spring used to drive the needle into the skin so that the needle is driven to the correct depth below the skin surface, without unnecessary tissue trauma. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard to provide such assurance. The Panel also recommends that the device be sterilizable to prevent cross-contamination.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: (a) Cross-contamination: If the device is not sterilizable, cross-contamination may occur. (b) Incorrect dosage: If the needle penetrates to an incorrect depth, the patient may receive an incorrect dosage of drug. (c) Tissue trauma: If the needle penetrates too deep, tissue trauma may result.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that syringe needle introducers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient

information to establish a performance standard to provide this assurance.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6920, to read as follows:

§ 880.6920 Syringe needle introducer.

(a) *Identification.* A syringe needle introducer is a device that uses a spring-loaded mechanism to drive a hypodermic needle into a patient to a predetermined depth below the skin surface.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

BILLING CODE 4110-03-M

[21 CFR Part 880]**[Docket No. 78N-1388]****Medical Devices; Classification of Irrigating Syringes**

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying irrigating syringes into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976. **DATES:** Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of irrigating syringes:

1. Identification: An irrigating syringe is a device consisting of a bulb or a piston syringe with an integral or a detachable tube. The device is used to irrigate, withdraw fluid from, or instill fluid into a body cavity or wound. The Panel identified this generic type of device under the name "nonsurgical irrigating syringe."

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and, if the device is not labeled as sterile, exempt from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that irrigating syringes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that this device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel recommends that this device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: Infection: If the device is labeled as sterile and it is not sterile, pathogenic organisms may cause an infection in the patient.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that irrigating syringes be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of an irrigating syringe be exempt from section 510 of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of an irrigating syringe, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning an irrigating syringe. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of an irrigating syringe be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application

of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of an irrigating syringe, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of an irrigating syringe must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of an irrigating syringe that is labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6960, to read as follows:

§ 880.6960 Irrigating syringe.

(a) *Identification.* An irrigating syringe is a device consisting of a bulb or a piston syringe with an integral or a detachable tube. The device is used to irrigate, withdraw fluid from, or instill fluid into a body cavity or wound.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the

Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1371]

Medical Devices; Classification of Liquid Crystal Vein Locators

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying liquid crystal vein locators into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of liquid crystal vein locators:

1. Identification: A liquid crystal vein locator is a device used to indicate the location of a vein by revealing variations in the surface temperature of the skin by displaying the color changes of heat sensitive liquid crystals (cholesteric esters).

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel recommends that liquid crystal vein locators be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that liquid crystal vein locators be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 880 in Subpart G by adding new § 880.6970, to read as follows:

§ 880.6970 Liquid crystal vein locator.

(a) *Identification.* A liquid crystal vein locator is a device used to indicate the location of a vein by revealing variations in the surface temperature of the skin by displaying the color changes of heat sensitive liquid crystals (cholesteric esters).

(b) *Classification.* Class I (general controls).

Interested persons may, on or before October 23, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 880]

[Docket No. 78N-1372]

Medical Devices; Classification of Vein Stabilizers

AGENCY: Food and Drug Administration.
ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying vein stabilizers into class I (general controls). FDA is also publishing the recommendation of the General Hospital and Personal Use Device Classification Panel that the devices be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

DATES: Comments by October 23, 1979. It is proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lillian L. Yin, Bureau of Medical Devices (HFK-470), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION:

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The General Hospital and Personal Use Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of vein stabilizers:

1. Identification: A vein stabilizer is a device consisting of a flat piece of plastic with two noninvasive prongs. The device is placed on the skin so that the prongs are on either side of a vein and hold it stable while a

V

7
9

UMI

hypodermic needle is inserted into the vein. The Panel identified this generic type of device under the name "vein stabilization device."

2. Recommended classification: Class I (general controls). The Panel recommends that these devices be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that vein stabilizers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel recommends that the device be exempt from premarket notification under section 510(k) of the act because the Panel believes that FDA does not need to receive premarket notification of a manufacturer's intent to market this simple device. The Panel also recommends that the device be exempt from the good manufacturing practice regulation under section 520(f) of the act because the Panel believes that the quality of the device is easily discernible and that defects are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendations on the Panel members' personal knowledge of, and clinical experience with, the device.

5. Risks to health: None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that vein stabilizers be classified into class I (general controls). The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of a vein stabilizer be exempt from section 510(k) of the act, FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807). Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of a vein stabilizer, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive

premarket notification submissions concerning a vein stabilizer. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

In response to the Panel's recommendation that manufacturers of a vein stabilizer be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act, FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a vein stabilizer must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of a vein stabilizer must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend part 880 in Subpart G by adding new § 880.6980, to read as follows:

§ 880.6980 Vein stabilizer.

(a) *Identification.* A vein stabilizer is a device consisting of a flat piece of plastic with two noninvasive prongs. The device is placed on the skin so that the prongs are on either side of a vein and hold it stable while a hypodermic needle is inserted into the vein.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807 of this chapter. The device also is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before October 23, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 10, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

Part IV

Merit Systems Protection Board

Prohibited Personnel Practices and
Activities; Procedures for the Receipt
and Investigation of Allegations

MERIT SYSTEMS PROTECTION BOARD**[5 CFR Parts 1251 Through 1269]****Prohibited Personnel Practices and Activities; Procedures for the Receipt and Investigation of Allegations.****AGENCY:** Office of the Special Counsel.**ACTION:** Proposed rule.

SUMMARY: These regulations set forth the procedures for the receipt and investigation by the Office of the Special Counsel of allegations of prohibited personnel practices and activities prohibited by other civil service law, rule or regulation, and the receipt and referral to agencies for investigation of or a report on whistleblower allegations.

DATES: Comments should be submitted by October 30, 1979.

ADDRESS: Send comments to the Office of the Special Counsel, 1717 H Street, NW., Washington, DC 20419.

FOR FURTHER INFORMATION CONTACT: Shigeki J. Sugiyama or Lynn R. Collins, Office of the Special Counsel (202-653-7140).

SUPPLEMENTARY INFORMATION: The Special Counsel published interim procedures for operations in the Federal Register on January 30, 1979 (44 FR 6060). The interim regulations remain in effect until final regulations are published. The Special Counsel received written comments on the interim regulations from two unions representing federal employees and one federal agency. In addition, comments were received from the Government Accountability Project. Those comments were considered in preparing these proposed regulations.

In § 1253.1, an address is set out to which complaints, allegations, and information under Subchapter B can be filed. As soon as the field office structure is established, § 1253.1 will be revised to include a list of those offices.

Accordingly, it is proposed to amend 5 CFR Chapter II by revising Subchapter B to read as follows:

Subchapter B—Office of the Special Counsel

PART 1250—JURISDICTION AND DEFINITIONS

Sec.

1250.1 General authority of the Special Counsel.

1250.2 Scope.

1250.3 Definitions.

Authority.—5 U.S.C. 1206(k); Sec. 204(g) of Reorganization Plan No. 2 of 1978, unless otherwise noted.

§ 1250.1 General authority of the Special Counsel.

The Special Counsel is authorized to carry out the following general functions, as described in this subchapter:

(a) To receive and investigate allegations of prohibited personnel practices and certain other violations of law, rule or regulation.

(b) To receive and refer to agencies for investigation or a report certain disclosures of information reasonably believed by the discloser to evidence a violation of any law, rule, or regulation, or mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety.

(c) To recommend, upon determination that there is reasonable ground to believe that a prohibited personnel practice has occurred, exists, or is to be taken, corrective action to the agency involved.

(d) To file with the Merit Systems Protection Board requests to order corrective action (if the agency has not taken the corrective action recommended after a reasonable period), requests for stays of prohibited personnel actions, and complaints for disciplinary action against federal employees, and intervene or otherwise participate in any proceeding before the Board.

§ 1250.2 Scope.

(a) The Special Counsel is required to receive and to investigate allegations of prohibited personnel practices and certain other activities prohibited by civil service law, rule, or regulation involving any Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, except that the prohibited personnel practices set forth below do not apply to:

(1) A Government corporation.

(2) The Federal Bureau of Investigation, the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, and certain other intelligence agencies excepted by the President.

(3) The General Accounting Office.

(4) The United States Postal Service and the Postal Rate Commission.

(b) The Special Counsel will investigate allegations of Hatch Act violations in any Executive agency, the U.S. Postal Service, and Postal Rate Commission and the District of Columbia Government.

(c) The Special Counsel will receive and act on information which evidences a violation of any law, rule, or regulation, or of mismanagement, a

gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety, involving any Executive agency.

§ 1250.3 Definitions.

As used in this subchapter:

(a) "Personnel action" means—

(1) An appointment;

(2) A promotion;

(3) An adverse action under chapter

75 of title 5, United States Code or other disciplinary or corrective action; (4) a detail, transfer, or reassignment;

(5) A reinstatement;

(6) A restoration;

(7) A reemployment;

(8) A performance evaluation under chapter 43 of title 5, United States Code;

(9) A decision concerning pay, benefits, or awards, or concerning education or training if the education or training may reasonably be expected to lead to an appointment, promotion, performance evaluation, or other personnel action; or

(10) Any other significant change in duties or responsibilities which is inconsistent with the employee's salary or grade level.

(b) "Prohibited personnel practice" means action by an employee who has authority to take, direct others to take, recommend, or approve any personnel action.

(1) That discriminates for or against any employee or applicant for employment on the basis of race, color, religion, sex, national origin, age, handicapping condition, marital status or political affiliation, as prohibited by certain specified laws (see 5 U.S.C. 2302(b)(1)).

(2) To solicit or consider any recommendation or statement, oral or written, with respect to any individual who requests or is under consideration for any personnel action unless the recommendation or statement is based on the personal knowledge or records of the person furnishing it and consists of an evaluation of the work performance, ability, aptitude, or general qualifications of the individual, or an evaluation of the character, loyalty, or suitability of such individual;

(3) To coerce the political activity of any person (including the providing of any political contribution or service), or take any action against any employee or applicant for employment as a reprisal for the refusal of any person to engage in such political activity;

(4) To deceive or willfully obstruct any person with respect to such person's right to compete for employment;

(5) To influence any person to withdraw from competition for any position for the purpose of improving or

injuring the prospects of any other person for employment;

(6) To grant any preference or advantage not authorized by law, rule or regulation to any employee or applicant for employment (including defining the scope or manner of competition or the requirements for any position) for the purpose of improving or injuring the prospects of any particular person for employment;

(7) To appoint, employ, promote, advance, or advocate for appointment, employment, promotion, or advancement, in or to a civilian position any individual who is a relative (as defined in 5 U.S.C. 3110) of the employee if the position is in the agency in which the employee is serving as a public official (as defined in 5 U.S.C. 3110) or over which the employee exercises jurisdiction or control as an official;

(8) To take or fail to take a personnel action with respect to any employee or applicant for employment as a reprisal for being a whistleblower, as defined in paragraph (c) of this section.

(9) To take or fail to take a personnel action against an employee or applicant for employment as a reprisal for the exercise of any appeal right granted by law, rule or regulation;

(10) To discriminate for or against any employee or applicant for employment on the basis of conduct which does not adversely affect the performance of the employee or applicant or the performance of others; or

(11) To take or fail to take any other personnel action if the taking of or failure to take such action violates any law, rule, or regulation implementing, or directly concerning, the merit system principles contained in 5 U.S.C. 2301.

(c) "Whistleblower" means a present or former Federal employee or applicant for Federal employment who discloses information he reasonably believes evidences a violation of any law, rule or regulation, or mismanagement, a gross waste of funds, an abuse of authority, or a substantial or specific danger to public health or safety, if the disclosure is not specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs. Where the information disclosed affects only the personnel situation of the complainant, it will normally be treated as an allegation of a prohibited personnel practice or violation of other civil service law, rule or regulation, and the complainant will not be considered to be a whistleblower.

(d) "Gross waste of funds" means unnecessary expenditure of substantial sums of money, or a series of instances of unnecessary expenditures of smaller amounts.

(e) "Mismanagement" means wrongful or arbitrary and capricious actions that may have an adverse effect on the efficient accomplishment of the agency mission.

PART 1251—INVESTIGATIVE AUTHORITY OF THE SPECIAL COUNSEL

Sec.

1251.1 Matters subject to investigation.

1251.2 Deferral to administrative appeals procedures.

1251.3 Investigation policy in discrimination complaints.

1251.4 Closing cases and terminating investigations.

1251.5 Actions on results of investigations.

§ 1251.1 Matters subject to investigation.

The Special Counsel is authorized—

(a) To receive and investigate allegations of prohibited personnel practices, as defined in section 1250.3 of this subchapter, and to determine whether there are reasonable grounds to believe that a prohibited personnel practice has occurred, exists, or is to be taken (5 U.S.C. 1206(a)).

(b) To conduct an investigation of any allegation concerning—

(1) Political activity by Federal employees and employees of the District of Columbia Government, prohibited by Subchapter III of Chapter 73 of title 5, United States Code (Hatch Act);

(2) Political activities by certain State and local officers and employees prohibited by Chapter 15 of title 5, United States Code (Hatch Act);

(3) Arbitrary or capricious withholding of information prohibited under section 552 of title 5, United States Code (Freedom of Information Act), except that the Special Counsel shall make no investigation under this subsection of any withholding of foreign intelligence or counter-intelligence information the disclosure of which is specifically prohibited by law or by Executive order;

(4) Activities prohibited by any civil service law, rule, or regulation, including partisan political intrusion in personnel decisionmaking, except when the Special Counsel determines that the allegation may be resolved more appropriately under an administrative appeals procedure; and

(5) Involvement by any employee in any prohibited discrimination found by any court or appropriate administrative authority to have occurred in the course of any personnel action, except when the Special Counsel determines that such allegation may be resolved more appropriately under an administrative appeals procedure. (5 U.S.C. 1206(e)).

§ 1251.2 Deferral to administrative appeals procedures.

Section 1206(e)(2) of title 5, United States Code, provides that the Special Counsel shall make no investigation of allegations described in § 1251.2(b)(4) or (5) of this part, if he determines that the matter may be resolved more appropriately under an administrative appeals procedure. The Special Counsel generally will not initiate an investigation in the following circumstances:

(a) The employee has a pending appeal on the same matter before the Merit Systems Protection Board, the Office of Personnel Management, the Equal Employment Opportunity Commission, or the Federal Labor Relations Authority, or a pending grievance under a formal agency or negotiated grievance proceeding, unless there is sufficient evidence submitted with the complaint to the Special Counsel to indicate the matter is not being properly processed.

(b) An administrative appeal proceeding has been completed, unless there is sufficient evidence submitted with the complaint to the Special Counsel to indicate the matter was not properly processed.

(c) An administrative proceeding was available to the complainant but the complainant did not file a timely appeal or otherwise failed to pursue the matter.

(d) The complainant alleges a violation of law, rule, or regulation in connection with a promotion action, particularly complaints of nonselection or general charges of "preselection", when the information submitted with the complaint to the Special Counsel does not evidence any prohibited personnel practice, as defined in § 1250.3 of this subchapter. In such circumstances the complainant should utilize the agency or negotiated grievance procedure if the matter is grievable.

§ 1251.3 Investigative policy in discrimination complaints.

The Special Counsel is authorized to investigate allegations of discrimination prohibited by law, as defined in § 1250.3(b)(1) of this subchapter. Since procedures for investigating discrimination complaints have already been established in the agencies and the Equal Employment Opportunity Commission, the Special Counsel will normally avoid duplicating those procedures and will defer to those procedures rather than initiating an independent investigation. However, the Special Counsel will—

(a) Assert independent investigative jurisdiction in those circumstances

where it appears that the agency is not processing the complaint consistent with provisions of applicable statutes and regulations; and

(b) Monitor agency and EEOC processing of discrimination complaints, in cases where he determines this to be necessary or appropriate.

§ 1251.4 Closing cases and terminating investigations.

(a) The Special Counsel will notify the complainant of the closing of the case and the reasons therefore, when the matter complained of is not within the investigative jurisdiction of the Special Counsel.

(b) The Special Counsel will notify the complainant of the termination of any investigation under this part and the reasons therefore, and any action taken by the Special Counsel on the allegation.

§ 1251.5 Actions on results of investigations.

(a) If the Special Counsel determines that there are reasonable grounds to believe that a prohibited personnel practice, as defined in § 1250.3 of this subchapter, has occurred, exists, or is to be taken, which requires corrective action, he reports his determinations, findings and recommendations to the agency, the Merit Systems Protection Board, and the Office of Personnel Management, and may report such finding to the President (5 U.S.C. 1206(c)(1)). If the agency involved fails to take the action recommended within a reasonable period, the Special Counsel may request the Board to consider the matter pursuant to 5 U.S.C. 1206(c)(1)(B).

(b) If the Special Counsel has reasonable cause to believe any other violation of any law, rule or regulation has occurred (i.e., violations other than or in addition to a prohibited personnel practice), he is required to report this to the agency head concerned and to require, within 30 days, a certificate by the agency head which states that (1) the agency head has personally reviewed the report of the Special Counsel, (2) what action has been, or is to be taken, and (3) when the action will be completed (5 U.S.C. 1206(c)(3)). Agency head certifications are included in the public list, provided for in § 1260.1 of this subchapter.

(c) When the investigation indicates that disciplinary action against any employee to investigations is warranted, the Special Counsel may file a complaint, together with a statement of supporting facts with the Merit Systems Protection Board. The complaint and statement of supporting facts shall be served on the employee at the same time it is filed with the Board. Additionally,

in the case of violations of provisions of Chapter 15 of title 5, United States Code (political activity of certain State and local officers and employees), the complaint, including the statement of supporting facts, shall be served on the State or local agency as well as the officer or employee (5 U.S.C. 1206(g)).

(d) In the case of a complaint for disciplinary action against an employee in a confidential, policy-making, policy-determining, or policy-advocating position appointed by the President by and with the advice and consent of the Senate [other than an individual in the Foreign Service of the United States], the Special Counsel shall submit the complaint including a statement of supporting facts and the employee's response to the complaint to the President for appropriate action in lieu of presenting the complaint before the Merit Systems Protection Board. (5 U.S.C. 1206(g)).

(e) When the Special Counsel believes that there is in an agency a pattern of prohibited personnel practices not otherwise appealable to the Merit Systems Protection Board under any law, rule or regulation, the Special Counsel may file a complaint with the Board against the agency involved to obtain an order for appropriate corrective action. (5 U.S.C. 1206(h)).

(f) If, in connection with any investigation under this part, the Special Counsel determines that there is reasonable cause to believe that a criminal violation by an employee has occurred, he shall report the determination to the Attorney General and to the head of the agency involved, and shall submit a copy of the report to the Director of the Office of Personnel Management and the Director of the Office of Management and Budget. The referral of an alleged criminal violation to the Attorney General shall not preclude the Special Counsel from conducting any investigation or proceeding concerning prohibited personnel practices instituted under this part. (5 U.S.C. 1206(c)(2)).

PART 1252—DISCLOSURES OF INFORMATION (WHISTLEBLOWING)

Sec.

1252.1 Applicability.

1252.2 Referral to agency heads under 5 U.S.C. 1206(b)(3); reports from agency heads.

1252.3 Referral to agency heads under 5 U.S.C. 1206(b)(7).

1252.4 Failure of agency head to file report.

1252.5 Review of agency report.

1252.6 Foreign intelligence or counterintelligence information.

§ 1252.1 Applicability.

This part applies to disclosures of information not specifically required by law or Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs, which the discloser reasonably believes evidences a violation of any law, rule or regulation, or mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to the public health or safety.

§ 1252.2 Referral to agency heads under 5 U.S.C. 1206(b)(3); reports from agency heads.

(a) If after review of the information received under this part the Special Counsel determines that there is a substantial likelihood that the information discloses a violation of any law, rule or regulation, or mismanagement, gross waste of funds, abuse of authority, or a substantial and specific danger to the public health or safety, he may, if the information was transmitted to him by an employee or former employee or applicant for employment in the agency which the information concerns, or by an employee who obtained the information in connection with the performance of his duties and responsibilities, require the head of the agency to conduct an investigation of the information and any related matters and to submit to the Special Counsel a written report setting forth the findings of the head of the agency.

(b) Any report required by the Special Counsel under this section shall be submitted within sixty (60) calendar days after the date on which the Special Counsel transmitted the information to the head of the agency, or within any reasonable longer period of time agreed to in writing by the Special Counsel or designee of the Special Counsel. In the event the agency finds that it is unable to adequately investigate and report within the time limit imposed by the statute, the agency shall as soon as practicable, but not less than 15 days before the date the report is due to the Special Counsel, the President, and the Congress, submit a written request to the Special Counsel specifying the additional time required and the reasons therefore.

(c) Any report required under this section shall be reviewed and signed by the agency head and shall include: (1) A summary of the information with respect to which the investigation was initiated; (2) a description of the conduct of the investigation; (3) a summary of any evidence obtained from the investigation; (4) a listing of any violation or apparent violation of any

law, rule, or regulation; (5) a description of any corrective action taken or planned to be taken as a result of the investigation, including, but not limited to, changes in agency rules, regulations, or practices, restoration of any aggrieved employee, disciplinary action against any employee, and referral to the Attorney General of any evidence of a criminal violation.

(d) Any report required under this section shall be submitted, by the agency head, to the Congress and the President, as well as to the Special Counsel.

(e) The Special Counsel will transmit a copy of the agency head's report to the party who made the disclosure to the Special Counsel, except when the report includes evidence of criminal violations referred to the Attorney General.

§ 1252.3 Referral to agency heads under 5 U.S.C. 1206(b)(7).

If the Special Counsel does not require an investigation by the head of the agency, the agency head shall, within a reasonable time (but no later than 60 days) after the information was transmitted to him by the Special Counsel, review the information, make any inquiry necessary, and inform the Special Counsel, in writing, of what action has been or is to be taken and when such action will be completed. The Special Counsel will inform the complainant of the report of the agency head.

§ 1252.4 Failure of agency head to file report pursuant to § 1252.2.

Whenever the Special Counsel does not receive a required report from an agency head within the time specified in the letter of referral, the Special Counsel may transmit a copy of the information which he sent to the agency head to the President and to the Congress, together with a statement noting the failure of the agency head to file the required report.

§ 1252.5 Review of agency report.

Upon receipt of any report of the head of an agency under § 1253.2, the Special Counsel shall review the report and determine whether the findings of the head of the agency appear reasonable and whether the agency's report contains the information required.

§ 1252.6 Foreign intelligence or counterintelligence information.

Any disclosure under this part involving foreign intelligence or counterintelligence information, the disclosure of which is specifically prohibited by law or Executive order, shall be transmitted by the Special Counsel to the Permanent Select Committee on Intelligence of the House

of Representatives and the Select Committee on Intelligence of the Senate.

PART 1253—FILING OF COMPLAINTS AND ALLEGATIONS

Sec.

1253.1 Place of filing.

1253.2 Form and content.

1253.3 Withdrawal of complaint.

1253.4 Request for stay of personnel action.

1253.5 Disclosure of identity of complainant or whistleblower.

§ 1253.1 Place of filing.

All complaints, allegations, and information under this subchapter shall be submitted to the Office of the Special Counsel, Merit Systems Protection Board, 1717 H Street, NW, Washington, DC 20419.

§ 1253.2 Form and content.

(a) Complaints, allegations and information may be submitted in any written form, but should include:

(1) The name and mailing address of the complainant of whistleblower, unless the matter is submitted anonymously;

(2) The department or agency, location and organizational unit complained about;

(3) A concise description of the actions complained about, names and positions of employees who took these actions, if known to the complainant, and dates, preferably in chronological order, together with any documentary evidence to the complainant;

(4) In the case of any allegation of a prohibited personnel practice, the personnel action, as defined in section 1250.3, that has been taken or is proposed to be taken;

(5) In the case of reprisal for disclosure of information by a whistleblower, the information believed to evidence violation of law, rule, or regulation, mismanagement, gross waste of funds, abuse of authority, or substantial and specific danger to public health or safety and when, to whom, and how or in what form it was disclosed;

(6) In the case of reprisal for exercising appeal rights, the action or specific matter that was appealed or grieved, the procedure involved, dates, and name of official or officer appealed to, and decision on or status of the appeal.

(7) A statement as to whether or not the complainant consents to the Special Counsel revealing the complainant's identity to the agency.

(b) If the complainant or whistleblower does not furnish sufficient information, the Special Counsel may request the complainant to do so before acting on the complaint.

§ 1253.3 Withdrawal of complaint.

A complaint may be withdrawn at any time. However, the Special Counsel may conduct an investigation in the absence of a complaint and withdrawal of a complaint does not necessarily result in termination of the investigation.

§ 1253.4 Request for stay of personnel action.

(a) A request for a stay of personnel action should be submitted to the Special Counsel as early as possible and should include:

(1) any available documentary evidence of the personnel action taken or to be taken; and

(2) a chronology of facts evidencing a prohibited personnel practice, as defined in § 1250.3 of this subchapter, has occurred or is to be taken.

(b) If possible, the facts supporting a request for a stay of personnel action should be sworn to or affirmed by the complainant.

§ 1253.5 Disclosure of identity of complainant or whistleblower.

(a) The identity of any complainant or whistleblower may not be disclosed without his consent, unless the Special Counsel determines that the disclosure of the identity is necessary in order to carry out his functions.

(b) The Special Counsel will determine to disclose the identity of a complainant or whistleblower without express consent only if:

(1) it is clear from the submissions of the complainant or whistleblower that his identity has already been disclosed with respect to the matter complained of (e.g. where the party has filed a grievance, complaint, or appeal on the matter or reported the matter to the agency inspector general or equivalent official without anonymity), or

(2) immediate action by the Special Counsel is necessary and there is not sufficient time to secure express consent to disclose identity. In such cases, the complainant or whistleblower will be notified of the disclosure immediately.

PART 1254—PROSECUTIONS

Sec.

1254.1 Complaint.

1254.2 Stay of personnel actions.

1254.3 Enforcement of board decisions.

1254.4 Petition for withholding order.

1254.5 Hearings on complaints filed by the Special Counsel.

1254.6 Dismissal by the Special Counsel.

§ 1254.1 Complaint.

The Special Counsel is authorized to file with the Merit Systems Protection Board, a complaint for disciplinary action against an employee, specifying the law, rule, or regulation violated,

together with a statement of supporting facts. The rights of employees against whom complaints are filed are set forth in the Board's regulations (5 CFR 1201.124).

§ 1254.2 Stay of personnel actions.

(a) The Special Counsel may request any member of the Board to order a stay of any personnel action for 15 calendar days if the Special Counsel determines that there are reasonable grounds to believe that the personnel action was taken, or is to be taken, as a result of a prohibited personnel practice. Where administratively practicable, the petition for stay shall be served upon the agency official or office which has taken or is taking the personnel action. The stay shall be effective on order of the Board member or on the fourth calendar day (excluding Saturdays, Sundays, and legal holidays) following submission of the petition to the Board member provided the Board member does not deny the stay within three calendar days of submittal.

(b) The Special Counsel may request any member of the Board to extend the period of any stay for a period of not more than 30 calendar days.

(c) The Special Counsel may request the Board to order a further extension of the stay for such period as the Board considers appropriate.

(d) Generally, the Special Counsel will not seek a stay if the taking of or failure to take the personnel action in question does not impose an undue hardship on the employee, such as geographic dislocation or termination, and can be addressed through an available appeals procedure.

§ 1254.3 Enforcement of Board decisions.

(a) If the Special Counsel determines that disciplinary action should be taken against an employee for knowing and willful refusal or failure to comply with an order of the Board, he is authorized to file a complaint setting forth the substance of the violation charged with specificity, including a statement of supporting facts, and to file the complaint with the Board.

(b) The complaint, including the statement of supporting facts, must be served upon the employee at the same time it is filed with the Board.

§ 1254.4 Petition for withholding order.

When the Special Counsel determines that a State or local agency has failed to remove an employee after a decision requiring such action by the Merit Systems Protection Board under 5 U.S.C. 1505, or that the employee was reemployed within 18 months in a State or local agency of the same State, the

Special Counsel may initiate proceedings for a withholding order as provided under 5 U.S.C. 1508, by filing a petition for a withholding order with an administrative law judge designated by the Board.

§ 1254.5 Hearings on complaints filed by the Special Counsel.

Any employee against whom the Special Counsel presents a complaint to the Merit Systems Protection Board shall, pursuant to the regulations of the Board, have the right to a reasonable time to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer, to be represented by an attorney or other representative, to a hearing before the Board or an administrative law judge designated by the Board, to have a transcript kept of any hearing, to a written decision and reasons therefor, and a copy of any final order on the complaint.

§ 1254.6 Dismissal by the Special Counsel.

The Special Counsel or his designee may, with leave of the Board or administrative law judge, file a dismissal of all or part of a complaint at any time prior to the close of the hearing before the Board or administrative law judge. Prosecution by the Special Counsel with respect to any of the charges so dismissed shall thereupon terminate.

PART 1255—ANCILLARY MATTERS

Subpart A—Discovery

Sec.

- 1255.1 Subpenas.
- 1255.2 Testimony and evidence.
- 1255.3 Depositions and interrogatories.
- 1255.4 Witness fees.

Subpart B—Prohibition on Disciplinary Action During Pendency of Investigation by Special Counsel

- 1255.5 Prohibition on Disciplinary Action During Pendency of Investigation by Special Counsel.

Subpart C—Advisory Opinions; Intervention; Requests to Merit Systems Protection Board to Review Office of Personnel Management Regulations

- 1255.6 Advisory Opinions.
- 1255.7 Intervention.
- 1255.8 Requests to Merit Systems Protection Board to Review Office of Personnel Management Regulations.

Subpart A—Discovery

§ 1255.1 Subpenas.

(a) The Special Counsel may issue subpenas requiring the attendance and testimony of witnesses and the production of documentary or other evidence from any place in the United

States or any territory or possession thereof, the Commonwealth of Puerto Rico, or the District of Columbia. A subpoena may be served by a representative of the Special Counsel, or a U.S. Marshal or Deputy Marshal.

(b) The subpoena must be signed by the Special Counsel, or by his designee upon a specific delegation by the Special Counsel. Subpenas may not be signed in blank.

(c) In the case of contumacy or failure to obey a subpoena issued by the Special Counsel or his designee, the Special Counsel may request the United States District Court for the judicial district in which the person to whom the subpoena is addressed resides, or is served, to issue an order requiring such person to appear at any designated place to testify or to produce documentary or other evidence. Upon any failure to obey an order of the court granted pursuant to the application of the Special Counsel, the Special Counsel may request the court to hold the person or persons to whom the order was directed in contempt of court.

(d) Application to a federal court for enforcement of a subpoena issued under this section may be made by the Special Counsel or his designee.

§ 1255.2 Testimony and evidence.

(a) Pursuant to Civil Service Rule V (5 CFR 5.4) all officers and employees in the executive branch, or applicants or eligibles for positions therein, shall give to the Special Counsel, or his authorized representative, all information, testimony, and documentary evidence in regard to matters inquired of arising under the laws, rules, and regulations administered by the Special Counsel.

(b) Whenever required by the Special Counsel or his authorized representative, such persons shall subscribe such testimony and make oath or affirmation thereto before an officer authorized by law to administer oaths. Such oath may be administered by any officer or employee of the Office of the Special Counsel authorized to administer such oaths.

§ 1255.3 Depositions and interrogatories.

The Special Counsel may order the taking of depositions and order responses to written interrogatories. Depositions shall be taken before an officer authorized to administer oaths. Reasonable notice shall be given to the person to be deposed concerning the time, place and subject of the deposition. Answers to interrogatories shall be served upon the Special Counsel or his authorized representative within thirty (30) days of the date of receipt of the interrogatories unless an

extension of time has been granted by the Special Counsel or his representative.

§ 1255.4 Witness fees.

(a) Except as provided in paragraph (c) of this section, witness fees and mileage allowances shall be paid by the party requesting the witness to appear, or asking for and receiving a subpoena requiring the attendance of a witness or the production of documents or other materials, and shall be tendered to the witness or person who is directed to produce documents or other materials along with the subpoena, or, if the witness appears voluntarily, at the time of appearance. When the witness is subpoenaed or appears at the request of the United States or an officer or agency thereof, fees and mileage need not be tendered with the subpoena or prior to the appearance of the witness or production of evidence; payment shall be made by the agency on whose behalf the witness appeared or was subpoenaed, upon the certificate of the Special Counsel or his designee that the witness appeared or produced documents or other evidence.

(b) Witness fees and mileage allowances payable under this section shall be the same as those paid subpoenaed witness in the courts of the United States, as set forth in section 1821 of title 28, United States Code.

(c) Employees of the Federal Government who appear voluntarily or pursuant to subpoena and who appear in official duty status shall not be entitled to any witness fees or mileage allowance (other than that to which they are entitled under the Federal Travel Regulations). All costs relating to federal employee witnesses shall be paid by the agency against whom the complaint or allegation is filed.

Subpart B—Prohibition on Disciplinary Action During Pendency of Investigation by Special Counsel

§ 1255.5 Prohibition on disciplinary action during pendency of investigation by Special Counsel.

During any investigation initiated by the Special Counsel, no disciplinary action shall be taken against any employee for any alleged prohibited activity under investigation or for any related activity, without the express approval of the Special Counsel.

Subpart C—Advisory Opinions; Intervention; Requests to Merit Systems Protection Board to Review Office of Personnel Management Regulations

§ 1255.6 Advisory opinions.

The Special Counsel is not authorized to issue any advisory opinion concerning any law, rule, or regulation (other than an advisory opinion concerning chapter 15 of title 5, U.S. Code, dealing with political activity of State and local officers and employees, or subchapter III of chapter 73 of title 5, United States Code, dealing with political activity of Federal officers and employees).

§ 1255.7 Intervention.

The Special Counsel may intervene or otherwise participate in any proceeding before the Merit Systems Protection Board.

§ 1255.8 Request to the Merit Systems Protection Board to review Office of Personnel Management regulations.

The Special Counsel may file a written complaint with the Merit Systems Protection Board, requesting the Board to review the validity of any provision of any rule, or regulation issued by the Director of the Office of Personnel Management. Such complaint shall specify the manner in which application of specific provisions of the rule or regulation has resulted or will result in causing any employee or agency to take a prohibited personnel practice.

PARTS 1256 THROUGH 1259 (RESERVED)

PART 1260—PUBLIC INFORMATION

Sec.

- 1260.1 Public list.
- 1260.2 Freedom of Information Act policy.
- 1260.3 Procedures for obtaining records.
- 1260.4 Service charge for information.
- 1260.5 Appeals.
- 1260.6 Disclosures by authorized officials.

§ 1260.1 Public list.

A public list of certain noncriminal whistleblower allegations and Special Counsel findings of violations of law, rule, or regulation, together with reports and certifications by heads of agencies, pursuant to 5 U.S.C. 1206(b)(3) and (c), is available to the public between 8:30 a.m. and 5:00 p.m., weekdays (except legal holidays) in the Office of the Special Counsel, Room 215, 1717 H Street, NW., Washington, D.C. 20419.

§ 1260.2 Freedom of Information Act policy.

Upon receipt by the Office of the Special Counsel of a request for agency records under the Freedom of Information Act (5 U.S.C. 552) that are reasonably described, the records shall be provided promptly unless it is determined that one or more of the exemptions under subsection (b) of that Act should be applied to withhold the records. See Appendix I, Disclosure Policy of the Office of the Special Counsel.

§ 1260.3 Procedures for obtaining records.

Requests for records may be made in person or in writing and, except in unusual circumstances, a determination shall be made on a request within 10 days (excluding Saturdays, Sundays, and legal holidays). Requests in writing should be addressed to the Office of the Special Counsel, 1717 H Street, NW., Washington, D.C. 20419. Requests in person may be made by appearing at that address during business hours on a regular business day. Requests in writing should be clearly and prominently marked "Freedom of Information Act Request".

§ 1260.4 Service charge for information.

(a) Requests for records of the Office of the Special Counsel are subject to the following fees for search and duplication:

Photocopies, per page, \$0.10.
Manual record search, \$5.00 per hour.
Where copies of records have already been made available to an individual in the course of agency proceedings or otherwise, the cost of photocopies to that individual or his representative shall be fifteen (15) cents per page. Fees for search and duplication of automated records shall be provided upon request.

(b) Requests that do not specify that whatever fees are involved shall be acceptable or acceptable up to a designated amount will be deemed not received for purposes of the time limits for a determination until the requester, after being promptly notified of the anticipated fees, agrees to payment.

(c) When the anticipated fees exceed fifty (\$50.00) dollars, a deposit of twenty (20%) percent of that amount must be made within thirty (30) days after the requester is so advised. Records will not be released until the deposit is received.

§ 1260.5 Appeals.

Any denial, in whole or in part, of a request for records of the Office of the Special Counsel may be appealed to the Special Counsel or his designee. The appeal shall be in writing and addressed

to the Special Counsel at 1717 H Street, NW., Washington, D.C. 20419. Except in unusual circumstances, the Special Counsel or his designee shall make a determination on the appeal within twenty (20) days (excluding Saturdays, Sundays, and legal holidays) after it is received. When a request is denied on appeal, the requester shall be advised of his right to seek judicial review.

§ 1260.6 Disclosures by authorized official.

No employee or former employee of the Office of the Special Counsel shall, in response to a demand of a court or other authority, produce or disclose any information or records acquired as part of the performance of his official duties or because of his official status without the prior approval of the appropriate official of the Office of the Special Counsel. This section does not apply in cases where the Government is a party.

PART 1261—PRIVACY

- Sec.
- 1261.1 Records maintained on individuals.
 - 1261.2 Access to records and identification.
 - 1261.3 Medical records.
 - 1261.4 Requests for amendment of records.
 - 1261.5 Appeals.
 - 1261.6 Exemptions.

Appendix I—Disclosure Policy of the Office of the Special Counsel.

Authority: 5 U.S.C. 522a.

§ 1261.1 Records maintained on individuals.

Information on individuals that are maintained in any group or system of records by the Office of the Special Counsel and which are retrieved by the name of the individual or some identifying particular assigned to the individual, is subject to the Privacy Act (5 U.S.C. 552a). The terms used in this part that are defined in that section shall have the meanings set forth therein.

§ 1261.2 Access to records and identification.

(a) Individuals may request access to records pertaining to them that are maintained as described in section 1261.1 by addressing an inquiry to the Office of the Special Counsel either by mail or by appearing in person at the offices of the Special Counsel at 1717 H Street, NW., Washington, D.C. 20419, during business hours on a regular business day. Requests in writing should be clearly and prominently marked "Privacy Act Request". Requests for copies of records shall be subject to duplication fees set forth in § 1260.4 of this subchapter.

(b) Individuals making a request in person shall be required to present

satisfactory proof of identity, preferably a document bearing the individual's photograph. Requests by mail or submitted other than in person should contain sufficient information to enable the Office of the Special Counsel to determine that the requester and the subject of the record are one and the same. To assist in this process, individuals should submit their name and address, date and place of birth, social security number, and any other known identifying information such as an agency file number or identification number and a description of the circumstances under which the records were compiled.

§ 1261.3 Medical records.

When a request for access involves medical records that are not otherwise exempt from disclosure, the requesting individual may be advised, if it is deemed necessary, that the records will be provided only to a physician designated in writing by the individual. Upon receipt of the designation, the physician will be permitted to review the records or to receive copies by mail upon proper verification of identity.

§ 1261.4 Requests for amendment of records.

Individuals may request amendment of records pertaining to them that are subject to this part. Requests should be addressed, in writing, to the Special Counsel and be clearly and prominently marked "Privacy Act Request". Requests for amendment should include identification of the records together with a statement of the basis for the requested amendment and all available supporting documents and materials. Requests for amendment shall be acknowledged not later than ten (10) days (excluding Saturdays, Sundays, and legal holidays) after receipt and a determination on the request shall be made promptly.

§ 1261.5 Appeals.

When a request for access or amendment has been denied, a written appeal may be submitted to the Special Counsel or his designee. A final determination on the appeal shall be issued within thirty (30) days (excluding Saturdays, Sundays, and legal holidays) after receipt. Where unusual circumstances prevent a determination within that time period, the time for a determination may be extended an additional thirty (30) working days after the requesting individual has been advised in writing of the reasons for the extension and the estimated date a determination will be made. Where the final determination denies a request for

amendment, the requesting individual shall be notified of his right to file a concise statement of reasons for disagreeing with the final determination. A copy of the statement shall be appended to the disputed record and provided to persons to whom the record is disclosed and to prior known recipients of the record. The Office of the Special Counsel may also attach to the statement a concise account of its reasons for not making the amendments requested. The final determination shall contain a notice of the right to judicial review.

§ 1261.6 Exemptions.

The Office of the Special Counsel may claim exemptions from the provisions of the Privacy Act at subsections (c)(3) and (d) as permitted by subsection (k) for records subject to the Act that fall within the category of investigatory material described in paragraphs (2) and (5) and testing or examination material described in paragraph (6) of that subsection. The exemptions for investigatory material are necessary to prevent frustration of inquiries into allegations of prohibited personnel practices or political activity and to protect identities of confidential sources of information. The exemption for testing or examination material is necessary to prevent the disclosure of information which would potentially give an individual an unfair competitive advantage or diminish the utility of established examination procedures. The Office of the Special Counsel also reserves the right to assert exemptions for records received from another agency that could be properly claimed by that agency in responding to a request and the Office of the Special Counsel may refuse access to information compiled in reasonable anticipation of a civil action or proceeding.

PARTS 1262 THROUGH 1269 [RESERVED]

Appendix I to Part 1261.—Disclosure Policy of the Office of the Special Counsel.

A. *General Statement of Policy.* The purpose of this statement is to express the policies of the Office of the Special Counsel regarding the disclosure of information about cases handled by the office in order to both protect the rights of individuals involved and meet the legitimate informational needs of the public through responsible disclosure.

The Office of the Special Counsel has broad statutory authority to receive and investigate allegations of prohibited personnel practices and certain disclosures of information ("whistleblowing"). To carry out these responsibilities, the identity of persons who provide information and cooperate during an investigation must be protected.

Unless the Special Counsel can be assured of a free flow of information from complainants, witnesses, and agencies, the investigative and enforcement functions of the Office of the Special Counsel cannot be discharged in an effective and timely manner. If complainants and witnesses are subjected to reprisal, intimidation, or coercion, they may refuse to come forward with complaints and be hesitant to cooperate.

In the same vein, unless agency management officials feel confident that they will not be subjected to embarrassment and unfair publicity based on unwarranted disclosure of complaints and charges, cooperation from agencies may be limited to only that required by law.

At the same time, complainants and the Congress, as well as interested members of the public and press, should be kept fully informed about activities of the Special Counsel and the disposition of matters brought to his attention. The legislation creating the Office of the Special Counsel contains specific statutory mechanisms for disclosure of information to Congress, complainants, and the public. The legislation also contains restrictions on disclosure of information.

Where there appears to be a conflict between the enabling legislation of the Office of the Special Counsel and other statutes governing disclosure and nondisclosure of information, it shall be the policy of the Special Counsel to favor the former where such an interpretation is necessary to carry out its investigative and enforcement functions absent a well-defined and overriding public interest.

B. *Protecting the Identity of Complainants.* The Special Counsel is precluded from disclosing the identity of a complainant without his consent unless it is determined that disclosure is necessary in order to carry out the Special Counsel's functions. Where circumstances surrounding an investigation create a likelihood that the identity of the complainant may become known, the Special Counsel will weight the public interest in proceeding with the investigation (based on the seriousness of the charges involved and the likelihood of obtaining corrective action) against the possibility of harm to the complainant arising from disclosure of his identity. Except where it would jeopardize the likelihood of success in investigation and enforcement, the complainant will be notified when disclosure of the complainant's identity appears imminent.

C. *Protecting the identity of Witnesses.* It shall be the policy of the Special Counsel to protect the identity of witnesses and sources of information who cooperate during an investigation. However, witnesses who provide affidavits or sworn statements will ordinarily be advised that the affidavit or statement is given without a pledge of confidentiality to the extent that it may be used in a proceeding or for official action arising from the investigation. Agency officials and other interested persons shall not, as a matter of right, be given access to statements of witnesses or information from sources collected by the Special Counsel during an investigation.

D. *Protecting the Privacy of Persons Named in an Investigation.* While an

investigation is pending, disclosure of the identity of persons who are being investigated shall be limited to disclosures necessary to proceed with the investigation. When an investigation has been terminated, disclosure of information that would reveal the identity of persons associated with the investigation will be based on a determination of how the public interest would be served by disclosure when balanced against the invasion of personal privacy involved. Unless and until an agency official or employee is formally charged with a violation, the focus of the investigation for disclosure purposes, shall be on prohibited personnel practices or violations of law of the agency concerned. The identity of a person together with the nature of the charges will be revealed when he is made the subject of a written complaint by the Special Counsel or an agency charging violations of law or prohibited personnel practices.

E. *Access to Information by the Complainant.* The Special Counsel will take reasonable steps to assure that a complainant is advised of the status of an investigation and is given the opportunity to provide information relevant to the investigation. When an investigation is terminated by the Special Counsel, the complainant whose allegation led to the investigation will be advised in writing why the investigation was terminated and the reasons for termination. Where the information provided results in an agency report at the direction of the Special Counsel, the report will be transmitted to the complainant, except when it contains evidence of a criminal violation or when disclosure of the information involved is specifically prohibited by law.

If the information provided by the complainant evidences a violation and the Special Counsel transmits the information to the agency head but does not require an investigation, the Special Counsel will inform the complainant in writing of the matters reported by the agency head.

F. *Access to Information by Employees Subjected to Disciplinary Action.* When the Special Counsel determines that disciplinary action should be taken against any employee and has prepared and presented a complaint against the employee together with a statement of supporting facts to the employee and the Merit Systems Protection Board, the employee shall be entitled to review the documents and records relied upon to support the disciplinary action.

Access to the identity of a complainant or sources of information consulted during the investigation leading to the disciplinary action will not routinely be made available. Where the circumstances surrounding the proposal for disciplinary action and the information relied upon to support the complaint make it apparent that the employee should be entitled to such information as a matter of due process, access to the identity of the complainant or sources of information will be granted, as necessary, to meet this standard after the complaint against the employee is served on the employee and Merit Systems Protection Board.

G. *Disclosure of Information to Congress.* By statute, when the Special Counsel requires

an agency to conduct an investigation and submit a written report within 60 days after a determination that there is a substantial likelihood of prohibited matters within its authority, the report shall be submitted to the Congress, to the President, and to the Special Counsel for transmittal to the complainant.

Agencies that are directed to submit a report under this authority shall transmit the report directly to the President of the Senate and the Speaker of the House of Representatives to satisfy the reporting requirement to Congress.

When any Member of Congress requests access to records or reports prepared by the Office of the Special Counsel or at its direction, and disclosure is not prohibited by law or Executive order, the records or reports requested, depending on the source of the request, shall be transmitted to the oversight committee for the Office of the Special Counsel in the House of Representatives or the oversight committee for the Office of the Special Counsel in the Senate, to be transmitted to the Member.

H. *Disclosure of Information Pertaining to a Pending Investigation.* While an investigation is pending, the Special Counsel will disclose the following information to a member of the public, generally only upon a written request, except where to do so would interfere with enforcement proceedings, constitute an unwarranted invasion of personal privacy or disclose the identity of the complainant:

- (1) Confirmation that an investigation of the matter described by the requester is pending, including the name and location of the agency or agencies involved;
- (2) The nature of the matters under investigation;
- (3) A description of any formal action taken by the Special Counsel.

Generally, any request for access to records or documents pertaining to an investigation will be denied while the investigation is pending.

I. *Public Disclosure of Noncriminal Matters.* In the public interest, the Office of the Special Counsel has statutory authority to make available to the public a list of noncriminal matters referred to heads of agencies together with the reports and certifications by heads of agencies specified by statute.

The list available to the public shall contain the following information in chronological sequence:

- (1) The nature of the matter;
- (2) The name and location of the agency involved;
- (3) The disposition of the matter, including a description of any corrective action ordered;
- (4) The names and position titles of any agency officials or employees disciplined by adverse action or by action of the Special Counsel, together with the nature of the action arising from the matter.

The information contained in the list together with any related reports or certifications shall be made available within 10 calendar days after final action by the Special Counsel in the matter.

J. *Control of Records.* Records, reports and related materials prepared by or submitted to

the Office of the Special Counsel shall be subject to the exclusive control of the Office of the Special Counsel for purposes of disclosure. Any request for access to such records or reports shall be referred to the Special Counsel. When the request for access to reports or records prepared by agencies involves information that may be lawfully protected from disclosure, the Special Counsel will, where practicable, consult with the agency involved. Requests for access to reports or records of an agency in the custody of the Office of the Special Counsel, but not under its control as described above, shall be referred to the agency concerned.

FEDERAL TRADE COMMISSION

16 CFR PART 436

Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures; Promulgation of Final Interpretive Guides

AGENCY: Federal Trade Commission.

ACTION: Promulgation of final interpretive guides for Trade Regulation Rule on Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures.

SUMMARY: On December 21, 1978 the Commission published proposed interpretive guides to its Franchising and Business Opportunities trade regulation rule and invited public comment on the proposed guides [43 FR 59614]. After reviewing the public comment, the Commission now promulgates final guides to accompany the rule.

EFFECTIVE DATE: The effective date of the rule to which these guides correspond is October 21, 1979.

FOR FURTHER INFORMATION CONTACT: John M. Tifford, Federal Trade Commission, Pennsylvania Ave. and Sixth Street, N.W., Washington, D.C. 20580, 202-523-1753.

FINAL GUIDES TO THE FRANCHISING AND BUSINESS OPPORTUNITY VENTURES TRADE REGULATION RULE

Introduction

These interpretive guides describe the provisions of the Federal Trade Commission's trade regulation rule entitled "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures" ("the rule") which was promulgated on December 21, 1978, and is effective October 21, 1979 (16 C.F.R. § 436). These guides neither amend nor modify the rule. They have been prepared solely to assist franchisors in understanding the rule and complying with its obligations.

In general, the rule addresses the problems of nondisclosure and misrepresentation which arise when prospective franchisees purchase franchises without essential and reliable information about them. To alleviate these problems, the rule requires franchisors and franchise brokers to furnish prospective franchisees with information about the franchisor, the franchisor's business and the terms of the franchise agreement in a single document ("the Basic Disclosure Document"). Additional information

must be furnished if any claims are made about actual or potential earnings ("the Earnings Claim Document"). Copies of the proposed franchise agreements also must be furnished. All disclosures must be made at prescribed times before any sale is consummated.

The rule requires disclosure of important facts. It does not regulate the substantive terms of the franchisor-franchisee relationship. It does not require registration, approval or the filing of any documents with the Federal Trade Commission in connection with the sale of franchises.

These interpretive guides are organized into four sections: (I) an overview of the rule, (II) a description of each disclosure required in the Basic Disclosure Document, (III) use of earnings claims and (IV) the official text of the rule.

I. An Overview of the Rule

This section will interpret provisions of the rule concerning: (i) what transactions are covered, (ii) who is obligated to make disclosures and entitled to receive disclosures, (iii) when disclosures must be made, (iv) when state disclosure documents may be utilized in lieu of the rule's disclosure documents, (v) acts or practices which violate the rule and potential liabilities, and (vi) miscellaneous definitions.

A. What Transactions Are Covered

Two types of continuing commercial relationships are defined as a "franchise" by the rule: "package and product franchises" and "business opportunity ventures." The specific elements of these relationships are described below. The name which the parties give to their relationship is not relevant in determining whether the relationship is within the scope of the rule. Thus, a relationship described by the parties as a "franchise" will not be covered by the rule unless it meets the definitional criteria of the rule; conversely, a self-described "distributorship" will be covered by the rule if the definitional elements are satisfied. Moreover, the rule covers relationships which are represented either orally or in writing as having the characteristics specified in the rule's definition of "franchise" regardless of whether the representations are, in fact, fulfilled.

1. Package and Product Franchises (§ 436.2(a)(1)(i) and (a)(2))

A package franchise adopts the business format established by the franchisor and identified by the franchisor's trademark. The franchisee's method of operation in producing the

goods or services sold by him are subject to significant controls instituted by the franchisor, or, alternatively, the franchisor promises to render significant assistance to the franchisee in the operation of the business. The franchisee is required to pay money to the franchisor. Examples of package franchises include fast food outlets (hamburgers, fried chicken, etc.) car products or services (car washes, transmission centers, rust proofing services, etc.) and business aids and services (tax preparation services, accounting services, etc.).

A product franchise distributes goods that are produced by the franchisor (or under his control or direction) and which bear the franchisor's trademark. The product franchisor exercises significant control over the franchisee's method of operation or, alternatively, promises to provide a significant degree of assistance in the franchisee's method of operation. The franchisee is required to pay the franchisor for the right to sell the trademarked goods, either by required purchases of equipment, supplies, etc., or by paying an initial fee for the right to sell the goods.

Thus, the three elements common to package and product franchises covered by the rule are (i) distribution of goods or services associated with the franchisor's trademark, (ii) significant control of, or significant assistance to, the franchisee's method of operation, and (iii) required payments by the franchisee to the franchisor. The Commission's interpretation of these elements is more fully described in the following three subsections.

a. *Trademark.* This element will be satisfied only when the franchisee is given the right to distribute goods and services which bear the franchisor's trademark, service mark, trade name, advertising or other commercial symbol ("the mark"). The most common instances occur when either the goods or services being distributed by the franchisee are associated with the franchisor's mark or when (i) the franchisee must conform to quality standards established by the franchisor with respect to the goods or services being distributed, and (ii) the franchisee operates under a name that includes, in whole or in part, the franchisor's mark.

The Commission does not intend to cover package or product franchises in which no mark is involved. If a mark is not necessary to a particular distribution arrangement, the supplier may avoid coverage under the rule by expressly prohibiting the use of its mark by the distributor.

b. *Significant Control or Assistance.* The term "significant" relates to the

degree to which the franchisee is dependent upon the franchisor's superior business expertise—an expertise made available to the franchisee by virtue of its association with the franchisor. The franchisee, in order to reduce its business risks or enhance its chances for business success, relies upon the availability of such expertise to avoid business mistakes that it otherwise might make. The franchisor conveys its expertise either by exercising controls over the franchisee's method of operation of the business or by furnishing assistance to the franchisee in areas relating to the controls over or assistance to the franchisee's method of operation of the business are "significant," then this second element of the rule's definition is met.

Among the significant types of controls over the franchisee's method of operation are those involving (a) site approval for unestablished businesses, (b) site design or appearance requirements, (c) hours of operation, (d) production techniques, (e) accounting practices, (f) personnel policies and practices, (g) promotional campaigns requiring franchisee participation or financial contribution, (h) restrictions on customers, and (i) location or sales area restrictions.

Among the significant types of promises of assistance to the franchisee's method of operation are (a) formal sales, repair or business training programs, (b) establishing accounting systems, (c) furnishing management, marketing or personnel advice, (d) selecting site locations, and (e) furnishing a detailed operating manual.

In addition to the above listed elements—the presence of any of which would suggest the existence of "significant control or assistance"—the following additional elements will, to a lesser extent, be considered when determining whether "significant" control or assistance is present in a relationship: (a) a requirement that a franchisee service or repair a product (except warranty work), (b) inventory controls, (c) required displays of goods and (d) on-the-job assistance in sales or repairs.

The Commission as a matter of policy will not consider the following items in determining whether "significant" control or assistance exists: (a) trademark controls designed solely to protect the trademark owner's legal ownership rights in the mark under state or federal trademark laws (such as display of the mark or right of inspection), (b) health or safety restrictions required by federal or state

laws or regulations, (c) agreements between a retailer and a trading stamp company providing for the distribution of trading stamps in connection with retail sales of merchandise or service, (d) agreements between a bank credit interchange organization and retailers or member banks for the provision of credit cards and credit services, and (e) assisting distributors in obtaining financing to be able to transact business.

The Commission will not interpret a supplier's assistance in a franchisee's promotional activities as "significant," in the absence of additional forms of assistance. This includes assistance in furnishing a distributor with point-of-sale advertising displays, sales kits, product samples and other promotional materials intended to assist the distributor in making sales. It also includes assistance in connection with advertising in the media, whether provided solely by the franchisor or on a cooperative basis with its franchisees.

The Commission's interpretation of the term "significant" recognizes that significance also is a function of the degree of reliance which franchisees are reasonably likely to place upon the controls or assistance. Obviously, reliance is likely to be greater in circumstances where the franchisee is relatively inexperienced in the business represented by the franchisor, or where the relative financial risk assumed by the franchisee in relation to its total business is greater (i.e. adding a new product line which is intended to account for a substantial amount of the business' future sales or income compared to a modest amount), or where controls or promised assistance are unique to one specific franchisor as opposed to typical industry practices employed by all businesses in the same industry.

Moreover, it should be emphasized that in order to be deemed "significant" the controls or assistance must be related to the franchisee's entire *method of operation*—not its method of selling a specific product or products which represent a small part of the franchisee's business. Controls or assistance directed to the sale of a specific product which have, at most, a marginal effect on a franchisee's method of operating the entire business will not be considered in determining whether control or assistance is "significant."

c. *Required Payments.* The franchisee must be required to pay to the franchisor (or an affiliate of the franchisor), as a condition of obtaining or commencing the franchise operation, a sum of at least \$500 during a period from any time before to within six months after

commencing operation of the franchisee's business.

The Commission's objective in interpreting the term "required payment" is to capture all sources of revenue which the franchisee must pay to the franchisor or its affiliate for the right to associate with the franchisor and market its goods or services. Often, required payments are not limited to a simple franchise fee, but entail other payments which the franchisee is required to pay to the franchisor or an affiliate, either by contract or by practical necessity. Among the forms of required payments are initial franchise fees as well as those for rent, advertising assistance, required equipment and supplies—including those from third parties where the franchisor or its affiliate receives payment as a result of such purchases—training, security deposits, escrow deposits, non-refundable bookkeeping charges, promotional literature, payments for services of persons to be established in business, equipment rental, and continuing royalties on sales.

The payments may be required either by contract or by practical necessity. Payments required by contract would include not only those required by the franchise agreement, but also those required in any companion contracts which the parties may execute, such as a real estate lease. Payments made by practical necessity include, among others, those for equipment which can only be obtained, in fact, from the franchisor or its affiliate.

Questions have been raised as to where, within the foregoing scheme, fall payments for inventory sold at a bona fide wholesale price. The Commission recognizes that it is, as a practical matter, virtually impossible to draw a clear line between start-up inventory that is purchased at the franchisee's option, and that which is purchased as a matter or practical or contractual necessity. In order to minimize ambiguity in this respect, but consistent with the Commission's objective that "required payment" capture all sources of hidden franchise fees, the Commission will not construe as "required payments" any payments made by a person at a bona fide wholesale price for reasonable amounts of merchandise to be used for resale. The Commission will construe "reasonable amounts" to mean amounts not in excess of those which a reasonable businessman normally would purchase by way of a starting inventory or supply or to maintain a going inventory or supply.

Agency relationships in which independent agents, compensated by

commission, sell goods or services (e.g. insurance salespersons) are excluded, since there is no "required payment."

2. Business Opportunity Ventures (§ 436.2 (c)(1)(ii) and (a)(2))

Business opportunity ventures are covered by the rule if each of the following three elements is present:

- (1) The franchisee sells goods or services supplied by the franchisor or its affiliate, or by suppliers with which it is required by the franchisor to do business;
- (2) The franchisor secures retail outlets or accounts for the goods or services, or secures locations for vending devices or racks, or provides the services of a person to do either; and
- (3) The franchisee is required to pay the franchisor or an affiliated person in order to obtain or commence the franchised business.

The most common types of business opportunity ventures are distributorships, rack jobbing and vending machine routes. In these ventures, the franchisor puts the franchisee into a business of distributing certain goods or services, usually those of a well-known third party (such as film, juice, pantyhose, etc.), by providing or suggesting a supplier for the goods and representing that the franchisor will establish retail accounts or place vending machines or rack displays in suitable locations. In some cases, the franchisor obtains the services of another person to secure accounts or locations. For example, the franchisor may represent that he will secure ten gasoline stations to be retail outlets for automotive after-market products (e.g., oil filters, gas additives, etc.) or place vending machines in ten locations. The franchisee of a business opportunity venture is required to pay a fee or purchase goods or equipment (such as vending machines or display racks) in order to participate in the business opportunity offered by the franchisor. The Commission expects that most business opportunity ventures will be covered by the rule.

3. Exemptions and Exclusions (§ 436.2(a)(3) and (4))

A relationship defined as a "franchise" under the rule nevertheless may be exempted or excluded from the rule's requirements. The rule exempts "fractional franchises," "leased departments," "minimal investments," and purely oral agreements, and excludes employer-employee and general business partnership relationships, relationships created by membership in a "retailer-owned cooperative," relationships with a testing or certification service, and "single" license relationships. The Commission's

interpretation of these terms is discussed below.

a. *Fractional Franchise.* A "fractional franchise" relationship results when an established distributor adds a franchised product line to its existing line of goods.

The fractional franchise exemption is available if two conditions are met.

The first condition is that the franchisee or any of its current directors or executive officers has more than 2 years of prior management experience at any time in the past in the business represented by the franchise. The required experience may be in the same business selling competitive goods, or in a business that would ordinarily be expected to sell the type of goods to be distributed under the franchise. For example, the experience requirement would be met in a franchise for tires, batteries and accessories granted to a service station dealer, but not by a truck rental franchise granted to the dealer.

The second condition is that the parties in good faith anticipated or should have anticipated, at the time of entering into the franchise agreement, that the sales arising from the proposed relationship would represent no more than 20% of the dollar volume of the franchisee's projected gross sales within the reasonably foreseeable future. The Commission will expect parties invoking this exemption to take into account in good faith the franchisee's anticipated sales for a period of at least 1 year after the franchisee begins selling the goods or products involved in the franchise.

b. *Leased Departments.* A "leased department" is an arrangement in which an independent retailer sells its own goods and services from premises leased from a larger retailer in the larger retailer's store. Such arrangements usually occur in areas of merchandising such as footwear, optometry, tobacco, cosmetics and jewelry. This exemption is applicable only if the independent retailer is not required directly or indirectly to purchase its goods or services from either the large retailer or from suppliers required or approved by the large retailer.

c. *Minimal Investments.* If the payment which the franchisee is required to make to the franchisor or an affiliate of the franchisor from any time before to within six months after commencing operation of the franchised business is less than \$500, then the relationship is exempt from coverage under the rule. The exemption reflects the Commission's policy determination that a significant financial risk on the part of the franchisee is a necessary element of a franchise. A franchisee commences operation when it first

makes goods or services available for sale. A commitment entered into during the first six months which requires a payment later than six months after commencing operation is not counted toward the \$500 minimum, such as a promissory note or that portion of lease payments made after six months.

d. *Oral Agreements.* The rule exempts purely oral relationships which lack any written evidence of a material term of the franchise relationship or agreement, as a matter of policy to avoid problems of proof in its enforcement. However, the exemption will not be available where there is any writing, even if unsigned, with respect to a material term, such as a purchase invoice for goods or equipment.

e. *Employer-Employee and General Partner Relationships.* Bona fide employer-employee relationships and relationships among general partners are excluded from coverage under the rule.

The Commission will apply the traditional test of "right of control" in determining whether an employment relationship exists, e.g., whether a salary or definite sum of money is given as consideration for the work, or whether the employee can be discharged or his employment terminated without liability on the part of the principal, as well as consider whether the "employee" must invest money in the business before being "hired."

All partners must be general partners to qualify for the exclusion. The Commission will look carefully at those "employment" or "partnership" arrangements which are structured to shield the "employer" or "limited partner" (franchisor) from liability to the disadvantage of the "employee" or "general partner" (franchisee).

f. *Cooperative Associations.* Two types of "cooperative associations" qualify for this exclusion: (1) agricultural cooperatives authorized by the Capper-Volstead Act, 7 U.S.C. § 291, and (2) retailer-owned cooperative chains. Retailer-owned cooperatives are those operated by and for independent retailers on a cooperative basis. The members must be independent retailers, and the organization must furnish services or goods primarily to its members. The phrase "cooperative basis" is adopted from the federal income tax statutes (Section 1381 of the Internal Revenue Code) and is intended to provide a general standard to cover the multitude of cooperative arrangements.

g. *Certification or Testing Services.* The rule excludes relationships which are created solely by arrangements with

bona fide certification or testing services, such as that offered by Underwriters Laboratory and similar organizations. Franchising involves distribution of goods or services through selected outlets; in contrast, certification or testing services authorize use of their trademark by all parties meeting their standards and willing to pay their fee.

h. *"Single" Trademark Licenses.* The rule excludes trademark licensing arrangements in which a single licensee is granted the right to use the trademark. This exclusion also includes a "one-on-one" licensing arrangement, i.e., the license of a trademark to a single licensee who manufactures the trademarked goods according to the licensor's specifications. This arrangement is common, for example, in the clothing industry where trademark owners license the manufacture of textiles. The exclusion also includes "collateral product" licensing; i.e., the practice of licensing a trademark which is well-known in one context (e.g., a soft drink) for use in another (e.g., clothing or decorative items embossed with the soft drink logo). This exclusion also includes licensing agreements entered into in the course of settlement negotiations in trademark infringement litigation, where the licensor will grant the "infringing" party a license to use the trademark for a specified period of time.

B. Who Makes and Receives Disclosures

1. Who Makes Disclosures

Disclosure must be made by "franchisors" and "franchise brokers."

A "franchisor" is a "person" (defined in § 436.2(b) to mean any individual, group, association, partnership, corporation or other business entity) who participates in a transaction covered by the rule (see paragraph A above) as a franchisor; that is, the person offering the business described in paragraph A. This definition does not include a franchisee who sells his own franchise, since the franchisee will not be a "franchisor" with respect to the relationship being offered.

A "franchise broker" is defined in § 436.2(j) to mean any person (i.e., any individual, group, association, partnership, corporation, or other business entity) other than a franchisor or franchisee who sells, offers for sale, or arranges for the sale of a franchise. An organizer or promoter of a trade show in which franchises or business opportunities are offered for sale is a "franchise broker" within the meaning of the rule, since such person "arranges" for the sale of franchises. This definition does not cover franchisees who sell

their own franchise. A sub-franchisor authorized to offer or sell sub-franchises will be a "franchise broker" within the meaning of the rule.

The rule establishes the same obligations for both the "franchisor" and the "franchise broker." Either the franchisor or the franchise broker may satisfy the requirements set out in § 436.1(a)-(e) and (g) by furnishing the required disclosure documents. The requirements of the rule, apply jointly to both the franchisor and the franchise broker; however, compliance by one will constitute compliance by the other.

Some franchisors permit their franchisees to sub-franchise others. Agreements authorizing such subfranchising may range from instances where the sub-franchisor merely "passes through" the terms and conditions prescribed by the franchisor, to instances where the sub-franchisor acts on its own, with the franchisor's role limited to approving the sub-franchisor's selections. The more power and responsibility the franchisor has with respect to the franchisees sold by the sub-franchisor, the more necessary that disclosures about the franchisor be included.

When sub-franchisors franchise others, the franchisor and sub-franchisor are free to decide between themselves as to the party responsible for preparing and disseminating the required disclosures. Both the franchisor and the sub-franchisor are responsible for each other's compliance with the rule, and are jointly and severally liable for each other's violations. In preparing the necessary disclosure document(s), franchisors and sub-franchisors should bear in mind that the goal of the rule is to furnish complete and accurate disclosure of essential and reliable information. It is their joint responsibility to ensure that such disclosure is made. It may be that some of the 20 categories of information required by the Basic Disclosure Document need be answered by the sub-franchisor only, or by the franchisor only, in order that the answer will be complete and accurate. Other categories may require disclosures by both the sub-franchisor and the franchisor in order to be complete and accurate. The determination of which parties should make which disclosures will depend upon the type of subfranchise relationship the parties have established.

As a general rule, the Commission would expect that categories 1-5 and 20 would contain information supplied by both parties, and category 16 would be answered by the sub-franchisor in all cases and by the franchisor, also, if the

franchisor's statistics differ materially from the sub-franchisor's statistics. Finally, to ease the expense of certified financial statements, the Commission will permit use of a franchisor's certified financial statements without any additional financial reporting requirement from a sub-franchisor if the franchisor absolutely and irrevocably guarantees the obligations of the sub-franchisor to the franchisee arising out of the franchise agreement between those two parties. A sub-franchisor is free to include its own financial statements in addition to the franchisor's financial statements.

2. Who Receives Disclosures

Disclosures must be made to "prospective franchisees" and, in some circumstances, to existing franchisees who extend or renew the term of their franchises. Section 436.2(e) defines a "prospective franchisee" as "any person, including any representative, agent, or employee of that person, who approaches or is approached by a franchisor or franchise broker, or any representative, agent or employee thereof, for the purpose of discussing the establishment, or possible establishment, of a franchise relationship involving such person." However, the prospective franchisee is not *per se* entitled to disclosure until the requisite timeframe for such disclosure. This timeframe is described in paragraph C below.

Franchisees who exercise a right under their franchise agreement to establish new outlets for themselves (as opposed to selling outlets to others), as well as franchisees who choose to extend or renew the term of their franchise agreement, need not be furnished with the disclosures required for prospective franchisees unless the new relationship is under terms and conditions materially different from their present agreement. In interpreting whether disclosure is required in such circumstances the Commission will employ a flexible standard based upon the extent to which the disclosure will materially assist the franchisees in making an informed decision.

A person who purchases an existing franchise directly from the franchisee who owns it, without significant contact with the franchisor, is not a prospective franchisee. A purchaser who purchases from an existing franchisee will not be deemed a prospective franchisee, therefore, merely because the franchisor has, and exercises, a right to approve or disapprove the purchaser, unless the franchisor's role in the sale is otherwise significant. Franchisors and franchise

brokers must make required disclosures only to prospective franchisees.

C. When Disclosures Must Be Made

1. The Basic Disclosure Document

The Basic Disclosure Document must be given to a "prospective franchisee" at the earlier of the first "personal meeting" or the "time for making of disclosures."

The term "personal meeting" is defined as a face-to-face meeting between a prospective franchisee and a franchisor or franchise broker (or their representatives) which is held for the purpose of discussing the sale, or possible sale, of a franchise. By definition, a first "personal meeting" does not include communication by telephone or mail. Even where a face to face meeting occurs, it is not necessarily a "first" personal meeting. In interpreting this term, the Commission will consider such factors as whether the franchisor clearly indicated at the outset of the discussion that it was not prepared to discuss the possible sale of a franchise at that time, whether the meeting was initiated by the prospective franchisee rather than the franchisor, whether the meeting was limited to a brief and generalized discussion and whether earnings claims were made. The Commission believes that by using common sense precautions, franchisors can defer the first personal meeting until such time as they are prepared to provide the required disclosures.

The term "time for making of disclosures" is defined in § 436.2(g) as ten business days prior to the earlier of (i) the execution by a prospective franchisee of any franchise agreement or any other agreement imposing a binding legal obligation on such prospective franchisee, about which the franchisor, franchise broker, or any agent, representative, or employee thereof knows or should know, in connection with the sale or proposed sale of a franchise; or (ii) the payment by a prospective franchisee, about which the franchisor, franchise broker, or any agent, representative or employee thereof knows or should know, of any consideration in connection with the sale, or proposed sale, of a franchise. This latter payment does not include payments which the prospective franchisee chooses to make on its own in connection with reviewing the proposed investment, such as a retainer for an attorney or a market feasibility study. The term "business days" does not include Saturdays, Sundays, or national holidays.

2. Earnings Claim Document

The Earnings Claim Document must be given (if it is required at all) to a prospective franchisee at the earlier of (i) the first personal meeting at which or following the time an earnings claim is made or (ii) the "time for making of disclosures." An Earnings Claim Document prepared exclusively for media claims (§ 436.1(e)) must be given to the prospective franchisee at the same time that the Basic Disclosure Document is given; i.e., the earlier of the first personal meeting or the time for making of disclosures.

3. Other Disclosures

A copy of the franchisor's standard franchise agreement and any related agreements (e.g., leases, purchase orders, etc.) must be given to the prospective franchisee when the Basic Disclosure Document is furnished. In addition, a copy of the completed franchise agreement (and any related agreements) which are intended to be executed by the parties must be given to the prospective franchisee at least five business days prior to the day that the agreements are to be executed. A revised copy of the agreement need not be provided if, within the five-day period, minor revisions are made to the completed agreement at the request of the franchisee which substantially benefit the franchisee and provide no more than *de minimis* benefits to the franchisor. Nor is a revised agreement required if, within the five-day period, purely typographical errors or omissions are corrected.

4. Updating Disclosures

To ensure that the disclosure documents contain accurate and timely information, the rule requires that they be kept current. The Basic Disclosure Document must be current as of the franchisor's most recent fiscal year. After the close of its fiscal year, the franchisor has ninety days in which to prepare a revised Basic Disclosure Document for distribution to prospective franchisees. In addition, the Basic Disclosure Document must be updated, on at least a quarterly basis, whenever a "material" change occurs in the information contained in the document. The updating information may be attached to the Basic Disclosure Document as an addendum. The Earnings Claim Document must be current as of the time when the earnings claim is made. Finally, and in addition to the above stated updating requirements, prospective franchisees must be notified of any material changes in the information contained in the

Earnings Claim Document prior to entering into a franchise relationship.

D. State Disclosure Documents and Laws

1. Uniform Franchise Offering Circular

Several states permit use of a disclosure format known as the Uniform Franchise Offering Circular ("UFOC") to comply with their own state registration or disclosure requirements. The Commission has determined that, in the aggregate, the disclosures required by the UFOC format provide protection to prospective franchisees which is equal to or greater than that provided by the rule. As a result, and in an effort to minimize compliance burdens, the Commission will permit the UFOC to be used in lieu of the disclosure requirements set forth in Section 436.1 (a) through (e) of the rule, to satisfy the rule's disclosure requirements. This determination is limited to the UFOC format adopted by the Midwest Securities Commissioners Association on September 2, 1975, plus its associated guidelines and any minor modifications thereof, that do not diminish the protection accorded to a prospective franchisee, which may be made or allowed by a state in which such registration has been made effective.

Either the rule or the UFOC disclosure format must be used in its entirety. Franchisors or franchise brokers may not pick and choose questions from each format, regardless of which specific question may provide equal or greater protection to prospective franchisees. Inasmuch as UFOC item 19 (or alternative item 19) involves disclosure about earnings claims, the rule's earnings claims disclosures set forth in § 436.1(b)-(e) will not apply if the UFOC format is utilized, except with respect to the printed text of advertisements, where the rule's preemption standard of "inconsistency" (Note 2 of the rule) will apply.

The UFOC format may be used in lieu of the rule documents in any state, notwithstanding the presence or absence of a state franchise law. The manner in which the UFOC may be used in lieu of the rule documents will depend on whether the UFOC is part of a currently effective state registration. The three possibilities are as follows:

a. If the UFOC is used in lieu of the rule documents in a state in which there is a currently effective registration, then in such event, the UFOC document and instructions should be followed completely, subject only to the modifications set forth later in this section. The Commission will presume the sufficiency, adequacy and accuracy of the document; however, the Commission retains the right to determine whether the UFOC

requirements as elaborated in the UFOC guidelines have been met, so that this presumption should not be viewed as deferring to state law enforcement. Moreover, the Commission will be influenced by subsequent state determinations of disclosure violations when considering its own enforcement alternatives. The UFOC cover page should be used; a separate page containing the information required for the cover to FTC documents pursuant to § 436.1(a)(21) of the rule must be given to the prospective franchisee. This paragraph does not apply to states with disclosure requirements but not registration, like Hawaii and Oregon.

b. If the UFOC is currently registered and effective in one state but is used in another state, then in such event, the UFOC format and instructions should be followed completely except that (a) answers to state-specific questions (such as the number of franchisees located within the registration state, franchisees proposed to be sold in the registration state, trademark information relating to the registration state, reference to state laws concerning termination rights or non-competition covenants, etc.) must be changed so that they refer to the state in which the document will be used rather than the original registration state in which the document was declared effective, (b) the FTC cover page prepared pursuant to § 436.1(a)(21) must be used; no UFOC cover page is required; and (c) no Commission presumption of sufficiency, adequacy or accuracy of the disclosure document will be made.

c. If the UFOC format is used when no current state registration is in effect, then in such event, in addition to the obligations set forth in paragraph b. above, the requirements of § 436.1(a)(22) concerning timeliness of information and updating requirements also will apply.

The following provisions of the rule still will apply even when the UFOC format is utilized:

a. *Scope of the Rule.* Disclosure must be made for all transactions covered by the rule, regardless of whether such transactions would require disclosure pursuant to state law.

b. *Persons Covered by the Rule.* Persons obligated to comply with the rule are determined by the rule, regardless of whether such persons would be obligated to make disclosure under state law. (However, while the FTC definitions determine persons required to comply with the rule, the UFOC definitions are used for making disclosures using the UFOC format.)

c. *Timing of Disclosures.* The disclosure statement must be furnished to the prospective franchisee at the times mandated by the rule, not by the state law, unless the state law requires earlier disclosure.

d. *Contracts to Be Executed.* Prospective franchisees must be given a copy of the completed contracts and agreements proposed to be executed at least five business days before they can be signed.

e. *Certain Prohibitions.* Franchisors and franchise brokers may not make any representation contradictory to those

appearing in the disclosure documents. Similarly, no information may appear in the disclosure document unless it is required either by the rule or by non-preempted state law.

f. *Refunds.* Section 436.1(h) makes it an independent violation of the rule to fail to return or refund fees in accordance with contract provisions disclosed in the Basic Disclosure Document regardless of whether the rule document or the UFOC document is used.

2. Preemption

The rule attempts to create a minimum federal standard of disclosure applicable to all franchise and business opportunity offerings, and, at the same time, permits state and local authorities to provide additional concurrent protection. Note 2 of the rule sets forth the preemption standard; namely, state or local laws or regulations are preempted only to the extent that they are "inconsistent" with the rule—that is, provide less protection to the

prospective franchisee than that provided by the rule. The degree of preemption is limited to the "inconsistency." Accordingly, franchisors and franchise brokers must comply with non-preempted state and local laws and regulations in addition to the rule.

Examples of state and local laws or regulations not preempted by the rule include (a) registration of franchisors and franchise salespersons, (b) escrow or bonding requirements, (c) substantive regulation of the franchisor-franchisee relationship, such as termination practices, contract provisions and financing arrangements, and (d) disclosure laws and regulations requiring more extensive disclosures than those provided by the rule.

The following breakdown gives examples of preemption in several situations (other than where the UFOC is used) where the rule and state franchise laws overlap:

STATE REQUIRES	FTC REQUIRES	FRANCHISOR MUST COMPLY WITH
Disclosure of item x.....	(Silent as to item x).....	State disclosure requirement.
(Silent as to item x).....	Disclosure of item x.....	FTC disclosure requirement.
Disclosure of item x.....	Disclosure of items x, y & z.....	Both State and FTC requirements.
Prohibits disclosure.....	Disclosure of item x.....	FTC Requirement; state requirement is preempted.
Registration; escrow or bonding.....	(Silent as to such requirements).....	State requirements.
Disclosure by Franchisor x.....	(Silent as to Franchisor x).....	State requirement.
(Silent as to Franchisor x).....	Disclosure by Franchisor x.....	FTC requirement.
Disclosure by Franchisor x.....	Disclosure by Franchisor x & y.....	State and FTC requirements.

E. Acts or Practices Which Violate the Rule and Potential Liabilities

It is an unfair or deceptive act or practice within the meaning of § 5 of the Federal Trade Commission Act for any franchisor or franchise broker:

1. To fail to furnish prospective franchisees with the Basic Disclosure Document in the manner and within the timeframes established in the rule (§ 436.1(a));

2. To make any representations about the actual or potential sales, income, or profits of existing or prospective franchises except in the manner and within the timeframes established by the rule, including dissemination of the Earnings Claim Document (§ 436.1(b)-(e));

3. To make any claim or representation (such as in advertising or oral statements by salespersons) which is inconsistent with the information required to be disclosed by the rule (§ 436.1(f));

4. To fail to furnish prospective franchisees, within the timeframes established by the rule, with copies of the franchisor's standard forms of franchise agreements and copies of the final agreements to be signed by the parties (§ 436.1(g)); and

5. To fail to return to prospective franchisees any funds or deposits (such as down payments) identified as refundable in the Basic Disclosure Document (§ 436.1(h)).

Violators are subject to civil penalty

actions brought by the Commission of up to \$10,000 per violation. In addition, the Commission may bring an action in federal or states court for damages on behalf of franchisees.

The Commission believes that the courts should and will hold that any person injured by a violation of the rule has a private right of action against the violator, under the Federal Trade Commission Act, as amended, and the rule. The existence of such a right is necessary to protect the members of the class for whose benefit the statute was enacted and the rule is being promulgated, is consistent with the legislative intent of the Congress in enacting the Federal Trade Commission Act, as amended, and is necessary to the enforcement scheme established by the Congress in that Act and to the Commission's own enforcement efforts.

F. Miscellaneous Definitions

1. "Material"

A number of provisions of the rule refer to the concept of "materiality." As defined in § 436.2(n), the phrase "material fact" includes "any fact, circumstances, or set of conditions which has a substantial likelihood of

influencing a reasonable franchisee or a reasonable prospective franchisee in the making of a significant decision relating to a named franchise business or which has any significant financial impact on a franchisee or prospective franchisee."

2. "Affiliated Person"

Several provisions of the rule require certain disclosures regarding persons "affiliated" with the franchisor. The term "affiliated person" is defined in § 436.2(e) to mean any individual, group, association, limited or general partnership, corporation, or any other business entity:

(a) Which directly or indirectly controls, is controlled by, or is under common control with, a franchisor; or

(b) Which directly or indirectly owns, controls or holds with power to vote, 10 percent (10%) or more of the outstanding voting securities of a franchisor; or

(c) Which has, in common with a franchisor, one or more partners, officers, directors, trustees, branch managers, or other persons occupying a similar status or performing similar functions.

In determining whether there is a "control" relationship, the Commission will look to the degree to which a person has the power or authority to manage or direct the course of the other person. Whether a control relationship exists is a question of fact. Such control may be exercised directly, such as in majority or controlling ownership of voting stock, or indirectly, such as where a person owns a majority or controlling interest in an intermediary corporation which is the majority or controlling shareholder of the other person. In determining whether there is a "control" relationship, the Commission will be guided by the concept of control employed in the federal securities laws and cases dealing with such laws.

II. The Basic Disclosure Document

The Basic Disclosure Document consists of 20 categories of information. Set forth below is a description of the rule section, explanation and example for each of these 20 categories.

§ 436.1(a)(1) [Identifying Information as to Franchisor]

Rule

(1)(i) The official name and address and principal place of business of the franchisor, and of the parent firm or holding company of the franchisor, if any;

(ii) The name under which the franchisor is doing or intends to do business; and

(iii) The trademarks, trade names, service marks, advertising or other commercial symbols (hereinafter collectively referred to as "marks") which identify the goods, commodities, or services to be offered, sold, or distributed by the prospective franchisee,

or under which the prospective franchisee will be operating.

Explanation

Disclosures should include (i) the franchisor's name and address as well as that of its parent or holding company, if applicable, (ii) the name under which the franchisor now does or intends to do business, and (iii) the trademarks, trade names, service marks or commercial symbols (the "marks") which the franchisor authorizes the prospective franchisee to utilize in the conduct of its business.

The description of marks should include information about registration, litigation, and the franchisor's knowledge of any infringing uses. Franchisors need not discuss any marks of companies whose products are merely distributed, such as the various trademarked food products distributed by a wholesale grocer to its retailers.

A "parent" controls the franchisor directly or indirectly through one or more intermediaries.

Example of Disclosure

Doe, Inc., doing business under the name of Doe Burgers, maintains its principal business address at 55 Front Street, New York, New York 11111. Doe, Inc., is a wholly owned subsidiary of Roe Industries whose principal place of business is 2 Union Street, Rye, New York 22222.

Pursuant to the franchise agreement, Doe, Inc. authorizes its franchisees to operate fast food restaurants under the name "Doe Burgers." The franchisee is also authorized to use the following trademarks, service marks, trade names, advertising or other commercial symbol(s): (a) "Big Doe"; (b) "Do-Roe Cola" and (c) "Double Doe Burger."

All of the marks are registered with the United States Patent Office and the registrations are in the principal Register. The mark "Big-Doe" also is registered in the state of Minnesota. Doe, Inc. is not aware of any current infringing uses of the marks stated above, nor is any litigation pending with respect to any of these marks.

§ 436.1(a)(2) [Business Experience of Franchisor's Directors and Executive Officers]

Rule

(2) The business experience during the past 5 years, stated individually, of each of the franchisor's current directors and executive officers (including, and hereinafter to include, the chief executive and chief operating officer, financial, franchise marketing, training and service officers). With regard to each person listed, those persons' principal occupations and employers must be included.

Explanation

Disclosure should include the name and relevant business experience of the franchisor's current directors as well as those executive officers who will have

significant management responsibility with respect to the marketing and servicing of franchises, such as the chief executive and operating officers, and financial, franchise marketing, franchise training and franchise service officers.

Information for each listed person should include the person's current position and facts about his or her business experience during the preceding five fiscal years, such as all other occupations or employment (including name of employers and position or title held), and any other facts which would assist a prospective franchisee in assessing the person's business experience. Incidental biographical data, such as age, address, community activities, etc. should not be included.

Example of Disclosure

John Smith, President

In 1974, Mr. Smith was employed with Camper's Delight, Inc., a franchisor of campgrounds, as the Vice President of Franchise Marketing. His employment with KampKorners, Inc., began in 1977 when he was appointed Director of Franchise Marketing. Since January, 1978, he has served as President of KampKorners, Inc.

§ 436.1(a)(3) [Business Experience of the Franchisor]

Rule

(3) The business experience of the franchisor and the franchisor's parent firm (if any), including the length of time each:

(i) has conducted a business of the type to be operated by the franchisee;

(ii) has offered or sold a franchise for such business;

(iii) has conducted a business or offered or sold a franchise for a business (A) operating under a name using any mark set forth under paragraph (a)(1)(iii), or (B) involving the sale, offering, or distribution of goods, commodities, or services which are identified by any mark set forth under paragraph (a)(1)(iii); and

(iv) has offered for sale or sold franchises in other lines of business, together with a description of such other lines of business.

Explanation

Disclosure relates to the business experience of the franchisor and any parent corporation, and must include complete information on each of the categories set forth in the rule section. The franchisor also should include a brief description of the nature of its business, its type of business organization (e.g., corporation, partnership, etc.) and the state and date of its incorporation or organization. The "other lines of business" disclosure (subparagraph (iv)) is limited to the franchisor's (and parent's) experience in franchising, and does not require non-franchise business history.

Example of Disclosure

The franchisor, Ralph's Rentals, Inc. was originally incorporated in Virginia on January 3, 1962. Since then, it has operated a full service equipment rental store. Since 1971, the franchisor has been selling franchises for the operation of retail establishments known as Ralph's Rentals. It has been offering franchises since 1971 under the marks set forth in section 1. The franchisor does not sell franchises in other lines of business.

§ 436.1(a)(4) [Litigation History]

Rule

(4) A statement disclosing who, if any, of the persons listed in paragraphs (a)(2) and (a)(3) of this section:

(i) Has, at any time during the previous seven fiscal years, been convicted of a felony or pleaded *nolo contendere* to a felony charge if the felony involved fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade;

(ii) Has, at any time during the previous seven fiscal years, been held liable in a civil action resulting in a final judgment or has settled out of court any civil action or is a party to any civil action (A) involving allegations of fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade, or (B) which was brought by a present or former franchisee or franchisees and which involves or involved the franchise relationship; *Provided, however*, That only material individual civil actions need be so listed pursuant to this subparagraph (4)(ii), including any group of civil actions which, irrespective of the materiality of any single such action, in the aggregate is material;

(iii) Is subject to any currently effective State or Federal agency or court injunctive or restrictive order, or is a party to a proceeding currently pending in which such order is sought, relating to or affecting franchise activities or the franchisor-franchisee relationship, or involving fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade.

Such statement shall set forth the identity and location of the court or agency; the date of conviction, judgment, or decision; the penalty imposed; the damages assessed; the terms of settlement or the terms of the order; and the date, nature, and issuer of each such order or ruling. A franchisor may include a summary opinion of counsel as to any pending litigation, but only if counsel's consent to the use of such opinion is included in the disclosure statement.

Explanation

Disclosure involves three types of franchisor litigation: criminal, civil, and administrative. For each past criminal, civil or administrative proceeding disclosed, set forth the (i) identity of the court or agency involved, (ii) date of conviction, judgment, decision, order or

ruling, (iii) amount of award or judgment and (iv) terms of any settlement order or ruling. The exact dollar amount of any settlement need not be disclosed if it is not disclosed in any papers filed in court. Instead, an approximate dollar amount may be used, such as "the low four figures". Additional requirements dependent upon the type of litigation disclosed are described below.

a. *Criminal litigation*. Subsection (i) requires disclosure of past felony convictions, including those entered after pleas of *nolo contendere*, of the franchisor, its current officers or directors, and its parent firm, which occurred within the previous seven fiscal years and which relate to those felonies described in the rule. Disclosure is not required with respect to any other criminal matter, such as proceedings which (a) are pending, (b) culminated in a manner other than by conviction or (c) involved crimes other than those set forth in subsection (i).

b. *Civil litigation*. Subsection (ii) requires disclosure of certain types of past and pending civil actions where the franchisor, its current directors or officers, or its parent firm, is or was a party. The term "civil action" is limited to judicial tribunals and arbitrations, and does not include legislative or administrative proceedings. Disclosure is required regardless of whether the "party" is a plaintiff or defendant, as well as situations where the party has been impleaded or intervenes or interpleads others. It covers judgments as well as out-of-court settlements where a complaint has been served or filed.

No disclosure is required unless both the subject matter and materiality prerequisites, described below, are satisfied.

The subject matter must involve either (a) those actions set forth in subsection (ii) or (b) actions by a present or former franchisee which involve the franchise relationship. A franchisor who offers more than one type of franchise—fried chicken and pizza, for example—must disclose litigation involving the franchise relationship in both types of franchises in disclosure statements given to prospective franchisees of either system.

Only material actions need be disclosed; that is, actions which have a substantial likelihood of influencing the investment decision of a reasonable prospective franchisee, or actions whose pendency or outcome may have a significant financial impact on a franchisor or prospective franchisee. When a number of material actions of a similar nature exist, or when an individual non-material proceeding is

combined with other past or pending non-material proceedings involving similar basic issues, making the aggregate impact of these proceedings material, then disclosure should be made about the combined proceedings as a whole. An example of this combination would be a situation where each of 15 franchisees is suing the franchisor about the franchisor's reimbursement policies on certain required warranty work performed by the franchisees.

For each pending civil proceeding disclosed, including any combined proceedings as a whole, the franchisor must set forth a brief description of the factual basis alleged in the complaint, the defenses or answers raised, and the relief sought. Disclosure may include a summary opinion of counsel about the merits of the claims asserted and any defenses raised as long as counsel has consented to the use of such opinion in the disclosure.

c. *Administrative-type proceedings*. Subsection (iii) requires disclosure of certain past or pending administrative-type proceedings in a state or federal agency or court which seek, or have resulted in currently effective injunctive or restrictive orders, such as complaints, consent agreements, cease and desist orders, and restraining or injunctive orders. Disclosure is required only when the proceedings either relate to or affect franchise activities or the franchisee-franchisor relationship or involve the subject matters set forth in subsection (iii). Neither orders of general applicability resulting from administrative rulemaking nor restrictive orders resulting from private negotiations between the franchisor and the franchisee need be disclosed (although the latter may require disclosure under subsection (ii) discussed above).

For each pending administrative proceeding disclosed, the franchisor must set forth a brief description of the factual basis alleged in the proceeding, the defenses or answers raised, and the relief sought. Disclosure may include a summary opinion of counsel about the merits of the claims asserted and any defenses raised as long as counsel has consented to the use of such opinion in the disclosure.

Example of Disclosure

On December 2, 1975, Mr. Raoul Meyer, current Vice President of Franchise Marketing for Whiz Stores, Inc., was convicted of mail fraud in violation of 18 U.S.C. § 1341, in the United States District Court for the District of Maryland. On January 30, 1978, Mr. Meyer was given a 3-year suspended sentence by U.S. District Judge Mertz and fined \$15,000. On January 13,

1977, Consolidated Amalgamation, Inc., the parent firm of Whiz Stores, Inc., pleaded guilty to charges of an unlawful conspiracy to fix prices with respect to the distribution of television sets. *United States v. Consolidated Amalgamation, Inc.*, Action No. 77-435C, United States District Court for the Eastern District of New York. On February 20, 1977, U.S. District Judge Foster fined Consolidated Amalgamation, Inc., \$250,000. A civil action was filed against Whiz Stores, Inc., in April, 1976, in the Superior Court of California, County of Orange, entitled *Loughlin v. Whiz Stores, Inc.*, Civil No. H-4567. Plaintiff Loughlin, a former franchisee of Whiz Stores, Inc., alleges in his complaint (among other things) that Whiz Stores, Inc., breached its contract and its fiduciary duties with regard to a franchise agreement between the plaintiff and Whiz Stores, Inc. Plaintiff has alleged damages of \$55,000 and has requested punitive damages of \$500,000. Whiz Stores, Inc., through its counsel, has denied such allegations and counterclaimed for unpaid royalties due under the franchise agreement. The case is scheduled for trial in December, 1979. Whiz Stores, Inc., is subject to a cease-and-desist order issued by the Federal Trade Commission on March 23, 1975, prohibiting Whiz Stores, Inc., from using unfair and deceptive practices in the marketing of franchises, including the use of atypical claims of profitability.

§ 436.1(a)(5) [Bankruptcy History]

Rule

(5) A statement disclosing who, if any, of the persons listed in paragraphs (a)(2) and (a)(3) of this section at any time during the previous seven fiscal years has:

- (i) Filed in bankruptcy;
- (ii) Been adjudged bankrupt;
- (iii) Been reorganized due to insolvency; or
- (iv) Been a principal, director, executive officer, or partner of any other person that has so filed or was so adjudged or reorganized, during or within 1 year after the period that such person held such position in such other person. If so, the name and location of the person having so filed, or having been so adjudged or reorganized, the date thereof, and any other material facts relating thereto, shall be set forth.

Explanation

Disclosure involves the bankruptcy history during the previous seven fiscal years of the franchisor, its parent or holding company, and those of its current directors and executive officers for whom disclosure is required. With respect to subsection (iv), disclosure is required only if the bankruptcy occurred during or within one year after the person's association with the bankrupt person or entity.

The franchisor should disclose, with respect to each bankruptcy proceeding requiring disclosure, (a) the name of the person(s) or business entity who has filed in bankruptcy, been adjudged bankrupt or has been reorganized due to insolvency (if other than the franchisor, the identity of such persons should be

disclosed, e.g., the chief executive officer or parent firm); (b) the court in which the proceeding was held, including the case or docket number, and the nature of the proceeding, i.e., bankruptcy, reorganization, etc. (c) the date of the adjudication of bankruptcy or confirmation of a plan for reorganization and the date of discharge; and (d) any other material facts, e.g., a summary of the details of the arrangements with creditors. This section does not require disclosure where the franchisor or an appropriate officer merely files a claim in a bankruptcy proceeding.

Example of Disclosure

On January 15, 1976, Richard Roe, President of Kwikkar Wash Systems, Inc., was adjudged bankrupt in the United States District Court for the District of Columbia, Docket No. B-20920-76. Arthur Sheppard, Vice President for franchise marketing was President of Amalgatron, Inc., from June, 1975 April, 1977. On July 3, 1977, Amalgatron, Inc., filed a petition for reorganization under Chapter XI of the Federal Bankruptcy Act. The plan is pending approval by creditors in the United States District Court for the District of Vermont, Docket B-45-76.

§ 436.1(a)(6) [Description of Franchise]

Rule

(6) A factual description of the franchise offered to be sold by the franchisor.

Explanation

Disclosures should provide a factual description of the franchise being offered for sale. The term "sold" encompasses purchasing, leasing, licensing or other methods of acquisition. Included within this disclosure should be (1) a general description of the business to be conducted by the franchisee; (2) a detailed discussion of the "business format" and/or "product line" which the franchisee is purchasing, including goods or services to be sold by the franchisee; and (3) a description of the market for the goods and/or services to be sold by the franchisee (e.g., whether the goods will be marketed to a specific segment of the community such as students, upper income consumers, etc.).

Example of Disclosure

The Franchisor develops, owns and operates, and authorizes others to operate, a quick service restaurant under the name of "Doe Burgers" (sometimes hereinafter referred to as Doe's restaurants). All Doe's restaurants are built to Company specifications as to exterior style and interior decor. The majority are free-standing corrugated iron buildings substantially uniform in design and appearance with adjoining parking space for 40 to 60 cars. Some are storefronts (which vary according to available locations but generally retain the

standard green and orange decor and sign). The typical free-standing restaurant has a cooking area and dining room capacity for 100 to 120 persons. The standardized decor features bamboo lamps, ice cream parlor chairs, art deco mirrors and cultured marble tabletops. The restaurants depend upon serving a large number of customers for their success and are generally located in urban or heavily populated suburban areas.

Each Doe's restaurant offers a uniform limited menu. Hamburgers are featured in three sizes—Bambi's Double-Doe burger, and Big Doe—and are prepared with a choice of cheese and eight other condiments. Also offered are french-fried potatoes, "Do-Ro" Cola and a limited number of other beverages. Doe's hamburgers are prepared with fresh beef.

The services and products of "Doe Burgers" restaurants are used primarily by the motoring public for quick service meals.

§ 436.1(a)(7) [Initial Funds Required To Be Paid by a Franchisee]

Rule

(7) A statement of the total funds which must be paid by the franchisee to the franchisor or to a person affiliated with the franchisor, or which the franchisor or such affiliated person imposes or collects in whole or in part on behalf of a third party, in order to obtain or commence the franchise operation, such as initial franchise fees, deposits, down payments, prepaid rent, and equipment and inventory purchases. If all or part of these fees or deposits are returnable under certain conditions, these conditions shall be set forth; and if not returnable, such fact shall be disclosed.

Explanation

The franchisor must disclose the nature, amount, payee and due date of all monies which the franchisee must pay in order to obtain or commence the franchise operation, in those circumstances when such payment is made either to (i) the franchisor, (ii) an affiliate of the franchisor, or when (iii) the franchisor or its affiliate collects the payment on behalf of a third party. Such payments include, but are not limited to, the initial franchise fees, deposits, down payments, prepaid rent, and equipment and inventory purchases. If exact amounts for any one or more categories vary, then a reasonable range of anticipated payments for each of such categories may be substituted. The franchisor need not disclose required payments which the franchisee must make to obtain or commence the franchise business (such as payments for the purchase of signs) when the franchisee has the option to make such payments to unaffiliated third parties.

The statement must indicate, for each payment, whether all or any part is refundable, and, if so, under what conditions. Although the rule neither requires nor prohibits refund promises,

section 436.1(h)- requires that refunds must be made when promised. Failure to do so constitutes a violation of the rule.

Franchisors also must disclose any nonrecurring commitments of funds by franchisees to the franchisor or affiliated persons for securing the franchise if the commitment is made when the franchise relationship is commenced, even though payment is not required until a later date, such as a 12-month deferred payment of a part of the franchise fee.

It is recommended, though not required by the rule, that franchisors disclose the nature and approximate amount of other payments that a franchisee would need to make to obtain or commence business.

Example of Disclosure

A MAR, Inc. franchisee is required to make a total initial expenditure of \$5,000. A franchise fee in the amount of \$2,000 is payable to the franchisor upon signing the franchise agreement. The remaining \$3,000 is due and payable by the franchisee to PhR, Inc., a wholly-owned subsidiary of MAR, Inc., upon delivery of the vending machines and supplies listed in the franchise agreement. The franchise fee of \$2,000 is nonrefundable. Eighty percent (80%) of the equipment fee to PhR, Inc. is refundable if the equipment is returned within 30 days of delivery in good working order.

§ 436.1(a)(8) [Recurring Funds Required To Be Paid by a Franchisee]

Rule

(8) A statement describing any recurring funds required to be paid, in connection with carrying on the franchise business, by the franchisee to the franchisor or to a person affiliated with the franchisor, or which the franchisor or such affiliated person imposes or collects in whole or in part on behalf of a third party, including, but not limited to, royalty, lease, advertising, training, and sign rental fees, and equipment or inventory purchases.

Explanation

The franchisor must disclose the nature, amount and payee of all payments which a franchisee must make on a recurring basis in carrying on the franchise business, in those circumstances when those payments are made to (i) the franchisor, (ii) an affiliate of the franchisor, or when (iii) the franchisor or its affiliate collects the payment on behalf of a third party. Such payments include, but are not limited to, royalty, lease, advertising, training, sign rental fees and equipment purchases. Two categories of recurring payments should be listed: those payable on a regular periodic basis, such as royalties, advertising and inventory purchases (in those circumstances where there are minimum purchase requirements), and

those infrequent anticipated expenses of a major nature such as the replacement cost of expensive equipment.

The amount of the payments should be expressed in an estimated dollar amount. If the amount of payments are dependent on a variable, such as sales volume, then these amounts may be expressed as a percentage of such variable. Where no accurate dollar amount is available, an estimated payment range may be used. Infrequent anticipated major expenses may be expressed either in their present or estimated future cost.

Example of Disclosure

Regular Periodic Payments

Royalty—The franchisee pays to Hudson, Inc. a royalty of six percent on total gross sales. Gross sales include all cash and charge room sales made at the franchisee's Hudson Inn.

Reservation Service—The franchisee is required to pay Hudson Reservation and Travel Service, Inc., an affiliate of the franchisor, a charge of \$2.00 per reservation obtained through and provided by Hudson Reservations.

Advertising fee—The franchisee will pay Hudson, Inc. an advertising fee of 3 percent on total gross room sales.

Infrequent Major Expenses

The Hudson Vacuum pump room vacuum system which all franchisees are required to operate and which can be purchased only from Hudson, Inc., has an estimated useable life of 10 years and now costs approximately \$10,000 installed.

§ 436.1(a)(9) [Affiliated Persons the Franchisee is Required or Advised To Do Business With by the Franchisor]

Rule

(9) A statement setting forth the name of each person (including the franchisor) the franchisee is directly or indirectly required or advised to do business with by the franchisor, where such persons are affiliated with the franchisor.

Explanation

The franchisor must list those suppliers who it requires or advises the franchisee to use, regardless of whether the supplier is the sole approved supplier or one of several approved suppliers, whenever such supplier is either the franchisor or an affiliate of the franchisor. The supplier should be listed even if its use is recommended rather than required. A brief description of the goods or services supplied by any listed supplier also must be disclosed. This disclosure differs from that required in the next category, (i.e., § 436.1(a)(10) which concerns circumstances where a franchisee is required to purchase, lease, or rent a good or service from a specific supplier), since the disclosure pursuant to this section of the rule is required

only when the listed supplier is either the franchisor or an affiliate. Where a supplier could be identified under both sections, the disclosure should be made in this section with a cross reference to this section contained in the disclosure for § 436.1(a)(10).

Example of Disclosure

[Assume the following fact situation: A franchisor is offering a vending machine route. The franchisee is required to purchase the vending machine from the franchisor. The franchisee has the choice of a specified number of products to be distributed from the machines, and the sources of those products are limited by the franchise agreement. Acme Company is the parent firm of the franchisor. Ace Products Company's President is also President of the franchisor. Bard Distributors is not "affiliated" with the franchisor, but is an approved source of fruit juice. In this situation, the following disclosure would be appropriate:]

If the franchisee chooses to vend canned food products, such products must be purchased from Acme Company. If the franchisee chooses to vend fruit juice, such juice must be purchased from a limited group of suppliers, including Acme Company or Ace Products Company, both of which are affiliated with the franchisor. If the franchisee wishes to vend non-food products, he or she may purchase such products from any source (as long as they meet our specifications), although we recommend that such products be purchased from Ace Products Company. If the franchisee chooses to vend soft drinks, they must be purchased from the franchisor. Further restrictions on supplies are noted in the next section.

§ 436.1(a)(10) [Obligations to Purchase]

Rule

(10) A statement describing any real estate, services, supplies, products, inventories, signs, fixtures, or equipment relating to the establishment or the operation of the franchise business which the franchisee is directly or indirectly required by the franchisor to purchase, lease or rent; and if such purchases, leases or rentals must be made from specific persons (including the franchisor), a list of the names and addresses of each such person. Such list may be made in a separate document delivered to the prospective franchisee with the prospectus if the existence of such separate document is disclosed in the prospectus.

Explanation

This section requires a description of specified items, related to the establishment or operation of the franchise business, which the franchisor requires the franchisee to purchase, lease or rent. Such items may consist of real estate, services, supplies, products, inventories, signs, fixtures, equipment, etc. If any listed items must conform to certain franchisor-imposed specifications, such as brand names or product standards, (e.g., a requirement for a sign at least six feet tall with

illuminated letters on a green background instead of a requirement that the franchisee have a sign) the existence of such specifications must be disclosed. If such specifications make the item substantially more expensive or difficult to obtain, then such fact should be mentioned. The franchisor also should indicate the manner in which the franchisor issues and changes specifications, and its business justification for such specification(s).

It is unnecessary to list items which any business would need in its ordinary operation, like stationery (unless, for example, the franchisor requires that stationery be of a certain color and/or carry the franchisor's logo) telephones, etc.

If a required purchase, lease, or rental must be made from a person or among a group of persons specified by the franchisor, the names and addresses of such suppliers should be disclosed together with the business justification for such restricted purchase list and the manner in which the franchisor issues and changes approved suppliers.

The list of required purchases and required suppliers may be contained in a document separate from the Basic Disclosure Document, if the separate document is delivered to the prospective franchisee along with the Basic Disclosure Document, and if the Basic Disclosure notes the existence of such other document.

Example of Disclosure

(1) Kiddycare Co. sets minimum quality standards and specifications for interior design, including carpeting, draperies, wall paints and furnishings, including desks, tables, chairs and lighting.

The franchisee is required to purchase toys, educational games, arts and crafts supplies, and playground equipment (including swing set, jungle gym, and teeterboards) from the franchisor.

Kiddycare illuminated signs must be purchased from either Signo Co., 1754 Wilshire Pike, Oklahoma City, Oklahoma, or Kidco Co., 154 Subsidiary Lane, Omaha, Nebraska.

Other than the items described above, there are no other items which Kiddycare requires its franchisees to purchase, lease or rent. Obviously, Kiddycare franchisees, like other businessmen, will need to purchase the customary and usual type and amount of business supplies like cash registers, stationery, etc.

These requirements are included in order to assure the health and safety of customers.

(2) [Assume the same fact example set forth in the discussion of § 436.1(a)(9) above.]

The franchisee is required to purchase a minimum of three vending machines from the franchisor. In addition, the franchisee is required to purchase at least \$300 worth of initial inventory of his or her choice.

This requirement is included to ensure the franchisor of minimum economies of scale.

§ 436.1(a)(11) Revenues Received by the Franchisor in Consideration of Purchases by a Franchisee

Rule

(11) A description of the basis for calculating, and, if such information is readily available, the actual amount of, any revenue or other consideration to be received by the franchisor or persons affiliated with the franchisor from suppliers to the prospective franchisee in consideration for goods or services which the franchisor requires or advises the franchisee to obtain from such suppliers.

Explanation

Disclosure is limited to situations in which (a) the supplier (or group of suppliers) is a required or advised source of franchisee purchases and (b) the rebate is received by the franchisor as a result of such purchases by the franchisee. The term "rebate" refers to any revenue or other monetary or non-monetary consideration, including but not limited to cash payments in the form of "kickbacks" or commissions. Volume discounts resulting solely from a franchisor's own purchases for its own use (as opposed to purchases which later are resold to franchisees) need not be disclosed.

Franchisors must describe both the basis for calculating rebates and the amount received by them or their affiliates. If the franchisor is reasonably capable of computing the exact amount of the rebate, he must do so; otherwise an estimate may be set forth.

Example of Disclosure

(1) [Assume the same fact example set forth in the discussion of § 436.1(a)(9) above.] The franchisor receives a flat 4 percent commission from Acme Company on all fruit juice sold to franchisees. In recent years, the total commissions received have ranged from \$2,500 to \$3,000 annually.

(2) Food Services Supply Co., an affiliate of the Fast Food Company, has an annual discount arrangement with Herd Ovens, Inc., a manufacturer of pizza ovens, under which it receives credits or rebates from Herd based on 5% of the annual volume of purchases made by Fast Food franchisees. The rebate for 1979 has not been received, nor has the company received a breakdown from Herd Ovens of accrued rebates to date. In 1977 it received a \$2,500 rebate and in 1978 it received a \$2,750 rebate.

§ 436.1(a)(12) [Financing Arrangements]

Rule

(12)(i) A statement of all the material terms and conditions of any financing arrangement offered directly or indirectly by the franchisor, or any person affiliated with the franchisor, to the prospective franchisee; and (ii) A description of the terms by which any payment is to be received by the franchisor from (A) any person offering financing to a

prospective franchisee; and (B) any person arranging for financing for a prospective franchisee.

Explanation

Disclosures should describe the material terms of financing arrangements offered to the franchisee, where such financing is to be made directly by the franchisor or any affiliated person, or indirectly through third parties who lend money to franchisees as a result of an arrangement with or through the intercession of the franchisor. Material terms would include, for example, the name and address of the lender; the maximum amount to be financed; the term and annual percentage rate of the loan; any required collateral; repayment rights and penalties; and provisions in the event of default. Where such terms vary over time and from offer to offer (such as interest rates) the franchisor should indicate the range of such terms which have been offered in the recent past.

The franchisor must describe any rebate to be received by it, or an affiliate, from a third person arising out of or in consideration of a franchisee's financing arrangement, such as a finder's fee.

Neither open account financing payable within 90 days nor franchise fees payable, without interest, over a period of time, need be disclosed under this section.

Example of Disclosure

A cash downpayment of \$2,500 of the \$7,500 franchise fee is required. Financing for the balance (\$5,000) is available from Allied Co., Inc., a subsidiary of the franchisor. The terms of such financing, which are negotiable and subject to change, are contained in a monthly installment note to be signed by the franchisee. In the past two years, the interest rate has ranged from 8½% to 10½% per annum.

The note is secured by the equipment on the franchisee's premises; the indebtedness may be prepaid in full without prepayment penalty; there is no acceleration of payment of principal upon default; and the franchisee waives no defenses. The franchisor receives no payment from any person offering financing, or arranging for the placement of financing, for a prospective franchisee.

§ 436.1(a)(13) [Restriction of Sales]

Rule

(13) A statement describing the material facts of whether, by the terms of the franchise agreement or other device or practice, the franchisee is:

- (i) Limited in the goods or services he or she may offer for sale;
- (ii) Limited in the customers to whom he or she may sell goods or services;

(iii) Limited in the geographic area in which he or she may offer for sale or sell goods or services; or

(iv) Granted territorial protection by the franchisor, by which, with respect to a territory or area, (A) the franchisor will not establish another, or more than any fixed number of, franchises or company-owned outlets, either operating under, or selling, offering, or distributing goods commodities or services, identified by any mark set forth under this paragraph (a)(1)(iii); or (B) the franchisor or its parent will not establish other franchises or company-owned outlets selling or leasing the same or similar products or services under a different trade name, trademark, service mark, advertising or other commercial symbol.

Explanation

This provision requires a description of whether the franchisee is:

- (i) Limited in the type of products or services it may sell;
- (ii) Limited in the customers to whom it may sell;
- (iii) Limited in the geographic area in which it may sell; or
- (iv) Granted territorial protection by the franchisor.

Any of the foregoing limitations or grants may result from specific terms of the franchise agreement or any "other device or practice" instituted by the franchisor, such as written or verbal understandings, or provisions in other agreements. With respect to the limitations described above, the disclosure must describe the specific limitation(s) involved and the franchisor's reason(s) for imposing such limitation(s). In addition, disclosures should be made concerning any limitation of a franchisee's right to sell competing goods or services, or any requirement that, with respect to the franchisor's goods or services, either (a) all must be offered for sale or (b) some may not be offered for sale. The description of any geographic limitation on a franchisee should include the typical boundaries of such area. If the franchisee is limited to selling goods or services from a particular location this fact should also be disclosed. If the size of the franchisee's selling area is subject to negotiation, this must also be indicated.

Descriptions about exclusive franchisee sales areas or areas of territorial protection should include (a) the typical boundaries of such area, (b) a description of the territorial restrictions imposed on the franchisor or an affiliate limiting the number of franchises or company-owned outlets for the operation of a business using the same trade names, trademarks, service marks or logos to be used by the franchisee within the area or territory granted by the franchisor, and (c) a

description of the territorial restrictions imposed on the franchisor and its parent limiting the number of franchise or company-owned outlets for the operation of a business selling or leasing "the same or similar products or services" under marks within the area or territory granted by the franchisor. With respect to (c), the phrase "same or similar products or services" is intended to be interpreted as involving only closely interchangeable items which are in relatively direct competition. For example, a fast food hamburger outlet would be considered to be selling a product which was "the same [as] or similar" to a fast food chicken outlet but not the "same [as] or similar" to a relatively expensive steak house or an ice cream outlet or a cheese store. Although all of the stores sell food, only the chicken outlet would, for the purpose of this disclosure section, sell products which involve closely interchangeable items in relatively direct competition to the hamburger outlet.

Example of Disclosure

The Franchise Agreement provides that the franchisee is required to sell all the goods enumerated by Happy Ice Cream Company in its operating manual. The franchisee is precluded from offering any goods not specifically approved by the franchisor, and violation of this restriction may result in termination of the franchise relationship. This requirement has been imposed to assure uniform flavor quality. The franchisee is not limited in the customers to whom it may sell the franchise goods.

The franchisee is restricted to sales from the franchise premises and may not, without explicit authorization of the franchisor, open or operate another outlet. This restriction has been imposed to permit the franchisor to offer exclusive sales areas.

A Happy Ice Cream franchisee is granted an exclusive territory, which generally encompasses a five-mile radius from the franchised outlet. The specific size of the territory is subject to negotiation and will be included in the franchise agreement. The franchisor will not establish another Happy Ice Cream franchise of a company-owned Happy Ice Cream store within the exclusive territory. Additionally, the franchisor will not establish or operate a company-owned outlet or grant a franchise to sell similar products under a different trade name or mark within the franchisee's exclusive territory.

§ 436.1(a)(14) [Personal Participation Required of the Franchisee in the Operation of the Franchise]

Rule

(14) A statement of the extent to which the franchisor requires the franchisee (or, if the franchisee is a corporation, any person affiliated with the franchisee) to participate personally in the direct operation of the franchise.

Explanation

This section requires a statement of the extent to which the franchisee's personal participation in the direct operation of the franchise business is required by the terms of the franchise agreement or other written or verbal instructions from the franchisor. A brief description of the type of activities which constitute such participation should be included. If the franchisee is a corporation, the statement should indicate whether any specific director or employee thereof must personally participate in the direct operation of the franchise business.

Example of Disclosure

An individual franchisee is required to be on the premises of the franchise business at least 4 hours a day, and to be available during the remaining 6 hours of operation pursuant to Section 7 of the Operating Manual. While on the business premises, the franchisee manages, supervises employees and, depending on customer traffic, assists in the servicing of customers. The franchisor does not require any personal participation of any person affiliated with a corporate franchisee.

§ 436.1(a)(15) [Termination, Cancellation, and Renewal of the Franchise]

Rule

(15) A statement disclosing, with respect to the franchise agreement and any related agreements:

- (i) The term (i.e., duration of arrangement), if any, of such agreement, and whether such term is or may be affected by any agreement (including leases or subleases) other than the one from which such term arises;
- (ii) The conditions under which the franchisee may renew or extend;
- (iii) The conditions under which the franchisor may refuse to renew or extend;
- (iv) The conditions under which the franchisee may terminate;
- (v) The conditions under which the franchisor may terminate;
- (vi) The obligations (including lease or sublease obligations) of the franchisee after termination of the franchise by the franchisor, and the obligations of the franchisee (including lease or sublease obligations) after termination of the franchise by the franchisee and after the expiration of the franchise;
- (vii) The franchisee's interest upon termination of the franchise, or upon refusal to renew or extend the franchise, whether by the franchisor or by the franchisee;
- (viii) The conditions under which the franchisor may repurchase, whether by right of first refusal or at the option of the franchisor (and, if the franchisor has the option to repurchase the franchise, whether there will be an independent appraisal of the franchise, whether the repurchase price will be determined by a predetermined formula and whether there will be a recognition of goodwill or other intangibles associated

therewith in the repurchase price to be given the franchisee);

(ix) The conditions under which the franchisee may sell or assign all or any interest in the ownership of the franchise, or of the assets of the franchise business;

(x) The conditions under which the franchisor may sell or assign, in whole or in part, its interest under such agreements;

(xi) The conditions under which the franchisor may modify;

(xii) The conditions under which the franchisee may modify;

(xiii) The rights of the franchisee's heirs or personal representative upon the death or incapacity of the franchisee; and

(xiv) The provisions of any covenant not to compete.

Explanation

This section requires the disclosure of information set forth in 14 subsections, all concerning the rights and obligations of the franchisor and franchisee upon termination, modification, or renewal of the franchise. The disclosures relating to each subsection should: (a) be set forth in a separate paragraph; (b) describe the provision(s) of the franchise agreement and any companion agreement(s) which are relevant to the category, or, if no provisions exist, such fact also should be stated; and (c) describe franchisor policies which, although not part of any franchise agreement, nevertheless are germane to the subsection.

Subsections (ii-v) should include a discussion of how and when renewals, extensions and terminations are effected or refused. If the franchise agreement may be materially modified when renewed or extended, this fact should be noted.

Subsection (vi) should include a description of the respective parties' material obligations to each other with respect to real estate lease or ownership, equipment, financing arrangements, etc., following termination, renewal or extension.

Subsection (vii) should include a description of what interest the franchisee has upon termination or refusal to renew, and what means are used to determine such interest, including valuation of leases, assets of the business, and goodwill.

Subsection (viii) should include a description of when and under what conditions the franchisor may repurchase all or a part interest in the franchise. The disclosure should indicate whether the franchisor has an exclusive option or right of first refusal.

Subsection (xiv) should include a description of any restrictions on the franchisee's other businesses or employment during and after the term of the franchise agreement, including but not limited to, restrictions relating to geographic areas, customers, and

products, and the applicable time period of any such restrictions.

Example of Disclosure

1. The initial term of the Bull-Pen franchise agreement is 10 years from the date of execution. The term is subject to the renewal of a 7-year lease of the premises; further, if the lease is terminated for any cause, MAR, Inc. (franchisor) has the right to terminate the franchise agreement before the expiration of the initial term. No other agreement affects the initial term of the franchise.

2. Upon expiration of the initial term, the franchisee has the right to renew the franchise for an additional 5 years by the execution of a new franchise agreement, and such other necessary companion agreements. These new agreements may differ materially from those presently used by MAR, Inc.

3. MAR, Inc. has the right to refuse to renew the franchise if the franchisee has been cited more than twice during the initial term for failure to comply with MAR's quality control standards. If MAR, Inc., intends to refuse to renew the franchise, it will notify the franchisee in writing 90 days before the expiration of the franchise agreement.

4. The franchisee may terminate the agreement if MAR, Inc. fails to comply with any of the provisions of the agreement, and if the franchisee notifies MAR, Inc. of such failure, giving MAR, Inc. 60 days to cure the failure. If MAR, Inc. does not comply to the franchisee's satisfaction during that period, the franchisee may terminate the agreement 45 days thereafter. The franchisee may also terminate the franchise agreement if MAR, Inc. has failed, within 1 year after execution of the agreement, to construct a Bull-Pen Restaurant for the franchisee.

5. MAR, Inc. may terminate the franchise if any of the following occurs: (1) the franchisee fails to conform to the terms of the agreement relating to the use of trademark "Bull-Pen"; (2) the lease on the premises is terminated for any reason; (3) the franchisee files a petition in bankruptcy or makes an assignment for the benefit of creditors; or (4) the franchisee fails to comply with any provision of the franchise agreement, provided that MAR, Inc. notifies the franchisee in writing of such failure and gives the franchisee 60 days to correct such failure. If the franchisee fails to correct the situation, MAR, Inc. may terminate the franchise 30 days thereafter.

6. The obligations of the franchisee after either the termination or the expiration of the franchise (either by the franchisor or the franchisee) are as follows:

(1) franchisee is obligated to pay royalties, advertising fees, and other charges owed to franchisor,

(2) franchisee shall not hold himself out as a "Bull-Pen" franchisee, and shall cease the use of trademarks, processes, materials, methods, or promotional materials provided by MAR, Inc.; he shall take all necessary steps to disassociate himself from "Bull-Pen," including the removal of signs, destruction of letterheads, changing of telephone listings, etc.,

(3) franchisee shall return to franchisor all manuals and training and promotional aids, and

(4) franchisee shall assign the remainder of the lease to franchisor.

7. The franchisee relinquishes all interest of every kind and description in the franchise upon termination or expiration of the franchise agreement. The franchisor shall purchase from the franchisee, at fair market values determined by the franchisor, all of the franchisee's right, title and interest in all inventory, supplies, and equipment on the premises. The franchisee receives no payment for equity with regard to the Bull-Pen trademark, or for goodwill established either prior to or during the operation of the franchise.

8. MAR, Inc. has an option to repurchase the franchisee's right, title and interest in and to the business developed under the Bull-Pen trademark during the term of the franchise agreement whenever the franchisee commits an act of default under the terms of the agreement, i.e., becomes insolvent, fails to make a refund payment to the franchisor within 15 days of the due date, or fails to comply with any health, safety or quality edict, given to it by the franchisor, within 20 days of such delivery. The purchase price will be the fair market value of the assets being purchased, as determined by the franchisor. There will be no independent appraisal of the assets, and no predetermined formula for the appraisal. There will be no payment in recognition of goodwill or other intangibles. The franchisor also has a right of first refusal whenever the franchisee seeks to assign all or any interest in the franchise to a third party.

9. During the term of the agreement, the franchisee may not sell, assign, transfer, convey or encumber any interest in the Bull-Pen Franchise without prior written consent of MAR, Inc. Any attempted sale will trigger a right of first refusal for the franchisor to match the terms of the requested sale. This right may be exercised for a period of 14 days after notification by the franchisee of the sale. Notwithstanding the franchisor's decision not to match the terms of the sale, the franchisor may disapprove a sale, assignment, transfer, conveyance or encumbrance whenever it determines that the proposed action is not in the best interest of the franchise or the other franchisees. All approvals shall be subject to such terms and conditions as may be prescribed by MAR, Inc.

10. MAR, Inc. has the right to sell or assign the agreement in whole or in part in its discretion.

11. The agreement may be modified only if MAR, Inc. and franchisee agree to the modification in writing.

12. Same as 11.

13. In the event of the death or incapacity of the franchisee, the franchisor will purchase the franchise in the same manner as noted above with respect to repurchase upon termination or expiration of the franchise agreement.

14. The franchisee neither shall be employed by nor have any financial or ownership interest in a business selling goods or services sold under the franchise agreement during the term of and for a period of 1 year from termination, transfer, or expiration of the franchise agreement, if such business is located within a 10-mile radius of the franchise outlet owned by the franchisee.

There are no restrictions on a franchisee's solicitation of customers of the franchise business for ventures other than for those businesses to which the restrictions described above would apply.

§ 436.1(a)(16) [Statistical Information Concerning the Number of Franchises (and Company-Owned Outlets)]

Rule

(16) A statement disclosing, with respect to the franchisor and as to the particular named business being offered;

(i) The total number of franchises operating at the end of the preceding fiscal year;

(ii) The total number of company-owned outlets operating at the end of the preceding fiscal year;

(iii) The names, addresses, and telephone numbers of (A) the 10 franchised outlets of the named franchise business nearest the prospective franchisee's intended location; or (B) all franchisees of the franchisor, or (C) all franchisees of the franchisor in the state in which the prospective franchisee lives or where the proposed franchise is to be located, provided, however, that there are more than 10 such franchisees. If the number of franchisees to be disclosed pursuant to subparagraph (B) or (C) exceeds 50, such listing may be made in a separate document delivered to the prospective franchisee with the prospectus if the existence of such separate document is disclosed in the prospectus;

(iv) The number of franchises voluntarily terminated or not renewed by franchisees within, or at the conclusion of, the term of the franchise agreement, during the preceding fiscal year;

(v) The number of franchises reacquired by purchase by the franchisor during the term of the franchise agreement, and upon the conclusion of the term of the franchise agreement, during the preceding fiscal year;

(vi) The number of franchises otherwise reacquired by the franchisor during the term of the franchise agreement, and upon the conclusion of the term of the franchise agreement, during the preceding fiscal year;

(vii) The number of franchises for which the franchisor refused renewal of the franchise agreement or other agreements relating to the franchise during the preceding fiscal year; and

(viii) The number of franchises that were cancelled or terminated by the franchisor during the term of the franchise agreement, and upon conclusion of the term of the franchise agreement, during the preceding fiscal year.

With respect to the disclosures required by subparagraphs (v), (vi), (vii) and (viii), the disclosure statement shall also include a general categorization of the reasons for such reacquisitions, refusals to renew or terminations, and the number falling within each such category, including but not limited to the following: failure to comply with quality control standards, failure to make sufficient sales, and other breaches of contract.

Explanation

This paragraph requires disclosure of the total number of operating franchisees and company-owned outlets of the franchisor, as well as the number of franchises which the franchisor has terminated, failed to renew or reacquired during the preceding fiscal year. It also requires disclosure of the number of franchises voluntarily terminated or not renewed by the franchisee.

The franchisor may comply with subsection (iii) disclosures by any one of three methods: (a) listing the ten franchised outlets nearest the prospective franchisee's intended location (or all franchise units if fewer than ten); (b) listing all franchisees; or (c) listing all franchisees located in either the state where the prospective franchisee will locate its business or where the prospective franchisee lives. This latter alternative is especially helpful if the proposed business location of the potential franchisee is unknown. Method (c) may be utilized only if the list will contain more than ten franchisees. If either method (b) or (c) is chosen, and such list contains more than 50 franchisees, the list may be given to the prospective franchisee separate from the Basic Disclosure Document, as long as the Basic Disclosure Document references the existence of the list, and the list is given to the prospective franchisee at the same time as the Basic Disclosure Document.

Subsection (iv) refers only to those situations in which the termination or non-renewal resulted solely from the franchisee's own preference. Furthermore, it is limited to those events occurring during the franchisor's preceding fiscal year.

Subsections (v-viii) refer to terminations by the franchisor by means of reacquisition, non-renewal or cancellation. It, too, is limited to those events occurring during the franchisor's preceding fiscal year. Subsection (v) covers reacquisitions resulting from voluntary purchase from franchisees. Subsection (vi) covers reacquisitions resulting from franchisee bankruptcy, triggered by the death or incapacity of the franchisee, or "otherwise reacquired." Subsection (vii) covers reacquisitions resulting from refusal to renew under the terms of the franchise agreement or any ancillary agreements (e.g., lease or purchasing agreements). Subsection (viii) covers reacquisitions resulting from termination or cancellation. The disclosure accompanying the number of franchises for each subsection (v-viii) should state the general reason for the reacquisition,

such as "failure to comply with quality control standards" or "failure to make sufficient sales." The franchisor is not required to disclose either the name or any other identifying information about any terminated franchisee.

Example of Disclosure

As of December 31, 1977, Hudson, Inc. had 212 franchised Hudson Inns and 14 company-owned outlets in operation. A list of the names, addresses and telephone numbers of all franchisees is attached hereto as Appendix C.

In the preceding fiscal year, 5 franchisees chose not to renew their franchise at the conclusion of their franchise agreements and 6 franchisees terminated their franchise relationship during the term of the franchise agreement. During the same period, Hudson, Inc. has repurchased 6 franchises during the term of the franchise agreement through the exercise of its right of refusal. In addition, Hudson, Inc. has reacquired 2 franchisees because of the bankruptcy of the franchisee.

Hudson, Inc. has not refused to renew any of its franchises during the previous fiscal year. It has, however, terminated 3 franchised outlets; 2 of these were terminated for failure to comply with the franchisor's quality control standards, and 1 for having failed to maintain his bookkeeping system in accordance with the franchise agreement.

§ 436.1(a)(17) [Site Selection]

Rule

(17)(i) If site selection or approval thereof by the franchisor is involved in the franchise relationship, a statement disclosing the range of time that has elapsed between signing of franchise agreements or other agreements relating to the franchise and site selection, for agreements entered into during the preceding fiscal year; and

(ii) If operating franchise outlets are to be provided by the franchisor, a statement disclosing the range of time that has elapsed between the signing of franchise agreements or other agreements relating to the franchise and the commencement of the franchise's business for agreements entered into during the preceding fiscal year.

With respect to the disclosures required by subparagraphs (a)(17) (i) and (ii), a franchisor may at its option also provide a distribution chart using meaningful classifications with respect to such ranges of time.

Explanation

The disclosures required by this section concern the selection or approval of a site for the proposed franchise outlet and the timeframes for such activity, based on the franchisor's experience in the preceding fiscal year. Franchisor approval is present whenever it is required by explicit contractual agreement as well as through other indirect means of controlling or strongly influencing site selections, such as, for example, requirements in operating manuals relating to sufficient customer parking or

customer traffic specifications. If the franchisor does not select or approve a site, a statement to such effect will suffice. Location clauses limited to general geographic areas like counties or cities, where the actual location within such geographic area is left solely to the franchisee's discretion, need not be described.

In listing the ranges of time between events requiring disclosure, the disclosure may include a distribution chart using meaningful classifications for the data therein presented. This chart may show different ranges of time depending on size or location, e.g., highway, shopping center, urban, rural, etc.

Example of Disclosure

The franchise agreement obligates the franchisor to select the site and provide an operating outlet for the franchisee. During the past fiscal year, the average length of time between the signing of the Franchise Agreement and the selection of a site for the Doe Burger Restaurant franchise was two to four months, and the typical length of time between the signing of the franchise agreement and the opening of the franchisees' business was six to eight months (or approximately four months after the site was selected).

§ 436.1(a)(18) [Training Programs]

Rule

(18) If the franchisor offers an initial training program or informs the prospective franchisee that it intends to provide such person with initial training, a statement disclosing:

- (i) The type and nature of such training;
- (ii) The minimum amount, if any, of training that will be provided to a franchisee; and
- (iii) The cost, if any, to be borne by the franchisee for the training to be provided, or for obtaining such training.

Explanation

This section requires disclosures relating to the franchisor's training program. The required disclosure is limited in scope to the training the franchisor offers at the beginning of the franchise relationship—that is, from the period after the execution of the franchise agreement through shortly after the actual commencement of the franchise business. The franchisor is required to disclose (a) the type and nature of the initial training; (b) the minimum amount, if any, of training that will be provided; and (c) the cost, if any, to be borne by the franchisee for such training.

By "type and nature", the Commission intends a description of the general content of the initial training program, including all elements of such training. Among the factors that should be disclosed are the location of the training

program (e.g., franchisor's headquarters, franchised outlet, by mail, etc.) the persons for whom training is either available or required (e.g., franchisee, manager, or employees), the instructional method, and whether the franchisor requires the trainee to attain a stated level of performance (e.g., satisfactory completion).

Disclosure about the cost to franchisees for such training should include the charges for the training, as well as personal expenses such as transportation, food and lodging. Estimates of expenses to the franchisees may be used if exact amounts are unknown or not easily calculated. The franchisor, at its option, may describe any additional training available to franchisees during the term of the franchise relationship.

Example of Disclosure

The management training program of the franchisor is conducted at Doe's Management Center, located in Neptune, New Jersey. The Center provides a training program for all new franchisees which must be completed prior to opening the franchise outlet. The training combines both classroom instruction and training in a special company-owned outlet. Classroom instruction covers food preparation, equipment operation, cost control, stock ordering, accounting principles and basic techniques of management. In addition to classroom instruction, an on-the-job training course is mandatory for each franchisee and each person responsible for the daily operation of a Doe Burger's Restaurant. The minimum amount of training that the franchisee will receive is two weeks. The training program is offered free of charge to the franchisee and his/her supervisory employees; except that the franchisee is responsible for costs such as room, board and transportation. Franchisee costs for room and board in the Neptune, New Jersey area are approximately \$50 per day per person.

§ 436.1(a)(19) [Public Figure Involvement in the Franchise]

Rule

(19) If the name of a public figure is used in connection with a recommendation to purchase a franchise, or as a part of the name of the franchise operation, or if the public figure is stated to be involved with the management of the franchisor, a statement disclosing:

- (i) The nature and extent of the public figure's involvement and obligations to the franchisor, including but not limited to the promotional assistance the public figure will provide to the franchisor and to the franchisee;
- (ii) The total investment of the public figure in the franchise operation; and
- (iii) The amount of any fee or fees the franchisee will be obligated to pay for such involvement or assistance provided by the public figure.

Explanation

This section requires the disclosure of the role of a "public figure" if his or her name is (1) used as part of the name of the franchise operation, or (2) used in connection with a recommendation to purchase a franchise, or (3) stated to be involved with the management of the franchisor. The term "public figure" refers to a person whose identity would be known to a substantial portion of the public either nationally or within the geographic area in which the franchise is sold, such as a person who has achieved prominence in sports, entertainment or public affairs. The term does not include non-living or fictionalized characters.

Disclosure is not required if the public figure's representations are limited to product endorsements, unless the endorsement also either includes a recommendation to purchase a franchise or suggests that the individual is affiliated with the franchisor's management. Moreover, even if the public figure is associated with the franchisor's management (e.g., a director), no disclosure is required unless such association is highlighted (i) in connection with a recommendation to purchase a franchise, (ii) as part of the name of the franchise operation, or (iii) as a communicated factor in describing the management structure of the franchisor.

The disclosure with respect to a public figure involvement should discuss the terms of the agreement with the public figure, including compensation and the franchisee's rights or restrictions in utilizing the public figure's personal appearances, name or likeness. If the public figure is stated to be involved with the actual management of the franchisor, the statement should describe the person's title and responsibilities.

The franchisor also must disclose the public figure's total investment, if any, in the franchise operation, including a description of the type of investment, e.g., common stock, notes, etc.

Example of Disclosure

MAR, Inc., the franchisor, has a 20-year exclusive agreement with the famous tennis player Paul Showdorf to use his name and likeness in the promotion of Paul's Palace Restaurant franchises. A likeness of Mr. Showdorf will appear on all outdoor signs, napkins and placemats. Mr. Showdorf will receive \$250,000 per year in compensation. Mr. Showdorf is obligated to make 12 commercials per year for national circulation and is obligated to appear at the grand opening of each Paul's Palace Restaurant. Mr. Showdorf has not invested in the franchise operation. The services outlined above are

provided by the franchisor as part of the franchise agreement.

§ 436.1(a)(20) [Financial Information Concerning the Franchisor]

Rule

(20)(i) A balance sheet (statement of financial position) for the franchisor for the most recent fiscal year, and an income statement (statement of results of operations) and statement of changes in financial position for the franchisor for the most recent 3 fiscal years. Such statements are required to have been examined in accordance with generally accepted auditing standards by an independent certified or licensed public accountant. *Provided, however*, that where a franchisor is a subsidiary of another corporation which is permitted under generally accepted accounting principles to prepare financial statements on a consolidated or combined statement basis, the above information may be submitted for the parent if (A) the corresponding unaudited financial statements of the franchisor are also provided and (B) the parent absolutely and irrevocably has agreed to guarantee all obligations of the subsidiary:

(ii) Unaudited statements shall be used only to the extent that audited statements have not been made, and provided that such statements are accompanied by a clear and conspicuous disclosure that they are unaudited. Statements shall be prepared on an audited basis as soon as practicable, but, at a minimum, financial statements for the first full fiscal year following the date on which the franchisor must first comply with this Part shall contain a balance sheet opinion prepared by an independent certified or licensed public accountant, and financial statements for the following fiscal year shall be fully audited.

Explanation

Required disclosure includes a balance sheet (statement of financial position) for the franchisor's most recent fiscal year, an income statement (statement of results of operations) for the most recent three fiscal years, and a statement of changes in financial position for the most recent three fiscal years. These financial statements must be accompanied by an opinion from an independent certified or licensed public accountant that the statements have been examined in accordance with generally accepted auditing standards of the United States. The opinion may be "qualified" or contain disclaimers if the accountant believes that the circumstances so warrant. An "independent or licensed public accountant" is an accountant who is permitted under the law of such person's State to prepare opinions on audited statements and is independent of the company being examined.

Financial statements prepared and filed with the Securities and Exchange Commission in accordance with SEC

Regulation S-X and the SEC's Accounting Series Releases may be used, even though their preparation may differ in minor respects from generally accepted accounting principles.

If the franchisor is a subsidiary of another company, the parent company's audited financial statements may be used in lieu of the franchisor's statements if the parent's financial statements are prepared on a combined or consolidated basis according to generally accepted accounting principles, provided that the franchisor's *unaudited* statements also are included. In such circumstances the parent must absolutely and irrevocably agree to guarantee to the franchisee all obligations of the franchisor under the franchise agreement and related agreements, and as set forth in the Basic Disclosure Document. This guarantee should appear in conjunction with the financial statements.

Franchisors may use unaudited financial statements (or those of their parents) if they lack audited statements for the fiscal years to be reported when they are first required to furnish a Basic Disclosure Document. However, the rule limits the length of time that unaudited statements may be used. Subsection (ii) requires that financial statements for the first year following the date when the franchisor first is required to comply with the rule must contain a balance sheet opinion prepared by an independent certified or licensed public accountant. A franchisor is "first required to comply with the rule" the first time it ever is required to distribute the Basic Disclosure Document to a prospective franchisee. Thus, a franchisor who is not now recruiting franchisees need not furnish a Basic Disclosure Document until such time as it resumes recruiting.

In practice, subsection (ii) will give franchisors who presently lack audited financials at least two complete fiscal years to begin reporting on an audited basis. For example, assume that a franchisor who lacks audited financials first disseminates a Basic Disclosure Document in the middle of its 1980 fiscal year. In such circumstance, it may use its unaudited 1979 fiscal year balance sheet in that document. Within 90 days after the close of its 1980 fiscal year, a revised disclosure document for the franchisor's 1981 fiscal year must be prepared. This new Basic Disclosure Document would contain the franchisor's fiscal 1980 financial information. These financials need not be audited (unless they were, in fact, previously prepared on an audited basis) since the franchisor's fiscal 1980

was not a *full* fiscal year from the date when the franchisor was first required to comply with the rule (i.e., give out a disclosure document). However, the franchisor's Basic Disclosure Document the next year, i.e., for fiscal year 1982, would contain a balance sheet opinion with respect to its 1981 financial statements. A "balance sheet opinion," in accounting terminology, consists of an opinion by an independent certified or licensed public accountant that the balance sheet presents fairly the financial position of the company, in conformity with generally accepted accounting principles consistently applied and that the accountant has performed the analyses and examinations required in conformity with generally accepted accounting principles. The Basic Disclosure Document for fiscal year 1983 would contain fully certified financial statements for Fiscal Year 1982.

A tabular summary of the above-described example is as follows:

Franchisor fiscal year	Required financial statement for fiscal year ending	Type of statement required
1980.....	1979	Unaudited.
1981.....	1980	Unaudited.
1982.....	1981	Balance sheet opinion.
1983.....	1982	Fully certified.

While § 436.1(a)(20)(i) requires an income statement (statement of results of operations) and a statement of changes in financial position for each of the most recent three fiscal years, the rule does not require that such past information be audited if it has not in fact been audited or, if the franchisor has not been in business for that long. The obligation to report audited information arises only as financial statements are prepared on an audited basis, within the period set out in § (a)(20)(ii). In the example noted above, the franchisor in fiscal 1983 would include audited statements for fiscal year 1982, and unaudited income statements and statements of changes in financial position for fiscal 1981 and 1980, indicating that such statements are unaudited.

Whenever unaudited statements are used, they must be accompanied by a disclosure that the statement has not been audited by an independent certified or licensed public accountant. The format for unaudited financials should correspond as closely as possible to whatever consolidated financials also may appear. For example, if the consolidated balance sheet lists five categories of "current assets", the unaudited balance sheet should list the

same five categories if possible, for "current assets", rather than merely list an aggregate number for "current assets" without further elaboration.

Where material changes occur in the information contained in the financial statements—i.e., changes which have a substantial likelihood of affecting a reasonable franchisee's investment decision or which have a significant impact on a franchisee—the franchisor is required to give the prospective franchisee updated information as discussed in these guides in Chapter I An Overview of the Rule, Section C when disclosures must be made. Such updated information need not be audited.

III. Use of Earnings Claims

The rule does not require that any earnings claim be made. However, if such claims are made, they may be made only in accordance with the provisions of Sections 436.1(b)–(e) of the rule. Section 436.1(b) concerns claims of potential earnings; § 436.1(c) concerns claims of past earnings performance; § 436.1(d) concerns segments of a disclosure document which describe the earnings claims that are made and § 436.1(e) concerns earnings claims made in the media.

The term earnings claim should be interpreted as including an oral, written or visual representation to a prospective franchisee or for general dissemination in the media which states or suggests a specific level or range of potential or actual sales, income, gross or net profits. Thus, it includes claims such as "earn a \$10,000 profit" or "sales volume of \$250,000" or "earn up to \$25,000 per year income." It also includes the presentation of facts which suggests or from which a prospective franchisee easily could infer a specific level or range of income, sales or profits, such as "earn enough money to buy a new Porsche" or "100% return on investment within the first year of operation." It does not include mere puffery, such as "make big money" or "opportunity of a lifetime." The presentation of data, such as costs only, from which income or profits can be determined simply by arbitrarily selecting a sales figure, is considered to be an earnings claim subject to the provisions of the rule. All earnings claims—whether they be made directly to the prospective franchisee or in the media—must satisfy the following rule imposed standards:

1. A reasonable basis must exist to support the accuracy of the claim.
2. Material sufficient to substantiate the accuracy of the claim must be in the franchisor's possession at the time the claim is made.

3. The claim must be geographically relevant to the prospective franchisee's proposed location (except for media claims discussed *infra*). These three standards are discussed separately below.

In addition, any time an earnings claim is made, an Earnings Claim Document must be furnished to the prospective franchisee at the time required by the rule.

A. Reasonable Basis

The facts in the franchisor's possession must reasonably support the earnings claim as it is likely to be understood by a reasonable prospective franchisee. These facts should constitute information upon which a prudent businessperson would rely in making an investment decision. Obviously, no rigid criteria can be established for the quality and quantity of information which constitutes the reasonable basis for a claim.

With respect to projections of potential future earnings (436.1(b)), two publications prepared by the American Institute of Certified Public Accountants suggest a number of criteria which contribute to the reasonableness of a forecast. These publications are *Presentation and Disclosure of Financial Forecasts* (August, 1975) (AICPA Pub. 75-4), and *Guidelines for Systems for the Preparation of Financial Forecasts* (Guideline Series No. 3 (1975)). These factors include:

- (1) The quality of information upon which the forecast is based;
- (2) The degree to which the information upon which the forecast is based is the best information reasonably available to the franchisor at the time the forecast was made;
- (3) The degree to which the forecast is the single most probable result, given the information and assumptions on which the representation is based;
- (4) The degree to which the assumptions on which the forecast is based are, in themselves, reasonable and suitably supported;
- (5) Whether the forecast has been prepared with appropriate care and by qualified personnel; and
- (6) The degree to which previous forecasts have been accurate in predicting subsequent events.

In citing these publications, the Commission is not suggesting that they are an exclusive test of what constitutes a reasonable basis; instead they only provide illustrations of the types of considerations which are relevant. The state of the art of forecasting precludes any inflexible approach to the definition of a reasonable basis.

With respect to claims of past earnings performance pursuant to Section 436.1(c), the data upon which

the franchisor bases its claims must be capable of independent examination and verification. The data must reasonably support the claim as it is likely to be understood by a reasonable prospective franchisee. For example, a representation that franchisees earn a net profit of \$30,000 per year implies that such figure is representative of the usual experience of the system's franchisees. The claim would not have a reasonable basis if, in fact, only a small minority of the franchisees earn such amount or if profits were due to non-recurring conditions or if the franchisees used inconsistent systems for reporting profit. Moreover, the franchisor would not have a reasonable basis for the claim if the only facts to support it were the income statements of a disproportionately small percentage of the system's franchisees.

Claims pursuant to 436.1(c) should be prepared in accordance with generally accepted United States accounting principles on a uniform basis consistently applied. This requirement does not mean that all franchisee results must be audited. Rather, a franchisor can rely on profit and loss statements furnished by franchisees or other representations as long as the franchisor is advised by the franchisees whose data the franchisor utilizes that the data was prepared in accordance with generally accepted accounting principles.

B. Substantiation

A franchisor must possess the data upon which its earnings claim is based at the time the representation is made. This data can consist of, for example, market studies, statistical analyses, franchisee profit and loss statements, as well as other types of information which customarily are relied upon by prudent persons in the course of making business decisions. This material must be made available to prospective franchisees and to the Commission or its staff upon reasonable notice. The franchisor must disclose the availability of the substantiating material in conjunction with any representation made. In order to protect franchisees from unwarranted disclosure of sensitive financial information the franchisor may delete any identifying information from which the identity of the franchisee can be obtained by the prospective franchisee. This limitation, however, does not apply to disclosures made to the Commission.

C. Geographic Relevance

Earnings claims (except those used in the media) must be relevant to the geographic market in which the

franchisee is to be located. This common-sense requirement, which is essentially a part of the "reasonable basis" concept, simply recognizes that projections which may be relevant to the geographic market of one franchisee may not be reasonably based for another franchisee to be located in a different geographic market presenting significantly dissimilar conditions. This requirement does not, however, restrict the franchisor to using information relating solely to the geographic area in which the franchisee is to be located. By "relevant," the Commission means that the experience of outlets in one geographic market area is likely to be predictive of the prospective franchisee's experience. The more similar the market conditions between the geographic areas are (e.g., demographics, socio-economic characteristics, climate, location—such as freestanding vs. shopping center—etc.) the more predictive the experience of the outlets in the other geographic market is likely to be. Any factors which are different and/or which are likely to affect the prospective franchisee's chances of achieving similar results should be disclosed.

D. Disclosure Document

Earnings claims may be made only if accompanied by an Earnings Claim Document. This document must be given to the prospective franchisee at the earlier of the first personal meeting at which the claim is made or ten days prior to entering into the franchise relationship. With respect to representations made solely in media advertising, the Earnings Claim Document must be given at the earlier of the first personal meeting or time for making of disclosures (described in Chapter I, Paragraph C, *supra*).

The Earnings Claim Document must contain six items:

1. A cover page setting forth the name of the franchisor, the date of issuance of the document, and a statement—whose text is set forth in Section 436.1(d)(1)—which, in essence, advises the prospective franchisee of the importance of the document. A table of contents to the document also is required by Section 436.1(d)(2).
2. The earnings claim.
3. A statement of the bases and assumptions upon which any earnings claim is made (discussed *infra*).
4. Certain mandatory disclosures, the text of which is dependent upon the type of earnings claim made. If a claim relates to projected future earnings (Section 436.1(b)), then the text must be as follows:

CAUTION

These figures are only estimates of what we think you may earn. There is no assurance you'll do as well. If you rely on our figures, you must accept the risk of not doing as well.

If the earnings claim relates to past performance (Section 436.1(c)), then the text must be as follows:

CAUTION

Some outlets have [sold] [earned] this amount. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

5. Notice that substantiating material is available for inspection by the prospective franchisee (except that no such statement is required in the disclosure document if the earnings claims are made solely in media advertising).

6. Other disclosures, depending upon type of claim made (discussed *infra*).

1. Statements of bases and assumptions

As set forth in item 3, *supra*, the Earnings Disclosure Document must contain a statement of bases and assumptions. Generally speaking, this statement should furnish sufficient information to enable the prospective franchisee to make an independent judgment as to the validity of the earnings claim. The statement should include a description of the material information relied upon when making the claim and a description of the material assumptions implicit in the claim.

If an earnings claim relates to past performance, or if the results of past performance are used to base predictions of projected future performance, then assumptions and facts which bear on the probability that a prospective franchisee will achieve similar earnings must be disclosed, including characteristics of the outlets upon which the claim is based which differ materially from the outlet being offered. Examples of such differences in characteristics would include geographic location, type of location (e.g., free standing vs. shopping center location), degree of competition in the market area, time the outlets have been in operation, services or goods sold, services supplied by the franchisor, and whether the units are franchised or company-owned or operated.

Assumptions with respect to earnings claims for projected future earnings must be disclosed if their validity is sufficiently in doubt that a reasonably prudent prospective franchisee might be deterred from relying on the forecast if he or she knew of the underlying assumptions. Guidance on the type of disclosures to be made may be gained

from the AICPA *Statement on the Presentation and Disclosure of Financial Forecasts* at 5–6, which states, in part:

Those assumptions should be disclosed which management thinks are most significant to the forecast or are key factors upon which the financial results of the enterprise depend. There ordinarily should be some indication of the basis or rationale for these assumptions. It would also be desirable for the disclosure to include an expression of the relative impact of a variation in the assumption when it would significantly affect the forecasted result.

Frequently, basic assumptions that have enormous potential impact are considered to be implicit in the forecast. Examples might be conditions of peace, absence of natural disasters, etc. Such assumptions need be disclosed only when there is a reasonable possibility that the current conditions will not prevail. In such circumstances, to the extent practicable, the possible impact of a change in the assumptions should be disclosed.

Identifying those assumptions which at the time of preparation, appear to be most significant to the forecast or which are key factors upon which the financial results of the business depend requires the careful exercise of good-faith judgment by management. The disclosure should include the following:

- a. Assumptions as to which there is a reasonable possibility of the occurrence of a variation that may significantly affect the forecasted results.
- b. Assumptions about anticipated conditions that are expected to be significantly different from current conditions, which are not otherwise reasonably apparent.
- c. Other matters deemed important to the forecast or to the interpretation of the forecast.

2. Other disclosures for potential earnings (436.1(b))

The number and percentage of the outlets which are located in the geographic markets that form the basis for the forecast and which the franchisor or the franchise broker knows to have achieved at least as favorable results as those forecasted must appear in immediate conjunction with the potential earnings claim.

The term "outlet" includes both franchised and company-owned or operated outlets. However, if the representation is based on both types of outlets, the data should separate the two types to reflect the experience of each type of outlet.

The disclosure is limited to those outlets which have achieved at least such results in a time period of corresponding length in the immediate past (usually within the last several years) as those forecasted. Thus, if the forecast is for achievements to be reached in a year, the disclosure should

indicate the number and percentage of outlets in those geographic markets upon which the representation is based which achieved at least the same result in a period of a recent year. The beginning and ending dates for the corresponding time period must be disclosed.

Paragraph (b)(5)(ii) requires that the disclosure document include, where appropriate, a statement that a franchisor is without prior franchising experience with respect to the particular product or service being franchised.

Paragraph (b)(4) requires the disclosure statement to include a disclaimer warning the prospective franchisee that there is no assurance that he or she will achieve the forecast and that he or she must assume the risk that the forecast will not be achieved.

Example of Disclosure of Potential Earnings Together With Statement of Bases and Assumptions

Disclosure

Ice Cream Systems of America, Inc., estimates the most probable sales volume for the first twelve months at the proposed Kensington, Maryland site at \$75,000.

CAUTION

These figures are only estimates of what we think you may earn. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

Five franchised outlets, which constitute 42 percent of all the franchised outlets in the geographic markets upon which this forecast is based, have achieved a sales volume of at least \$75,000 in their first twelve months, for the period from June 1, 1978 to May 31, 1979.

Bases

This forecast is based upon (1) recent past performance of two franchised units in similar geographic market areas; (2) recent past experience of three franchised units in the same geographic market area; (3) a market study for the geographic market area conducted by H. Arthur Associates, an independent consulting firm; and (4) traffic volume study for proposed site conducted by qualified personnel from Ice Cream Systems of America, Inc.

(1) Three franchised outlets in geographical market areas similar to the suburban Washington, D.C. area report results for their first twelve months as at least \$75,000 in sales volume. These franchised units are identical in design and operation to the unit proposed for Kensington, Maryland, and are located in similar areas (shopping center mall) with similar traffic volume and population characteristics. One of the units is located near a small college which generates approximately 25% of its customers.

(2) Ice Cream Systems of America, Inc., has recently opened two other franchised outlets in Washington, D.C., suburban area. Both units report sales volume in excess of \$75,000 for their first twelve months in business (June 1, 1978-May 31, 1979). One of the units is

located near the main campus of a state university which accounts for approximately 45% of its customers.

(3) Ice Cream Systems of America, Inc., has conducted appropriate traffic volume studies for the proposed site, which indicate traffic potential in excess of that for the five franchised outlets mentioned above. The study indicates that the outlet should be able to generate 200 or more customers a day.

(4) H. Arthur Associates, Inc., an independent consultant has conducted a market study for the demand of KoneKorner products in the geographic market areas in which the franchise is to be located (suburban Maryland/Washington, D.C. suburbs). The study indicates strong consumer preference for KoneKorner brands over brands currently available in the geographic market area.

These studies, and the financial statements of the franchise units mentioned above, are available to the prospective franchisee for inspection.

Assumptions

The above forecasted sales volumes assume an opening date no later than June 1, 1980. If opening is delayed, this figure will be affected since, on the average (based on all reporting operating outlets), 50% of the annual volume is achieved in June, July and August.

The above forecast assumes operating hours from 10 A.M. until 1 A.M. daily, 365 days a year. This further assumes an average of 172 customers a day with average orders of \$1.20, which is the average of all reporting operating outlets.

The above forecast also assumes the completing of the Kensington Community College facilities by September 1, 1979. Students from this facility are expected to account for a significant proportion of the customers (varying from 25%-45% in the experience of the two outlets mentioned above).

The above forecast also assumes: (1) stable supply of dairy products for 1980; (2) no competing ice cream outlet within a 4 block radius; and (3) retail price increases of no more than 7 percent in 1980.

3. Special Features of Disclosures of Past Earnings (436.1(c))

The number and percentage of outlets of the franchise which are located in the geographic markets which form the basis for the representation and which the franchisor or the franchise broker knows to have obtained at least the same results as those represented must appear in immediate conjunction with the past earnings claim. Where a franchisor distributes more than one type of good or service, it may only disclose information about outlets which sell the same goods or services as those being offered to the prospective franchisee. For example, where a franchisor franchises two fast-food systems—one fried chicken and the other pizza—it may disclose only information about pizza outlets where

the pizza franchise is the franchise being offered.

The term "outlet" includes both franchised and company-owned or operated outlets. However, if the representation is based on both types of outlets, the data should separate the two types to reflect the experience of each type of outlet.

The disclosure is limited to those outlets which have achieved such results during a period of corresponding length to that represented, during the immediate past (e.g., within the last several years). The beginning and ending dates of the corresponding time period must be disclosed.

If the franchisor is without prior experience in franchising the particular product or service being offered, it must disclose this fact.

Example of Disclosure of Past Earnings Together With Statement of Bases and Assumptions

Disclosure

Kleanco franchisees earn \$35,000 in net profits a year.

CAUTION

Some outlets have earned this amount. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

Thirty, or 25% of all Kleanco franchised outlets in the 5 metropolitan areas on which this claim is based, reported net profits in excess of \$35,000 for the fiscal year 1978. (July 1, 1978-June 30, 1979).

Bases

This claim is based on the income statements (statement of results of operations) for 30 Kleanco franchisees in the downtown areas of New York, New Haven, Trenton, Philadelphia, and Hartford. These statements have been prepared in accordance with generally accepted accounting principles and reflect operations for the period from July 1, 1978-June 30, 1979.

The income statements are available for inspection.

Assumptions

These figures are based on accounting principles which are disclosed as part of the income statement and the notes thereto.

Ten of the franchisees noted above have been in business for more than ten years; five have been in business between five and ten years; and five more have been in business between two and five years. Only ten of the outlets referred to above have been open less than 2 years.

4. Special Features for Media Claims (436.1(e))

Section 436.1(e) encompasses earnings claims made for "general dissemination." It includes claims made in advertising (radio, television, magazines, newspapers, billboards, etc.)

as well as those contained in speeches or press releases. It does not include communications to financial journals or the trade press in connection with bona-fide news stories, or directly to lenders in connection with arranging financing for the franchisee.

Like other earnings claims, a reasonable basis must exist for the claim, substantiating material must be in the franchisor's possession at the time the claim is made and an Earnings Claim Document must be given to prospective franchisees at the earlier of the first personal meeting or time for making of disclosures. However, unlike claims made directly to a prospective franchisee, substantiating material must be made available for inspection only to the Commission, and notice of the existence of the substantiating material is not required. Further, no geographic relevance is required.

Mandatory disclosures must be included in the actual advertisement containing any earnings claim, regardless of whether the claim relates to past earnings or potential earnings. Section 436.1(e)(3) requires, in "immediate conjunction" with any earnings claim, the disclosure of the number and percentage of the outlets which the franchisor or franchise broker knows to have made at least the same results as those represented in the claim, in the recent past during a similar time period. (If the claim is not based on earnings of existing outlets, this must be disclosed.) This disclosure should refer to all of the franchisor's outlets (including company owned outlets), unless the advertisement clearly indicates otherwise. If the claim includes both franchised and company-owned outlets, each category should be reported separately in this disclosure.

In addition to the above requirement, section 436.1(e)(4) requires the following disclosures to be made in conjunction with any forecast about potential franchise sales, income or profits in media advertising:

CAUTION

These figures are only estimates; there is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

Example of Advertisement Describing Past Earnings

Our Franchisees Earn \$50,000 or More Per Year!

Now, for a limited time in this area, a well-known licensor of mobile office cleaning franchises is offering an opportunity for a self-motivated person to join the ranks of independent businessmen who have earned \$50,000 a year! Small investment needed! This is an opportunity of a lifetime!

Three units, or 6 percent of all franchised units, earned net profits of at least \$50,000 from June 1, 1978-May 30, 1979.

IV. Official Text of the Franchise Rule

§ 436.1 The rule.

In connection with the advertising, offering, licensing, contracting, sale, or other promotion in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, of any franchise, or any relationship which is represented either orally or in writing to be a franchise, it is an unfair or deceptive act or practice within the meaning of section 5 of that Act for any franchisor or franchise broker:

(a) To fail to furnish any prospective franchisee with the following information accurately, clearly, and concisely stated, in a legible, written document at the earlier of the "time for making of disclosures" or the first "personal meeting":

(1)(i) The official name and address and principal place of business of the franchisor, and of the parent firm or holding company of the franchisor, if any;

(ii) The name under which the franchisor is doing or intends to do business; and

(iii) The trademarks, trade names, service marks, advertising or other commercial symbols (hereinafter collectively referred to as "marks") which identify the goods, commodities, or services to be offered, sold, or distributed by the prospective franchisee, or under which the prospective franchisee will be operating.

(2) The business experience during the past 5 years, stated individually, of each of the franchisor's current directors and executive officers (including, and hereinafter to include, the chief executive and chief operating officer, financial, franchise marketing, training and service officers). With regard to each person listed, those persons' principal occupations and employers must be included.

(3) The business experience of the franchisor and the franchisor's parent firm (if any), including the length of time each: (i) has conducted a business of the type to be operated by the franchisee; (ii) has offered or sold a franchise for such business; (iii) has conducted a business or offered or sold a franchise for a business (A) operating under a name using any mark set forth under paragraph (a)(1)(iii), or (B) involving the sale, offering, or distribution of goods, commodities, or services which are identified by any mark set forth under paragraph (a)(1)(iii); and (iv) has offered for sale or sold franchises in other lines of business, together with a

description of such other lines of business.

(4) A statement disclosing who, if any, of the persons listed in paragraphs (a)(2) and (a)(3) of this section:

(i) Has, at any time during the previous seven fiscal years, been convicted of a felony or pleaded nolo contendere to a felony charge if the felony involved fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade;

(ii) Has, at any time during the previous seven fiscal years, been held liable in a civil action resulting in a final judgment or has settled out of court any civil actions or is a party to any civil action (A) involving allegations of fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade, or (B) which was brought by a present or former franchisee or franchisees and which involves or involved the franchise relationship: *Provided, however*, That only material individual civil actions need be so listed pursuant to this subparagraph (4)(ii), including any group of civil actions which, irrespective of the materiality of any single such action, in the aggregate is material;

(iii) Is subject to any currently effective State or Federal agency or court injunctive or restrictive order, or is a party to a proceeding currently pending in which such order is sought, relating to or affecting franchise activities or the franchisor-franchisee relationship, or involving fraud (including violation of any franchise law, or unfair or deceptive practices law), embezzlement, fraudulent conversion, misappropriation of property, or restraint of trade.

Such statement shall set forth the identity and location of the court or agency; the date of conviction, judgment, or decision; the penalty imposed; the damages assessed; the terms of settlement or the terms of the order; and the date, nature, and issuer of each such order or ruling. A franchisor may include a summary opinion of counsel as to any pending litigation, but only if counsel's consent to the use of such opinion is included in the disclosure statement.

(5) A statement disclosing who, if any, of the persons listed in paragraphs (a)(2) and (a)(3) of this section at any time during the previous 7 fiscal years has:

(i) Filed in bankruptcy;

(ii) Been adjudged bankrupt;

(iii) Been reorganized due to insolvency; or

(iv) Been a principal, director, executive officer, or partner of any other person that has so filed or was so adjudged or reorganized, during or within 1 year after the period that such person held such position in such other person. If so, the name and location of the person having so filed, or having been so adjudged or reorganized, the date thereof, and any other material facts relating thereto, shall be set forth.

(6) A factual description of the franchise offered to be sold by the franchisor.

(7) A statement of the total funds which must be paid by the franchisee to the franchisor or to a person affiliated with the franchisor, or which the franchisor or such affiliated person imposes, or collects in whole or in part on behalf of a third party, in order to obtain or commence the franchise operation, such as initial franchise fees, deposits, downpayments, prepaid rent, and equipment and inventory purchases. If all or part of these fees or deposits are returnable under certain conditions, these conditions shall be set forth; and if not returnable, such fact shall be disclosed.

(8) A statement describing any recurring funds required to be paid, in connection with carrying on the franchise business, by the franchisee to the franchisor or to a person affiliated with the franchisor, or which the franchisor or such affiliated person imposes or collects in whole or in part on behalf of a third party, including, but not limited to, royalty, lease, advertising, training, and sign rental fees, and equipment or inventory purchases.

(9) A statement setting forth the name of each person (including the franchisor) the franchisee is directly or indirectly required or advised to do business with by the franchisor, where such persons are affiliated with the franchisor.

(10) A statement describing any real estate, services, supplies, products, inventories, signs, fixtures, or equipment relating to the establishment or the operation of the franchise business which the franchisee is directly or indirectly required by the franchisor to purchase, lease or rent; and if such purchases, leases or rentals must be made from specific persons (including the franchisor), a list of the names and addresses of each such person. Such list may be made in a separate document delivered to the prospective franchisee with the prospectus if the existence of such separate document is disclosed in the prospectus.

(11) A description of the basis for calculating, and, if such information is readily available, the actual amount of, any revenue or other consideration to be received by the franchisor or persons affiliated with the franchisor from suppliers to the prospective franchisee in consideration for goods or services which the franchisor requires or advises the franchisee to obtain from such suppliers.

(12) (i) A statement of all the material terms and conditions of any financing arrangement offered directly or indirectly by the franchisor, or any person affiliated with the franchisor, to the prospective franchisee; and

(ii) A description of the terms by which any payment is to be received by the franchisor from (A) any person offering financing to a prospective franchisee; and (B) any person arranging for financing for a prospective franchisee.

(13) A statement describing the material facts of whether, by the terms of the franchise agreement or other device or practice, the franchisee is:

(i) Limited in the goods or services he or she may offer for sale;

(ii) Limited in the customers to whom he or she may sell such goods or services;

(iii) Limited in the geographic area in which he or she may offer for sale or sell goods or services; or

(iv) Granted territorial protection by the franchisor, by which, with respect to a territory or area, (A) the franchisor will not establish another, or more than any fixed number of, franchises or company-owned outlets, either operating under, or selling, offering, or distributing goods, commodities or services, identified by any mark set forth under paragraph (a)(1)(iii) of this section; or (B) the franchisor or its parent will not establish other franchises or company-owned outlets selling or leasing the same or similar products or services under a different trade name, trademark, service mark, advertising or other commercial symbol.

(14) A statement of the extent to which the franchisor requires the franchisee (or, if the franchisee is a corporation, any person affiliated with the franchisee) to participate personally in the direct operation of the franchise.

(15) A statement disclosing, with respect to the franchise agreement and any related agreements:

(i) The term (i.e., duration of arrangement), if any, of such agreement; and whether such term is or may be affected by any agreement (including leases or subleases) other than the one from which such term arises;

(ii) The conditions under which the franchisee may renew or extend;

(iii) The conditions under which the franchisor may refuse to renew or extend;

(iv) The conditions under which the franchisee may terminate;

(v) The conditions under which the franchisor may terminate;

(vi) The obligations (including lease or sublease obligations) of the franchisee after termination of the franchise by the franchisor, and the obligations of the franchisee (including lease or sublease obligations) after termination of the franchise by the franchisee and after the expiration of the franchise;

(vii) The franchisee's interest upon termination of the franchise, or upon refusal to renew or extend the franchise, whether by the franchisor or by the franchisee;

(viii) The conditions under which the franchisor may repurchase, whether by right of first refusal or at the option of the franchisor (and if the franchisor has the option to repurchase the franchise, whether there will be an independent appraisal of the franchise, whether the repurchase price will be determined by a predetermined formula and whether there will be a recognition of goodwill or other intangibles associated therewith in the repurchase price to be given the franchisee);

(ix) The conditions under which the franchisee may sell or assign all or any interest in the ownership of the franchise, or of the assets of the franchise business;

(x) The conditions under which the franchisor may sell or assign, in whole or in part, its interest under such agreements;

(xi) The conditions under which the franchisee may modify;

(xii) The conditions under which the franchisor may modify;

(xiii) The rights of the franchisee's heirs or personal representative upon the death or incapacity of the franchisee; and

(xiv) The provisions of any covenant not to compete.

(16) A statement disclosing, with respect to the franchisor and as to the particular named business being offered:

(i) The total number of franchises operating at the end of the preceding fiscal year;

(ii) The total number of company-owned outlets operating at the end of the preceding fiscal year;

(iii) The names, addresses, and telephone numbers of (A) the 10 franchised outlets of the named franchise business nearest the prospective franchisee's intended location; or (B) all franchisees of the

franchisor, or (C) all franchisees of the franchisor in the State in which the prospective franchisee lives or where the proposed franchise is to be located. *Provided, however,* That there are more than 10 such franchisees. If the number of franchisees to be disclosed pursuant to subparagraph (B) or (C) exceeds 50, such listing may be made in a separate document delivered to the prospective franchisee with the prospectus if the existence of such separate document is disclosed in the prospectus;

(iv) The number of franchises voluntarily terminated or not renewed by franchisees within, or at the conclusion of, the term of the franchise agreement, during the preceding fiscal year;

(v) The number of franchises reacquired by purchase by the franchisor during the term of the franchise agreement, and upon the conclusion of the term of the franchise agreement, during the preceding fiscal year;

(vi) The number of franchises otherwise reacquired by the franchisor during the term of the franchise agreement, and upon the conclusion of the term of the franchise agreement, during the preceding fiscal year.

(vii) The number of franchises for which the franchisor refused renewal of the franchise agreement or other agreements relating to the franchise during the preceding fiscal year; and

(viii) The number of franchises that were canceled or terminated by the franchisor during the term of the franchise agreement, and upon conclusion of the term of the franchise agreement, during the preceding fiscal year.

With respect to the disclosures required by paragraphs (a)(16) (v), (vi), (vii), and (viii) of this section, the disclosure statement shall also include a general categorization of the reasons for such reacquisitions, refusals to renew or terminations, and the number falling within each such category, including but not limited to the following: failure to comply with quality control standards, failure to make sufficient sales, and other breaches of contract.

(17)(i) If site selection or approval thereof by the franchisor is involved in the franchise relationship, a statement disclosing the range of time that has elapsed between signing of franchise agreements or other agreements relating to the franchise and site selection, for agreements entered into during the preceding fiscal year; and

(ii) If operating franchise outlets are to be provided by the franchisor, a statement disclosing the range of time

that has elapsed between the signing of franchise agreements or other agreements relating to the franchise and the commencement of the franchisee's business, for agreements entered into during the preceding fiscal year.

With respect to the disclosures required by paragraphs (a)(17) (i) and (ii) of this section, a franchisor may at its option also provide a distribution chart using meaningful classifications with respect to such ranges of time.

(18) If the franchisor offers an initial training program or informs the prospective franchisee that it intends to provide such person with initial training, a statement disclosing:

(i) The type and nature of such training;

(ii) The minimum amount, if any, of training that will be provided to a franchisee; and

(iii) The cost, if any, to be borne by the franchisee for the training to be provided, or for obtaining such training.

(19) If the name of a public figure is used in connection with a recommendation to purchase a franchise, or as a part of the name of the franchise operation, or if the public figure is stated to be involved with the management of the franchisor, a statement disclosing:

(i) The nature and extent of the public figure's involvement and obligations to the franchisor, including but not limited to the promotional assistance the public figure will provide to the franchisor and to the franchisee;

(ii) The total investment of the public figure in the franchise operation; and

(iii) The amount of any fee or fees the franchisee will be obligated to pay for such involvement or assistance provided by the public figure.

(20)(i) A balance sheet (statement of financial position) for the franchisor for the most recent fiscal year, and an income statement (statement of results of operations) and statement of changes in financial position for the franchisor for the most recent 3 fiscal years. Such statements are required to have been examined in accordance with generally accepted auditing standards by an independent certified or licensed public accountant. *Provided, however,* That where a franchisor is a subsidiary of another corporation which is permitted under generally accepted accounting principles to prepare financial statements on a consolidated or combined statement basis, the above information may be submitted for the parent if (A) the corresponding unaudited financial statements of the franchisor are also provided, and (B) the parent absolutely and irrevocably has

agreed to guarantee all obligations of the subsidiary;

(ii) Unaudited statements shall be used only to the extent that audited statements have not been made, and provided that such statements are accompanied by a clear and conspicuous disclosure that they are unaudited. Statements shall be prepared on an audited basis as soon as practicable, but, at a minimum, financial statements for the first full fiscal year following the date on which the franchisor must first comply with this part shall contain a balance sheet opinion prepared by an independent certified or licensed public accountant, and financial statements for the following fiscal year shall be fully audited.

(21) All of the foregoing information in paragraph (a) (1) through (20) of this section shall be contained in a single disclosure statement or prospectus, which shall not contain any materials or information other than that required by this part or by State law not preempted by this part. This does not preclude franchisors or franchise brokers from giving other nondeceptive information orally, visually, or in separate literature so long as such information is not contradictory to the information in the disclosure statement required by paragraph (a) of this section. This disclosure statement shall carry a cover sheet distinctively and conspicuously showing the name of the franchisor, the date of issuance of the disclosure statement, and the following notice imprinted thereon in upper and lower case boldface type of not less than 12 point size:

INFORMATION FOR PROSPECTIVE FRANCHISEES REQUIRED BY FEDERAL TRADE COMMISSION

To protect you, we've required your franchisor to give you this information. We haven't checked it, and don't know if it's correct. It should help you make up your mind. Study it carefully. While it includes some information about your contract, don't rely on it alone to understand your contract. Read all of your contract carefully. Buying a franchise is a complicated investment. Take your time to decide. If possible, show your contract and this information to an advisor, like a lawyer or an accountant.

If you find anything you think may be wrong or anything important that's been left out, you should let us know about it. It may be against the law.

There may also be laws on franchising in your state. Ask your state agencies about them.

Federal Trade Commission,
Washington, D.C.

Provided, That the obligation to furnish such disclosure statement shall be

deemed to have been met for both the franchisor and the franchise broker if either such party furnishes the prospective franchisee with such disclosure statement.

(22) All information contained in the disclosure statement shall be current as of the close of the franchisor's most recent fiscal year. After the close of each fiscal year, the franchisor shall be given a period not exceeding 90 days to prepare a revised disclosure statement and, following such 90 days, may distribute only the revised prospectus and no other. The franchisor shall, within a reasonable time after the close of each quarter of the fiscal year, prepare revisions to be attached to the disclosure statement to reflect any material change in the franchisor or relating to the franchise business of the franchisor, about which the franchisor or franchise broker, or any agent, representative, or employee thereof, knows or should know. Each prospective franchisee shall have in his or her possession, at the "time for making of disclosures," the disclosure statement and quarterly revision for the period most recent to the "time for making of disclosures" and available at that time. Information which is required to be audited pursuant to paragraph (a)(20) of this section is not required to be audited for quarterly revisions. *Provided, however,* That the unaudited information be accompanied by a statement in immediate conjunction therewith that clearly and conspicuously discloses that such information has not been audited.

(23) A table of contents shall be included within the disclosure statement.

(24) The disclosure statement shall include a comment which either positively or negatively responds to each disclosure item required to be in the disclosure statement, by use of a statement which fully incorporates the information required by the item. Each disclosure item therein must be preceded by the appropriate heading, as set forth in Note 3 of this part.

(b) To make any oral, written, or visual representation to a prospective franchisee which states a specific level of potential sales, income, gross or net profit for that prospective franchisee, or which states other facts which suggest such a specific level, unless:

(1) At the time such representation is made, such representation is relevant to the geographic market in which the franchise is to be located;

(2) At the time such representation is made, a reasonable basis exists for such representation and the franchisor has in its possession material which

constitutes a reasonable basis for such representation, and such material is made available to any prospective franchisee and to the Commission or its staff upon reasonable demand.

Provided, however, That in immediate conjunction with such representation, the franchisor shall disclose in a clear and conspicuous manner that such material is available to the prospective franchisee; and *Provided, further,* That no provision within paragraph (b) of this section shall be construed as requiring the disclosure to any prospective franchisee of the identity of any specific franchisee or of information reasonably likely to lead to the disclosure of such person's identity; and *Provided, further,* That no additional representation as to a prospective franchisee's potential sales, income, or profits may be made later than the "time for making of disclosures";

(3) Such representation is set forth in detail along with the material bases and assumptions therefor in a single legible written document whose text accurately, clearly and concisely discloses such information, and none other than that provided for by this part or by State law not preempted by this part. Each prospective franchisee to whom the representation is made shall be furnished with such document no later than the "time for making of disclosures"; *Provided, however,* That if the representation is made at or prior to a "personal meeting" and such meeting occurs before the "time for making of disclosures," the document shall be furnished to the prospective franchisee to whom the representation is made at that "personal meeting";

(4) The following statement is clearly and conspicuously disclosed in the document described by paragraph (b)(3) of this section in immediate conjunction with such representation and in not less than twelve point upper and lower-case type:

CAUTION

These figures are only estimates of what we think you may earn. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

(5) The following information is clearly and conspicuously disclosed in the document described by paragraph (b)(3) of this section in immediate conjunction with such representation:

(i) The number and percentage of outlets of the named franchise business which are located in the geographic markets that form the basis for any such representation and which are known to the franchisor or franchise broker to have earned or made at least the same sales, income, or profits during a period

of corresponding length in the immediate past as those potential sales, income, or profits represented; and

(ii) The beginning and ending dates for the corresponding time period referred to by paragraph (b)(5)(i) of this section. *Provided, however,* That any franchisor without prior franchising experience as to the named franchise business so indicate such lack of experience in the document described in paragraph (b)(3) of this section.

Except, That representations of the sales, income or profits of existing franchise outlets need not comply with this paragraph (b).

(c) To make any oral, written or visual representation to a prospective franchisee which states a specific level of sales, income, gross or net profits of existing outlets (whether franchised or company-owned) of the named franchise business, or which states other facts which suggest such a specific level, unless:

(1) At the time such representation is made, such representation is relevant to the geographic market in which the franchise is to be located;

(2) At the time such representation is made, a reasonable basis exists for such representation and the franchisor has in its possession material which constitutes a reasonable basis for such representation, and such material is made available to any prospective franchisee and to the Commission or its staff upon reasonable demand.

Provided, however, That in immediate conjunction with such representation, the franchisor discloses in a clear and conspicuous manner that such material is available to the prospective franchisee; and *Provided, further,* That no provision within paragraph (c) of this section shall be construed as requiring the disclosure to any prospective franchisee of the identity of any specific franchisee or of information reasonably likely to lead to the disclosure of such person's identity; and *Provided, further,* That no additional representation as to the sales, income, or gross or net profits of existing outlets (whether franchised or company-owned) of the named franchise business may be made later than the "time for making of disclosures";

(3) Such representation is set forth in detail along with the material bases and assumptions therefor in a single legible written document which accurately, clearly and concisely discloses such information, and none other than that provided for by this part or by State law not preempted by this part. Each prospective franchisee to whom the representation is made shall be

furnished with such document no later than the "time for making of disclosures." *Provided, however,* That if the representation is made at or prior to a "personal meeting" and such meeting occurs before the "time for making of disclosures," the document shall be furnished to the prospective franchisee to whom the representation is made at that "personal meeting";

(4) The underlying data on which the representation is based have been prepared in accordance with generally accepted accounting principles;

(5) The following statement is clearly and conspicuously disclosed in the document described by paragraph (c)(3) of this section in immediate conjunction with such representation, and in not less than twelve point upper and lower case boldface type:

CAUTION

Some outlets have [sold] [earned] this amount. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

(6) The following information is clearly and conspicuously disclosed in the document described by paragraph (c)(3) of this section in immediate conjunction with such representation:

(i) The number and percentage of outlets of the named franchise business which are located in the geographic markets that form the basis for any such representation and which are known to the franchisor or franchise broker to have earned or made at least the same sales, income, or profits during a period of corresponding length in the immediate past as those sales, income, or profits represented; and

(ii) The beginning and ending dates for the corresponding time period referred to by subparagraph (6)(i). *Provided, however,* That any franchisor without prior franchising experience as to the named franchise business so indicate such lack of experience in the document described in paragraph (c)(3) of this section.

(d) To fail to provide the following information within the document(s) required by paragraphs (b)(3) and (c)(3) of this section whenever any representation is made to a prospective franchisee regarding its potential sales, income, or profits, or the sales, income, gross or net profits of existing outlets (whether franchised or company-owned) of the named franchise business:

(1) A cover sheet distinctively and conspicuously showing the name of the franchisor, the date of issuance of the document and the following notice imprinted thereon in upper and lower case boldface type of not less than twelve point size:

INFORMATION FOR PROSPECTIVE FRANCHISEES ABOUT FRANCHISE [SALES] [INCOME] [PROFIT] REQUIRED BY THE FEDERAL TRADE COMMISSION.

To protect you, we've required the franchisor to give you this information. We haven't checked it and don't know if it's correct. Study these facts and figures carefully. If possible, show them to someone who can advise you, like a lawyer or an accountant. Then take your time and think it over.

If you find anything you think may be wrong or anything important that's been left out, let us know about it. It may be against the law.

There may also be laws on franchising in your State. Ask your State agencies about them.

Federal Trade Commission,
Washington, D.C.

(2) A table of contents.

Provided, however, That each prospective franchisee to whom the representation is made shall be notified at the "time for making of disclosures" of any material change (about which the franchisor, franchise broker, or any of the agents, representatives, or employees thereof, knows or should know) in the information contained in the document(s) described by paragraphs (b)(3) and (c)(3) of this section.

(e) To make any oral, written, or visual representation for general dissemination (not otherwise covered by paragraphs (b) or (c) of this section) which states a specific level of sales, income, gross or net profits, either actual or potential, of existing or prospective outlets (whether franchised or company-owned) of the named franchise business or which states other facts which suggest such a specific level, unless:

(1) At the time such representation is made, a reasonable basis exists for such representation and the franchisor has in its possession material which constitutes a reasonable basis for such representation and which is made available to the Commission or its staff upon reasonable demand;

(2) The underlying data on which each representation of sales, income or profit for existing outlets is based have been prepared in accordance with generally accepted accounting principles;

(3) In immediate conjunction with such representation, there shall be clearly and conspicuously disclosed the number and percentage of outlets of the named franchise business which the franchisor or the franchise broker knows to have earned or made at least the same sales, income, or profits during a period of corresponding length in the immediate past as those sales, income, or profits represented, and the beginning and ending dates for said time period;

(4) In immediate conjunction with each such representation of potential sales, income or profits, the following statement shall be clearly and conspicuously disclosed:

CAUTION

These figures are only estimates; there is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

Provided, however, That if such representation is not based on actual experience of existing outlets of the named franchise business, that fact also should be disclosed;

(5) No later than the earlier of the first "personal meeting" or the "time for making of disclosures," each prospective franchisee shall be given a single, legible written document which accurately, clearly and concisely sets forth the following information and materials (and none other than that provided for by this part or by State law not preempted by this part):

(i) The representation, set forth in detail along with the material bases and assumptions therefor;

(ii) The number and percentage of outlets of the named franchise business which the franchisor or the franchise broker knows to have earned or made at least the same sales, income or profits during a period of corresponding length in the immediate past as those sales, income, or profits represented, and the beginning and ending dates for said time period;

(iii) With respect to each such representation of sales, income, or profits of existing outlets, the following statement shall be clearly and conspicuously disclosed in immediate conjunction therewith, printed in not less than 12 point upper and lower case boldface type:

CAUTION

Some outlets have [sold] [earned] this amount. There is no assurance you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

(iv) With respect to each such representation of potential sales, income, or profits, the following statement shall be clearly and conspicuously disclosed in immediate conjunction therewith, printed in not less than 12 point upper and lower case boldface type:

CAUTION

These figures are only estimates. There is no assurance that you'll do as well. If you rely upon our figures, you must accept the risk of not doing as well.

(v) If applicable, a statement clearly and conspicuously disclosing that the franchisor lacks prior franchising

experience as to the named franchise business;

(vi) If applicable, a statement clearly and conspicuously disclosing that the franchisor has not been in business long enough to have actual business data;

(vii) A cover sheet, distinctively and conspicuously showing the name of the franchisor, the date of issuance of the document, and the following notice printed thereon in not less than 12 point upper and lower case boldface type:

INFORMATION FOR PROSPECTIVE FRANCHISEES ABOUT FRANCHISE [SALES] [INCOME] [PROFIT] REQUIRED BY THE FEDERAL TRADE COMMISSION

To protect you, we've required the franchisor to give you this information. We haven't checked it and don't know if it's correct. Study these facts and figures carefully. If possible, show them to someone who can advise you, like a lawyer or an accountant.

If you find anything you think may be wrong or anything important that's been left out, let us know about it. It may be against the law.

There may also be laws about franchising in your State. Ask your State agencies about them.

Federal Trade Commission
Washington, D.C.

(viii) A table of contents;

(6) Each prospective franchisee shall be notified at the "time for making of disclosures" of any material changes that have occurred in the information contained in this document.

(f) To make any claim or representation which is contradictory to the information required to be disclosed by this part.

(g) To fail to furnish the prospective franchisee with a copy of the franchisor's franchise agreement and related agreements with the document, and a copy of the completed franchise and related agreements intended to be executed by the parties at least 5 business days prior to the date the agreements are to be executed.

Provided, however, That the obligations defined in paragraphs (b) through (g) of this section shall be deemed to have been met for both the franchisor and the franchise broker if either such person furnishes the prospective franchisee with the written disclosures required thereby.

(h) To fail to return any funds or deposits in accordance with any conditions disclosed pursuant to paragraph (a)(7) of this section.

§ 436.2 Definitions.

As used in this part, the following definitions shall apply:

(a) The term "franchise" means any continuing commercial relationship

created by any arrangement or arrangements whereby:

(1)(i)(A) a person (hereinafter "franchisee") offers, sells, or distributes to any person other than a "franchisor" (as hereinafter defined), goods, commodities, or services which are:

(1) Identified by a trademark, service mark, trade name, advertising or other commercial symbol designating another person (hereinafter "franchisor"); or
(2) Indirectly or directly required or advised to meet the quality standards prescribed by another person (hereinafter "franchisor") where the franchisee operates under a name using the trademark, service mark, trade name, advertising or other commercial symbol designating the franchisor; and

(B)(1) The franchisor exerts or has authority to exert a significant degree of control over the franchisee's method of operation, including but not limited to, the franchisee's business organization, promotional activities, management, marketing plan or business affairs; or

(2) The franchisor gives significant assistance to the franchisee in the latter's method of operation, including, but not limited to, the franchisee's business organization, management, marketing plan, promotional activities, or business affairs; *Provided, however,* That assistance in the franchisee's promotional activities shall not, in the absence of assistance in other areas of the franchisee's method of operation, constitute significant assistance; or

(ii)(A) A person (hereinafter "franchisee") offers, sells, or distributes to any person other than a "franchisor" (as hereinafter defined), goods, commodities, or services which are:

(1) Supplied by another person (hereinafter "franchisor"); or

(2) Supplied by a third person (e.g., a supplier) with whom the franchisee is directly or indirectly required to do business by another person (hereinafter "franchisor"); or

(3) Supplied by a third person (e.g., a supplier) with whom the franchisee is directly or indirectly advised to do business by another person (hereinafter "franchisor") where such third person is affiliated with the franchisor; and

(B) The franchisor:

(1) Secures for the franchisee retail outlets or accounts for said goods, commodities, or services; or

(2) Secures for the franchisee locations or sites for vending machines, rack displays, or any other product sales display used by the franchisee in the offering, sale, or distribution of said goods, commodities, or services; or

(3) Provides to the franchisee the services of a person able to secure the retail outlets, accounts, sites or locations

referred to in paragraph (a)(1)(ii)(B) (1) and (2) above; and

(2) The franchisee is required as a condition of obtaining or commencing the franchise operation to make a payment or a commitment to pay to the franchisor, or to a person affiliated with the franchisor.

(3) Exemptions. The provisions of this part shall not apply to a franchise:

(i) Which is a "fractional franchise"; or

(ii) Where pursuant to a lease, license, or similar agreement, a person offers, sells, or distributes goods, commodities, or services on or about premises occupied by a retailer-grantor primarily for the retailer-grantor's own merchandising activities, which goods, commodities, or services are not purchased from the retailer-grantor or persons whom the lessee is directly or indirectly (A) required to do business with by the retailer-grantor or (B) advised to do business with by the retailer-grantor where such person, is affiliated with the retailer-grantor; or

(iii) Where the total of the payments referred to in paragraph (a)(2) of this section made during a period from any time before to within 6 months after commencing operation of the franchisee's business, is less than \$500; or

(iv) Where there is no writing which evidences any material term or aspect of the relationship or arrangement.

(4) Exclusions. The term "franchise" shall not be deemed to include any continuing commercial relationship created solely by:

(i) The relationship between an employer and an employee, or among general business partners; or

(ii) Membership in a bona fide "cooperative association"; or

(iii) An agreement for the use of a trademark, service mark, trade name, seal, advertising, or other commercial symbol designating a person who offers on a general basis, for a fee or otherwise, a bona fide service for the evaluation, testing, or certification of goods, commodities, or services;

(iv) An agreement between a licensor and a single licensee to license a trademark, trade name, service mark, advertising or other commercial symbol where such license is the only one of its general nature and type to be granted by the licensor with respect to that trademark, trade name, service mark, advertising, or other commercial symbol.

(5) Any relationship which is represented either orally or in writing to be a franchise (as defined in this paragraph (a)(1) and (2) of this section) is subject to the requirements of this part.

(b) The term "person" means any individual, group, association, limited or general partnership, corporation, or any other business entity.

(c) The term "franchisor" means any person who participates in a franchise relationship as a franchisor, as denoted in paragraph (a) of this section.

(d) The term "franchisee" means any person (1) who participates in a franchise relationship as a franchisee, as denoted in paragraph (a) of this section, or (2) to whom an interest in a franchise is sold.

(e) The term "prospective franchisee" includes any person, including any representative, agent, or employee of that person, who approaches or is approached by a franchisor or franchise broker, or any representative, agent, or employee thereof, for the purpose of discussing the establishment, or possible establishment, of a franchise relationship involving such a person.

(f) The term "business day" means any day other than Saturday, Sunday, or the following national holidays: New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving, and Christmas.

(g) The term "time for making of disclosures" means ten (10) business days prior to the earlier of (1) the execution by a prospective franchisee of any franchise agreement or any other agreement imposing a binding legal obligation on such prospective franchisee, about which the franchisor, franchise broker, or any agent, representative, or employee thereof, knows or should know, in connection with the sale or proposed sale of a franchise, or (2) the payment by a prospective franchisee, about which the franchisor, franchise broker, or any agent, representative, or employee thereof, knows or should know, of any consideration in connection with the sale or proposed sale of a franchise.

(h) The term "fractional franchise" means any relationship, as denoted by paragraph (a) of this section, in which the person described therein as a franchisee, or any of the current directors or executive officers thereof, has been in the type of business represented by the franchise relationship for more than 2 years and the parties anticipated, or should have anticipated, at the time the agreement establishing the franchise relationship was reached, that the sales arising from the relationship would represent no more than 20 percent of the sales in dollar volume of the franchisee.

(i) The term "affiliated person" means a person (as defined in paragraph (b) of this section):

(1) Which directly or indirectly controls, is controlled by, or is under common control with, a franchisor; or

(2) Which directly or indirectly owns, controls, or holds with power to vote, 10 percent or more of the outstanding voting securities of a franchisor; or

(3) Which has, in common with a franchisor, one or more partners, officers, directors, trustees, branch managers, or other persons occupying similar status or performing similar functions.

(j) The term "franchise broker" means any person other than a franchisor or a franchisee who sells, offers for sale, or arranges for the sale of a franchise.

(k) The term "sale of a franchise" includes a contract or agreement whereby a person obtains a franchise or interest in a franchise for value by purchase, license, or otherwise. This term shall not be deemed to include the renewal or extension of an existing franchise where there is no interruption in the operation of the franchised business by the franchisee, unless the new contracts or agreements contain material changes from those in effect between the franchisor and franchisee prior thereto.

(l) A "cooperative association" is either (1) an association of producers of agricultural products authorized by section 1 of the Capper-Volstead Act, 7 U.S.C. 291; or (2) an organization operated on a cooperative basis by and for independent retailers which wholesales goods or furnishes services primarily to its member-retailers.

(m) The term "fiscal year" means the franchisor's fiscal year.

(n) The terms "material," "material fact," and "material change" shall include any fact, circumstance, or set of conditions which has a substantial likelihood of influencing a reasonable franchisee or a reasonable prospective franchisee in the making of a significant decision relating to a named franchise business or which has any significant financial impact on a franchisee or prospective franchisee.

(o) The term "personal meeting" means a face-to-face meeting between a franchisor or franchise broker (or any agent, representative, or employee thereof) and a prospective franchisee which is held for the purpose of discussing the sale or possible sale of a franchise.

§ 436.3 Severability.

If any provision of this part or its application to any person, act, or practice is held invalid, the remainder of the part or the application of its provisions to any person, act, or practice shall not be affected thereby.

Note 1.—The Commission expresses no opinion as to the legality of any practice mentioned in this part. A provision for disclosure should not be construed as condonation or approval with respect to the matter required to be disclosed, nor as an indication of the Commission's intention not to enforce any applicable statute.

Note 2.—By taking action in this area, the Federal Trade Commission does not intend to annul, alter, or affect, or exempt any person subject to the provisions of this part from complying with the laws or regulations of any State, municipality, or other local government with respect to franchising practices, except to the extent that those laws or regulations are inconsistent with any provision of this part, and then only to the extent of the inconsistency. For the purposes of this part, a law or regulation of any State, municipality, or other local government is not inconsistent with this part if the protection such law or regulation affords any prospective franchisee is equal to or greater than that provided by this part. Examples of provisions which provide protection equal to or greater than that provided by this part include laws or regulations which require more complete record keeping by the franchisor or the disclosure of more complete information to the franchisee.

Note 3.—[As per § 436.1(a)(24) of this part:]

DISCLOSURE STATEMENT

Pursuant to 16 CFR 436.1 et seq., a Trade Regulation Rule of the Federal Trade Commission regarding Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures, the following information is set forth on [name of franchisor] for your examination:

1. IDENTIFYING INFORMATION AS TO FRANCHISOR.

2. BUSINESS EXPERIENCE OF FRANCHISOR'S DIRECTORS AND EXECUTIVE OFFICERS.

3. BUSINESS EXPERIENCE OF THE FRANCHISOR.

4. LITIGATION HISTORY.

5. BANKRUPTCY HISTORY.

6. DESCRIPTION OF FRANCHISE.

7. INITIAL FUNDS REQUIRED TO BE PAID BY A FRANCHISEE.

8. RECURRING FUNDS REQUIRED TO BE PAID BY A FRANCHISEE.

9. AFFILIATED PERSONS THE FRANCHISEE IS REQUIRED OR ADVISED TO DO BUSINESS WITH BY THE FRANCHISOR.

10. OBLIGATIONS TO PURCHASE.

11. REVENUES RECEIVED BY THE FRANCHISOR IN CONSIDERATION OF PURCHASES BY A FRANCHISEE.

12. FINANCING ARRANGEMENTS.

13. RESTRICTION OF SALES.

14. PERSONAL PARTICIPATION REQUIRED OF THE FRANCHISEE IN THE OPERATION OF THE FRANCHISE.

15. TERMINATION, CANCELLATION, AND RENEWAL OF THE FRANCHISE.

16. STATISTICAL INFORMATION CONCERNING THE NUMBER OF FRANCHISES (AND COMPANY-OWNED OUTLETS).

17. SITE SELECTION.

18. TRAINING PROGRAMS.
19. PUBLIC FIGURE INVOLVEMENT IN
THE FRANCHISE.
20. FINANCIAL INFORMATION
CONCERNING THE FRANCHISOR.

Effective October 21, 1979.

By direction of the Commission dated July
25, 1979.

Department of Housing and Urban Development

Office of the Assistant Secretary for
Community Planning and Development

Community Development Block Grants;
Categorical Program Settlement Fund

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

[Docket No. R-79-540]

Community Development Block Grants; Categorical Program Settlement Fund**AGENCY:** Department of Housing and Urban Development.**ACTION:** Final rulemaking.

SUMMARY: This rule establishes the requirements for funding the financial settlement of projects assisted under Title I of the Housing Act of 1949, as amended. The purpose of the rule is to implement Title I of the Housing and Community Development Act of 1977, section 103(d)(2).

Section 103(d)(2) authorizes grants for the financial settlement of projects and programs assisted under the categorical programs terminated by section 116(a) of the Housing and Community Development Act of 1974, primarily urban renewal projects assisted under the Housing Act of 1949, as amended which require supplemental assistance to close them out financially, and to the extent feasible the completion of previously approved activities. Though block grant funds are being used to complete most ongoing projects, there is a need to continue funding projects which require grants to close them out financially. The law and the prior interim rule authorized these funds to be used for the cost to complete previously approved activities for all the terminated programs. The existence of a potential federal exposure arising from direct or Federally-guaranteed loans made pursuant to Title I of the Housing Assistance Act of 1949 necessitates that these resources be restricted to reducing or eliminating such potential exposure. The increased potential exposure to the Government has resulted from project assets (primarily land disposition proceeds) not being realized in a timely fashion. Therefore, in the final rule, only grants for the purpose of retiring the outstanding Federal loans and other obligations necessary for a financial settlement will be considered for financial assistance. This is a marked deviation from the interim rule which allowed assistance to be provided to any project assisted under any of the programs terminated by section 116(a) of the Housing and Community Development Act of 1974.

EFFECTIVE DATE: October 1, 1979.**FOR FURTHER INFORMATION CONTACT:**

Peter Rowan, Program Completion Division, Community Planning and Development, HUD, Room 7186, 451 Seventh Street, SW., Washington, D.C. 20410, 202-755-1871.

SUPPLEMENTARY INFORMATION: On June 6, 1978 (43 FR 24656) an interim rule governing categorical program settlement funds was published in the Federal Register. Interested parties were given until July 6, 1978 to submit written comments. All comments received with respect to the interim rule were given due consideration. Copies of the comments received are available for inspection and copying in the Office of General Counsel, Department of Housing and Urban Development, Room 5218, 451 Seventh Street, SW., Washington, D.C. 20410.

The following is a discussion of the major comments received and revisions made in the interim rule.

Purpose

Section 570.480. Since the rule is being modified to limit assistance only for financial settlement of ongoing urban renewal projects, references to all other "terminated programs" and assistance for "cost to complete" activities have been deleted.

Definition

Section 570.481 has been deleted by cross-referencing this subpart to Subpart N and using the definitions contained therein—thus avoiding duplication.

Eligible Applicants

A number of comments were received which suggested that the eligibility be expanded to permit communities that had undertaken renewal type programs and whose activities had not been recognized for Federal assistance be allowed to compete for funds under this subpart. Since these comments are in conflict with the provisions of section 116 of the Housing and Community Development Act of 1974 which limits consideration to projects and programs that have been previously financially assisted by HUD, the recommendations were not adopted.

Similar comments were received which recommended that the eligibility for assistance be further restricted to exclude from consideration any project that had previously been financially settled. These comments were accepted on the basis that the primary use of these funds is for the purpose of achieving financial settlement of the ongoing projects, and to reduce the

potential Federal exposure from inadequately secured loans.

In keeping with the interim rule that precludes assistance to projects that have previously been funded from the "Urgent Needs Fund", § 570.482 has been modified to exclude any project for which a financial settlement has been previously approved.

Applications

Section 570.483(a) has been expanded to require consultation with the appropriate HUD Area Office to establish a proposed financial settlement date prior to submission of an application. This change was necessary in order that realistic cost estimates involving interest payments may be included in the grant requests. Generally a period of not less than 60 days or more than 150 days from the last day applications will be accepted for a given funding cycle should be specified. Wherever possible the financial settlement date should be the maturity date of the currently outstanding project temporary loans.

Section 570.483(b) has been modified to clarify the fact that funds under the financial settlement grants may not be used to substitute for cash local grants-in-aid owed the project(s) nor costs for noncash local grant-in-aid activities.

Project Funding Resources

Several comments were received suggesting that the requirement that a community commit the equivalent of 20 percent of their 1978-1980 block grant entitlement as a funding resource was excessive in those instances where prior year block grant funds had been used to continue project activities or reduce the outstanding loans of a project. The percentage clause equates with that portion of entitlement grants which the Secretary is authorized to apply, without the request of the applicant, to settle outstanding loans for urban renewal projects which cannot be completed without additional grants, pursuant to Section 112(a) of the Act. It would be inappropriate not to consider this resource since the Categorical Program Settlement Grants are being provided for funding projects which cannot be financially settled without supplemental assistance.

To recognize past contributions would be contrary to the purpose of the Categorical Program Settlement Grants, which is to provide supplemental assistance beyond the existing resources in order to achieve financial settlement of the project.

Certifications

Section 570.483(e) and (f) have been deleted since these requirements are fully set forth in Subpart N. To repeat them here is redundant. A comment was received which suggested that this Section be expanded to include the full wording of each certification and the background information with respect to each. This comment was rejected in that they are set forth in Subpart D (570.307) and Subpart K of the regulations, and would therefore be redundant.

Submission of Applications

Section 570.484 specifies the dates by which applications must be filed for consideration for funding during Fiscal Year 1980.

Purpose of Funding

Section 570.485 has been revised to clarify that financial assistance is only available for the purpose of financially settling ongoing urban renewal projects which have insufficient resources to achieve financial settlement.

The Department has determined that an Environmental Impact Statement is not required with respect to this rule. A copy of the Finding of Inapplicability is available for inspection in the Office of Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

Accordingly the interim rule published June 8, 1978 at FR 28656 is made final and 24 CFR Part 570, Subpart H is amended as follows:

Subpart H—Categorical Program Settlement Fund

Sec.	Purpose.
570.480	Eligible applicants.
570.482	Applications.
570.483	Submission of applications.
570.484	Funding considerations.
570.485	Repayment of categorical program settlement grant.
570.487	General provisions.

Subpart H—Categorical Program Settlement Grants**§ 570.480 Purpose.**

The purpose of categorical program settlement grants is to provide supplemental assistance necessary for the financial settlement of urban renewal projects (including annual Neighborhood Development Programs) pursuant to Subpart N, subject to the requirements of this Subpart.

§ 570.482 Eligible applicants.

Eligible applicants are units of general local government, in which projects assisted under Title I of the Housing Act of 1949 are located, which cannot financially settle such projects without supplemental financial assistance.

§ 570.483 Applications.

Applications shall be transmitted to the appropriate HUD Area Office and shall include the following:

(a) A completed standard form 424, Application for Federal Assistance (short form). Section IV of form 424, Remarks, shall include a statement which indicates the proposed settlement date. Prior to submission, the proposed financial settlement date shall be determined through consultation with the appropriate HUD Area Office.

(b) A summary of the funding assistance required, shown as the difference between funding needs and funding resources.

(1) *Project funding needs.* Applicants shall list amounts for direct Federal loans, Federally-guaranteed loans, other loans or incurred obligations payable. Project funding needs may not include requests for Categorical Program Settlement grant funds to be used as a substitute for cash local grants-in-aid owed the project(s) nor costs for noncash local grant-in-aid activities.

(2) *Project funding resources.* Applicants shall list amounts for accounts receivable, cash on hand, unpaid Federal grants, any unpaid cash local share for the project and any other funding resources to be made available. Applications shall list anticipated land proceeds to the date of settlement. The equivalent of 20 percent of an applicant's block grant entitlement from 1978-1980 shall be or shall have been provided to meet funding needs.

(c) A schedule showings, all estimated land proceeds after the settlement date.

(d) A statement indicating action taken to minimize the need for supplemental assistance. Program alternatives which were rejected shall be reported along with the reasons for the rejection.

§ 570.484 Submission of applications.

(a) Applications will be accepted in the appropriate area office and may be submitted at any time during the fiscal year. Funding selections will be made twice annually for fiscal year 1980.

(b) Applications received prior to February 1, 1980 will be considered in the first funding cycle. All other applications will be included in the second funding cycle. Applicants will be notified as to the status of their requests

promptly after funding selections are made.

§ 570.485 Funding considerations.

(a) *General criterion.* The general criterion for funding consideration is that financial settlement of a project cannot be accomplished without grant assistance under this subpart if the project funding needs are in excess of the funding resources, as listed under § 570.483(b). The Secretary may approve a grant in an amount less than the funding assistance established pursuant to § 570.483(b), taking into account the funding priority needs of other applicants and the availability of funds under this Subpart;

(b) *Purpose of grant.* Priority for funding consideration will be determined by status of an applicant as delineated below:

(c) *Funding priority.* Applicants will be given consideration for funding in the following order of priority:

- (1) Non-entitlement applicants.
- (2) Applicants with entitlements that phase out in 1980.
- (3) Entitlement applicants.

§ 570.486 Repayment of categorical program settlement grant.

An applicant receiving a grant under this Subpart shall be required to make repayments up to the amount of the grant from the land proceeds described in § 570.483(c) which are realized, provided that any reasonable expenses incurred in the disposition of such land may be deducted from the proceeds. The repayments shall be made quarterly from proceeds received by the grant recipient. The repayment obligation shall be included in the terms of the closeout agreement notwithstanding the provisions of § 570.804(b)(7)(i) of subpart N;

§ 570.487 General provisions.

(a) The Secretary reserves the right to impose such other conditions in approving categorical program settlement grants as are deemed appropriate in furthering the objectives of this subpart.

(b) Any settlement grants which are found to be in excess of actual needs on financial settlement of the project shall be returned to HUD.

(c) The failure to comply substantially with requirements applicable to this Subpart, and Subpart N, may result in the termination of the grant and the recapture of any remaining funds which have not been obligated by the recipient for the purposes, and in accordance with the requirements, with respect to which the grant was provided.

(d) The provision of a grant under this subpart shall not serve to increase the local share requirements of the project.

(e) The provisions of Subparts J, K, N, and O apply to this subpart, except to the extent they are specifically modified or augmented by the provisions of this subpart.

(Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Issued at Washington, D.C., July 26, 1979.

Robert C. Embry, Jr.,

Assistant Secretary for Community Planning and Development.

Department of Energy

Economic Regulatory Administration

Notice of Intent Regarding Certain Responsibilities of the Department of Energy in Carrying Out Title I of the Public Utility Regulatory Policies Act of 1978

DEPARTMENT OF ENERGY

Economic Regulatory Administration

(Docket No. ERA-R-79-18)

Notice of Intent Regarding Certain Responsibilities of the Department of Energy in Carrying Out Title I of the Public Utility Regulatory Policies Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.
ACTION: Notice of Intent.

SUMMARY: Title I of the Public Utility Regulatory Policies Act of 1978 (PURPA) establishes a number of Federal requirements relating to the regulation of electric utilities and imposes obligations upon State regulatory authorities, certain nonregulated utilities and the Department of Energy (DOE). On April 6, 1979, the Economic Regulatory Administration (ERA) of DOE issued a Notice of Inquiry to solicit public comment on the manner of exercising DOE's authority under PURPA to (a) prescribe voluntary guidelines respecting the Federal standards set forth in PURPA, (b) intervene in State regulatory proceedings, and (c) provide technical assistance to help State regulatory authorities carry out their duties and responsibilities with respect to the standards. This Notice of Intent summarizes the public comments which ERA received and presents ERA's determinations with respect to the exercise of its authority to set guidelines, to intervene, and to provide technical assistance.

FOR FURTHER INFORMATION CONTACT: Dr. Stephen S. Skjei, Division of Regulatory Assistance, Office of Utility Systems, Department of Energy, 2000 M Street, NW., (Room 4016B), Washington, D.C. 20461, telephone (202) 254-8209. Carl Kaplan, Division of Regulatory Proceedings, Office of Utility Systems, Department of Energy, 2000 M Street, NW. (Room 4332B), Washington, D.C. 20461, telephone (202) 634-1800. William L. Webb, Office of Public Information, Economic Regulatory Administration, Department of Energy, 2000 M Street, NW. (Room B-110), Washington, D.C. 20461, telephone (202) 634-2170. Mary Ann Masterson, Office of General Counsel, Department of Energy, 20 Massachusetts Avenue, NW. (Room 3224), Washington, D.C. 20585, telephone (202) 376-9469.

If the persons listed above cannot be reached at their respective telephone numbers, interested parties should

contact the Department of Energy locator at (202) 254-5000.

SUPPLEMENTARY INFORMATION:

I. Background

On April 6, 1979, ERA issued a Notice of Inquiry (44 FR 22022, April 12, 1979) soliciting public comment on the exercise of DOE's authority to prescribe voluntary guidelines respecting standards established by the Public Utility Regulatory Policies Act of 1978 (PURPA), Pub. L. 95-617, 92 Stat. 3117 *et seq.* (16 U.S.C. 2601 *et seq.*); to intervene in State regulatory proceedings; and to provide technical assistance to State regulatory authorities. ERA also sought the views of hundreds of private organizations, State and local agencies, Federal agencies and other interested persons through a special mailing. Testimony was received from three speakers at a public hearing held in Washington, D.C. on May 10, 1979, and from three speakers at a public hearing held in Denver, Colorado on May 17, 1979. Written and oral comments were received from a total of 23 respondents. Among those commenting were State utility commissions, publicly-owned electric utilities, privately-owned electric utilities, and consumers.

In the Notice of Inquiry, ERA posed the following questions concerning the exercise of its authority for voluntary guidelines, intervention, and technical assistance:

Voluntary Guidelines

- (a) Should DOE decline to issue voluntary guidelines?
- (b) What policy areas should be addressed in the guidelines?
- (c) Should there be a single comprehensive guideline issuance, or multiple issuances each addressing specific policy issues?
- (d) How should voluntary guidelines be disseminated?
- (e) How should new issues be brought to the attention of DOE?
- (f) What factors should be considered in selecting issues for guidelines?

Intervention

- (a) Which State proceedings should be considered for intervention?
- (b) Once a proceeding is selected for intervention, what issues should be addressed by DOE?

Technical Assistance

- (a) What kinds of information should DOE provide to State regulatory authorities?
- (b) How should the information be disseminated?
- (c) Should DOE offer on-site, informal assistance?

(d) Should DOE sponsor seminars and workshops?

(e) What services should DOE provide with respect to cost-of-service information?

(f) Should DOE provide assistance to regulated utilities?

This Notice of Intent summarizes the public comments received as a result of the April 6, 1979 Notice of Inquiry and states ERA's intent regarding the exercise of its authority under PURPA to issue voluntary guidelines, to intervene in State regulatory proceedings, and to provide technical assistance.

II. Discussion of Comments and Intended Actions

A. Guideline Issues

(1) *Summary of Comments.* The number of respondents supporting the issuance of guidelines was approximately equal to the number opposed to their issuance. Respondents in favor of the issuance of voluntary guidelines suggested that voluntary guidelines: (a) would be helpful to some State commissions in the process of considering the PURPA standards; (b) should address particular areas as needed; and (c) should be published in the Federal Register as well as being directly communicated to all interested parties. Respondents opposed to the issuance of voluntary guidelines contended that substantial information on PURPA is already available and that the legislation is sufficiently explicit to guide State commissions in their consideration process. The major reasons cited for not issuing voluntary guidelines were that guidelines could (a) restrict the flexibility of State regulatory authorities and nonregulated electric utilities in responding to PURPA in a manner that adequately considers the individual circumstances of each utility and region; (b) delay ongoing State proceedings; and (c) cause States which have already considered PURPA standards to duplicate needlessly their prior efforts in order to reconsider issues in the context of DOE's voluntary guidelines.

Several respondents opposed to the issuance of voluntary guidelines, nonetheless, provided constructive suggestions in the event ERA determined to issue guidelines. Among the suggestions these respondents advanced were that voluntary guidelines should (a) clearly state that they are merely the DOE's opinion on the PURPA standards; (b) be stated in generic terms that provide sufficient decision-making flexibility for case-specific application; (c) reflect DOE's intervention experience; and (d) be

published for public review and comment prior to final adoption.

(2) *Intended Actions.* After a careful evaluation of the comments received and other available information, ERA has decided that it will exercise its discretionary authority under PURPA to promulgate voluntary guidelines for selected PURPA standards. These guidelines will be published as the need for them is identified through the States' annual PURPA reports, ERA's regulatory intervention program, or other ERA assessments of the progress being made at the State level in carrying out PURPA duties and responsibilities.

The purpose of these voluntary guidelines will be to provide State commissions, nonregulated utilities, and other interested parties with DOE's views on issues that DOE believes to be important to the consideration of specific PURPA standards. The guidelines will be designed to contribute to the consideration process of State regulatory authorities and covered nonregulated utilities by (a) identifying factors pertinent to the consideration of a specific standard, especially elements of national policy, that DOE believes should be taken into account; (b) indicating how these factors may relate to other factors entering into consideration of the standard; and (c) describing the important issues that are implicit in such relationships of factors and that need to be addressed when considering the standard. Voluntary guidelines of this nature will be particularly helpful to those regulatory authorities and nonregulated utilities that have not yet considered the PURPA standards.

The guidelines will, of course, be DOE's opinion and the final determinations regarding the appropriateness of each standard in a particular case must ultimately be made by State commissions and nonregulated utilities on a case-by-case basis in light of the evidence presented and applicable legal requirements. The voluntary guidelines will seek to avoid those matters which are unique to an individual jurisdiction, as well as policy issues specific to particular cases. Case-specific policy issues will be addressed by DOE, as appropriate, through intervention in selected regulatory proceedings.

While ERA believes that the process of consideration by State regulatory authorities and covered nonregulated utilities will be enhanced by voluntary guidelines, this Notice of Intent to issue voluntary guidelines should not and is not intended to provide a basis for delaying a State's consideration of, or determinations of appropriateness with

respect to, the PURPA standards. Moreover, any failure by DOE to issue guidelines, or any delay by DOE in issuing guidelines will in no way relieve State commissions or covered nonregulated utilities of their obligations and responsibilities under PURPA. ERA, therefore, encourages State commissions and covered nonregulated utilities to proceed expeditiously in the consideration of the PURPA standards.

(3) *Procedures.* Prior to issuing any voluntary guidelines, ERA will publish proposed voluntary guidelines for comment in the Federal Register and afford a period for receipt of written comments. Public hearings will be scheduled during this period, as appropriate. Final voluntary guidelines will be published in the Federal Register and will be mailed directly to all covered electric utilities and State regulatory authorities identified in the current Final List of (Gas and) Electric Utilities Covered by Titles I and III of the Public Utility Regulatory Policies Act of 1978 and Title II of the National Energy Conservation Policy Act of 1978, initially published in the Federal Register on March 21, 1979 (44 FR 17448).

In this regard, ERA soon will publish proposed voluntary guidelines for solar energy and renewable resources in accordance with the President's directive of June 20, 1979. The proposed voluntary guidelines for solar energy and renewable resources will be available for comment by October 15, 1979.

B. Intervention Issues

(1) *Summary of Comments.* A total of eight respondents commented on the scope of DOE's authority to intervene regarding PURPA standards in State regulatory authority proceedings. On the question of factors to be considered by DOE in selecting State proceedings for DOE intervention, it was suggested that interventions should be limited to issues of national interest, should be precedential in nature, and should assist small utilities. On the question of issues DOE should address in preparing testimony, it was suggested that DOE should focus on controversial issues to clarify the intent of PURPA. One respondent commented that DOE should not intervene, and all other respondents qualified the scope of DOE intervention.

(2) *Intended Actions.* No change in DOE's intervention selection policy appears warranted based on the comments received. In the exercise of its discretionary authority to intervene in State regulatory proceedings and the proceedings of nonregulated utilities, DOE will endeavor initially to foster the

purposes of PURPA and to contribute to informal decisionmaking through comprehensive participation in a limited number of proceedings.

In selecting interventions under PURPA, DOE will continue to assess a variety of factors including, but not limited to: (a) the opportunity for a precedential decision; (b) PURPA objectives; (c) energy policy objectives; (d) regulatory climate; (e) potential receptivity to DOE participation; (f) utility generation and fuel mix; (g) geographical balance; (h) data availability, as well as other issues that may be particularly relevant to each proceeding.

In a related matter, one commenter suggested that DOE might have an inherent advantage as an intervening party in a proceeding where DOE had provided financial or technical assistance to the involved State public utility commission or to the utility company itself. DOE does not perceive that such assistance would create any advantage to DOE, since statutorily authorized financial and technical assistance activities are not case-specific. Assistance under PURPA is given only to assist in carrying out the duties and responsibilities of PURPA and is not intended to influence the outcome of deliberations concerning the PURPA standards. Furthermore, such assistance is always a matter of public record.

(C) Technical Assistance Issues

(1) *Summary of Comments.* A total of 23 respondents commented on various aspects of the technical assistance questions posed in the Notice of Inquiry. Many encouraged ERA to provide some kind of technical assistance to interested parties. Several respondents were in favor of DOE providing on-site informal consultations. Several other respondents suggested that ERA continue to sponsor seminars and workshops.

(2) *Intended Actions.* Based on the comments received, ERA will continue to expand its ongoing efforts to identify State needs in considering and implementing the PURPA standards and to make available appropriate assistance materials, programs and workshops in areas of national or regional interest.

At the present time DOE has taken a number of steps to provide PURPA-related technical assistance to the States. Through the National Regulatory Research Institute (NRRI), ERA is engaged in a program to provide research, technical and analytic support to State regulatory and energy agencies and to nonregulated utilities. This

technical assistance effort presently encompasses 13 National Energy Act related projects and one long-range research project in the area of regulatory economics. NRRI will also conduct several workshops for State public utility commissions on marginal cost pricing, time-of-use rates, and cost-of-service. In addition, other workshops will be conducted by ERA on residential conservation services, cogeneration and small power production, and conservation voltage regulation and other utility energy efficiency measures.

Other related ERA activities include (a) a project to determine the needs of State public utility commissions and utilities for an information clearinghouse, (b) case studies on lifeline rate programs, (c) development of assistance materials for use by State public utility commissions and utilities in complying with PURPA in the areas of load management, master metering, consumer rate information and rate analysis techniques, and (d) grants to State consumer agencies to assist in presentation of the consumer perspective in rate proceedings.

ERA will continue to monitor State needs, to analyze requests for technical assistance and to structure programs to meet those needs.

Issued in Washington, D.C. on August 20, 1979.

Jerry L. Pfeffer,

*Assistant Administrator for Utility Systems,
Economic Regulatory Administration.*

Part VIII

Department of Labor

Employment and Training Administration

Young Adult Conservation Corps

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Parts 675 and 685

Young Adult Conservation Corps.

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rules.

SUMMARY: This document contains final rules for the Young Adult Conservation Corps (YACC). These regulations set forth the requirements for the funding, establishment, location, operation and management of YACC and for the recruitment, referral, selection, and assignment of enrollees. These regulations also set forth the standards for hours and conditions of employment; standards for safe and healthful working and living conditions; wage rates and allowable deductions; and various YACC administrative provisions.

DATE: Effective date of these rules is September 24, 1979.

Comments on the final rules are requested by October 23, 1979.

ADDRESSES: Comments should be addressed to the Assistant Secretary of Employment and Training, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213. Attention: Robert Taggart, Administrator, Office of Youth Programs.

FOR FURTHER INFORMATION CONTACT: Robert Taggart, Administrator, Office of Youth Programs, Telephone: (202) 376-2646.

SUPPLEMENTARY INFORMATION: The Comprehensive Employment and Training Act (CETA) Amendments of 1978 (Pub. L. 95-524), which extended the authorization of the Young Adult Conservation Corps (YACC), was signed into law on October 27, 1978. The YACC remains as Title VIII of CETA, as it was when first enacted as part of the Youth Employment and Demonstration Projects Act (YEDPA) of 1977 (Title I, Pub. L. 95-93) on August 5, 1977. The provisions of Title VIII (YACC) remain basically unchanged, with the following exceptions:

(a) Section 804(a) was amended to add a new subsection (12) to provide for activities in integrated pest management. (See § 685.22(a)(12) of this Part.)

(b) Section 804(b)(1) was amended to include the Fish and Wildlife Conservation Act; 16 U.S.C. 601, with those provisions of Federal law with which work on YACC projects must be

consistent. (See § 685.22(b)(1) of this Part.)

(c) Section 806(a)(2)(B)(i) was amended to add, specifically, as eligible deliverers, the Federal Extension Service and the cooperative extension service of any State with respect to pest management projects described in Section 804(a)(12) of the Act. (See § 685.3(b)(1) of this Part.)

The purpose of the YACC is to provide employment and other benefits to youths who would not otherwise be currently employed, through a period of service during which they engage in completing projects of a public nature on Federal and non-Federal public lands and waters.

Section 126(a) of CETA states that the Secretary may prescribe such rules and regulations as he deems necessary to carry out the purposes of CETA. Pursuant to this authority, the Department of Labor is setting forth in this document the Federal regulations governing the Young Adult Conservation Corps program. The Department of Labor's regulation at 29 CFR 2.7 states that it is the policy of the Department of Labor to use proposed rulemaking procedures when issuing regulations for grant programs. The Secretary, however, in signing this document, is waiving the regulation at 29 CFR 2.7 for the following reasons: (1) these regulations continue the provisions of the existing YACC regulations at 29 CFR Part 97b with minimal substantive changes; and (2) Section 4(a)(2) of the CETA Amendments of 1978 requires that CETA, as reauthorized, be implemented by April 1, 1979. Nevertheless, even though this document contains final rules, the Department, in keeping with the spirit of 29 CFR 2.7 and Executive Order 12044, is requesting comments on these final rules. Changes in these rules may be made at a later date, depending upon the extent and nature of any comments.

The financial and other impact of these regulations is less than specified in DOL criteria for determining when a regulatory analysis should be performed. See 44 FR 5576 (January 26, 1979). Therefore, the preparation of a regulatory analysis is not required for these regulations.

Accordingly, Title 20 of the Code of Federal Regulations, Chapter V, is amended as follows:

1. In § 675.3 add the following table of contents for Part 685:

PART 675—INTRODUCTION OF THE REGULATIONS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

§ 675.3 Table of Contents for Regulations Under CETA.

Authority: Section 126(a)(1) of the Comprehensive Employment and Training Act (29 U.S.C. 801 et seq.) unless otherwise noted.

Subpart A—General

§ 685.1 Purpose and scope.

(a) The purpose of this part is to provide the regulations of the Department of Labor for a Young Adult Conservation Corps (YACC) under Title VIII of the Comprehensive Employment and Training Act.

(b) This part contains the policies, rules and regulations pertaining to the Young Adult Conservation Corps program. The definitions at § 675.4 of this title and the following listed provisions of Part 676 of this title also apply to the YACC to the extent that they do not conflict with the provisions of this Part:

Subpart B

(1) Section 676.30(f), *Termination conditions; participant limitations.*

Subpart C

(2) Section 676.46, *Secretary's responsibilities.*

Subpart D

(3) Section 676.51, *Nondiscrimination and equitable service.*

Subpart E

(4) Section 676.61 through 676.74, pertaining to prevention of fraud and program abuse, except that the words "recipient" or "subrecipient" shall include entities receiving financial assistance from Agriculture and Interior under Title VIII of CETA to perform substantive work for YACC.

§ 685.2 Definitions.

Definitions for abbreviations and major terms used in this part are contained in § 675.4 of this title. The following definitions are specific to this part:

"Act" means the Comprehensive Employment and Training Act.

"Academic credit" means credit for education, training or work applicable toward a secondary school diploma, a post secondary degree, or an accredited certificate of completion, consistent with applicable State law and the requirements of an accredited educational agency or institution.

"Agriculture" means the Secretary of Agriculture or his or her designee.

"Area(s) of substantial unemployment" (ASU) means an area—

(1) which has a population of at least 10,000;

(2)(i) which has an average unemployment rate of at least 6.5 percent for the most recent twelve-month period, as determined by the Bureau of Labor Statistics (BLS); or

(ii) which for fiscal year 1979, and for parts A, B, and C of Title II of the Act for all fiscal years, has an average unemployment rate of at least 6.5 percent for any three consecutive months during the most recent twelve-month period, as determined by the Bureau of Labor Statistics. (Sec. 803(d).)

"Enrollee" means an individual who

has been officially enrolled at the assigned camp/project until the time of his or her official termination from the YACC program. The term "enrollee" is synonymous with "Corps member" as used in the statute and includes individuals in both the Federal and State grant programs.

"Federal program" means those camps/projects of the YACC program which are operated directly by Agriculture and Interior, as distinguished from those operated by States under the State grant program.

"Interagency agreement" means the tripartite agreement, entered into by the Secretaries of Labor, Agriculture and the Interior, which outlines their separate and joint responsibilities for operation and management of the YACC program under the Act. (Sec. 802)

"Interior" means the Secretary of the Interior or his or her designee.

"Labor" means the Secretary of Labor or his or her designee.

"Nonresidential project" means a designated area from which daily work activities are assigned and to/from which nonresidential enrollees commute daily.

"Onboard strength" means the actual number of individuals enrolled in the YACC program or any specified camp, project or other component thereof, at a given time.

"Program direction" means those general and administrative functions and services provided by Agriculture and/or Interior for overall management of the YACC.

"Program operating plan" means the annual plan for operation of the overall YACC program, which is jointly developed by Labor, Agriculture and Interior pursuant to the interagency Agreement. The plan consists of site selections/locations, the proportions of residential and nonresidential enrollee slots, and the budget.

"Refugee/parolee" as used in § 685.10(a) means an alien who is admitted into the United States under the Immigration and Nationality Act, and who is legally authorized to take permanent employment in the United States. (Sec. 803(b)(1)(C))

"Report, financial and program progress" as used in § 685.4(a)(2) and (3), and outlined in § 685.47(c), means that report which is required from Agriculture and Interior under section III C of the YACC Interagency Agreement, and which includes information on enrollee slot capacity, enrollment, and characteristics, as well as financial status, for both the Federal and State grant programs.

"Residential camp" means a YACC facility established and maintained to provide 7-days-a-week, 24-hours-a-day residential support services for enrollees.

"School program, full time" as used in § 685.11(a), means any educational program, attendance at which would prevent full-time participation in scheduled work assignments required by the YACC program.

"Selection, enrollee" means the Agriculture or Interior process of choosing, only from among those candidates referred to them by Labor,

which individuals will be enrolled in the YACC. (Sec. 803(a))

"Selection, site" means the Agriculture or Interior process of choosing, in consultation with Labor, the location at which each YACC residential camp or nonresidential project will be established and operated. (Sec. 804(a))

"State grant program" means those YACC camps/projects operated by States, local units of government, public and/or private nonprofit agencies or organizations, under grants made and administered jointly by Agriculture and Interior with States. In accordance with title VIII, Section 806 of the Act.

"Unemployed" means, for purposes of the YACC program, persons who are without jobs and who want and are available for full-time work.

"YACC" means the Young Adult Conservation Corps program, authorized by Title VIII of the Comprehensive Employment and Training Act.

"Youth population, State's total" means the number of youth in a State ages 16 through 24, consistent with the most current Bureau of Census estimate.

§ 685.3 Eligibility for funds.

(a) Labor shall make an interagency transfer of funds to Agriculture and Interior to carry out their responsibilities in the operation and management of YACC residential camps and nonresidential projects, in accordance with the interagency agreement between Labor, Agriculture, and Interior.

(b) Agriculture and Interior shall make available to governors or their designees 30 percent of the sums appropriated for the YACC for any fiscal year, for the operation of State and local programs. Agriculture and Interior shall apportion such sums on the basis of each State's total youth population, and consistent with the interagency agreement and the regulations of this part, and after consultation with the Governor, may enter into agreements with the Governor or his or her designee for operation of the State grant programs by:

(1) any State agency or institution specifically including the Federal Extension Service and the cooperative extension service of any State with respect to pest management projects described in Sec. 685.22(a)(12) of this title.

(2) any unit of general local government, or any public agency or organization or any private nonprofit agency or organization which has been in existence for at least two years. (Sec. 806)

(c) Regulations promulgated by Agriculture and Interior, covering the State grant program, shall be consistent

with the Department of Labor regulations issued under this part, and the interagency agreement.

§ 685.4 Funding procedures.

(a) Labor shall fund the Federal and State grant YACC program by semiannual, direct transfers of funds and obligational authority to Agriculture and Interior, using Standard Form 1151, "Nonexpenditure Transfer Authorization." (Sec. 809)

(1) After the initial transfer of funds, Labor shall make semiannual transfers of funds, no sooner than 30 days after receipt of each first-quarter financial and program progress report for the midyear transfer, and no later than 30 days before the beginning of subsequent new fiscal years. (See Sec. 685.41 of this part.)

(2) In advance of each third quarter, after the first fiscal year, Labor shall review quarterly financial and program progress reports and use the financial data to provide for adjustments in the midyear semiannual transfer. Such adjustments will include reductions by amounts corresponding to the balances remaining unobligated by Agriculture or Interior, or both, during the fourth quarter of the previous fiscal year, since such balances are considered available resources.

Subpart B—Enrollee Recruitment, Referral, Selection, Assignment, Status

§ 685.10 Eligibility criteria.

To be eligible for YACC, a youth must be:

- (a) unemployed, at the time of application;
- (b) age 16 through 23, inclusive;
- (c) citizens or lawfully admitted permanent residents of the United States or lawfully admitted refugees or parolees; and
- (d) capable of carrying out the work to which they may be assigned. (Sec. 803(b)(1))

§ 685.11 Limitations on enrollment.

(a) Labor shall not refer any youth to Agriculture or Interior who is between the ages of 16 and 18, inclusive unless the applicant gives written assurance on the application form that he or she has not left a full-time school program for the purpose of enrolling in YACC. (Sec. 803(b)(2).)

(b) Agriculture and Interior shall assure that no youth is enrolled in the YACC for a period exceeding 12 months. Such period may be completed in up to three separate enrollments, so long as the youth meets the eligibility requirements at the time of each

separate enrollment. If a youth reaches the age of 24 while enrolled, he or she may remain in the program to complete his or her current period of enrollment. (Sec. 803(e)(1).)

(c) Labor shall not refer any youth if he or she desires enrollment only for the normal periods between school terms. (Sec. 803(e)(2).)

§ 685.12 Recruitment and referral procedures.

(a) Labor shall recruit candidates for YACC through the public employment service, prime sponsors qualified under section 101 of the Act, sponsors of Native American programs qualified under section 302 of the Act, sponsors of migrant and seasonal farmworkers programs under section 303 of the Act, Agriculture and Interior, and such other agencies and organizations as Labor may deem appropriate. (Sec. 803(c).) To the extent feasible, Labor shall refer, through the public employment service, an equitable number of youth for employment, based upon the total youth population of the State, from both sexes, and from all economic and racial classifications. Labor shall transmit to the SESA's Census data reflecting the numbers of youth in each State in these classifications.

(b) State employment security agencies (SESA's), through their local employment service/job service offices (ES/JS), shall enter into nonfinancial agreements with title II prime sponsors and other agencies and organizations, as they deem appropriate, for the recruitment and initial referral of candidates for YACC to the ES/JS. ES/JS offices shall identify prospective applicants from their own files and shall also take and process all applications from interested youth for subsequent referral of eligible applicants to Agriculture/Interior.

(c) Local ES/JS offices shall refer all those candidates who self-certify that they meet the eligibility criteria listed in § 685.10 (a), (b), and (c) to individuals designated by Agriculture and Interior for selection of those to be enrolled. These candidates shall be deemed capable of performing the work which the YACC has available. Such referrals shall include all interested youth, including veterans, from all economic and racial classifications.

(d) After receipt of verification, from a camp or project director, that a youth has been officially enrolled, the ES/JS office shall notify the appropriate recruiting agency.

(e) Labor shall review data to determine whether any adjustment in the recruitment and referral process is necessary to see that, to the extent

feasible, an equitable proportion of male, female, poor, nonpoor, minority, and nonminority youth are being served, based upon the most current Census estimates of total youth population in each State.

§ 685.13 Selection and assignment.

Agriculture and Interior representatives shall:

(a) Notify ES offices when openings are available;

(b) Select potential enrollees only from applications referred by ES/JS;

(c) To the extent feasible, select an equitable number of youth for employment, based upon the total youth population of the State, from both sexes, and from all economic and racial classifications;

(d) Notify selected applicants of the date, time, and place to which they should report for work, and that:

(1) A physical examination is required of each selectee, which either must be obtained at the selectee's expense or may be obtained by the selectee at little or no cost;

(2) They will be required to pay for their own transportation to and from the project or camp. Youths, who need an advance against future salary to pay for transportation to a residential camp may request one from the camp director;

(3) A parental consent will be required for those youth who have not yet reached the age of majority;

(4) They must provide their own clothing, with the exception of certain safety equipment which will be provided.

(e) Assign youth to nonresidential projects within normal commuting distance from their homes, and youth to residential camps as near to their homes as practicable, without regard to State boundaries;

(f) Notify the referring ES/JS office, as soon as possible but no later than thirty days after receipt of application, which applicants have been selected and have reported for employment, and which have not been so selected.

§ 685.14 Federal status of enrollees.

(a) Except as otherwise specifically provided in this part, all YACC enrollees, whether in the Federal program or the State grant program, shall not be deemed Federal employees, and shall not be subject to the provisions of law relating to Federal employment including those regarding hours of work, rates of compensation, leave, unemployment compensation, and Federal employee benefits. (Sec. 805(a).)

(b) For purposes of section 5911 of title 5 of the United States Code, relating to allowances for living quarters,

enrollees whose housing is provided by the Federal Government shall be deemed employees of the United States within the meaning of the term "employee" as defined in that section, and provisions of that section shall apply. (Sec. 805(a)(4).)

(c) For purposes of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) and title II of the Social Security Act (42 U.S.C. 401 et seq.), enrollees, including State grant program enrollees, shall be deemed employees of the United States, and any service performed by a person as an enrollee shall be deemed to be performed in the employ of the United States. (See 805(a).)

(d) For purposes of chapter 171 of title 28 of the United States Code, relating to tort claims procedures, enrollees, including State grant program enrollees, shall be deemed employees of the United States within the meaning of the term "employee of the Government" as defined in section 2671 of title 28, United States Code, and provisions of that chapter shall apply. (Sec. 805(a)(3).)

(e) For purposes of subchapter 1 of chapter 31 of title 5 of the United States Code, relating to compensation to Federal employees for work injuries, enrollees, including State grant program enrollees, shall be deemed employees of the United States within the meaning of the term "employee" as defined in section 8101 of title 5, United States Code, and provisions of that subchapter shall apply except that the term "performance of duty" shall not include any act of an enrollee while absent without authorization from his or her assigned post of duty, but shall include time spent participating in an activity (including an activity while on pass or during travel to or from such post of duty) authorized by or under the direction of YACC program staff. (Sec. 805(a)(2).)

(1) Residential enrollees are generally considered under FECA to be Federal employees from the time each begins Government authorized travel to the assigned YACC camp, to the time each completes Government authorized travel after termination from the program. During this period, residential enrollees are generally considered, under FECA, to be in "performance of duty" at all times, during any and all of their activities, 24 hours a day, 7 days a week, except when they are absent without authorization. Whether a residential enrollee is in "performance of duty" shall be determined by the Office of Workers' Compensation Programs (OWCP).

(2) Nonresidential enrollees, after official enrollment, are generally considered, under FECA, to be in

"performance of duty" as Federal employees from the time they arrive daily at the designated area from which activities are assigned, until they leave such designated area or activity. Nonresidential enrollees are generally not covered by FECA while commuting between a designated area/authorized activity and their residence. Whether a nonresidential enrollee is in "performance of duty" shall be determined by OWCP.

§ 685.15 Federal Employees' Compensation procedures.

(a) Whenever a youth is injured, develops an occupationally related illness, or dies, the camp/project director shall immediately comply with the procedures set out in the Employment Standards Administration regulations at 20 CFR Chapter 1. The camp/project director shall also see that a thorough investigation of the circumstances, and a medical evaluation, are made, and shall see that required forms are filed with the appropriate OWCP district office.

(b) If a youth dies, the camp or project director, in addition to making proper notifications, in accordance with procedures established by Agriculture and/or Interior, shall:

(1) Notify the appropriate district office of OWCP of the death and the circumstances surrounding it, and file appropriate forms with that office; (Sec. 805(a)(2) of the Act);

(2) Inform the next of kin of any benefits which may be available from Federal Employees' Compensation. The camp/project director shall notify them that the Government shall pay for expenses involved in the preparation and transportation of the remains to a mortuary in the area selected by the next of kin, but not for other funeral expenses;

(3) Consult the decedent's family as to the final disposition of the remains before any final action is taken in this regard; and

(4) If the next of kin refuses to accept the remains, arrange for burial at a site close to the camp/project and at a cost not to exceed the amount authorized in section 8134(a) of the Federal Employee's Compensation Act (FECA).

§ 685.16 Tort claims.

(a) In the event an enrollee is alleged to be involved in the damage, loss or destruction of the property of others or of causing personal injury to or the death of other individual(s) while in the performance of duty, claims may be filed by the owner(s) of the property, the injured person(s), or by a duly authorized agent or legal representative

of the claimant to the camp/project director who shall collect all of the facts and submit the claim for a decision to the appropriate officials of Agriculture and Interior for processing pursuant to the tort claim procedures established by those departments.

(b) Tort claims shall be made on Standard Form 95, the Claim for Damage or Injury form or a similar document, supported by necessary justification.

§ 685.17 Enrollee claims for lost, stolen or damaged personal property.

(a) Agriculture or Interior may pay claims to enrollees for lost, damaged, or stolen personal property, up to a maximum of \$200, when such loss is not due to the negligence of the enrollee. Enrollees shall always be compensated for losses when they are the result of a natural disaster or when the enrollee's property is in the protective custody of the camp director. The Camp/project director shall file such claims with Agriculture or Interior for a determination on the claim and promptly notify the enrollee of the determination.

Subpart C—Program Operation

§ 685.20 Camp/project site selection, location.

Consistent with the interagency agreement, Agriculture and Interior, in consultation with Labor, shall select the site of each residential camp and nonresidential project.

(a) Nonresidential projects and those residential camps providing for nonresidential participation shall be located within normal commuting distances from the geographic centers of areas of substantial unemployment designated by the Secretary of Labor. Labor shall annually provide Agriculture and Interior with a listing of areas of substantial unemployment.

(b) To the maximum extent feasible, residential camps shall be located in areas where existing residential facilities for the enrollees are available. Whenever appropriate, existing but unoccupied or underutilized Federal, State, or local government facilities and equipment shall be utilized for YACC camps with the approval of the Federal agency, State or local government involved. (Sec. 804(d)(2))

§ 685.21 Camp/project operation and management.

(a) In keeping with the interagency agreement, Agriculture and Interior shall, in the case of the Federal program, have responsibility for, and, in the case of the State grant program, issue guidelines covering:

(1) The identification of a director or supervisor in charge of each YACC residential camp or nonresidential project;

(2) The staffing, operation and management of each YACC camp and project;

(3) Selection of enrollees;

(4) Determination of enrollee's work assignments, subject to the health, safety, and work standards established by Labor in §§ 685.22, 23, 24 and 25 of this subpart;

(5) Enrollee discipline;

(6) Enrollee termination; and

(7) Operating an effective program at each camp and project.

(b) Agriculture and Interior may provide for such transportation related to camp and/or work project operations, lodging, subsistence, medical treatment, and other services, supplies, equipment, and facilities as they may deem appropriate to carry out the purposes of this part, consistent with the regulations mentioned in paragraph (a)(4) of this section, regarding health, safety and work standards. (Sec. 804(d)(1))

§ 685.22 Work projects and assignments.

(a) YACC enrollees shall perform work on projects in such fields as:

(1) Tree nursery operations, planting, pruning, thinning, and other silvicultural measures;

(2) Wildlife habitat improvements and preservation;

(3) Range management improvement;

(4) Recreation area development, rehabilitation, and maintenance;

(5) Fish habitat and culture measures;

(6) Forest insect and disease prevention and control;

(7) Road and trail maintenance and improvements;

(8) General sanitation, cleanup and maintenance;

(9) Erosion control and flood damage;

(10) Drought damage measures; and

(11) Other natural disaster damage measures. (Sec. 804(a))

(12) Integrated pest management, including activities to provide the producers of Agricultural commodities with information about the appropriate amount of chemical pesticides which when used in conjunction with nonchemical methods of pest control (a) will provide protection against a wide variety of pests, (b) will preserve to the greatest extent possible the quality of the environment, and (c) will be cost effective.

(b) Agriculture and Interior shall undertake to assure that projects on which work is performed under this part are consistent with the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the

National Forest Management Act of 1976, and such other standards relating to such projects as the Secretaries of Agriculture and Interior shall prescribe, consistent with other provisions of Federal law (including the Fish and Wildlife Conservation Act; 16 USC 601). (Sec. 804(b)(1))

(c) To the maximum extent practicable, Agriculture and Interior shall establish projects that:

(1) Are labor-intensive;

(2) Are projects for which work plans can be readily developed;

(3) Are able to be initiated promptly;

(4) Are productive;

(5) Are likely to have a lasting impact both as to the work performed and the benefit to the youths participating;

(6) Provide work experience to participants in skill areas required for the projects; and

(7) Are similar to activities of persons employed in seasonal and part-time employment in agencies such as the National Park Service, United States Fish and Wildlife Service, Bureau of Reclamation, Bureau of Land Management, Bureau of Indian Affairs, Forest Service, Bureau of Outdoor Recreation, and Soil Conservation Service. (Sec. 804(c))

(d) Agriculture and Interior shall assure that YACC program activities will not result in the displacement of employed workers, or impair existing contracts for services, or result in the substitution of YACC funds for other funds in connection with work that would otherwise be performed.

(e) Agriculture and Interior shall place individuals employed as enrollees into jobs which will diminish the backlog of relatively labor-intensive projects which would otherwise be carried out if adequate funding were made available. (Sec. 804(b)(2))

(f) Agriculture and Interior shall see that YACC enrollees do not, at the same time, share common facilities or property, or work with members of the Job Corps, under title IV of the Act, except in emergency situations, as outlined in paragraphs (g) and (h) of this section.

(g) Agriculture and Interior may authorize and utilize enrollees who are at least 18 years old to provide assistance and to perform work in emergency disaster situations. Camp/project directors may ask enrollees to volunteer, but may not require them to participate while any natural disaster is occurring. They may, however, require enrollees to perform work on damage which has been caused by such disasters. In determining the eligibility of enrollees for performing such work, camp/project directors shall follow

regular Agriculture and Interior policies and procedures, insofar as they are consistent with health, safety, and work standards established by Labor in sections 685.22, 23, 24, and 25 of this subpart. Agriculture and Interior shall arrange, to the extent feasible, for any added expenses consequent to such assistance to be borne by the benefiting organization. If funding is not available from the benefiting organization, Agriculture and Interior may use YACC operational funds to provide the emergency assistance, subject to the availability of such funds.

(h) Camp and project directors shall see that no enrollee participates in emergency relief efforts:

(1) In connection with strikes or labor stoppages; or

(2) On private property except as incidental to authorized emergency work as outlined in paragraph (g) of this section.

(i) Camp and project directors shall see that the assignment of enrollees under 18 years of age to work activities is in compliance with the Hazardous Occupation Orders issued pursuant to the Fair Labor Standards Act and set forth at 29 CFR 570.50 et seq.

§ 685.23 Safety and health.

(a) Agriculture and Interior shall assure that enrollees are not required or permitted to work or receive services in buildings or surroundings or under conditions which are unsanitary, hazardous, or lack proper ventilation. Camp and project directors shall see that such work or services are conducted or provided in accordance with appropriate Agriculture or Interior policies and procedures, and are consistent with the standards set forth in the regulations under the Occupational Safety and Health Act at 29 CFR Part 1910, 1926, and 1960 subpart B.

(b) Agriculture and Interior shall conduct safety and health inspections of every residential camp and work project area connected therewith, at least annually, consistent with the requirements in 29 CFR 1960.26(d).

(c) Camp/project directors shall issue such items of protective and safety clothing and equipment to enrollees as are necessary and appropriate to ensure a maximum of safety in all work situations. Camp/project directors shall also see that proper use of such clothing and equipment is taught to enrollees and enforced. Enrollees are expected to provide all other clothing.

(d) Camp/project directors shall provide complete safety orientation to enrollees in all work situations to alert

them to any hazards to which they may be exposed. (Sec. 805(b)(3))

§ 685.24 Residential camp living conditions.

(a) Residential camp directors shall provide for residential support facilities and services which ensure healthful and secure living conditions, 7 days a week, 24 hours a day.

(b) Agriculture and Interior shall assure that all residential facilities are well maintained and shall comply with applicable Federal, State, and local safety, health, and housing codes for multipurpose group residences.

(c) Agriculture and Interior shall see that adequate supervision and assistance are provided which are adequate to ensure the safety and health of the enrollees. (Sec. 805(b)(3))

§ 685.25 Enrollee wages and hours of work.

(a) Agriculture and Interior shall assure that each enrollee, in both the Federal and State grant programs, is paid at the same hourly rate, which shall be at the Federal minimum rate specified in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended.

(b) Notwithstanding paragraph (a) of this section Agriculture and Interior shall provide for an additional cost-of-living allowance for enrollees in the State of Alaska, not to exceed 25 percent of the Federal wage rate.

(c) As an incentive, camp and project directors may authorize incremental increases, above the minimum wage specified in paragraphs (a) and (b) of this section, for a limited number of enrollees, to reflect additional responsibilities or competencies. For this purpose, two promotional categories may be established: (1) Enrollee Leader, and (2) Enrollee Assistant Leader. No more than 15 percent of the enrollment of any individual camp or project shall be given such increases. For each enrollee thus compensated, the wage increase shall not exceed 50 percent, nor be less than 15 percent of the applicable basic hourly minimum wage, as outlined in paragraphs (a) and (b) of this section.

(d) Camp and project directors shall reduce enrollee wages for each hour of unexcused absence.

(e) Camp directors may require enrollees assigned to residential camps to assume responsibility for housekeeping and maintenance duties. Such duties shall not be considered compensable, unless scheduled during the regular work day, in which case enrollees shall be paid at the same rate as for regular work assignments.

(f) Camp and project directors shall see that:

(1) Only those enrollees who are qualified in accordance with § 685.22(g) are allowed to participate in fire suppression activities;

(2) Such enrollees are used only to supplement compensated firefighters, and are paid at the rates set by Agriculture and Interior as established in pay plans for emergency firefighters, in accordance with established agency policies, procedures and practices;

(3) No YACC enrollee is required to work for a greater number of hours per day than other firefighters.

(g) Agriculture and Interior shall see that no enrollee is required to work for more than 8 hours per day or 40 hours per week, except that camp and project directors may authorize overtime, which shall not exceed 10 such hours per week, in which event they shall pay them at the same rate as specified in paragraph (a) and (b), or (f)(2) when applicable, of this section. (Sec. 805(b))

§ 685.26 Allowable deductions from enrollees' wages.

(a) Agriculture and Interior shall see that enrollees assigned to residential camps are charged for food and lodging, at the rate of \$3.00 per day, while in residence. Project and camp directors shall arrange for payment of such charges by payroll deduction. Agriculture and Interior shall see that such deductions remain in the applicable appropriation or fund.

(b) Residential camp directors may arrange, through payroll deductions, for the reimbursement, by enrollees, of initial travel advances provided to them in the circumstances outlined in § 685.13(d)(2).

(c) Camp and project directors shall see that:

(1) Income taxes are withheld from enrollee wages pursuant to the Federal Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) (Sec. 805(a)(1)), and such State income tax laws as are applicable, and that any forms required to effect income tax deductions or withholding exemptions are provided to and completed by each enrollee; and

(2) Wage and tax statements are provided to enrollees.

(d) Deductions shall not exceed the limit as set forth in title III of the Consumer Credit Protection Act (15 U.S.C., 1671 et seq.).

§ 685.27 Enrollee payroll procedures.

Agriculture and Interior shall assure that the payroll procedures for both the Federal and State programs are the same. State and local grantees shall utilize the payroll forms used by the

Federal Government for payment of enrollees in accordance with the regulations/instructions issued by Agriculture or Interior, as appropriate.

§ 685.28 Enrollee leave.

(a) Agriculture and Interior shall provide enrollees with paid annual leave at a rate of 4 hours for every full pay period which shall consist of two normal work weeks. Accrual shall commence at the beginning of the first full pay period after the day of official enrollment, and shall end on the date of official termination. Such leave may be accrued up to a maximum of 13 days for 52 weeks of uninterrupted enrollment. Enrollees may use accrued leave at any time, subject to the approval of the camp/project director, but shall use all accrued leave prior to each formal termination. The date of formal termination shall be the final date upon which the youth is eligible to receive pay, whether this is a work day or an accrued but unused leave day.

(b) The camp or project director may grant administrative leave with pay, at his or her discretion, for enrollee participation in job search and employment development activities. Such leave with pay is to be counted as time in employment.

(c) The camp or project director may grant emergency or administrative leave, without pay, at his or her discretion. Such leave without pay is not counted as time in employment.

(d) Camp and project directors shall pay enrollees for all official holidays, if they are in a pay status for 8 hours on the workdays immediately preceding and following the holiday. Approved leave with pay shall count as time in employment for official paid holidays. Such holidays shall not count as annual leave. (Sec. 805(b))

§ 685.29 Resolution of grievances and complaints filed by enrollees.

Agriculture and/or Interior shall establish plans and procedures, subject to approval by Labor, for resolving any issues or complaints filed by youths, from the time at which their referrals are received from ES/JS to the time of formal termination. These plans and procedures shall encompass issues or complaints such as those regarding adverse action, civil rights, equal employment opportunity, enrollment or upgrading which arise between their Departments and any enrollee. Such procedures shall provide the enrollee with:

- (a) An opportunity for an informal conference to resolve the issue;
- (b) A notice setting forth the grounds for any adverse action proposed to be

taken against him or her and giving him or her an opportunity to respond;

(c) An opportunity for a formal hearing and, if the enrollee is not satisfied, with an opportunity for an appeal; and

(d) An offer of assistance in the preparation for hearings and appeals. (Sec. 802)

§ 685.30 Cooperation with agencies and institutions.

(a) Agriculture and/or Interior shall, to the extent feasible, arrange for local linkages with educational systems, CETA and other employment and training programs, employment service offices, local apprenticeship sponsors and information centers, and employers, in order to arrange for the provision of available services to enrollees, both during nonwork hours while enrolled, and after termination from YACC. Camp/project directors shall be encouraged to establish procedures to ensure that enrollees are made aware of established linkages and related information and opportunities.

(b) Camp and project directors shall notify appropriate local ES/JS offices regarding enrollee status, in advance of the end of the enrollment period or upon termination and shall, to the extent feasible, assist the enrollee in making contact with ES/JS or other organizations to enhance the possibilities for placement.

(c) Labor shall work with the Department of Health, Education, and Welfare to make suitable arrangements whereby academic credit may be awarded by educational institutions and agencies for competencies derived from work experience obtained through the YACC program. Labor shall also encourage camp and project directors, through Agriculture and Interior, to make necessary arrangements with local education agencies so that academic credit for such work experience may be granted. (Sec. 804(e))

Subpart D—Administrative Provisions

§ 685.40 Interagency agreement.

Labor shall administer the YACC program through an interagency agreement with Agriculture and Interior. (Sec. 802)

§ 685.41 Annual program operating plan.

(a) In advance of each fourth fiscal quarter, Labor shall review the quarterly financial and program progress reports received during the fiscal year, to form the basis for joint interagency development of the program operating plan for the next fiscal year, as outlined in this section.

(b) Labor, Agriculture, and Interior shall jointly begin the development of an annual program operating plan at least 90 days in advance of the beginning of each fiscal year. This plan shall include:

- (1) The camp/project site selections/locations arrived at in consultation, in accordance with the interagency agreement;
 - (2) The proportions of residential and nonresidential slots; and
 - (3) The budget for the new fiscal year.
- (c) Labor shall approve the proportion of residential and nonresidential slots, and the budget before transfer of funds can occur.

For the initial and subsequent budgets, the cost per unit (per-slot for fiscal years 1978 and 1979, and per-enrollee-year for subsequent years) will be reflective of all programs costs, including, but not limited to: camp/project operating costs; enrollee wages and benefits; recruitment, selection, and placement support costs; transportation; annual capital replacement costs; program direction expenses; and startup costs, including those for rehabilitation, construction, purchase of real property, lease(s), equipment and furnishings, vehicles, transfers of station, and initial planning.

§ 685.42 Directives, guidelines, controls, and records.

Labor, Agriculture and Interior shall establish procedures to ensure that operational directives, guidelines, controls, and records of the YACC program are established, promulgated, and maintained, in accordance with their established policies and procedures, and consistent with the requirements of this part.

§ 685.43 Enrollee records.

Camp and project directors shall establish and maintain enrollee records, according to regular Agriculture and/or Interior policies and procedures, subject to their regulations under the Freedom of Information Act, and the Privacy Act of 1974.

§ 685.44 Financial management.

Based upon each annual program operating plans, Agriculture and/or Interior shall assume financial responsibility, authority and accountability for all the camps and projects respectively operated under the YACC program within the total program costs per slot or enrollee year approved by Labor.

§ 685.45 Property management.

Agriculture and/or Interior are responsible for real and personal property procurement, management, and

accountability. When accountable property, other than real property, is declared excess to the needs of the YACC program, Labor shall be given first preference for use of the property in other Labor programs.

§ 685.46 Procedures for resolving complaints.

(a) Agriculture and Interior shall receive and resolve complaints concerning alleged violations of their responsibilities as outlined in these regulations and the Act from any person or any unit of Federal, State, or local government.

(b) All such complaints shall be filed with Agriculture or Interior according to procedures established by those agencies.

§ 685.47 Maintenance of records.

Agriculture and Interior shall ensure that sufficient auditable and otherwise adequate records are maintained to support the expenditure of all funds under the Act.

§ 685.48 Reporting requirements.

Agriculture and Interior shall compile and submit to the Department of Labor, Office of Youth Programs, the reports listed below, with data for Federal and State grant programs separately delineated:

(a) A copy of the monthly report on budget execution (Standard Form 133), as submitted to the U.S. Treasury Department;

(b) A monthly report of onboard strength, which shall be due no later than 15 calendar days after the end of each month and which shall include the actual number of individuals enrolled on the last day of the reporting month;

(c) A quarterly financial and program progress report, in accordance with the format outlined in Appendix No. 1 of the YACC Interagency Agreement, which shall be due no later than 30 calendar days after the end of each quarter, and shall consist of:

- (1) A Federal program summary, supported by individual reports of the Federal program by State;
- (2) A State grant program summary, supported by individual State reports;
- (3) A combined Federal/State summary report.

§ 685.49 Assessment/monitoring.

(a) Agriculture and Interior shall plan and conduct regularly scheduled onsite assessments and such other interim visits as are necessary to monitor camp/project performance, and to insure effective accomplishment of YACC program objectives by all levels of management charged with program responsibilities.

(b) Labor, in consultation with Agriculture and/or Interior, may participate in any onsite monitoring or assessment effort.

§ 685.50 Overall program evaluation.

Labor, in accordance with a plan developed in consultation with Agriculture and Interior, shall fund and conduct such evaluations of the YACC program as deemed necessary to determine whether the program is meeting statutory objectives.

Signed at Washington, D.C., this 20th day of August, 1979.

Ray Marshall,
Secretary of Labor.

NUCLEAR REGULATORY COMMISSION**10 CFR Parts 40, 150****Uranium Mill Tailings Licensing****AGENCY:** Nuclear Regulatory Commission.**ACTION:** Final Regulations with request for comments.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to conform to the requirements of the Uranium Mill Tailings Radiation Control Act of 1978 and to the standards set forth in the draft Generic Environmental Impact Statement Uranium Milling. The bulk of these regulations are being published in proposed form. (See proposed rules published elsewhere in this part of the Federal Register.) The Commission finds it necessary, however, to issue as immediately effective a temporary general license to authorize the possession and storage of mill tailings or wastes to prevent existing milling operations in both Agreement and non-Agreement States from being in technical violation of the Atomic Energy Act of 1954, as amended by the Uranium Mill Tailings Radiation Control Act of 1978. The immediately effective regulations relating to the general license, such as amendments to the definition of "byproduct material," and to the coverage of tailings in Agreement States, serve two functions. They reflect the NRC's legal interpretation of the new Act necessitating the general license and clarify the application of the general license. Accordingly, these regulations must also be made immediately effective.

DATES: Effective date: August 24, 1979. Comments on or before October 24, 1979.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Docketing and Service Branch. Copies of comments on these amendments may be examined in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Don F. Harmon, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone 301/433-5910) or Hubert J. Miller, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone 301/427-4103).

SUPPLEMENTARY INFORMATION: These immediately effective regulations are closely related to the proposed rules implementing the Uranium Mill Tailings Radiation Control Act of 1978 and the draft Generic Environmental Impact Statement on Uranium Milling. Thus, the two sets of amendments should be read together. (See proposed rules published elsewhere in this part of the Federal Register.)

On May 17, 1979, the Commission met to determine the issue of the timing of the effectiveness of certain requirements of the Uranium Mill Tailings Radiation Control Act of 1978. At this meeting it was determined that the NRC has immediate licensing authority over mill tailings, now defined as section 11e(2) byproduct material in the Atomic Energy Act of 1954, as amended; that the new requirements for agreement state regulation of tailings and milling operations will not take effect until three years after the date of enactment of the mill tailings legislation; and that during that three-year interim, the legislation requires that NRC assume concurrent jurisdiction over tailings in both Agreement and non-Agreement States. The Commission also determined that the definition of section 11e(2) byproduct material includes the above-ground wastes from in situ extraction operations.

New § 40.26 is added to 10 CFR Part 40 to establish a temporary general license to authorize the possession and storage of mill tailings or wastes. The general license will prevent existing milling operations with valid licenses from being in technical violation of the Atomic Energy Act of 1954, as amended by the Uranium Mill Tailings Radiation Control Act of 1978. The Commission believes this general license is consistent with the Congressional intent to implement the mill tailings legislation in a manner designed to minimize unnecessary disruption. As provided in section 40.20 of 10 CFR Part 40, a general license is effective without filing of an application or the issuance of licensing documents to particular persons. This general license is applicable only to persons who possess appropriate specific licenses issued by the Commission or Agreement States to authorize uranium milling activities. The authority to possess, use, or own tailings under the general license shall expire upon the expiration or renewal of the underlying NRC or Agreement State specific milling license.

The Commission notes that all of its existing active milling licenses have been reviewed or are being reviewed under the provisions of the National

Environmental Policy Act (NEPA). All NRC licenses presently contain, or will contain, requirements for tailings reclamation, mill and site cleanup, and surety arrangements to cover these costs. For the most part, present requirements and conditions are substantially the same as the requirements set forth in the proposed amendments concerning uranium milling, and most milling operations in non-Agreement States have already committed to specific plans for decommissioning and tailings disposal meeting the new requirements. NRC uranium milling licenses that have been granted under the NEPA process during the period over which the NRC's generic environmental impact statement or uranium milling was being developed were issued with the express condition that approved waste generating processes and mill tailings management practices were subject to revision in accordance with the conclusions of the final generic environmental impact statement and any related rulemaking. In the process of reevaluating approved mill operator plans upon expiration or renewal to meet the new regulatory requirements, the NRC staff plans to incorporate into applicable specific licenses the authority to possess and store byproduct material covered by this general license.

Under the provisions of this general license, Agreement State licensees will not be required to obtain a specific NRC license until such time as the licensee's Agreement State specific license expires or is renewed. The Commission notes in this regard that there presently exist Agreement State regulations and requirements governing the control of tailings in Agreement States that appear adequate to protect the public health and safety during the interim period until such licenses expire or are renewed. At such time as each Agreement State license expires or is renewed, it will be necessary at least until November 1, 1981, for the Agreement State licensee to apply for and obtain a specific NRC license covering the possession of byproduct material. The Commission intends to review each application under the NEPA process and impose any necessary requirements as may be necessary to protect the public health and safety. Given that tailings piles in Agreement States covered by this general license have been in existence for several years, the Commission does not believe that the relatively small incremental increase to such piles during the interim time until licenses expire or are renewed will foreclose available alternatives for

reducing or avoiding adverse environmental and other effects or result in irreversible or irretrievable commitments of sources. The Commission has concluded that the issuance of the general license is not a major Federal action significantly affecting the quality of the human environment and as such does not require an environmental impact statement. The Commission further notes in this regard that the authority to possess, own, or receive title to tailings now defined as byproduct material under this general license is subject to NRC remedial orders as necessary to protect the public health and safety and to correct any situations in which events might require more immediate Commission attention to insure proper control of tailings.

Section 40.4 of 10 CFR Part 40 is amended to include a new definition of "byproduct material." This amendment, which includes uranium and thorium mill tailings as byproduct material licensable by the Commission, is required by the recently enacted Uranium Mill Tailings Radiation Control Act. Discrete above-ground wastes from in situ or solution extraction are covered by this definition, although the underground ore bodies depleted by the extraction process are not covered. The Commission considered amending 10 CFR Part 30, "Rules of General Applicability to Licensing of Byproduct Material," to specify licensing requirements concerning tailings, but has concluded that it is more appropriate to amend 10 CFR Part 40. The legislative record of the mill tailings legislation makes it clear that the expanded definition of byproduct material covers only mill tailings or wastes, which are exclusively associated with 10 CFR Part 40 licensing matters.

The amendments to 10 CFR Part 150 are to conform to Part 40's new definition of byproduct material and to Part 40's coverage of such byproduct material in Agreement States for the three years following enactment of the Uranium Mill Tailings Radiation Control Act of 1978. This is in accordance with the statute's provisions requiring NRC licensing of tailings in Agreement States for the three-year interim. Pursuant to the mill tailings legislation, however, Agreement States may exercise concurrent jurisdiction over tailings and wastes for the three-year interim.

The Commission finds that because the regulations supporting the general license must be effective immediately so as to prevent existing milling operations from being in technical violation of the

Atomic Energy Act, good cause exists pursuant to 5 U.S.C. 553 to waive the 30-day comment period, as impracticable and contrary to the public interest, and make the amendments to 10 CFR 40.1, 40.2a, 40.3, 40.4, 40.26, 150.3, and 150.15 immediately effective. The Commission notes in this regard that informal written comments on this matter were solicited and received from industry, environmental groups, and several states. (These comments may be found in the Commission's public document room in a memorandum dated May 9, 1979, from the Executive Legal Director to the Commission entitled "Staff Response to the Commission Request for Further Information Regarding SECY-79-88 'Timing of Certain Requirements of the Uranium Mill Tailings Radiation Control Act of 1978'.") Comments on these amendments are invited, however, and the new regulations remain subject to further modification in response to such comments.

(Secs. 11e(2), 81, 83, 84, 161b, 174; Pub. L. No. 83-703, 68 Stat. 948 et seq. (42 U.S.C. 2014e(2), 2111, 2113, 2114, 2201b, 2021)).

Dated at Washington, D.C. this 22nd day of August 1979.

For the Nuclear Regulatory Commission.
Samuel J. Chilk,
Secretary of the Commission.

Regulatory Changes

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, the Uranium Mill Tailings Radiation Control Act of 1978, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapters 40 and 150, Code of Federal Regulations are published as a document subject to codification.

1. § 40.1 of 10 CFR 40 is amended by revising paragraphs (a) and (b) as follows:

§ 40.1 Purpose.

(a) The regulations in this part establish procedures and criteria for the issuance of licenses to receive title to, receive, possess, use, transfer, deliver, or import into or export from the United States source and byproduct materials, as defined in this Part, and establish and provide for the terms and conditions upon which the Commission will issue such licenses. The regulations in this Part do not establish procedures and criteria for the issuance of licenses for material covered under Title I of the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. 3021).

(b) The regulations contained in this part are issued pursuant to the Atomic Energy Act of 1954, as amended (68 Stat.

919), Title II of the Energy Reorganization Act of 1974 (88 Stat. 1242), and Title II of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901).

2. § 40.2a of 10 CFR 40 is added to read as follows:

§ 40.2a Temporary coverage in Agreement States.

Until November 8, 1981, the regulations in this Part shall govern the Commission's licensing of byproduct material as defined in this Part in Agreement States.

3. § 40.3 of 10 CFR 40 is revised to read as follows:

§ 40.3 License requirements.

No person subject to the regulations in this Part shall receive title to, own, receive, possess, use, transfer, deliver, or import into or export from the United States byproduct material as defined in this Part or any source material after removal from its place of deposit in nature, except as authorized in a specific or general license issued by the Commission pursuant to the regulations in this Part.

4. § 40.4 of 10 CFR 40 is amended by revising paragraphs 40.4(a-1), 40.4(e), and 40.4(l) and adding new paragraphs 40.4(b-1) and 40.4(p).

§ 40.4 Definitions.

(a-1) "Byproduct Material" means the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from uranium solution extraction processes. Underground ore bodies depleted by such solution extraction operations do not constitute "byproduct material" within this definition.

(b-1) "Department of Energy" means the United States Department of Energy or its duly authorized representative.

(e) "Persons" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission or the Department of Energy except that the Department of Energy shall be considered a person within the meaning of the regulations in this Part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to section 202 of the Energy Reorganization Act of 1974 (88 Stat.

1244) and the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. 21), any State or any political subdivision of, or any political entity within a State, any foreign government or nation or any subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent or agency of the foregoing.

(1) With the exception of "byproduct material" as defined in Section 11e. of the Act, other terms defined in Section 11 of the Act shall have the same meaning when used in the regulation in this Part.

(p) "Uranium Milling" means any activity that results in the production of byproduct material as defined in this Part.

5. § 40.26 of 10 CFR 40 is added to read as follows:

§ 40.26 General license for possession and storage of byproduct material as defined in this Part.

(a) A general license is hereby issued to receive title to, own, or possess byproduct material as defined in this Part without regard to form or quantity.

(b) The general license in paragraph (a) of this section applies only:

(1) In the case of licensees of the Commission, where activities that result in the production of byproduct material are authorized under a specific license issued by the Commission pursuant to this Part, to byproduct material possessed or stored at an authorized disposal containment area or transported incident to such authorized activity; Provided, that authority to receive title to, own, or possess byproduct material under this general license shall terminate when the specific license for source material expires, is

¹ The Department of Energy facilities and activities identified in section 202 are:

(1) Demonstration Liquid Metal Fast Breeder reactors when operated as part of the power generation facilities of an electric utility system, or when operated in any other manner for the purpose of demonstrating the suitability for commercial application of such a reactor.

(2) Other demonstration nuclear reactors, except those in existence on January 19, 1975, when operated as part of the power generation facilities of an electric utility system, or when operated in any other manner for the purpose of demonstrating the suitability for commercial application of such a reactor.

(3) Facilities used primarily for the receipt and storage of high-level radioactive wastes resulting from licensed activities.

(4) Retrieval Surface Storage Facilities and other facilities authorized for the express purpose of subsequent long-term storage of high-level radioactive waste generated by the Department of Energy, which are not used for, or are part of, research and development activities.

renewed, or is amended to include a specific license for byproduct material as defined in this Part; or

(2) In Agreement States until November 8, 1981, where activities that result in the production of byproduct material are authorized under a specific license issued by the Agreement State on or before May 17, 1979, to byproduct material possessed, or stored at an authorized disposal containment area or transported incident to such authorized activities; Provided, that authority to receive title to, own, or possess byproduct material under such general license shall terminate when such Agreement State license expires or is renewed, whichever first occurs.

(c) The general license in paragraph (a) of this section is subject to:

(1) The provisions of Parts 19, 20, 21, and §§ 40.1, 40.2, 40.2a, 40.3, 40.4, 40.5, 40.8, 40.41, 40.46, 40.61, 40.62, 40.63, 40.65, 40.71, and 40.81 of Part 40 of this Chapter; and

(2) The documentation of daily inspections of tailings or waste retention systems and the immediate notification of the appropriate NRC regional office as indicated in Appendix D of 10 CFR Part 20, or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could lead to failure of the system and result in a release of tailings or waste into unrestricted areas; and any additional requirements the Commission may by order deem necessary.

6. § 150.3 of 10 CFR 150 is amended by revising § 150.3(c) to read as follows:

§ 150.3 Definitions.

(c) "Byproduct material" means (1) any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material; or (2) the tailings or wastes produced by the extraction.

7. § 150.15 of 10 CFR 150 is amended by adding a new paragraph (a)(7), to read as follows:

§ 150.15 Persons not exempt.

(a) * * *

(7) Until November 8, 1981, the receipt of title to, ownership of, receipt of, possession of, use of, transfer of, delivery of, import or export of the byproduct material as defined in

§ 150.3(c)(2) of this Part; Provided, however, that during this period any State may exercise any authority under State law respecting such material in the same manner, and to the same extent, as permitted before enactment of the Uranium Mill Tailings Radiation Control Act of 1978. In case of conflict between Federal and State requirements regarding a license, the Federal license requirements shall prevail unless the State requirements are more stringent than the Federal requirements.

[FR Doc. 79-26515 Filed 8-23-79; 8:45 am]

BILLING CODE 7590-01-M

NUCLEAR REGULATORY COMMISSION

[10 CFR Parts 30, 40, 70, 150, and 170]

Criteria Relating to Uranium Mill Tailings and Constructions of Major Plants

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rules.

SUMMARY: The proposed amendments to 10 CFR Parts 40 and 150 would incorporate licensing requirements for uranium and thorium mills and their tailings and wastes into the Commission's regulations. The proposed amendments to Parts 40 and 150 are derived from a draft generic environmental impact statement on uranium milling and the requirements contained in the Uranium Mill Tailings Radiation Control Act of 1978. The proposed amendments to Parts 30 and 70 would require a final environmental assessment be completed by the NRC prior to construction of other types of major plants. The proposed amendments to 10 CFR 170 set forth the fees to be charged in conjunction with licenses authorizing the possession of tailings. These proposed regulation changes and the draft generic environmental impact statement referred to above will be the subjects of public hearings to be held in October at locations in western milling regions. The general purpose of these hearings will be to receive comments on these proposed regulation changes and the draft generic environmental impact statement. More specific information concerning these hearings will be made available in a forthcoming Federal Register notice.

Closely related to these proposed regulations are immediately effective regulations pertaining to a general license authorizing possession of tailings by existing milling operations with valid specific licenses for milling. Although the immediately effective regulations are formally published elsewhere in this part of the Federal Register, they are shown here for purposes of clarity and continuity.

DATE: Comment period expires October 24, 1979.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments on the proposed amendment may be examined in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Don F. Harmon, Office of Standards

Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone 301/433-5910) or Hubert J. Miller, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone 301/427-4103).

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission is amending its regulations to conform to the requirements of the Uranium Mill Tailings Radiation Control Act of 1978 and to the standards set forth in the draft generic environmental impact statement on uranium milling. The bulk of these regulations are published here in proposed form. The Commission finds it necessary, however, to issue as immediately effective a temporary general license to authorize the possession and storage of mill tailings or wastes to prevent existing milling operations in both Agreement and non-Agreement States from being in technical violation of the Atomic Energy Act of 1954, as amended by the Uranium Mill Tailings Radiation Control Act of 1978. Although the immediately effective regulations are formally published elsewhere in this part of the Federal Register, they are shown here for the purposes of clarity and continuity. In a notice published in the Federal Register on June 3, 1976, the U.S. Nuclear Regulatory Commission announced its intention to prepare a generic environmental impact statement (GEIS) on uranium milling. The Commission was acting partly in response to a petition for rulemaking filed with the Commission by the Natural Resources Defense Council, Inc. The Commission has evaluated the environmental impacts of uranium milling and has published a draft GEIS (NUREG-0511) on this subject (See Notice of Availability, April 26, 1979, 44 FR 24963).

The GEIS concludes that there is a need for certain definitive rule changes to the Commission's regulations to establish specific uranium mill licensing requirements, particularly with regard to the tailings or wastes generated during the milling process. The rule change proposed herein to 10 CFR 40 will incorporate into the Commission's regulations the additional needed requirements derived from the draft GEIS. These proposed additional requirements and potential alternatives are discussed in detail in the draft GEIS along with their supporting bases. It is not possible to provide here a complete summary of all the complex issues, alternatives, and supporting technical bases addressed in the draft GEIS. In formulating proposals for dealing with uranium milling problems to assure

public health and safety and environment protection, the NRC staff has developed a full range of perspectives and facts. It has analyzed the problems from short- and long-term points of view. It has evaluated potential health risks to individuals living in the immediate vicinity of mills, to individuals living in mining and milling regions, to mill workers, and to large populations which can be exposed to radon. Potential impacts on land use, air quality, water quality, water use, biota and soils, and potential socioeconomic effects of milling operations have been assessed. Alternatives for tailings disposal which have been examined range from the past practice of doing virtually nothing to isolate tailings, to utilizing potential advanced treatment methods such as incorporation of tailings in a solid matrix, such as cement or asphalt. The major institutional questions considered by the NRC in developing needed rule changes include: the need for land use controls and site monitoring at tailings disposal sites; methods of providing financial surety so that tailings disposal and site decommissioning are accomplished by the milling operator; and the need for and methods of funding any long-term surveillance which may be necessary at tailings disposal sites. For additional information concerning these issues, the draft GEIS should be reviewed. (It is suggested that readers of the GEIS start with the Summary; the chief bases for these proposed regulations are presented there. In preparing the Summary, the staff made a special effort to refer to specific sections of the text which are pertinent to each issue discussed. This has been done to make it easy for readers to find and consider all of the information that has been developed, so that they can draw their own conclusions about the issues addressed.) The major conclusions reached in the draft GEIS relative to needed rule changes, stated here in broad terms, are:

1. Tailings areas should be located at remote sites to reduce potential population exposures to the maximum extent reasonably achievable.

2. Tailing areas should be located at sites where disruption and dispersion by natural forces are eliminated or reduced to the maximum extent reasonably achievable.

3. The "prime option" for tailings disposal is placement below grade.

4. If tailings are located above ground, stringent siting and design criteria should be adhered to.

5. Sufficient cover should be placed over tailings to reduce radon exhalation

to a calculated value of less than 2pCi/m³sec above natural background levels.

6. Steps should be taken to reduce seepage of materials into groundwater to the maximum extent reasonably achievable.

7. Final disposition of tailings should be such that ongoing active maintenance is not necessary to preserve isolation.

8. Milling operations should be conducted so that all airborne effluent releases are reduced to as low as is reasonably achievable. Yellowcake drying and packaging operations should cease when effluent control devices are inoperative or not working at their reasonably expected best performance levels.

9. Financial surety arrangements should be established to ensure that sufficient funds are available to cover the costs of decontamination and decommissioning the mill and site and for the reclamation of tailings areas.

10. Sites on which tailings are stored should be controlled through ownership and custody by a government agency unless, in special cases as might occur in deep mine disposal, this is determined unnecessary.

11. Funds should be provided by each mill operator to cover the costs of long-term site surveillance.

12. Construction of a uranium mill or tailings disposal area should not commence until the NRC has completed its final environmental impact statement required by the National Environmental Policy Act (NEPA).

The rule changes proposed herein would also incorporate into the Commission's regulation 10 CFR 40 and 150 the requirements established by the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. 3201). This legislation, among other things, establishes a program to regulate mill tailings during uranium or thorium ore processing at active mill operations and after termination of such operations in order to stabilize and control such tailings in a safe and environmentally sound manner and to minimize or eliminate radiation health hazards to the public. In the Commission's view, the legislation also requires that the NRC exercise concurrent jurisdiction over tailings in Agreement States until November 8, 1981. The UMTRCA, among other things, specifies:

1. A revised definition of "byproduct material" to include tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content;

2. Ownership and custody requirements for byproduct material;

3. Provisions for bonds, sureties, or other financial arrangements covering the decontamination, decommissioning, and reclamation of sites, structures, and equipment used in conjunction with byproduct material;

4. Provisions for Agreement State authority under Section 274 of the Atomic Energy Act; and

5. Provisions for NRC grants to States to aid in the development of State regulatory programs.

The UMTRCA further establishes certain responsibilities and authorities whereby the Environmental Protection Agency (EPA) must develop standards of general application for the protection of the public health, safety, and the environment from radiological and nonradiological hazards associated with the processing and with the possession, transfer, and disposal of byproduct material. Such generally applicable standards for nonradiological hazards must provide for the protection of human health and the environment consistent with the standards required under subtitle C of the Solid Waste Disposal Act, as amended. The Commission and any State permitted to exercise authority under § 274b.(2) of the Atomic Energy Act must apply these standards of general application in licensing actions involving byproduct material. In this regard, the Commission notes that the EPA has published (43 FR 58946), for comments, proposed regulations to implement the requirements of the Solid Waste Disposal Act, as amended. The Commission believes that the requirements in the amendments proposed herein, along with applicable requirements in other parts of the Commission's regulations, will be at least comparable to presently published requirements applicable to the possession, transfer, and disposal of similar material regulated by the EPA under the Solid Waste Disposal Act, as amended. Since final regulations have not been adopted by EPA to implement the mandates of the Solid Waste Disposal Act, additional amendments to the Commission's regulations may be required. The Commission intends to follow the progress of the EPA rulemaking action to implement regulations under the Solid Waste Disposal Act. Any final regulations pertaining to byproduct material adopted by the Commission will be comparable, to the maximum extent practicable, to requirements applicable to the possession, transfer, and disposal of similar hazardous material regulation by EPA under the Solid Waste Disposal Act, as amended. To ensure

comparability, concurrence of final regulations will be obtained from the Administrator of EPA as required by the UMTRCA. In addition, the Administrator of EPA will be specifically requested to provide comments and recommendations concerning this matter.

The significant features of the amendments to 10 CFR 40 are:

1. Section 40.4 of Part 40 is being amended (effective immediately) to include the definition of "byproduct material." This amendment, to include uranium and thorium mill tailings as byproduct material as a licensable material in the Commission's regulations, is required by the recently enacted UMTRCA. Discrete above ground wastes from in-situ or solution extraction are covered by this definition, although the underground ore bodies depleted by the extraction process are not covered. While the Commission has considered amending its regulation 10 CFR 30, "Rules of General Applicability to Licensing of Byproduct Material," to specify licensing requirements relative to tailings, the Commission considers it more appropriate to amend 10 CFR 40 since the legislative record of the UMTRCA makes clear that the expanded definition of byproduct material covers only mill tailings or wastes which are exclusively associated with 10 CFR 40 licensing matters.

2. A new § 40.28 is being added (effective immediately) to 10 CFR 40 to establish a temporary general license to authorize the possession and storage of mill tailings or wastes to keep existing milling operations in both Agreement and non-Agreement States from being in technical violation of the Atomic Energy Act of 1954, as amended by UMTRCA. The Commission believes this general license is consistent with the Congressional intent to implement the UMTRCA in a manner designed to minimize unnecessary disruption. As provided in § 40.20 of 10 CFR 40, a general license is effective without the filing of an application or the issuance of licensing documents to particular persons. This general license is applicable only to persons who possess appropriate specific licenses issued by the Commission or Agreement States which authorize uranium milling activities. The authority to possess, use, or own tailings under the general license shall expire concurrently with the expiration or renewal of each NRC or Agreement State specific milling license.

The Commission notes that all of its existing active milling licenses have been reviewed or are being reviewed under the provisions of the National Environmental Policy Act (NEPA). All

NRC licenses presently contain, or will contain, requirements for tailings reclamation, mill and site cleanup, and surety arrangements to cover these costs. For the most part, present requirements and conditions are substantially the same as the requirements being proposed herein, and most milling operators involved in non-Agreement States have already committed themselves to specific plans for decommissioning and tailings disposal meeting these requirements. NRC uranium milling licenses that have been granted under the NEPA process during the period over which the NRC's generic environmental impact statement on uranium milling was being developed were issued with the express condition that approved waste generating processes and mill tailings management practices were subject to revision in accordance with the conclusions of the final generic environmental impact statement and any related rulemaking. In the process of reevaluating approved mill operator plans upon expiration or renewal to meet the requirements of the rule change proposed herein, the NRC staff plans to incorporate into applicable specific licenses the authority to possess and store byproduct material covered by this general license.

Under the provisions of this general license, Agreement State licensees will not be required to obtain a specific NRC license until such time as the licensee's Agreement State specific license expires or is renewed. The Commission notes in this regard that there presently exist Agreement State regulations and requirements governing the control of tailings in Agreement States which appear adequate to protect the public health and safety during the interim period until such licenses expire or are renewed. At such time as each Agreement State license expires or is renewed, it will be necessary at least until November 1, 1981, for the Agreement State licensee to apply for and obtain a specific NRC license covering the possession of byproduct material. The Commission intends to review each application under the NEPA process and impose any necessary requirements as may be necessary to protect the public health and safety. Given that the tailings piles in Agreement States covered by this general license have been in existence for several years, the Commission does not believe that the incremental increase to such piles during the interim time until licenses expire or are renewed will foreclose available alternatives for reducing or avoiding adverse environmental and other effects or result

in irreversible or irretrievable commitments of resources. Thus, the Commission has concluded that an environmental impact statement to support this interim general license is not required. The Commission further notes in this regard that the authority to possess, own, or receive title to tailings now defined as byproduct material under this general license is subject to NRC remedial orders as necessary to protect the public health and safety and to correct any situations where events might require more immediate Commission attention to insure proper control of tailings.

3. Section 40.31 of Part 40 is being amended by revising § 40.31(a) to cover applications for byproduct material and by adding a new paragraph (g) to require applicants for mill licenses to propose specifications relating to the operation of mill sand disposition of tailings or wastes so as to achieve certain requirements and objectives set forth in a new Appendix A to 10 CFR 40. These requirements and objectives are discussed in detail in the following Item #4.

Since these requirements and objectives deal primarily with presently operating and future milling activities, they do not apply to the remedial action program authorized in Title 1 of the UMTRCA.

4. A new Appendix A entitled, "Criteria Relating to the Operation of Uranium Mills and Disposition of Tailings or Wastes (i.e., byproduct material as defined in Section 11e.(2) of the Atomic Energy Act) Produced by the Extraction or Concentration of Source Material From Ores," is being added to 10 CFR 40. This appendix is divided into four major categories: technical criteria; financial criteria; site and byproduct material ownership; and long-term site surveillance. The technical criteria deal primarily with specifications for siting tailing areas, options for storing tailings below and above ground, seepage controls, minimum cover requirements for tailings at the end of milling operations, preoperational site monitoring requirements, and effluent controls during milling operations. These criteria were basically derived from the GEIS discussed above. The guiding principles in the development of these criteria were that: tailings should be isolated from people and the environment in such a manner to reduce potential exposures to as low as is reasonably achievable; the site where tailings are stored should be returned to conditions reasonably near those of the surrounding environment; and final disposition of tailings should be such

that active maintenance is not necessary to preserve isolation. The bases for these criteria are set forth in detail in the GEIS. The Commission believes that under these criteria tailings can be disposed of at reasonable costs and in such a manner that conditions at disposal sites will be reasonably near those of surrounding environs. Thus, the need for ongoing active care and maintenance programs to redress degradation of the tailings isolation by natural weathering and erosion forces can be essentially eliminated. In that the proposed technical criteria for mill siting and tailings disposal areas preclude location of tailings or milling operations in an area that could be disrupted by natural events such as flooding, these criteria will assure that the requirements of Executive Order 11988 of May 23, 1977, concerning flood plain management are met. Therefore, as well as assuring tailings isolation, floodplains will be protected.

The ownership, surety, and long-term funding criteria delineated in the new Appendix were derived from the GEIS. They are also requirements established under the UMTRCA. The Commission believes that compliance with these criteria will ensure that milling operators, who are responsible for the generation of tailings, will bear the costs of tailing reclamation and long-term site surveillance and that government ownership of tailings and disposal sites will ensure adequate long-term control of the tailings.

With regard to long-term site surveillance, the UMTRCA requires the final disposition of tailings or wastes at milling sites to be such that the need for long-term maintenance and monitoring of such sites after license termination shall be minimized, and to the maximum extent practicable, eliminated. These requirements are delineated in the long-term surveillance criterion set forth in the new Appendix. In order to confirm the integrity of a stabilized tailings system, the Commission proposes to require annual site inspections by site owners (e.g., an appropriate government agency). Depending on the specific conditions of a particular site, as determined during the period following site reclamation and before termination of a mill operator's license, a determination may be made that more frequent inspections or more comprehensive monitoring are required. More specific guidance on long-term surveillance may be issued in the future after more experience has been gained relative to this issue. Results of such inspections would be submitted to the

Commission within 60 days following each inspection.

The criteria in the new Appendix A would become effective following completion of the rulemaking action contemplated herein by the Commission, except that criterion 11 would not become effective until November 8, 1981, under the provisions of the UMTRCA.

5. Paragraphs (b) of § 40.14 and (e) of § 40.32 of 10 CFR 40 are being amended to require the Director of the Commission's Office of Nuclear Material Safety and Safeguards or his designee to make a positive finding on an applicant's proposed plans as meeting the requirements and objectives in Appendix A prior to commencement of construction of a mill which produces byproduct material. This finding would be that made in the final environmental impact statement (or other environmental assessment) prepared pursuant to Part 51 of this chapter. These proposed amendments will delete paragraph (b) of § 40.14 so as to preclude exemptions from the requirements of §§ 40.31(f) and 40.32(e) of Part 40 and amend paragraph (e) of § 40.32 so as to require the denial of applications for licenses where construction is started before the appropriate environmental appraisals are completed and documented. The Commission notes in this regard that milling results in the production of large quantities of byproduct material as tailings per year. When construction of a mill commences, nearly irrevocable commitments are made regarding tailings disposal. Given that each mill tailings pile constitutes a low-level waste burial site containing long-lived radioactive materials, the Commission believes that prudence requires that specific methods of tailings disposal, mill decontamination, site reclamation, surety arrangements, and arrangements to allow for transfer of site and tailings ownership be worked out and approved before a license is granted.

The Commission also notes that similar irrevocable and/or ir retrievable commitments are involved in the commencement of construction of plants and facilities in which source materials are possessed and used for the production of uranium hexafluoride and commercial waste disposal by land burial. Accordingly, the requirements of the revised paragraphs (b) of § 40.14 and (e) of § 40.32 would apply to these plants and facilities.

The proposed amendments to 10 CFR 30 and 70 also relate to commencement of construction of other types of plants and facilities in which byproduct and special nuclear materials are used and possessed. The Commission also

believes commencement of construction of these plants and facilities may also result in irreversible and irretrievable commitments of resources. Therefore, the Commission believes that it is also desirable and necessary that a final environmental impact statement or assessment be completed and documented before authorizing commencement of construction. Thus, 10 CFR 30.11(b), 10 CFR 30.33(a)(5), 10 CFR 70.14(b) and 10 CFR 70.23(a)(7) are being amended to conform to the foregoing amendments to 10 CFR 40.

The amendments to 10 CFR Part 150 that are to conform to Part 40's new definition of byproduct material and to Part 40's coverage of such byproduct material in Agreement States for the three years following enactment of UMTRCA are immediately effective. These amendments are in accordance with UMTRCA's provisions requiring NRC licensing of tailings in Agreement States for the three year interim. Pursuant to UMTRCA, however, Agreement States may exercise concurrent jurisdiction over tailings and wastes for the three-year interim.

A new proposed § 150.15a is added to enumerate certain authorities reserved in the Commission under UMTRCA. Paragraph (a) is drawn directly from sections 204(f) and 202(a) of UMTRCA. Paragraph (b) is extracted from § 83 of the Atomic Energy Act of 1954, as added by § 202(a) of UMTRCA. The language of UMTRCA and its legislative history indicate that the NRC is to make the determinations under and establish requirements pursuant to § 83, which minimum Federal standards and determinations must, under § 204(e) of the UMTRCA, be met by the Agreement States. New proposed § 150.31 and 150.32 outline requirements in the UMTRCA for Agreement State regulation of tailings or activities that produce such tailings or wastes. The new requirements, which become effective after November 8, 1981, are taken directly from § 274c of the Atomic Energy Act, as added by § 204(e) of the UMTRCA.

The proposed amendments to 10 CFR 170 establish fees for licensing and inspection actions involving only the management of mill tailings and associated wastes. The proposed fees are based on NRC staff experience involving the review of the environmental and public health aspects of uranium milling and related activities.

Proposed regulatory changes

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, the Uranium Mill Tailings Radiation

Control Act of 1978, and section 553 of title 5 of the United States Code, notice is hereby given that the Commission proposes to amend 10 CFR 30, 40, 70, 150, and 170 as indicated below.

The amendments to §§ 40.1, 40.2a, 40.3, 40.4, 40.26, 150.3, and 150.15, adopted as final rules in a document printed elsewhere in this part, are included below for purposes of clarity and continuity. They are identified in the amendatory language as being effective immediately.

1. Section 40.1 of 10 CFR 40 is amended (effective immediately) by revising paragraphs (a) and (b) as follows:

§ 40.1 Purpose.

(a) The regulations in this part establish procedures and criteria for the issuance of licenses to receive title to, receive, possess, use, transfer, deliver, or import into or export from the United States source and byproduct materials, as defined in this Part, and establish and provide for the terms and conditions upon which the Commission will issue such licenses. The regulations in this Part do not establish procedures and criteria for the issuance of licenses for materials covered under Title I of the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. § 2021).

(b) The regulations contained in this part are issued pursuant to the Atomic Energy Act of 1954, as amended (68 Stat. 919), Title II of the Energy Reorganization Act of 1974 (88 Stat. 1242), and Title II of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901).

2. § 40.2a of 10 CFR 40 is added (effective immediately) to read as follows:

§ 40.2a Temporary coverage in Agreement States.

Until November 8, 1981, the regulations in this Part shall govern the Commission's licensing of byproduct material as defined in this Part in Agreement States.

3. § 40.2b of 10 CFR 40 is proposed to be read as follows:

§ 40.2b Coverage of inactive tailings sites.

(a) Prior to the completion of the remedial action, the Commission will not require a license pursuant to this Part for possession of byproduct material as defined in this Part that is located at a site where milling operations are no longer active, if such site is or is likely to be designated a processing site covered by the remedial action program of title I of the Uranium Mill Tailings Radiation Control Act of 1978. The Commission will exert its

regulatory role in remedial actions exclusively through concurrence and consultation in the execution of the remedial action pursuant to title I of the Uranium Mill Tailings Radiation Control Act of 1978.

(b) The Commission will require a license pursuant to this Part for byproduct material as defined in this Part that is located at a site where milling operations are not longer active, if such site is not and will not be covered by the remedial action program of title I of the Uranium Mill Tailings Radiation Control Act of 1978; provided, however, that the criteria in Appendix A of this Part will be applied to the maximum extent practicable, with consideration given to the unique circumstances of such inactive sites.

4. § 40.3 of 10 CFR 40 is revised (effective immediately) to read as follows:

§ 40.3 License requirements.

No person subject to the regulations in this Part shall receive title to, own, receive, possess, use, transfer, deliver, or import into or export from the United States byproduct material as defined in this Part or any source material after removal from its place of deposit in nature, except as authorized in a specific or general license issued by the Commission pursuant to the regulations in this Part.

5. § 40.4 of 10 CFR 40 is revised (effective immediately) by amending paragraphs 40.4(a-1), 40.4(e), and 40.4(1) and adding new paragraphs 40.4(b-1) and 40.4(p).

§ 40.4 Definitions.

(a-1) "Byproduct Material" means the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from uranium solution extraction processes. Underground ore bodies depleted by such solution extraction operations do not constitute "byproduct material" within this definition.

(b-1) "Department of Energy" means the United States Department of Energy or its duly authorized representative.

(e) "Person" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission or the Department of Energy except that the Department of Energy shall be considered a person within the meaning

of the regulations in this Part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to section 202 of the Energy Reorganization Act of 1974 (88 Stat. 1244) * and the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. 21), any State or any political subdivision of, or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent or agency of the foregoing.

(1) With the exception of "byproduct material" as defined in Section 11e. of the Act, other terms defined in Section 11 of the Act shall have the same meaning when used in the regulation in this Part.

(p) "Uranium Milling" means any activity that results in the production of byproduct material as defined in this Part.

6. Section 40.11 of 10 CFR 40 is proposed to be amended by changing the word "Administration" to read "Department of Energy" and by adding the words "or the Uranium Mill Tailings Radiation Control Act of 1978" following the words "Energy Reorganization Act of 1974."

7. Section 40.13 of 10 CFR 40 is proposed to be amended by adding the following sentence at the end of Paragraph (a): "The exemption contained in this paragraph does not include byproduct material as defined in this Part."

8. Section 40.14 of 10 CFR 40 is proposed to be amended by deleting paragraph 40.14(b).

*The Department of Energy facilities and activities identified in section 202 are:

(1) Demonstration Liquid Metal Fast Breeder reactors when operated as part of the power generation facilities of an electric utility system, or when operated in any other manner for the purpose of demonstrating the suitability for commercial application of such a reactor.

(2) Other demonstration nuclear reactors, except those in existence on January 19, 1975, when operated as part of the power generation facilities of an electric utility system, or when operated in any other manner for the purpose of demonstrating the suitability for commercial application of such a reactor.

(3) Facilities used primarily for the receipt and storage of high-level radioactive wastes resulting from licensed activities.

(4) Retrieval Surface Storage Facilities and other facilities authorized for the express purpose of subsequent long-term storage of high-level radioactive waste generated by the Department of Energy, which are not used for, or are part of, research and development activities.

9. Section 40.26 of 10 CFR 40 is added (effective immediately) to read as follows:

§ 40.26 General license for possession and storage of byproduct material as defined in this Part.

(a) A general license is hereby issued to receive title to, own, or possess byproduct material as defined in this Part without regard to form or quantity.

(b) The general license in paragraph (a) of this section applies only:

(1) In the case of licensees of the Commission, where activities that result in the production of byproduct material are authorized under a specific license issued by the Commission pursuant to this Part, to byproduct material possessed or stored at an authorized disposal containment area or transported incident to such authorized activity; Provided, that authority to receive title to, own, or possess byproduct material under this general license shall terminate when the specific license for source material expires, is renewed, or is amended to include a specific license for byproduct material as defined in this Part; or

(2) In Agreement States until November 8, 1981, where activities that result in the production of byproduct material are authorized under a specific license issued by the Agreement State on or before May 17, 1979, to byproduct material possessed, or stored at an authorized disposal containment area or transported incident to such authorized activities; Provided, that authority to receive title to, own, or possess byproduct material under such general license shall terminate when such Agreement State license expires or is renewed, whichever first occurs.

(c) The general license in paragraph (a) of this section is subject to:

(1) The provisions of Parts 19, 20, 21, and sections 40.1, 40.2, 40.2a, 40.3, 40.4, 40.5, 40.6, 40.41, 40.46, 40.61, 40.62, 40.63, 40.65, 40.71, and 40.81 of Part 40 of this Chapter; and

(2) The documentation of daily inspections of tailings or waste retention systems and the immediate notification of the appropriate NRC regional office as indicated in Appendix D of 10 CFR Part 20, or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could lead to failure of the system and result in a release of tailings or waste

into unrestricted areas; and any additional requirements the Commission may by order deem necessary.

10. Section 40.31 of 10 CFR 40 is proposed to be amended by revising § 40.31(a) and adding a new § 40.31(g) as follows:

§ 40.31 Applications for specific licenses.

(a)(1) Applications for a specific license for source material or for byproduct material produced in conjunction with the uranium milling activity for which a source material license is sought from the Commission should be filed in quadruplicate on Form NRC-2 "Application for Source Material License," with the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Applications may be filed in person at the Commission's Offices at 1717 H Street, NW., Washington, D.C., or 7920 Norfolk Avenue, Bethesda, Md. Information contained in previous applications, statements, or reports filed with the Commission may be incorporated by reference, provided such references are clear and specific.

(2) Applications for specific licenses for byproduct material as defined in this Part not sought in conjunction with a source material license from the Commission for uranium milling shall be filed with the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Such applications include, until November 8, 1981, applications for specific licenses from the Commission for such byproduct material generated by uranium milling under an Agreement State license issued or renewed after May 17, 1979.

(g) An application for a license to receive title to, own, receive, possess, and use source material for uranium milling or byproduct material, as defined in this Part, shall contain proposed specifications relating to milling operations and the disposition of the byproduct material to achieve the requirements and objectives set forth in Appendix A of this Part.

11. Section 40.32 of 10 CFR 40 is proposed to be amended by revising § 40.32(e) as follows:

§ 40.32 General requirements for issuance of specific licenses.

(e) In the case of an application for a license to possess and use source and byproduct material for uranium milling, production of uranium hexafluoride, commercial waste disposal by land burial or for the conduct of any other

activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such a conclusion shall be grounds for denial of a license to possess and use source and byproduct material in such plant or facility.

12. Appendix A is proposed to be added to Part 40 to read as follows:

Appendix A to Part 40

Criteria Relating to the Operation of Uranium Mills and the Disposition of Tailings or Wastes (i.e., byproduct material as defined in Section 11e.(2) of the Atomic Energy Act) Produced by the Extraction or Concentration of Source Material From Ores.

Introduction. Every applicant for a license to possess and use source material in conjunction with uranium or thorium milling is required by the provisions of § 40.31(g) to include in a license application proposed specifications relating to milling operations and the disposition of tailings or waste resulting from such milling activities. This appendix establishes technical, financial, ownership, and long-term site surveillance requirements relating to the siting, operation, decontamination, decommissioning, and reclamation of mills and tailings or waste systems and sites at which such mills and systems are located.

I. Technical Criteria

Criterion 1—Tailings or waste disposal areas shall be located at remote sites so as to reduce potential population exposures and the likelihood of human intrusions to the maximum extent reasonably achievable. To avoid proliferation of small waste disposal sites, byproduct material from in-situ extraction operations, such as residues from solution evaporation or contaminated control processes, and wastes from small remote above ground extraction operations shall preferably be disposed of at existing large mill tailings disposal sites; consideration will be given to the nature of the wastes, such

as their volume and specific activity, and to costs and environmental impacts of transporting the wastes to a large disposal site.

Criterion 2—Tailings or waste disposal areas shall be located at sites where disruption and dispersion by natural forces are eliminated or reduced to the maximum extent reasonably achievable. In the selection of mill sites, primary emphasis shall be given to isolation of tailings or wastes, a matter having long-term impacts, as opposed to consideration only of short-term convenience or benefits, such as minimization of transportation or land acquisition costs. These criteria, which preclude location of tailings or mill site in an area which could be disrupted by natural events, such as flooding, assure that the requirements of Executive Order 11988 concerning floodplain management are met.

Criterion 3—The "prime option" for disposal of tailings is placement below grade, either in mines or specially excavated pits. The evaluation of alternative sites and disposal methods performed by mill operators in support of their proposed tailings disposal program (provided in applicant environmental reports) shall reflect this. In some instances, below-grade disposal may not be the most environmentally sound approach, such as might be the case if a high quality groundwater formation is relatively close to the surface or not very well isolated by overlying soils and rock. Also, geologic and topographic conditions might make full, below-grade burial impracticable; for example, bedrock may be sufficiently near surface that blasting would be required to excavate a disposal pit at excessive cost, and more suitable alternate sites are not available. In these cases, it must be demonstrated that an above-grade disposal program will provide reasonably equivalent isolation of the tailings from natural erosional forces.

Criterion 4—If tailings or wastes are disposed of above ground, the following siting and design criteria shall be adhered to:

(a) Upstream rainfall catchment areas must be utilized to decrease the size of the maximum possible flood which could erode or wash out sections of the tailings disposal area.

(b) Topographic features shall provide good wind protection.

(c) Embankment slopes shall be relatively flat after final stabilization to minimize erosion potential and to provide conservative factors of safety assuring long-term stability. The broad objective should be to contour final slopes to grades which are as close as

possible to those which would be provided if tailings were disposed of below grade; this would, for example, lead to slopes of about 10 horizontal to 1 vertical (10h:1v) or less steep. In general, slopes should not be steeper than about 5h:1v. Where steeper slopes are proposed, reasons why a slope less steep than 5h:1v would be impracticable should be provided, and compensating factors and conditions which make such slopes acceptable should be identified.

(d) A full, self-sustaining vegetative cover shall be established or riprap employed to retard wind and water erosion. Special concern shall be given to slopes of embankments.

(e) The impoundment shall not be located near a potentially active fault that could cause a maximum credible earthquake larger than that which the impoundment could reasonably be expected to withstand.

(f) The impoundment, where feasible, should be designed to incorporate features which will promote deposition. For example, design features which promote deposition of sediment suspended in any runoff which flows into the impoundment area might be utilized; the objective of such a design feature would be to enhance the thickness of cover over time.

Criterion 5—Steps shall be taken to reduce seepage of toxic materials into groundwater to the maximum extent reasonably achievable. This could be accomplished by lining the bottom of tailings areas and reducing the inventory of liquid in the impoundment by such means as dewatering tailings and/or recycling water from tailings impoundments to the mill. Furthermore, steps shall be taken during stockpiling of ore to minimize penetration of radionuclides into underlying soils; suitable methods include lining and/or compaction of ore storage areas. Also, tailings treatment, such as neutralization to promote immobilization of toxic substances shall be considered. The specific method, or combination of methods, to be used must be worked out on a site-specific basis. While the primary method of protecting groundwater shall be isolation of tailings and tailings solutions, disposal involving contact with groundwater will be considered provided supporting tests and analysis are presented demonstrating that the proposed disposal and treatment methods will preserve quality of groundwater.

Criterion 6—Sufficient earth cover, but not less than three meters, shall be placed over tailings or wastes at the end of milling operations to result in a calculated reduction in surface exhalation of radon from the tailings or

wastes to less than two picocuries per square meter per second above natural background levels. Direct gamma exposure from the tailings or wastes should be reduced to background levels. Plastic or other synthetic caps should not be used to reduce radon exhalation from the tailings or wastes. Cover material must not include mine waste or rock that contain elevated levels of radium; soils used for cover must be essentially the same, as far as radioactivity is concerned, as that or surrounding soils.

Criterion 7—At least one full year prior to any major site construction, a preoperational monitoring program should be conducted to provide complete baseline data on a milling site and its environs prior to development. Throughout the construction and operation phase of the mill, an operational monitoring program should be conducted to demonstrate compliance with applicable standards and regulations; to evaluate performance of control systems and procedures; to evaluate environmental impacts of operation; and to detect potential long-term effects.

Criterion 8—Milling operations shall be conducted so that all airborne effluent releases are reduced to as low as is reasonably achievable below the limits in 10 CFR Part 20. The primary means of accomplishing this should be by means of emission controls. Institutional controls, such as extending the site boundary and exclusion area, may be employed to ensure that offsite exposure limits are met, but only after efforts have been taken to control emissions at the source to the maximum extent reasonably achievable. Notwithstanding the existence of individual dose standards, strict control of emissions is necessary to assure that population exposures are reduced to the maximum extent reasonably achievable and to avoid site contamination. The greatest potential sources of offsite radiation exposure (aside from radon exposure) are dusting from dry surfaces or the tailings disposal area not covered by tailings solution and emissions from yellowcake drying and packaging operations. Yellowcake drying and packaging operations should cease when effluent control devices are inoperative or not working at their reasonably expected best performance levels. To control dusting from tailings, that portion not covered by standing liquids should be wetted or chemically stabilized to prevent or minimize blowing and dusting to the maximum extent reasonably achievable. This requirement may be relaxed if tailings

are effectively sheltered from wind, such as may be the case where they are disposed of below grade and the tailings surface is not exposed to wind. Consideration should be given in planning tailings disposal programs to methods which would allow phased covering and reclamation of tailings impoundments since this will help in controlling particulate and radon emissions during operation. To control dusting from diffuse sources, such as tailings and ore pads where automatic controls do not apply, operators should develop written operating procedures specifying the methods of control which will be utilized.

Criterion 8(A)—Daily inspections of tailings or waste retention systems shall be conducted and documented. The appropriate NRC regional office as indicated in Appendix D of 10 CFR Part 20, or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, shall be immediately notified of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could lead to failure of the system and result in a release of tailings or waste into unrestricted areas.

II. Financial Criteria

Criterion 9—Financial surety arrangements shall be established by each mill operator to assure that sufficient funds will be available to carry out the decontamination and decommissioning of the mill and site and for the reclamation of any tailings or waste disposal areas. The amount of funds to be ensured by such surety arrangements shall be based on cost estimates in an approved plan for (1) decontamination and decommissioning of mill buildings and the milling site to levels which would allow unrestricted use of these areas upon decommissioning, and (2) the reclamation of tailings and/or waste disposal areas in accordance with technical criteria delineated in Section I of this Appendix. The licensee shall submit this plan in conjunction with an environmental report that addresses the expected environmental impacts of the milling operation, decommissioning and tailings reclamation, and evaluates alternatives for mitigating these impacts. The surety shall cover the payment of the charge for long-term surveillance required by Criterion 10. In establishing specific surety arrangements, the licensee's cost estimates shall take into

account total capital costs that would be incurred if an independent contractor were hired to perform the decommissioning and reclamation work. In order to avoid unnecessary duplication and expense, the Commission will accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other Federal or State agencies and/or local governing bodies for such decommissioning, decontamination, reclamation, and long-term site surveillance. The licensee's surety mechanism will be reviewed from time to time by the Commission (generally at the time of license renewal) to assure sufficient funds for completion of the reclamation plan if the work had to be performed by the regulatory authority. The amount of surety liability should change in accordance with the predicted cost of future reclamation. Factors affecting reclamation cost estimates include: inflation; increases in the amount of disturbed land; and decommissioning and reclamation that has been performed. This will yield a surety that is at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended. Liability under the surety mechanism shall remain in effect until the reclamation program has been completed and approved. Financial surety arrangements generally acceptable to the Commission are:

- (a) Surety bonds;
- (b) Cash deposits;
- (c) Certificates of deposit;
- (d) Deposits of government securities;
- (e) Letters or lines of credit; and
- (f) Combinations of the above or such other types of arrangements as may be approved by the Commission.

Criterion 10—A charge of \$250,000 to cover the costs of long-term surveillance shall be paid by each mill operator to the general treasury of the United States or to an appropriate State agency prior to the termination of a uranium or thorium mill license. If site surveillance requirements at a particular site are determined, on the basis of a site-specific evaluation, to be significantly greater than those specified in Criterion 12, variance in funding requirements may be specified by the Commission. The total charge to cover the costs of long-term surveillance shall be such that, with an assumed 1 percent annual real interest rate, the collected funds will yield interest in an amount sufficient to cover the annual costs of site surveillance. The charge will be

adjusted annually to recognize inflation. The inflation rate to be used is that indicated by the change in the Consumer Price Index published by the U.S. Department of Labor, Bureau of Labor Statistics.

III. Site and Byproduct Material Ownership

Criterion 11—

A. These criteria relating to ownership of tailings and their disposal sites become effective on November 8, 1981, and apply to all licenses terminated, issued, or renewed after that date.

B. Any uranium or thorium milling license or tailings license shall contain such terms and conditions as the Commission determines necessary to assure that, prior to termination of the license, the licensee will comply with ownership requirements of this criterion for sites used for tailings disposal.

C. Title to the byproduct material licensed under this Part and land, including any interests therein (other than land owned by the United States or by a State) which is used for the disposal of any such byproduct material, shall be transferred to the United States or the State in which such land is located, at the option of such State. For licenses issued before November 8, 1981, the NRC will review an applicant's plans to effect arrangements to allow for transfer of site and tailings ownership prior to issuance of a license.

D. If the Commission determines that use of the surface or subsurface estates, or both, of the land transferred to the United States or to a State will not endanger the public health, safety, welfare, or environment, the Commission will permit the use of the surface or subsurface estates, or both, of such land in a manner consistent with the provisions provided in these criteria. If the Commission permits such use of such land, it will provide the person who transferred such land with the right of first refusal with respect to such use of such land.

E. In the case of any uranium or thorium milling license in effect on November 8, 1981, the Commission may require, before the termination of such license, transfer of land and interests therein (including tailings) to the United States or a State in which such land is located at the option of such State as may be necessary to protect the public health, welfare, and the environment from any effects associated with byproduct material defined in this Part. In exercising this requirement, the Commission will take into consideration the status of the ownership of such land and interests therein (including tailings) and the ability of the licensee to transfer

title and custody thereof to the United States or a State. For licenses issued before November 8, 1981, the NRC will review an applicant's plans to effect arrangements to allow for transfer of site and tailings ownership prior to issuance of a license. Subsequent renewals shall not disqualify licensees otherwise eligible for such consideration under this criterion.

F. Material and land transferred to the United States or a State in accordance with this Criterion shall be transferred without cost to the United States or a State other than administrative and legal costs incurred in carrying out such transfer.

G. The provisions of this Part respecting transfer of title and custody to land and tailings and wastes shall not apply in the case of lands held in trust by the United States for any Indian tribe or lands owned by such Indian tribe subject to a restriction against alienation imposed by the United States. In the case of such lands which are used for the disposal of byproduct material, as defined in this Part, the licensee shall enter into arrangements with the Commission as may be appropriate to assure the long-term surveillance of such lands by the United States.

IV. Long-Term Site Surveillance

Criterion 12—The final disposition of tailings or wastes at milling sites should be such that the need for ongoing active maintenance is not necessary to preserve isolation. As a minimum, annual site inspections shall be conducted by site owners where tailings, or wastes are stored to confirm the integrity of the stabilized tailings or waste systems and to determine the need, if any, for maintenance and/or monitoring. Results of the inspection shall be reported to the Commission within 60 days following each inspection. The Commission may require more frequent site inspections if, on the basis of a site-specific evaluation, such a need appears necessary due to the features of a particular tailings or waste disposal system.

13. Section 70.14 of 10 CFR 70 is proposed to be amended by deleting paragraph 70.14(b).

14. Section 70.23 of 10 CFR 70 is proposed to be amended by revising paragraph (a)(7) to read as follows:

§ 70.23 Requirements for the approval of applications.

(a) * * *

(7) Where the proposed activity is processing and fuel fabrication, scrap recovery, conversion of uranium hexafluoride, commercial waste disposal by land burial, or any other

activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical, and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusions shall be grounds for denial to possess and use special nuclear material in such plant or facility.

15. Section 30.11 of 10 CFR 30 is proposed to be amended by deleting paragraph 30.11(b).

16. Section 30.33 of 10 CFR 30 is proposed to be amended by revising paragraph (a)(5) to read as follows:

§ 30.33 General requirements for issuance of specific licenses.

(a) * * *

(5) In the case of an application for a license to receive and possess byproduct material for commercial waste disposal by land burial or for the conduct of any other activity which the Commission determines will significantly affect the quality of the environment, the Director of Nuclear Material Safety and Safeguards or his designee, before commencement of construction of the plant or facility in which the activity will be conducted, on the basis of information filed and evaluations made pursuant to Part 51 of this chapter, has concluded, after weighing the environmental, economic, technical, and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusion shall be grounds for denial of a license to receive and possess byproduct material in such plant or facility.

17. Section 150.3 of 10 CFR 150 is amended (effective immediately) by revising paragraph 150.3(c) to read as follows:

§ 150.3 Definitions.

* * * *

(c) "Byproduct material" means (1) any radioactive material (except special

nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material; or (2) the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from solution extraction processes. Underground ore bodies depleted by such solution extraction operations do not constitute "byproduct material" within this definition.

18. Section 150.15 of 10 CFR 150 is amended (effective immediately) by adding a new paragraph (a)(7), to read as follows:

§ 150.15 Persons not exempt.

(a) * * *

(7) Until November 8, 1981, the receipt of title to, ownership of, receipt of, possession of, use of, transfer of, delivery of, import or export of the byproduct material as defined in § 150.3(c)(2) of this Part; Provided, however, that during this period any State may exercise any authority under State law respecting such material in the same manner, and to the same extent, as permitted before enactment of the Uranium Mill Tailings Radiation Control Act of 1978. In case of conflict between Federal and State requirements regarding a license, the Federal license requirements shall prevail unless the State requirements are more stringent than the Federal requirements.

19. 10 CFR 150 is proposed to be amended by adding a new § 150.15a to read as follows:

§ 150.15a Continued Commission authority pertaining to byproduct material.

(a) Prior to the termination of any Agreement State license for byproduct material as defined in § 150.3(c)(2) of this Part, or for any activity that results in the production of such material, the Commission shall have made a determination that all applicable standards and requirements pertaining to such material have been met.

(b) After November 8, 1981, the Commission reserves the authority to establish minimum standards regarding reclamation, long term surveillance (i.e., continued site observation, monitoring and, in some cases where necessary, maintenance), and ownership of byproduct material as defined in § 150.3(c)(2) of this Part and of land used as a disposal site for such material. Such reserved authority includes:

(1) Authority to establish such terms and conditions as the Commission determines necessary to assure that, prior to termination of any license for

byproduct material as defined in § 150.3(c)(2) of this Part, or for any activity that results in the production of such material, the licensee shall comply with decontamination, decommissioning, and reclamation standards prescribed by the Commission; and with ownership requirements for such materials and its disposal site as the Commission may establish;

(2) The authority to require that prior to termination of any license for byproduct material as defined in § 150.3(c)(2) of this Part or for any activity that results in the production of such material, that title to such byproduct material and its disposal site be transferred to the United States or the State in which such material and land is located, at the option of the State (provided such option is exercised prior to termination of the license);

(3) The authority to permit use of the surface or subsurface estates, or both, of the land transferred to the United States or a State pursuant to paragraph (b)(2) of this section in a manner consistent with the provisions of the Uranium Mill Tailings Radiation Control Act of 1978, provided that the Commission determines that such use would not endanger the public health, safety, welfare, or the environment;

(4) The authority to require, in the case of a license for any activity that produces such byproduct material (which license was in effect on November 8, 1981) transfer of land and material pursuant to paragraph (b)(2), of this section, taking into consideration the status of such material and land and interests therein, and the ability of the licensee to transfer title and custody thereof to the United States or a State;

(5) The authority to require the Secretary of the Department of Energy, other Federal agency, or State, whichever has custody of such property and materials, to undertake such monitoring, maintenance, and emergency measures as are necessary to protect the public health and safety and other actions as the Commission deems necessary to comply with the standards promulgated pursuant to the Uranium Mill Tailings Radiation Control Act of 1978; and

(6) The authority to enter into arrangements as may be appropriate to assure Federal long term surveillance (i.e., continued site observation of such disposal sites on land held in trust by the United States for any Indian tribe or land owned by an Indian tribe and subject to a restriction against alienation imposed by the United States.

20. 10 CFR 150 is proposed to be amended by adding a new § 150.31 to read as follows:

§ 150.31 Requirements for Agreement State regulation of byproduct material.

After November 8, 1981, in the licensing and regulation of byproduct material, as defined in § 150.3(c)(2) of this Part, or of any activity which results in the production of such byproduct material, an Agreement State shall require—

(a) Compliance with requirements established by the Commission pertaining to ownership of such byproduct material and disposal sites for such material; and

(b) Compliance with standards which shall be adopted by the Agreement State for the protection of the public health, safety, and the environment from hazards associated with such material which are equivalent, to the extent practicable, or more stringent than, standards adopted and enforced by the Commission for the same purpose, including requirements and standards promulgated by the Commission and the Administrator of the Environment Protection Agency pursuant to the Uranium Mill Tailings Radiation Control Act of 1978; and

(c) Procedures which—

(1) In the case of licenses under State law include—

(i) An opportunity, after public notice, for written comments and a public hearing, with a transcript,

(ii) An opportunity for cross examination, and

(iii) A written determination which is based upon findings included in such determination and upon the evidence presented during the public comment period and which is subject to judicial review;

(2) In the case of rulemaking, provide an opportunity for public participation through written comments or a public hearing and provide for judicial review of the rule;

(3) Require for each license which has a significant impact on the human environment a written analysis (which shall be available to the public before the commencement of any such proceedings) of the impact of such license, including any activities conducted pursuant thereto, on the environment. Such analysis shall include—

(i) An assessment of the radiological and nonradiological impacts to the public health of the activities to be conducted pursuant to such license;

(ii) An assessment of any impact on any waterway and groundwater resulting from such activities;

(iii) Consideration of alternatives, including alternative sites and engineering methods, to the activities to be conducted pursuant to such license; and

(iv) Consideration of the long term impacts, including decommissioning, decontamination, and reclamation impacts associated with activities to be conducted pursuant to such license, including the management of any byproduct material, as defined in § 150.3(c)(2) of this Part; and

(4) Prohibit any major construction activity with respect to such material prior to complying with the provisions of paragraph (c)(3) of this section.

(d) No Agreement State shall be required under paragraph (c) to conduct proceedings concerning any license or regulation which would duplicate proceedings conducted by the Commission.

21. 10 CFR 150 is proposed to be amended to add § 150.32 to read as follows:

§ 150.32 Funds for reclamation or maintenance of byproduct material.

(a) The total amount of funds an Agreement State collects, pursuant to a license for byproduct material as defined in § 150.3(c)(2) of this Part or for any activity that results in the production of such material, for reclamation or long term maintenance and monitoring of such material, shall, after November 8, 1981, be transferred to the United States if title and custody of such material and its disposal site is transferred to the United States upon termination of such license. Such funds include, but are not limited to, sums collected for long term surveillance (i.e., continued site observation, monitoring and, in some cases where necessary, maintenance). Such funds do not, however, include monies held as surety where no default has occurred and the reclamation or other bonded activity has been performed.

(b) If an Agreement State requires such payments for reclamation or long term surveillance (i.e., continued site observation, monitoring and, in some cases where necessary, maintenance), they payments must, after November 8, 1981, be sufficient to ensure compliance with those standards established by the Commission pertaining to bonds, sureties, and financial arrangements to ensure adequate reclamation and long term management of such byproduct material and its disposal site.

22. § 170.2 of 10 CFR 170 is proposed to be revised to read as follows:

§ 170.2 Scope.

Except for persons who apply for or hold the permits, licenses, or approvals exempted in § 170.11, the regulations in this part apply to a person who is an applicant for, or holder of, a specific byproduct material license issued pursuant to Part 40 of this chapter, a specific special nuclear material license issued pursuant to Part 70 of this chapter, a specific approval of spent fuel casks and shipping containers issued pursuant to Part 71 of this chapter, a specific request for approval of sealed sources and devices containing byproduct material, source material, or special nuclear material, or a production or utilization facility construction permit and operating license issued pursuant to Part 50 of this chapter, to routine safety and safeguards inspections of a licensed person, to a person who applies for approval of a reference standardized design of a nuclear steam supply system or balance of plant, for review of a facility site prior to the submission of an application for a construction permit, for review of a standardized spent fuel facility design, and for a special project review which the Commission completes or makes whether or not in conjunction with a license application on file or which may be filed.

23. § 170.3 of 10 CFR 170 is proposed to be amended by revising paragraphs 170.3 (a) and (c) to read as follows:

§ 170.3 Definitions.

As used in this part:

(a) "Byproduct material" means (1) any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material; or (2) the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from uranium solution extraction processes. Underground ore bodies depleted by such solution extraction operations do not constitute "byproduct material" within this definition.

(c) "Materials license" means a byproduct material license issued pursuant to Part 30 of this chapter, or a source or byproduct material license issued pursuant to Part 40 of this chapter, or a special nuclear material license issued pursuant to Part 70 of this chapter.

24. § 170.31 of 10 CFR 170 is proposed to be amended by adding a new category 4.D to read as follows:

§ 170.31 Schedule of fees for materials licenses and other regulatory services.

4.D (1) Licenses specifically authorizing the receipt, possession, use, or ownership of tailings or wastes (i.e., byproduct material) produced in conjunction with heap-leaching operations.

Application.....	10,000
New License ¹	63,800
Renewal ¹	93,800
Amendment ²	
Major.....	20,800
Minor.....	3,500
Administrative.....	150

(2) Licenses specifically authorizing the receipt, possession, use, or ownership of tailings or wastes (i.e., byproduct material) produced in conjunction with milling operations.

Production scale activity:	
Application.....	7,000
New License ¹	52,600
Research and development scale activity:	
Application.....	2,000
New License ¹	14,800
Renewal ¹	*13,800
Amendment ²	
Major.....	*4,200
Minor.....	*760
Administrative.....	*150

(3) Licenses specifically authorizing the receipt, possession, use, or ownership of tailings or wastes (i.e., byproduct material) produced in conjunction with in situ leaching operations.

Production scale activity:	
Application.....	2,500
New License ¹	16,900
Research and development scale activity:	
Application.....	850
New License ¹	5,000
Renewal ¹	*14,800
Amendment ²	
Major.....	*1,400
Minor.....	*250
Administrative.....	*150

25. § 170.32 of 10 CFR 170 is proposed to be amended by adding a new category 4.D to read as follows:

§ 170.32 Schedule of fees for health and safety, and safeguards inspections for materials licenses.

4.D. Licenses specifically authorizing the receipt, possession, use, or ownership of tailings or wastes (i.e., byproduct material) produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content.

Health and Safety..... 1,800 One Per Year.

The Commission finds that because the regulations supporting the general license must be effective immediately so as to prevent existing milling operations from being in technical violation of the Atomic Energy Act, good cause exists pursuant to 5 U.S.C. 553 to waive the 30-day comment period, as impracticable

and contrary to the public interest, and make the amendments to 10 CFR 40.1, 40.2a, 40.3, 40.4, 40.26, 150.3, and 150.15 immediately effective. The Commission notes in this regard that informal written comments on this matter were solicited and received from industry, environmental groups, and several States (these comments may be found in the Commission's public document room in a memorandum dated May 9, 1979, from the Executive Legal Director to the Commission entitled "Staff Response to the Commission Request for Further Information Regarding SECY-79-88 'Timing of Certain Requirements of the Uranium Mill Tailings Radiation Control Act of 1978'"). Comments on these amendments are invited, however, and the new regulations remain subject to further modifications in response to such comments.

(Secs. 11e.(2), 81, 83, 84, 161b, 161x, 274; Pub. L. No. 83-703, 68 Stat. 948 et seq. (42 U.S.C. 2014e.(2), 2111, 2113, 2114, 2201b, 2201x, 2201y))

Dated at Washington, D.C. this 22nd day of August 1979.

for the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

Highlights

- 50314, 50321 Lithium Sulfur Dioxide Batteries** DOT/FAA adopts a new Technical Standard Order for batteries used in aircraft; effective 9-26-79 (Part VII of this issue) (2 documents)
- 50072 Propane Deregulation** DOE/ERA issues notice of availability of draft regulatory analysis; comments by 12-1-79
- 50140 Improving Government Regulations** DOT/Sec'y publishes semi-annual regulations agenda and review list (Part II of this issue)
- 50276, 50286, 50292, 50299 Emergency Management and Assistance** FEMA establishes basic set of administrative rules; effective 8-27-79; comments by 10-26-79 (Part V of this issue) (5 documents)
- 50067 Mass Transportation** DOT/UMTA proposes rules dealing with maintenance of effort by designated recipients of funds; comments by 10-11-79
- 50218 Home Insulation** FTC issues rules which prescribe standardized test methods relating to labeling and advertising; effective 11-30-79 (Part III of this issue)
- 50304 Noninflationary Pay and Price Behavior** CWPS adopts form PAY-1; effective 8-27-79 (Part VI of this issue)

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Area Code 202-523-5240

Highlights

- 50065 Taxes** Treasury/IRS proposes rules relating to excise tax on coal; comments and request for hearing by 10-26-79
 - 50130 Treasury Securities** Treasury/Sec'y announces auction of Series C-1984 notes
 - 50027 1979 Rice Crop** USDA/CCC establishes loan and purchase program; effective 8-27-79
 - 50135 Sunshine Act Meetings**
- Separate Parts of This Issue**
- 50140 Part II—DOT/Sec'y**
 - 50218 Part III—FTC**
 - 50248 Part IV—HUD**
 - 50276 Part V—FEMA**
 - 50304 Part VI—CWPS**
 - 50314 Part VII—DOT/FAA**

Rules and Regulations

Federal Register

Vol. 44, No. 167

Monday, August 27, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

Expenses of the Almond Board of California, and Rate of Assessment for the 1979-80 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: This regulation authorizes expenses and a rate of assessment for the 1979-80 crop year, to be collected from handlers to support activities of the Board which locally administers the Federal marketing order covering almonds grown in California.

DATES: Effective July 1, 1979, through June 30, 1980.

FOR FURTHER INFORMATION CONTACT: William J. Higgins, (202) 447-5053.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to Marketing Order No. 981, as amended (7 CFR Part 981), regulating the handling of almonds grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Board, established under this marketing order, and upon other information, it is found that the expenses and rate of assessment, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking and postpone the effective time until 30 days after publication in the *Federal Register* (5 U.S.C. 553), as the order requires that the rate of assessment for a particular marketing year shall apply to all

assessable almonds handled from the beginning of such year which began July 1, 1979. To enable the Board to meet crop year obligations, approval of the expenses and assessment rate is necessary without delay. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rate at an open meeting of the Board. It is necessary to effectuate the declared purposes of the act to make these provisions effective as specified.

Further in accordance with procedures in Executive Order 12044, the emergency nature of this regulation warrants publication, without opportunity for further public comments. The regulation has not been classified significant under USDA criteria for implementing the Executive Order. An Impact Analysis is available from William J. Higgins (202) 447-5053.

§ 981.329 Expenses and rate of assessment.

(a) Expenses that are reasonable and likely to be incurred by the Board during the 1979-80 crop year, will amount to \$8,885,869.

(b) The rate of assessment for said year payable by each handler in accordance with § 981.81 is fixed at 2.75 cents per pound of almonds (kernelweight basis), less any amount credited pursuant to § 981.41 but not to exceed 2.5 cents per pound of almonds (kernelweight basis).

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 22, 1979.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division.

[FR Doc. 79-26511 Filed 8-24-79; 8:45 am]

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1421

[CCC Grain Price Support Regulations, 1979 Crop Rice Supplement]

Grains and Similarly Handled Commodities; 1979 Crop Rice Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates, (4)

premiums and discounts, and (5) location differentials under which Commodity Credit Corporation (CCC) will extend price support on 1979-crop rice. This rule is needed to satisfy statutory requirements and will enable eligible rice producers to obtain loans and purchases on their eligible 1979-crop rice.

EFFECTIVE: August 27, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3749 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the *Federal Register* on December 12, 1978, 43 FR 58095, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1979 crop of rice. Such determinations included determining loan rates, premiums, and discounts for grades, classes, other qualities, location differentials and other provisions as may be needed to carry out the program. Interested persons were given until January 11, 1979, to submit recommendations, views, and comments. Eight responses were received concerning the loan and purchase rates for rice. Three respondents recommended no change in the loan rate, three recommended an increase without specifying a level, one commentator reported satisfaction with current whole kernel rice differentials, while another recommended elimination of class and quality differentials.

The loan and purchase rates established by CCC are determined herein on the basis of statutory requirements.

Final Rule

The General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto, and the 1978 and Subsequent Crops Rice Loan and Purchase Program Regulations, and any amendments thereto, in Part 1421, are further supplemented, as stated herein, for the 1979 crop of rice. Accordingly, the regulations in 7 CFR 1421.325 through 1421.328 and the title of the subpart are revised, as provided below, effective as to the 1979 crop of rice. The material

previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1979 Crop Rice Loan and Purchase Program

Sec.
1421.325 Purpose.
1421.326 Availability.
1421.327 Maturity of loans.
1421.328 Loan and purchase rates and premiums and discounts.

Authority.—Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 101, 401, 63 Stat. 1051, as amended, sec. 702, 91 Stat. 940 (7 U.S.C. 1441 and 1421).

§ 1421.325 Purpose.

This subpart contains additional program provisions which, together with the applicable provisions of the General Regulations Governing Price Support for 1978 and Subsequent Crops, as amended, and the 1978 and Subsequent Crops Rice Loan and Purchase Program Regulations, as amended, apply to loans and purchases for 1979-crop rice.

§ 1421.326 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1979 crop of eligible rice on or before March 31, 1980.

(b) *Purchases.* Producers desiring to offer eligible rice not under loan for purchase must execute and deliver to the county ASCS office prior to April 30, 1980, a purchase agreement (Form CCC-614) indicating the approximate quantity of 1979 crop of rice they will sell to CCC.

§ 1421.327 Maturity of loans.

Loans mature on demand but not later than April 30, 1980.

§ 1421.328 Loan and purchase rates and premiums and discounts.

(a) *Farm storage loans.* The loan rate for farm storage rice shall be \$6.79 per hundredweight for any class. The settlement rate shall be the applicable basis rate specified in paragraph (c) of this section, adjusted in accordance with the provisions of this section and §§ 1421.311 and 1421.22.

(b) *Warehouse storage loans and purchases.* The loan rate for rice stored modified-commingled and identity-preserved in an approved warehouse shall be the applicable basic rate specified in paragraph (c) of this section, adjusted as provided in paragraphs (e) and (f) of this section. The rate for loans on rice stored commingled in an approved warehouse and for settlement for modified-commingled and identity-preserved loans and purchases shall be the applicable basic rate specified in paragraph (c) of this section, adjusted in

accordance with the provisions of this section and §§ 1421.311 and 1421.22.

(c) *Basic rates.* The basic rate per 100 pounds of rice shall be computed as follows: Multiply the milling yield (in pounds per hundredweight) of whole kernels by the applicable loan value for whole kernels (as shown in the table below according to class), and round the result to the nearest hundredth. Similarly, multiply the difference between the total milling yield and the whole kernels yield (in pounds per hundredweight) by the applicable loan value for broken rice and round the result to the nearest hundredth. Add the results (as rounded) of the two computations to obtain the basic loan and purchase rate per 100 pounds of rice and express such rate in dollars and cents.

Loan Value for Whole Kernels and Broken Rice
(In cents per pound)

Rough rice class	Whole kernels	Broken rice
Long grains	12.18	4.40
Medium grains	10.43	4.40
Short grains	10.43	4.40

(d) *Premium.* The basic rate determined under paragraph (c) of this section shall be adjusted for Grade U.S. No. 1 by the following premium:

Grade U.S. No. 1	Cents per 100 lbs
	8

(e) *Discounts.*—(1) *Grade.* The basic rate determined under paragraph (c) of this section shall be adjusted for grades below U.S. No. 2 by the following discounts:

Grade U.S. No. 3	Cents per 100 lbs
Grade U.S. No. 4	15
Grade U.S. No. 5	30
	50

(2) *Smut damage.* The rate for rice evidencing smut damage shall be further adjusted by the following discounts:

Percent smut damage:	Cents per 100 lbs
Trace	0
0 1 to 1 0	5
1 1 to 2 0	10
2 1 to 3 0	15
3 1 and over	25

(f) *Location differentials.* For rice produced in areas specified below, discounts for location (to adjust for transportation costs of moving rice to an area where competitive milling facilities are available) shall be applied to the basic rate determined under paragraph (c) of this section and shall be in addition to any adjustment under paragraphs (d) and (e) of this section: *Provided, however,* That if such rice is transported and stored in a rice

producing area where no location differential is applicable, no discount for location shall be applied.

Differential Table
(Dollars per hundredweight)

Production areas	Discounts rice
State of Florida	\$2.73
States of North Carolina and South Carolina	2.75
Counties of Lafayette, Little River, and Miller, Ark.; Bowie, Tex.; McCurtain, Okla.; and Bos-sier Parish, La.	1.26
Imperial County, Calif., and adjacent counties in Arizona and California	3.115
Counties of Marion, Pike, and St. Charles, Mo.	1.89

(g) *Other.* Rice that (1) contains in excess of 14 percent moisture, (2) is weevily, (3) is musty, (4) is sour, shall not be eligible for loan. However, in the event that such rice is delivered in satisfaction of loan obligations to CCC, such rice will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity office for settlement purposes. Such discounts will be in effect at the time of delivery of rice to CCC for settlement purposes. CCC will, from time to time, adjust such discounts as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Note.—This rule has been determined to be not significant under the USDA criteria implementing Executive Order 12044 and contains necessary operating decisions needed to implement the national average for 1979 rice loan and purchase rates announced on June 29. An approved Final Impact Statement is available from George Schaefer, ASCS, (202) 447-8480.

Signed at Washington, D.C., August 17, 1979.

Ray Fitzgerald,
Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 107

Leverage to Unincorporated Small Business Investment Companies

AGENCY: Small Business Administration.
ACTION: Final rule.

SUMMARY: This final rule adopts without change the Proposed rule published April 19, 1979 (44 FR 23258). This rule sets forth SBA's policy that it will generally supply funds to Unincorporated Licensees (that is, Licensees organized as limited

partnerships) on a nonrecourse basis. SBA will usually look exclusively to the Unincorporated Licensee's assets for repayment of any debt owed SBA. However, in appropriate cases SBA may make the liability of the general partner as such a condition of its purchase or guaranty of the Unincorporated Licensee's debentures. Without this rule, SBA would have the right in every case to look to the separate (nonpartnership) assets of the general partner for payment of debts owed to SBA, for which the general partner is liable by operation of law. SBA believes nonrecourse financing for partnership SBICs would attract additional investors and capital into the SBIC program, in furtherance of Congressional policy.

EFFECTIVE DATE: This rule is effective as of August 27, 1979.

FOR FURTHER INFORMATION CONTACT: Arthur P. Cyr, Acting Deputy Associate Administrator for Investment, 202-653-6584.

SUPPLEMENTARY INFORMATION: The only comment received dealt with matters beyond the scope of this rule, but it was apparent that this rule is a step in the direction urged by the comment.

Accordingly, the proposed rule is adopted as published.

Pursuant to the authority contained in section 308 of the Small Business Investment Act of 1958, as amended, 15 U.S.C. 661, *et seq.*, Part 107 of Title 13, Code of Federal Regulations, is amended as follows:

1. Section 107.4 is amended by inserting after paragraph (d) the following paragraph:

§ 107.4 Limited Partnership SBIC.

(e) *Liability of general partner for partnership debts to SBA.* Subject to section 314 of the Act, the general partner of an Unincorporated Licensee shall not be liable solely by reason of its status as a general partner for repayment of any debts owed by the Licensee to SBA unless SBA, in the exercise of reasonable investment prudence, and with regard to the financial soundness of such Unincorporated Licensee, shall determine otherwise prior to the purchase or guaranty of such Unincorporated Licensee's debentures.

2. Present § 107.4(e) of the Regulation is redesignated as § 107.4(f).

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: August 14, 1978.

A. Vernon Weaver,
Administrator.

BILLING 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 79-WE-8-AD; Amdt. 39-3541]

Airworthiness Directives; McDonnell Douglas DC-10 Series Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires upper wing/VHF antenna anti-ice system testing and eventual modification of the system on DC-10 series airplanes. This AD is necessary to detect possible passive failures in the right upper wing/VHF antenna anti-ice valve position monitor. The passive failure followed by a valve failure could result in asymmetric ice accretion on RH wing surfaces and/or ice ingestion in the No. 2 engine.

DATES: Effective September 29, 1979.

Compliance schedule—As prescribed in the body of the AD.

ADDRESS: The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846. Attn: Director, Publications and Training, C1-750, (54-60).

Also, a copy of the service information may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue, SW., Washington, D.C. 20591, or
Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT: Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an Airworthiness Directive requiring upper wing/VHF antenna anti-ice system testing and modification of the system on McDonnell Douglas Model DC-10 series airplanes was published in the Federal Register at 44 FR 30100. The proposal was prompted by analysis

indicating that a right upper wing or VHF antenna anti-ice valve monitor could fail without knowledge of the flight crew. Under certain conditions this could result in asymmetric ice accretion on RH wing surfaces or could produce ice ingestion in No. 2 engine.

The monitor, without maintenance testing, could remain passively failed. The monitored valves have demonstrated a relatively high failure rate. A subsequent valve failure under these conditions could leave the aircraft without anti-ice protection without knowledge of the crew.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and comments were received indicating that DC-10 operators had no objection to this proposed rule.

While no adverse comments were received, the FAA has amended the proposal to include clarification of the requirements for inspection to relieve operators from the undue burden of performing the maintenance tests if the aircraft is already modified.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

McDonnell Douglas: Applies to DC-10-10, -10F, -30, -30F and -40 airplanes. Serial Numbers corresponding to manufacturer's fuselage Numbers 1 through 257, certificated in all categories.

Compliance is required as indicated.

To reduce the possibility of an unannounced anti-ice system failure, accomplish the following, unless modified per Paragraph (c) of this AD.

a. Within the next 300 hours' time in service from the effective date of this AD, unless previously accomplished within the last 3,000 hours' time in service, accomplish the tests specified below.

Test Procedure for Wing/Antenna Anti-ice System Passive Failures

1. Remove power from all AC and DC buses.
2. Open "BATT DIRECT & LEFT EMER DC FEED" circuit breaker on overhead CB panel.
3. Disconnect P1-837 at center accessory compartment right hand (CAC-R) disconnect panel.
4. Restore power to DC buses 1 and 3. (Other buses may be energized if desired).
5. Pressurize No. 3 pneumatic system to at least 15 psig per instructions in Maintenance Manual Chapter 36-00-00.
6. Place WING & ANT ANTI-ICE switch to TEST position and verify that WING & ANT ANTI-ICE DISAGREE light comes on and goes off.

Caution

WING ICE PROTECTION MUST NOT BE OPERATED IN TEST POSITION ON THE GROUND WITH ENGINES OR APU OPERATING OR WITH PNEUMATIC GROUND SUPPLY CONNECTED FOR MORE THAN 30 SECONDS. FAILURE TO OBSERVE THIS PRECAUTION CAN RESULT IN OVERHEATING WING LEADING EDGES, CAUSING DAMAGE.

Note.—The above caution is not applicable if an external ground pneumatic source with air temperature controlled at 190°F (88°C) or less is used.

7. Release WING & ANT ANTI-ICE switch and verify WING & ANT DISAGREE light comes on and goes off.

8. Depressurize No. 3 pneumatic system, remove power from all AC and DC buses, and verify "BATT DIRECT & LEFT EMER DC FEED" circuit breaker is open.

9. Reconnect P1-837 at CAC-R panel and restore power to aircraft as required.

10. Open "WING & ANT ANTI-ICE DISAGREE LTS" circuit breaker on upper main CB panel.

11. In lower galley or forward cargo area as applicable, gain access to antenna valve.

12. Disconnect P1-2472 from antenna valve position switches.

13. Close circuit breaker listed in Step 10.

14. Pressurize No. 3 pneumatic system to at least 15 psig per instructions in Maintenance Manual Chapter 36-00-00.

15. Place WING & ANT ANTI-ICE switch to TEST position and verify that WING & ANT ANTI-ICE DISAGREE light comes on and goes off.

Caution

WING ICE PROTECTION MUST NOT BE OPERATED IN TEST POSITION ON THE GROUND WITH ENGINES OR APU OPERATING OR WITH PNEUMATIC GROUND SUPPLY CONNECTED FOR MORE THAN 30 SECONDS. FAILURE TO OBSERVE THIS PRECAUTION CAN RESULT IN OVERHEATING WING LEADING EDGES, CAUSING DAMAGE.

Note.—The above caution is not applicable if an external ground pneumatic source with air temperature controlled at 190°F (88°C) or less is used.

16. Release WING & ANT ANTI-ICE switch and verify WING & ANT DISAGREE light comes on and goes off.

17. Open circuit breaker listed in Step 10.

18. Reinstall P1-2472 connector on antenna valve.

19. Restore aircraft to normal operating condition.

Note.—Steps 1 through 7 check the integrity of the VHF antenna anti-ice valve and monitoring circuit. Steps 10 through 16 check the integrity of the right wing anti-ice valve and monitoring circuit.

b. If Steps a.6 and 7 or a.15 and 16 are not satisfactorily accomplished, repair the unsatisfactory condition, or restrict the aircraft from flight in icing conditions.

c. Within one year from the effective date of this AD provide for performance monitoring of the wing and antenna anti-ice systems by separate lights in a manner

approved by the Chief, Aircraft Engineering Division, FAA Western Region.

Note.—McDonnell Douglas Service Bulletin 50-47 dated December 5, 1978 provides a satisfactory method of accomplishment.

d. Alternative inspections, modifications or other actions which provide an equivalent level of safety may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

This amendment becomes effective September 29, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Issued in Los Angeles, Calif., on August 15, 1979.

William R. Krieger,

Acting Director, FAA Western Region.

[FR Doc. 79-26584 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-WE-11-AD; Amdt. 39-3542]

Airworthiness Directives; Hughes Model 369D Helicopter

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective to all persons an amendment adopting a new Airworthiness Directive (AD) which was previously made effective as to known operators of Hughes Helicopters Model 369D Helicopter by priority mail dated June 20, 1979. This AD was issued because of three reported failures of the main rotor blade root fittings. This AD requires an initial visual inspection with 5X or higher magnification glass, and repetitive visual inspections, for cracks or corrosion of the main rotor blade upper and lower root fittings and lead-lag links.

DATES: Effective August 30, 1979, except with respect to certain persons specified in the body of the AD.

Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from: Hughes Helicopters, Centinela and Teale Streets, Culver City, California 90230.

FOR FURTHER INFORMATION CONTACT: Wallace M. Frei, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles,

California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: An emergency Airworthiness Directive (AD) was adopted on June 19, 1979 and made effective immediately upon receipt of the airmail letter dated June 20, 1979 to all known operators of Hughes Helicopters Model 369D Helicopter because of three reported failures in the main rotor blade root fittings and the main rotor blade attach lugs of the lead-lag links, due to corrosion and/or fretting. This condition could result in the loss of a main rotor blade. The AD required an initial visual inspection with a 5X or higher magnifying glass within ten (10) hours time in service for cracks in the main rotor blade root fittings and attach lugs of the lead-lag links, and also the application of zinc chromate primer for corrosion protection. In addition, a repetitive visual inspection for broken or cracked lugs, without removing the blades, is required at intervals not to exceed 25 hours time in service.

Since the issuance of the June 20, 1979 emergency airmail letter AD, it has been determined that corrosion is a major cause of crack initiation. The AD has been amended to also inspect for corrosion.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest, and good cause existed for making the AD effective immediately as to all known operators of Hughes Helicopters Model 369D Helicopter. These conditions still exist and the AD is hereby published in the Federal Register as an Amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

Hughes Helicopters: Applies to Hughes Model 369D Helicopter certificated in all categories.

Compliance required as indicated.

To prevent failure of the main rotor blade attachment lugs, which could result in loss of a main rotor blade, accomplish the following:

(a) Within ten (10) hours time in service, after the effective date of this AD, unless already accomplished, remove the main rotor blades in accordance with Hughes Model

369D Helicopter Basic Handbook of Maintenance Instructions and visually inspect with a 5X or higher magnifying glass the area around the main rotor blade attach pins lug holes in the upper main rotor blade root fitting, P/N 369A1113, the lower main rotor blade root fitting, P/N369A1114, and the main rotor vertical hinge links (lead-lag links), P/N369H1203, for cracks and corrosion.

(1) If any cracks or corrosion are found in main rotor blade upper and lower root fitting, replace that main rotor blade, P/N369D21100, before further flight.

(2) If any cracks or corrosion are found in the main rotor vertical hinge link, P/N 369H1203, replace the main rotor hub, P/N 369D21200, before further flight.

(3) If no cracks or corrosion are found in the main rotor fittings or main rotor vertical hinge links (lead-lag links), seal all junctions between the steel bushing and lugs with a thin film of zinc chromate primer without removing the bushings.

(b) Thereafter, without removing the main rotor blades and within intervals not exceeding 25 hours time in service, visually inspect all the exposed portions of all main rotor blade upper and lower root fitting attach lugs and main rotor hub lead-lag links attach lugs for broken, corroded or cracked lugs. If any broken, corroded or cracked lugs are found, replace in accordance with (a)(1) and/or (a)(2) above.

(c) Equivalent visual inspections may be used when approved by the Chief, Aircraft Engineering Division, FAA, Western Region.

This amendment becomes effective August 30, 1979, as to all persons except those persons to whom it was made immediately effective by the airmail letter dated June 20, 1979, which contained this amendment.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on August 15, 1979.

William R. Krieger

Acting Director, FAA Western Region.

[FR Doc. 79-26570 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-WE-18-AD; Amdt. 39-3534]

Airworthiness Directives; McDonnell Douglas DC-10 Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting an airworthiness directive (AD) which was previously made effective as to known operators of McDonnell Douglas

Model DC-10-10, DC-10-10F, DC-10-40 airplanes by telegraphic message dated July 15, 1979. This AD was required because of failure of the nuts retaining the engine at the aft engine mount which could result in loss of engine retention strength capability.

DATES: Effective August 29, 1979, and was effective earlier for all recipients of the telegram dated July 15, 1979.

Compliance schedule—As prescribed in the body of the AD.

FOR FURTHER INFORMATION CONTACT: Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: Pursuant to the authority delegated me by the administrator, an AD was adopted on July 15, 1979, and was made effective to all known operators of McDonnell Douglas Model DC-10-10, DC-10-10F, and DC-10-40 series airplanes because of a possibility of loss of engine retention strength capability resulting from failures of the nuts retaining the engine at the aft engine mount.

Since it was found that immediate corrective action was required, notice of public procedure thereon was impracticable and contrary to the public interest and good cause existed therefore, to make the AD effective immediately as to all operators of McDonnell Douglas Model DC-10-10, -10F, and -40 series airplanes. These conditions still exist and the AD is hereby published in the Federal Register as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

McDonnell Douglas: Applies to McDonnell Douglas Model DC-10-10, DC-10-10S, and DC-10-40 series airplanes certificated in all categories. Compliance required as indicated. To prevent failure of the aft engine mount barrel nuts on No. 1, No. 2 and No. 3 engines which could result in the loss of engine support, accomplish the following unless already accomplished subsequent to July 6, 1979:

(a) Before further flight after August 29, 1979, visually inspect the aft engine mount barrel nuts on No. 1, No. 2 and No. 3 engines for evidence of cracking with particular regard to the area adjacent to the protruding bolt shank.

(b) Before further flight after August 29, 1979, verify torque values of the aft engine mount bolts which mate with the barrel nuts on No. 1, No. 2 and No. 3 engines to the minimum value specified in the DC-10 Maintenance Manual.

(c) Revenue flight to the first base for the necessary equipment to accomplish (b) of this AD is authorized if such equipment is not available at the location of the aircraft on August 29, 1979.

(d) Report results of all inspections to the Chief, Aircraft Engineering Division, FAA Western Region, within twenty-four hours of accomplishment in the following format:

(1) "N" number.

(2) Hours' time-in-service and inspection.

(3) The results of inspection by reference to specific paragraph of this AD.

(e) If cracks are discovered per paragraph (a) or if minimum torque values cannot be achieved per paragraph (b), replace the barrel nut with like serviceable part prior to further flight.

This amendment becomes effective August 29, 1979, and was effective earlier for all recipients of the telegram dated July 15, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on August 14, 1979.

Benjamin Demps, Jr.,

Acting Director, FAA Western Region.

[FR Doc. 79-26574 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-WE-20-AD; Amdt. 39-3535]

Airworthiness Directives; Piper Aerostar Model 600 and 601 Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires modification of the upper main cabin door latch assemblies. This AD will require modification to prevent the possible disengagement of the door locking pins, a positive visual indication of locking pin position and replacement of the rod end fittings. This AD is necessary to prevent the loss of the upper cabin door in flight.

DATES: Effective August 29, 1979.

Compliance required within thirty (30) days after the effective date.

ADDRESSES: The applicable service information may be obtained from: The Piper Aerostar Customer Service Department, 2560 Skyway Drive, Santa Maria, California 93454.

Also, a copy of the service information may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591.

or
Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT: Kyle L. Olsen, Executive Secretary, Airworthiness Directive, Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: There have been two instances of inflight loss of the upper cabin door and reports of the door latch mechanism not operating properly. In one instance, the door could not be opened by the pilot and the emergency exit was used to exit the aircraft. In other instances, the upper cabin door is left open by the pilot for ventilation during taxi and the door is not latched before takeoff. The manufacturer has issued two service bulletins which modify the door latch mechanism and add a positive visual indication to the pilot if the upper cabin door is unlatched.

Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued which requires (1) installation of a spacer to prevent the disengagement of the door locking pins in the event of separation of the inner door handle from its shaft, (2) installation of a positive visual indication of door locking position and (3) replacement of the door locking rod end fittings made from tubing with those made from solid steel.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and a good cause exists for making this amendment effective in less than thirty (30) days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

Piper: (Ted Smith) applies to Aerostar Model 600 and 601 airplanes certificated in all categories:

Compliance required within thirty (30) days after the effective date of this AD, unless already accomplished.

To prevent inflight loss of the upper cabin door and to prevent the disengagement of door locking pins accomplish the following:

(a) Install in the upper cabin door latching mechanism, spacers and the locking position visual indicators in accordance with Aerostar Service Bulletin 600-35, dated August 28, 1973.

(b) Replace the rod end fittings made from tubing with solid steel rod end fittings in accordance with Aerostar Service Bulletin 600-61, dated January 28, 1977.

(c) Alternate modifications or other actions which provide an equivalent level of safety may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

This amendment becomes effective August 29, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on August 14, 1979.

Benjamin Damps, Jr.,

Acting Director, FAA Western Region.

[FR Doc. 79-26575 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-WE-22-AD; Amdt. 39-3536]

Airworthiness Directives; Lockheed L-1011 Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires an inspection of the No. 2 engine electrical power feeder cable and corrective action, if required.

This AD is required to prevent loss of integrity of the No. 2 engine firewall as a result of burn-through due to electrical arcing from the No. 2 engine electrical power feeder cable.

DATES: Effective August 29, 1979.

Compliance schedule—Within 400 hours' time in service from August 29, 1979.

ADDRESSES: The applicable service information may be obtained from: Lockheed California Company, Burbank, California 91520.

Also, a copy of the service information may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue, S.W., Washington, D.C. 20591.

or

Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, California 90261.

FOR FURTHER INFORMATION CONTACT: Jerry J. Presba, Executive Secretary, Airworthiness Directive, Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-6351.

SUPPLEMENTARY INFORMATION: The FAA has received a report that one L-1011 operator encountered grounding of the No. 2 engine generator feeder cable to the firewall at approximately Fuselage Station 2022. This inadvertent grounding produced overheating and burn-through of the firewall, and is attributed to possible excessive slack in the wire and/or missing wire clamp cushion(s).

This AD provides for inspection for these discrepant conditions and further specifies corrective action to prevent recurrence from this cause.

Since a situation exists that requires immediate adoption of this regulation it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

Lockheed California: Applies to Lockheed L-1011-385 series airplanes certificated in all categories:

Compliance required within the next 400 hours' time in service from the effective date of this AD, unless already accomplished.

To prevent local structural damage and insure security of the No. 2 engine generator feeder cables, accomplish the following:

(a) Inspect the No. 2 engine generator feeder cables in the aft body area between Fuselage Station 2011 and Fuselage Station 2053 above Waterline 350 for looseness and slack, surface abrasions, discoloration of outer surface and close proximity to structure without clamps or other protective supports. Inspect feeder cable support clamps for lack of clamp cushions and bent or dislodged mount brackets or clamps. These inspections are to be made in accordance with Part 2 of Lockheed Service Bulletin 093-24-086, dated August 2, 1979.

(b) If any of the above discrepant conditions is found to exist, prior to further flight perform corrective action in accordance with Part 2 of Lockheed Service Bulletin 093-24-086, dated August 2, 1979.

(c) Alternative inspections, modifications or other actions which provide an equivalent level of safety may be used when approved

by the Chief, Aircraft Engineering Division, FAA Western Region.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

This amendment becomes effective August 29, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on August 14, 1979.

Benjamin Damps, Jr.,

Acting Director, FAA Western Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-NW-10-AD; Amdt. 39-3539]

Airworthiness Directives; Rockwell NA 265-60 Airplanes Equipped With Ralsbeck Mark Five Modification

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On April 13, 1979, a telegraphic Airworthiness Directive (AD) was issued and made effective upon receipt to all known operators of Rockwell NA 265-60 (Sabreliner) which had been modified per Ralsbeck STC SA687NW. The AD, which was amended April 18, 1979, and April 23, 1979, required deactivation of the flap system and the imposition of certain operating limitations following an incident which resulted in loss of control of a modified Sabreliner. AD 79-13-02 (Amendment 39-3499), 44 FR 36169 was published on June 21, 1979, making the telegraphic AD and Amendments effective as to all persons. Ralsbeck has now developed a modification which is terminating action for the AD. This Amendment incorporates the approved terminating action.

DATES: The effective date: September 4, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. William M. Perrella, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108. Telephone (206) 767-2516.

SUPPLEMENTAL INFORMATION: The Ralsbeck Group has now developed and the FAA has approved modifications which, when made, will warn of flap asymmetrical conditions prior to the flap impinging on the aileron. Since this

corrects the unsafe condition which required the issuance of AD 79-13-02, the AD is further herein amended to incorporate the modifications as terminating action.

Since this amendment imposes no additional burden on any person and is relieving in nature, it is found that notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by further amending Airworthiness Directive 79-13-01 (Amdt. 39-3499, 44 FR 36169; dated June 21, 1979) by adding a paragraph D as follows:

"D. Installation of the modifications in accordance with FAA-approved Ralsbeck Mark Five Sabreliner Service Bulletin No. 5 (or equivalent modifications approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region) and incorporation of Change I of the FAA-approved Airplane Flight Manual (Ralsbeck Report 76-601 for S/N 306-84 and subsequent; and 76-602 for S/Nos. 306-1 through 306-63), constitute terminating action to the requirements of this Airworthiness Directive."

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to The Ralsbeck Group, 7777 Perimeter Road South, Boeing Field International, Seattle, Washington 98108. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective September 4, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the provisions of Executive Order 12044 and as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Seattle, Wash., on August 15, 1979.

C. B. Walk, Jr.,

Director, Northwest Region.

Note.—The incorporation by reference provisions in the document were approved by

the Director of the Federal Register on June 19, 1967.

[FR Doc. 79-26577 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-NW-26-AD; Amdt. 39-3533]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) to require inspection and replacement, as required, of the inboard nacelle lower diagonal strut forward fittings. Strut fitting cracking could eventually result in fitting failures.

DATES: Effective date September 4, 1979. Compliance required within 500 hours time-in-service after the effective date of this AD unless already accomplished.

ADDRESS: The Boeing service bulletin specified in this directive may be obtained upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Iven D. Connally, Airframe Section, ANW-212, Engineering and Manufacturing Branch, FAA, Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: Eight instances of cracked diagonal strut fittings have been reported at the lower strut forward attachment on Boeing 747 aircraft. The cracks are due to stress corrosion and fatigue. Loss of a support fitting would reduce the pylon structural integrity sufficiently to allow engine separation under certain flight conditions. Since this condition is likely to exist or develop in other Boeing 747 airplanes, action is taken herein to require inspection and replacement, if required, of the strut attachment fittings. Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation

Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Boeing: Applies to all Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747-54-2062 with more than 5,000 landings. Compliance required with 500 hours time-in-service after the effective date of this AD unless already accomplished. To prevent failure of the inboard pylon lower diagonal brace fittings accomplish the following:

A. Within 500 hours time-in-service after the effective date of this AD unless already accomplished, visually inspect the forward lower diagonal brace fittings for cracks in accordance with Boeing Service Bulletin 747-54-2062, or methods approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

B. Replace or repair cracked fittings before further flight in accordance with Boeing Service Bulletin 747-54-2062, or in accordance with procedures approved by the Chief, Engineering and Manufacturing Branch, FAA, Northwest Region.

C. If no cracks are found, repeat the inspection in accordance with Paragraph A above at intervals not to exceed 1,000 landings until all affected fittings are replaced with steel fittings. If cracks are found and reworked, repeat the inspection at intervals not to exceed 250 landings, until the reworked fitting is replaced.

D. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, Northwest Region, may adjust the compliance times if the request contains substantiating data to justify the increase for that operator.

E. Report results of the inspections of the fittings both positive and negative, to the Chief, Engineering and Manufacturing Branch, FAA, Northwest Region. (Reporting approved by the Bureau of Budget under BOB No. 04-R0174.)

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective September 4, 1979.

(Secs. 313(a), 601, and 603 Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89).)

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provisions of Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 28, 1979).

Issued in Seattle, Wash., on August 13, 1979.

Note.—The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

C. B. Walk, Jr.,

Director, Northwest Region.

[FR Doc. 79-26578 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-NW-24-AD Amdt. 39-3537]

Airworthiness Directives: Boeing Model 747 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Airworthiness Directive (AD) requires inspection and replacement, as necessary, of the lanyard cables on B. F. Goodrich escape slide/raft assemblies on certain Boeing 747 airplanes. During routine inspection, the slide/raft firing and packboard lanyards were found to be subject to corrosion which caused cable separation. Separation of the firing or packboard lanyard will prevent proper inflation of the slide/raft.

DATES: Effective date September 4, 1979.

ADDRESSES: The service bulletins specified in this directive may be obtained upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington, 98124. These documents may be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Roger S. Young, Airframe Section, ANW-212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: The firing lanyard connects the girt bar to the valve on the stored gas reservoir and activates the inflation of the slide/raft assembly during an emergency evacuation of the airplane. Separation of the firing lanyard will prevent inflation of the slide/raft both automatically and manually. Failure of the packboard lanyard will prevent the slide/raft from separating from the packboard and thus prevent proper inflation. In approximately forty percent of the twenty slide/raft assemblies checked, the firing lanyard showed evidence of corrosion. There were six instances of firing lanyards and two instances of

packboard lanyards that had separated. Since this condition is likely to exist or develop on other slide/raft assemblies, this AD requires inspecting the lanyards and replacing as necessary. Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to all Boeing Model 747 airplanes which are equipped with slide/raft assemblies. Compliance is required as indicated. Accomplish the following:

A. Within the next 90 days from the effective date of this AD, unless accomplished within the last 180 days, inspect the firing and packboard lanyards for corrosion in accordance with Boeing Alert Service Bulletin 747-25A2467 and B. F. Goodrich Alert Service Bulletin 25-051.

B. Lanyards showing signs of corrosion are to be replaced with new parts in accordance with B. F. Goodrich Alert Service Bulletin 25-051.

C. Repeat inspections, described in paragraph A, at intervals not to exceed one (1) year from the date of the last inspection.

D. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineer and Manufacturing Branch, FAA Northwest Region may adjust the inspection interval if the request contains substantiating data to justify the increase for that operator.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective September 4, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.85).)

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provisions of Executive Order 12044 and as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 28, 1979).

Issued in Seattle, Wash., on August 15, 1979.

Note.—The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

C. B. Walk, Jr.,

Director, Northwest Region.

[FR Doc. 79-26581 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-NW-18-AD—Amdt. No. 39-3538]

Airworthiness Directive; Hillier UH12D and UH12E (Including 4-Place) Helicopters Soloy Turbine Conversions

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On June 15, 1979, an airmail letter Airworthiness Directive (AD) was issued and made effective upon receipt to all known operators of Hillier UH12D and UH12E (including 4-place) helicopters that have been converted to turbine power by Soloy Conversions LTD., under Supplemental Type Certificates (STC'S SH177WE and SH178WE). The AD required a one time inspection, reporting of results, and possible repair or replacement of the outer gimbal forward attachment fitting on these aircraft. This action was prompted by four (4) confirmed incidents of cracked forward gimbal attachment fittings on Soloy Turbine converted helicopters, one of which completely failed one side of the dual load path fitting in less than 20 flight hours after turbine conversion. Compliance with the AD will result in detection of cracks in the fitting thereby preventing failure of the fitting and consequential loss of main rotor control. This condition still exists and the AD is hereby published in the Federal Register to make it effective as to all persons.

DATES: The effective date is September 4, 1979, except for recipients of the airmail letter of June 15, 1979, which contained this amendment. Initial compliance required before further flight.

FOR FURTHER INFORMATION CONTACT: Mr. James R. Haynes, Airframe Section, ANW-212, Engineering and Manufacturing Branch, Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108. Telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: The cracks found were in the forward outer gimbal attachment fitting (Hiller Engine Mount Part No. 63181-5). The cracks appeared to originate from the weld

beads and possibly progress into the gusset area of the fitting. The cracks occurred in both sides of the fitting simultaneously which negates the failsafe properties of the fitting. Complete failure of the forward fitting would result in an upward shift of the transmission causing binding of all main rotor controls and possible loss of the main rotor transmission assemblies. It was not determined if these cracks were caused by the higher flight loads induced by the turbine conversion, by damage induced at the time of conversion, or by incipient damage that already existed in these fittings when salvaged from previously damaged helicopters prior to turbine conversion. Consequently, the AD includes a reporting requirement to provide additional information.

Since this condition is likely to exist in other Hillier Helicopter Models UH12D and UH12E, converted to turbine power by Soloy Conversions, LTD. under applicable STC's, the AD was issued and is now published in the Federal Register requiring inspection and repair or replacement, as necessary, of the affected parts.

Since a situation existed that required immediate adoption of this regulation, it is found that notice and public procedure thereon were impracticable and good cause existed at the time of issuance, and still exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations, (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Hiller Aviation: Applies to Hillier UH12D and UH12E (including 4-place) helicopters certificated in all categories which have been converted to turbine power under Soloy Conversions, LTD. Supplemental Type Certificates SH177WE and SH178WE.

A. Before further flight, unless already accomplished in the last 20-flight hours, remove the paint from the outer gimbal forward attach fitting of the Hillier engine mount Part No. 63181-5 and dye penetrant or magnetic particle inspect the gusset weld beads for cracks on both the front and back sides of the gusset.

B. If cracks are found, repair or replace the fitting on the engine mount Part No. 63181-5 before further flight in accordance with the following:

1. If cracks in the welds do not exceed 25 percent of the total weld length, repair by grinding out the defect and rewelding with Heliarc equipment and Oxweld #32 welding rod in accordance with the Hillier Structural Repair Manual.

2. If cracks in the fitting do not extend into the original welds, they may be repaired by welding with the equipment in (1) above in accordance with the Hillier Structural Repair Manual.

3. If cracks are found outside the limits of 1 or 2 above, replace the fitting in accordance with the engine mount strut repair procedures of the Hillier Structural Repair Manual by using appropriate fixture for maintaining mounting locations.

C. Equivalent repairs or replacements may be approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

D. Report cracks found, total flight hours, and flight hours since last inspection, to Chief, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, WA 98108. Reporting approved by the Bureau of the Budget under BOB No. 04-R0174.

E. Helicopters may be flown to a maintenance base for inspections or replacements in accordance with FAR 21.197.

"This Amendment is effective September 4, 1979, and was effective earlier for all recipients of the airmail letter dated June 15, 1979, which contained this Amendment."

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a)), 1421, 1423) and sec. 6(c) of Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the provisions of Executive Order 12044 and as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 28, 1979).

Issued in Seattle, Wash., on August 15, 1979.

C. B. Walk, Jr.,

Director, Northwest Region.

[FR Doc. 79-26582 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 79-WE-3-AD; Amdt. 39-3540]

Airworthiness Directives; Hillier Helicopter Models UH-12D and UH-12E

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes the currently effective Airworthiness Directive (AD) which requires inspection and replacement, if necessary, of main rotor blade forks on Hillier UH-12D and UH-12E helicopters. This amendment revises the effectivity of the mandatory action and subdivides the required action into two categories, dependent upon the main rotor blade fork serial number.

DATES: Effective August 30, 1979. Compliance schedule—As prescribed in the body of the AD.

FOR FURTHER INFORMATION CONTACT: Jerry Presba, Executive Secretary, Airworthiness Directive Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009. Telephone: (213) 536-8351.

SUPPLEMENTARY INFORMATION: Amendment 39-3441, (44 FR 18645), AD 79-07-01 requires inspection and replacement, if necessary, of main rotor blade forks on UH-12D and UH-12E helicopters.

After issuing AD 79-07-01 the FAA has received a report of a crack in a main rotor blade fork which was in a serial number category exempt from the provisions of the AD. Therefore, the FAA is superseding AD 79-07-01 with a new AD requiring inspection of these additional serial numbered parts. Since this latter group of serial numbered parts is of an improved design, the inspection requirements for this serial numbered category of main rotor blade forks is less frequent than that specified for the original group of forks.

Additionally, the FAA has learned that certain serial numbered forks of the improved design were erroneously included in the inspection requirements of the superseded AD. Relief from undue burden is achieved by deleting these serial numbers from the more rigorous inspection requirements.

The FAA has also determined that the daily visual inspection requirements specified in the superseded AD are capable of accomplishment by the flight crew. The appropriate language has therefore been revised to "check," with an explanatory note.

This amendment relieves the restriction and imposes no additional burden to persons affected by the superseded AD. With respect to the additional requirements of the AD, it was found that immediate corrective action was required, hence notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making this amendment effective in less than thirty (30) days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

Hiller Aviation: I. Applies to Models UH-12D and UH-12E helicopters certificated in

all categories equipped with main rotor blade fork P/N 52110-3, S/N 4000P and lower Serial Numbered forks, except Serial Nos. 001P, 002P, 003P, 04P, 005P through 009P, 0010P, 0011P, 0012P, 013P through 016P, 0017P, 018P, 020P, 022P through 027P, 0027P, 028P through 040P, and 043P through 052P.

To detect cracks and prevent failures which have occurred in the main rotor blade fork P/N 52110-3 at the outboard tension-torsion bar retention bolt hole, the following inspections shall be conducted:

(a) Perform daily visual check of P/N 52110-3 forks for cracks in the area of the outboard tension-torsion bar retention bolt hole. Washers and nuts need not be removed for this inspection. This check may be performed by the pilot.

Note.—For the requirements regarding the listing of compliance and method of compliance with this AD in the aircraft's permanent maintenance record, see FAR 91.173.

(b) On forks having 240 or more hours' time in service, on the effective date of this AD, within the next 10 hours' time in service, unless already accomplished within the last 90 hours' time in service, and within each 100 hours' time in service thereafter from the last inspection, accomplish the inspection specified in I(d).

(c) On forks having less than 240 hours' time in service on the effective date of this AD, accomplish the inspection specified in I(d) prior to the accumulation of 250 hours' time in service and within each 100 hours' time in service thereafter from the last inspection.

(d) Perform a dye penetrant inspection, or FAA approved equivalent, of the bolt hole and adjacent milled surfaces. For this inspection remove the nut, washer and pin.

(e) Replace cracked rotor forks with like serviceable parts prior to further flight.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections required by this AD.

(g) Equivalent inspection procedures and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

II. Applies to Models UH-12D and UH-12E helicopters certificated in all categories equipped with main rotor blade fork P/N 52110-3, Serial Numbers 001P, 002P, 003P, 04P, 005P through 009P, 0010P, 0012P, 013P through 016P, 0017P, 018P, 020P, 022P through 027P, 028P through 040P, 043P through 052P and 4001P and higher Serial Numbers.

a. Coincident with replacement of the main rotor retention pin P/N 51452 perform a visual inspection of the P/N 52110-3 fork using a 10 power magnifying glass. The P/N 52110-3 fork is to be inspected for cracks in the area of the outboard tension-torsion bar retention bolt hole including both the forward and aft faces.

Note.—The replacement period of the retention pin P/N 51452 is 643 hours' time in service.

b. Replace cracked rotor forks with like serviceable parts prior to further flight.

c. Equivalent inspection procedures and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

This supersedes Amendment 39-3441 (44 FR 18645), AD 79-07-01.

This amendment becomes effective August 30, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Issued in Los Angeles, Calif., on August 15, 1979.

William R. Krieger,
Acting Director, FAA Western Region.

[FR Doc. 79-26583 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-GL-26]

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate additional controlled airspace near Ashland, Wisconsin, to accommodate revised Very High Frequency Omnidirectional Range (VOR) and Non-Directional Radio Beacon (NDB) instrument approach procedure into the John F. Kennedy Memorial Airport, Ashland, Wisconsin.

EFFECTIVE DATE: October 4, 1979.

FOR FURTHER INFORMATION CONTACT: Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone (312) 694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions and other aircraft operating under visual weather conditions. The floor of the controlled airspace will be lowered from 1200 feet above the surface to 700 feet for a distance of approximately one mile beyond that now depicted. The development of these proposed procedures necessitates that the FAA alter the designated airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitudes for this procedure will be established below the floor of the 700 foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable

other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Discussion of Comments

On page 31198 of the Federal Register dated May 31, 1979, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate additional controlled airspace near Ashland, Wisconsin. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective October 4, 1979, as follows:

In § 71.181 (44 FR 442), the following transition area is amended to read:

Ashland, Wis.

That airspace extending upward from 700 feet above the surface within an 8 mile radius of the John F. Kennedy Memorial Airport (Latitude 40°32'59" N.; Longitude 90°56'06" W.) and within 4.5 miles west and 10.5 miles east of the Ashland, Wisconsin VOR 205° radial, extending from the 8 mile radius area to 18.5 miles southwest of the Ashland, Wisconsin VOR.

(Sec. 307(a), Federal Aviation Act of 1958 (47 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61, of the Federal Aviation Regulations (14 CFR 11.61)).

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this document is contained in the docket. A copy of it may be obtained by writing to the Federal Aviation Administration, Attention: Rules Docket Clerk (AGL-7), Docket No. 79-GL-26, 2300 East Devon Avenue, Des Plaines, Illinois.

Issued in Des Plaines, Ill., on August 14, 1979.

Wayne J. Barlow,
Director, Great Lakes Region.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-ANW-09]

Redesignation of Control Zone, Pendleton, Ore.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the effective time for the Pendleton, Oregon, control zone from continuous to part-time to establish effective times for this control zone which coincide with the availability of weather reporting service at this location. The National Weather Service has reduced their hours of operation at Pendleton, Oregon, making this amendment necessary.

EFFECTIVE DATE: August 28, 1979.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, Airspace Specialist (ANW-534), Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, Northwest Region, FAA Building, Boeing Field, Seattle, Washington, 98108; telephone: (206) 767-2610.

SUPPLEMENTARY INFORMATION:

History

The National Weather Service at Pendleton, Oregon, currently provides weather reporting service supporting the control zone at Pendleton, Oregon. Beginning May 5, 1979, operational hours for the National Weather Service at Pendleton, Oregon, were changed from full time to the period from 0600 to 2200 hours local time daily and weather reporting service is not available for an 8-hour period. Therefore, the present continuous effective period for the Pendleton, Oregon, control zone must be revised to establish effective times for this control zone coincidental with the availability of weather reporting service by the National Weather Service.

Furthermore, it is anticipated that the loss of weather reporting service at Pendleton, Oregon, will be temporary. Therefore, the revised Pendleton, Oregon, control zone designation provides for changes in the effective periods for this control zone by Notice to Airmen with continuous publication of these effective periods in the Airport/Facility Directory.

Since this amendment imposes no additional burden on any person and is relieving in nature, notice and public procedures hereon are unnecessary and the amendment may be made effective in less than thirty (30) days.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (FARs) revises the control zone at Pendleton, Oregon.

The reduced hours of weather reporting service by the National Weather Service at Pendleton, Oregon, necessitates the changing of the effective hours of operation for the Pendleton, Oregon, control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective August 28, 1979, as follows:

By amending Subpart § 71.171 by adding the following:

Pendleton, Ore.

This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory. (Sec. 107(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))).

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Seattle, Wash., on August 15, 1979.

C. B. Walk, Jr.,
Director, Northwest Region.

[FR Doc. 79-26572 Filed 8-24-79; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-SO-53]

Alteration of Transition Area, Elkin, N.C.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule redesignates an extension and corrects the geographic location of the Zephyr RBN in the Elkin, North Carolina, Transition Area. This action provides controlled airspace required to protect instrument flight operations at the Elkin Municipal Airport.

EFFECTIVE DATE: September 20, 1979.
ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT: Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: In the Elkin, North Carolina, Transition Area described in § 71.181 (44 FR 442), an extension was designated on the 056° bearing from the Zephyr RBN to provide controlled airspace for aircraft executing the NDB RWY 25 standard instrument approach procedure at the Elkin Municipal Airport. The final approach course and geographic location of the Zephyr RBN have been changed. It is necessary to redesignate the extension and correct the RBN location in order to provide the required controlled airspace to protect aircraft executing the approach procedure.

Since this amendment is minor in nature and creates no burden on the public, notice and public procedures hereon are unnecessary.

Adoption of the Amendment

Accordingly, Subpart G, § 71.181 (44 FR 442) of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., September 20, 1979, as follows:
Elkin, N.C.

" * * * 056° bearing from Zephyr RBN (latitude 36°18'47" N., longitude 80°43'25" W.) * * * " is deleted and " * * * 057° bearing from Zephyr RBN (latitude 36°18'35" N., longitude 80°43'37" W.) * * * " is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in East Point, Ga., on August 15, 1979.

George R. LaCaille,
Acting Director, Southern Region.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-SO-51]

Alteration of Transition Area, Southport, N.C.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This rule redesignates an extension in the Southport, North Carolina, Transition Area. This action provides controlled airspace required to protect instrument flight operations at the Brunswick County Airport.

EFFECTIVE DATE: September 20, 1979.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT: Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: In the Southport, North Carolina, transition area described in § 71.181 (44 FR 442), an extension was designated on the 315° bearing from the Yaupon RBN to provide controlled airspace for aircraft executing the NDB-A standard instrument approach procedure at the Brunswick County Airport. The final approach course in the procedure has been changed to the 291° bearing. It is necessary to redesignate the extension to provide the required controlled airspace to protect aircraft executing the procedure.

Since this amendment is minor in nature and creates no greater burden on the public, notice and public procedure hereon are unnecessary.

Adoption of the Amendment

Accordingly, Subpart G, § 71.181 (44 FR 442) of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, September 20, 1979, as follows:

Southport, N.C.

" * * * 315° * * * " is deleted and " * * * 291° * * * " is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—The Federal Aviation Administration has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally

current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in East Point, Ga., on August 15, 1979.

BILLING CODE 4910-13-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. I

Interpretative Statement Regarding the Use of Misleading Names by Persons Required To Be Registered With the Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Interpretative statement.

SUMMARY: The Commission is concerned about the use of names by individuals and firms required to be registered with the Commission which may mislead the public as to the affiliations or the true nature of the businesses of those persons. Of particular concern is the use of terms like "exchange" and "board of trade" in misleading contexts. The Commission is, therefore, announcing that it considers the use of a misleading name to constitute "other good cause" for the denial, suspension or revocation or registration.

FOR FURTHER INFORMATION CONTACT: Mark N. Rae, Office of the General Counsel, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., 20581, 202-254-7285.

SUPPLEMENTARY INFORMATION: Under section 8a(2)(B) of the Commodity Exchange Act, 7 U.S.C. 12a(2)(B) (1976), the Commission may deny an application for registration if the Commission determines, after affording the applicant an opportunity for a hearing, that the applicant is unfit to engage in the activity for which registration is sought.¹ A finding of unfitness may be based on one or more of several enumerated factors or on

¹ Individuals and firms engaged in commodity activities are required to register with the Commission in various categories. See, e.g., Sections 4d (futures commission merchants), 4e (floor brokers) and 4m (commodity trading advisors and commodity pool operators) of the Act, 7 U.S.C. 6d, 6e and 6m (1976), as amended, 92 Stat. 869, 870 (1978). Section 4k of the Act, 7 U.S.C. 6k (1976), as amended, 92 Stat. 869 (1978), generally requires the registration of any person associated with a futures commission merchant or with any agent thereof as a partner, officer or employee (or occupying a similar status or performing similar functions).

"other good cause shown." A finding of "other good cause shown" to deny registration is also sufficient to suspend or revoke the registration of any person. See Section 8a(3), 7 U.S.C. 12a(3) (1976).

In an interpretative statement published in the Federal Register on July 3, 1975, the Commission set forth a number of factors which, in the Commission's opinion, would constitute "other good cause" for denial of an application for registration. See 40 FR 28125 *et seq.* In that release, the Commission noted that the factors which it had listed as constituting "other good cause" were not exclusive and that other activity could also form the basis of a finding that a person is not suited to engage in the business for which registration is sought. *Id.* at 28126.

The Commission has determined at this time to advise prospective applicants, registrants and other interested persons that it considers the "other good cause" standard to preclude the use of names that suggest to the public that a firm is affiliated with another person when this is not the case or that a firm is engaged in a commodity-related business in which the firm is not engaged to a substantial extent.² The Commission is particularly concerned about the use of such terms as "board of trade" or "exchange" in misleading contexts. By way of illustration, the Commission believes that the use of a name such as "National Exchange, Incorporated" by an applicant for registration as a futures commission merchant or by its agents or correspondents named in the firm's application would be misleading. In contrast, the use of the name "Exchange Futures Merchants, Incorporated" by the same firm probably would not be inappropriate.

Similarly, in the case of an applicant for registration as a commodity trading advisor, the name "Futures Newsletter, Inc.," would probably be acceptable, but "Board of Trade Newsletters, Inc.," would be misleading.

The Commission has directed its staff to advise an applicant of any problem that the staff perceives with the firm's name in order to afford the applicant an opportunity voluntarily to make whatever changes may be necessary to eliminate the misleading character of the name. In some cases, the only

² The use of a name by a person in these circumstances may be so misleading as to constitute fraud within the meaning of Sections 4b or 4c of the Act, 7 U.S.C. 6b and 6c (1976), as amended, 92 Stat. 870 (1978), or the Commission's antifraud regulations, 17 CFR 30.03, 31.03 and 32.9. See also Section 4h(2) of the Act, 7 U.S.C. 6h (1976), which, among other things, makes it unlawful for any person falsely to represent that he or she is a member of a contract market.

acceptable solution will be to delete certain terms from the name of a firm. In others, however, clarification may be sufficient to correct the problem.

Issued in Washington, D.C., on August 21, 1979, by the Commission.

Jane K. Stuckey,
Secretary, Commodity Futures Trading Commission.

BILLING CODE 6351-01-M

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

32 CFR Part 2500

Information Security Regulations

AGENCY: Office of Administration.

ACTION: Final rule.

SUMMARY: The Office of Administration is publishing this regulation as required by Executive Order 12065 and Information Security Oversight Office Directive No. 1, which provide for the classification, downgrading, declassification and safeguarding of national security information. This regulation establishes the policies and procedures by which the Office of Administration will safeguard the information under its control. The policies and procedures are intended to apply only to the Office of Administration and its employees.

EFFECTIVE DATE: August 27, 1979.

FOR FURTHER INFORMATION CONTACT: Donald Street, Assistant Security Officer, Telephone: 202-456-2832.

SUPPLEMENTARY INFORMATION: This regulation is issued pursuant to the provisions of Executive Order 12065 and Information Security Oversight Office Directive No. 1. Users of this regulation should concurrently refer to the Executive Order and the Directive.

In consideration of the foregoing, Part 2500 of Chapter XXV, Title 32, Code of Federal Regulations is promulgated as a final regulation as set forth below, effective August 27, 1979.

William R. Pollak,
General Counsel.

Title 32 of the Code of Federal Regulations is amended by establishing Chapter XXV—Executive Office of the President, Office of Administration, and adding a new Part 2500 as follows:

PART 2500—INFORMATION SECURITY REGULATION

Sec.
 2500.1 Introduction.
 2500.3 Original classification.

Sec.
 2500.5 Derivative classification.
 2500.7 Declassification and downgrading.
 2500.9 Safeguarding.
 2500.11 Implementation and review.
 Authority: Sec. 5-404 of Executive Order 12065

§ 2500.1 Introduction.

(a) *References.* (1) Executive Order 12065, "National Security Information", dated June 28, 1978.

(2) Information Security Oversight Office Directive No. 1, "National Security Information", dated October 2, 1978.

(b) *Purpose.* The purpose of this regulation is to ensure, consistent with the authorities listed in Section (a), that national security information held by the Office of Administration is protected to the extent necessary to safeguard the national security.

(c) *Applicability.* This regulation governs the Office of Administration. Together with the authorities listed in Section (a), it establishes the policies and procedures for safeguarding of information that is under the control of the Office of Administration.

§ 2500.3 Original classification.

No one in the Office of Administration has been granted authority for original classification of information.

§ 2500.5 Derivative classification.

The Office of Administration serves only as the temporary physical custodian of classified information which originated in other agencies of the Executive Office of the President. Therefore, no one in the Office of Administration incorporates, restates, paraphrases or generates in a new form information which is already classified.

§ 2500.7 Declassification and downgrading.

(a) *Declassification authority.* No one in the Office of Administration has the authority to declassify or downgrade classified information.

(b) *Mandatory review for declassification.* Requests for mandatory review for declassification of classified information contained in the records of any Executive Office of the President agency for which the Office of Administration provides services should be addressed directly to the agency which is the owner of the record, in accordance with that agency's published Information Security Regulation.

§ 2500.9 Safeguarding.

The Office of Administration shall protect information in its custody against unauthorized disclosure

commensurate with its level of classification.

§ 2500.11 Implementation and review.

The Information Security Oversight Committee of the Office of Administration shall be chaired by the agency's General Counsel. The Committee shall be responsible for acting on all suggestions and complaints concerning the administration of the information security program. The chairperson shall also be responsible for conducting an active oversight program to ensure effective implementation of Executive Order 12065.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD 77-210]

Anchorage Grounds, Disestablishment of Anchorage B, Buffalo Harbor, N.Y.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule disestablishes the Explosives and Inflammables Anchorage B, Buffalo Harbor, New York. A reduction in the number of explosives transfers within the harbor has eliminated the need for this anchorage. **EFFECTIVE DATE:** This amendment is effective on August 27, 1979.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander H. E. Snow, Office of Marine Environment and Systems (G-WLE/73), Room 7315, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202) 426-1934.

SUPPLEMENTARY INFORMATION: On April 28, 1979, the Coast Guard published a proposed rule (44 FR 24586) concerning this amendment. Interested persons were given until May 29, 1979 to submit comments. No comments were received.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are Lieutenant Commander H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Lieutenant J. W. Salter, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing Part 110 of Title 33, Code of Federal Regulations is amended as follows:

§ 110.208 [Amended]

By deleting from § 110.208 paragraphs (a)(2), (b)(1), and (b)(2).

(Sec. 7, 38 Stat. 1053, as amended, (33 U.S.C. 471); sec. 6(g)(1)(A), 80 Stat. 940, (49 U.S.C. 1655(g)(1)(A)); 49 CFR 1.46(c)(1).)

Dated: August 21, 1979.

R. H. Scarborough,
Vice Admiral, U.S. Coast Guard, Acting
Commandant.

BILLING CODE 4910-14-M

33 CFR Part 110

[CGD 77-067]

Anchorage Grounds, Vieques Passage and Vieques Sound, Near Vieques Island, P.R.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule changes the size and location of Vieques Passage explosives anchorage and ammunition handling berth (Area 1). A portion of this anchorage area extends into a buoyed channel. This rule will eliminate a potentially unsafe situation by relocating the anchorage away from the channel.

EFFECTIVE DATE: This amendment is effective on August 27, 1979.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander H. E. Snow, Office of Marine Environment and Systems, (G-WLE/73), Room 7315, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-1934.

SUPPLEMENTARY INFORMATION: On March 29, 1979, the Coast Guard published a proposed rule (44 FR 18703) concerning this amendment. Interested persons were given until May 10, 1979 to submit comments. No comments were received.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are Lieutenant Commander H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Lieutenant J. W. Salter, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing Part 110 of Title 33 of the Code of Federal Regulations is amended by revising § 110.245(a)(1) to read as follows:

§ 110.245 Vieques Passage and Vieques Sound, near Vieques Island, P.R.

(a) *The anchorage grounds—(1) Vieques Passage explosives anchorage and ammunition handling berth (Area 1).* A circular area having a radius of 1,700 yards with its center at latitude 18°09'00"N., longitude 65°32'40"W.

* * *

(Sec. 7, 38 Stat. 1053, as amended, (33 U.S.C. 471); sec. 6(g)(1)(A), 80 Stat. 937, (49 U.S.C. 1655(g)(1)(A)); 49 CFR 1.46(c)(1).)

Dated: August 21, 1979.

R. H. Scarborough,
Vice Admiral, U.S. Coast Guard, Acting
Commandant.

BILLING CODE 4910-14-M

33 CFR Part 110

[CGD 79-018]

Special Anchorage Area, Lower Harbor, Marquette, Mich.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule establishes a special anchorage in the lower harbor, Marquette, Michigan. The high density of boats in this area warrants establishment of a defined anchorage area. This rule will provide a safe anchorage area within the harbor for small craft.

EFFECTIVE DATE: This amendment is effective on August 27, 1979.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander H. E. Snow, Office of Marine Environment and Systems (G-WLE/73), Room 7315, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-1934.

SUPPLEMENTARY INFORMATION: On May 3, 1979, the Coast Guard published a proposed rule (44 FR 25883) concerning this amendment. Interested persons were given until June 19, 1979 to submit comments. One letter supporting the proposal was received.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are Lieutenant Commander H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Lieutenant J. W. Salter, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing Part 110 of Title 33, Code of Federal Regulations is amended by adding § 110.80b to read as follows:

§ 110.80b Marquette Harbor, Marquette, Mich.

The area within Marquette Harbor beginning at latitude 46°32'38"N., longitude 87°22'46"W.; thence to latitude 46°32'37"N., longitude 87°22'54"W.; thence to latitude 46°32'33"N., longitude 87°22'54"W.; thence to latitude 46°32'33"N., longitude 87°22'46"W., thence to point of origin.

Note.—An ordinance of the City of Marquette authorizes the Harbormaster to

direct the location and length of time any watercraft may anchor in this area.

(Rule 9, 28 Stat. 647, as amended, (33 U.S.C. 258); sec. 6(g)(1)(C) 80 Stat. 937, (49 U.S.C. 1655(g)(1)(C)); 49 CFR 1.46(c)(3))

Dated: August 21, 1979.

R. H. Scarborough,
Vice Admiral, U.S. Coast Guard, Acting
Commandant.

Federal Highway Administration

49 CFR Part 396

[BMCS Docket No. MC-48; Amendment No. 78-10]

Federal Motor Carrier Safety Regulations; Inspection, Repair, and Maintenance

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Effective date extended; additional comments requested.

SUMMARY: The final rule published in the Federal Register on July 2, 1979 (44 FR 38523), to become effective on August 31, 1979, is hereby amended to become effective on December 31, 1979. This extension is in response to various petitions requesting clarification of certain requirements, exemption from certain requirements, and additional time to use the current stock of vehicle condition reports. This document also requests comments on the exemptions requested by certain motor carriers and rebuttal comments on submissions from various entities.

DATES: The rule is effective on December 31, 1979. Comments must be received on or before December 31, 1979.

ADDRESS: Comments should be sent, preferably in triplicate, to BMCS Docket No. MC-48, Amendment No. 78-10, Room 3402, Bureau of Motor Carrier Safety, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald J. Davis, Chief, Regulations Development Branch, Bureau of Motor Carrier Safety (202-426-9767); Mrs. Kathleen S. Markman, Office of the Chief Counsel, (202-426-0824). Federal Highway Administration, Department of Transportation, Washington, D.C. 20590. Office hours are 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Thus far FHWA has received 17 comments on the revision of 49 CFR 396 published at 44 FR 38523 on July 2, 1979. That revision would provide more adequate inspection and maintenance procedures and thus mitigate vehicle defects and defect-related accidents. Comments were received from fourteen motor carriers, two carrier organizations and one labor organization. Twelve entities requested an extension of the effective date. Three entities requested exemptions from certain requirements of 49 CFR Part 396. These petitions will be described in more detail below. Three entities requested revision of 49 CFR 396.11, in particular the requirement that a copy of the vehicle inspection report be carried on the power unit. Seven entities requested a revision of the 396.13(3) requirement that the driver certify before driving the vehicle that repairs of defects indicated on the prior driver vehicle inspection report have been made.

The majority of comments received indicated that a four month extension of the effective date of the revision of 49 CFR 396 is needed in order to permit depletion of current stocks of vehicle condition report forms. However, one carrier requested an extension until October 1, 1980, while another carrier requested an extension until August 31, 1980. The Private Truck Council of America, Inc., requested a four month extension to provide additional time for clarification of certain requirements contained in the above mentioned revision. In contrast, the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers (IBT) has filed an objection to any postponement or delay in the effective date of the rule. The IBT said that any argument for delay or postponement is without merit and should be denied. The American Trucking Associations, Inc. (ATA), requested an extension to June 30, 1980, to permit carriers to use up their present stock of forms and also requested a

revision of § 396.13(3), regarding driver certification. The ATA contends that certification of repairs is not a responsibility of drivers in the regulated trucking industry.

Hudson Transit Lines, Inc., of Mahwah, New Jersey, has requested an indefinite postponement of § 396.13(3), and a revision of § 396.13(1) to read "Satisfy himself that the motor vehicle is in safe operating condition and sign a report to that effect." (Underlining indicates addition). In addition, Hudson requested a four month postponement of the effective date of the new rules.

As indicated above, three motor carriers petitioned for exemptions from certain requirements of the new rule. The United Parcel Service (UPS) and Car Carriers, Inc., requested exemptions from certain provisions of 49 CFR 396.11 and 396.13 when the same person drives the same vehicle regularly, and the vehicle is returned to its origin point each day. The UPS suggested that a master work sheet be retained at the home base, where the driver can sign the vehicle in at the end of the workday and sign it out again at the beginning of the next day's run. In addition, each vehicle covered by the exemption would have an exemption card indicating the vehicle's home base, the place where the vehicle condition records could be inspected. The UPS requests that § 396.11(c)(3) be amended to provide for an exemption for all vehicles domiciled at the same location each day, or vehicles domiciled at one of two fixed locations on alternate days. Transport, Inc. of New Jersey, a motor carrier of passengers, requested for motor bus carriers and especially for motor bus commuter operators an exemption from the provisions of 49 CFR 396.11 and 396.13 requiring, in essence, that vehicle inspection reports be carried on the vehicle, that the last vehicle inspection report be reviewed for defects noted thereon and that the driver certify that necessary repairs have been made.

In consideration of the foregoing, it has been determined that a postponement of the effective date of the new rules to December 31, 1979, has merit for the purpose of obtaining additional views or comments with respect to the petitions referred to herein. Interested parties are invited to submit their views with respect to the above-mentioned petitions and comments on or before December 31, 1979.

Note.—The FHWA has determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation pursuant to Executive Order 12044. However, this document does relate to a significant

regulation. An evaluation of that regulation is contained in BMCS Docket No. MC-48 and can be reviewed in Room 3402, Bureau of Motor Carrier Safety, 400 Seventh Street SW., Washington, D.C. 20590 from 7:45 a.m. to 4:15 p.m. ET, Monday-Friday.

(49 U.S.C. 304, 49 U.S.C. 1655, 49 CFR 1.48(b) and 301.60)

Issued on: August 22, 1979.

Robert A. Kaye,
Director, Bureau of Motor Carrier Safety.

BILLING CODE 4910-22-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

Gulf of Alaska Groundfish; Final Regulations

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Final rule.

SUMMARY: This document makes final an amendment (amendment number 4) to the fishery management plan (FMP) for the Gulf of Alaska groundfish fishery, submitted by the North Pacific Fishery Management Council. This amendment, consisting of 11 subparts, which was proposed on July 9, 1979 (44 FR 40099), corrects omissions in the original plan, eliminates superfluous management measures, and eases the burden of the measures on both domestic and foreign fishermen. The regulations are revised to implement this amendment.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: Denton R. Moore, Acting Chief, Permits and Regulations Division, National Marine Fisheries Service, Washington, D.C. 20235. Telephone: 202-634-7432.

SUPPLEMENTARY INFORMATION: On April 21, 1978, an FMP for the Gulf of Alaska groundfish, prepared by the North Pacific Fishery Management Council (Council) was published (43 FR 17242). This approved FMP was amended three times to: (1) Extend the fishing year to October 31, 1979; (2) allow a directed Pacific cod fishery to concentrate in one portion of a fishing area; and (3) raise reserves to allow for possible joint ventures. Final regulations implementing the FMP and the amendments were published (in two parts) on November 14, 1978 (43 FR 52709) and December 1, 1978 (43 FR 56238).

On April 4, 1979, amendment number 4 was submitted by the Council. The

amendment was approved preliminarily by the Assistant Administrator for Fisheries, and was published on July 9, 1979, under section 306(a) of the Fishery Conservation and Management Act, as amended (the Act).

The approved management measures and these regulations are the result of experience gained by the Council in the fishery. This amendment will relieve restrictions on both foreign and domestic fishermen. The components of the amendment, and the basis for the changes are as follows:

1. Reduce the number of fishing areas in the Gulf of Alaska from 5 to 3 in order to relieve burdens on foreign and domestic fishermen while retaining sufficient delineation among stocks to prevent localized overfishing.

2. Allow foreign fishing within the 3-12 mile zone between 169° and 170° W. longitude to correct an omission in the original FMP.

3. Remove the restriction which allowed only 25% of the total allowable level of foreign fishing (TALFF) to be taken from December 1 to May 31. This provision, after experience, was considered unnecessary, since the requirement that foreign vessels use pelagic trawls in the winter adequately protects halibut stocks.

4. Allow foreign longlining for sablefish seaward of 400 meters (instead of 500 meters) from May 1 to September 30 in the area between 140° and 170° W. longitude. Because incidental halibut catch by longliners is low during the summer, this change increases areas for foreign nations to catch sablefish while retaining adequate protection for halibut stocks.

5. Permit a directed longline fishery for Pacific cod between 140° and 157° W. longitude (in addition to the authorized fishery between 157° and 170° W. longitude) seaward of 12 miles, except during the U.S. halibut season. By encouraging foreign longliners, rather than foreign trawlers, to take the Pacific cod TALFF, the incidental mortality of halibut will be reduced.

6. Exempt foreign longline vessels from the provisions of the foreign regulations which required that fishing by all vessels of a nation in a fishing area cease when the allocation for any species has been taken. The exemption does not apply if the allocation reached is for a target species of the longliners. This change prevents the foreign trawl fishery from inadvertently closing the foreign longline fishery (which tends to have low incidental catch mortality) before the longline fishermen achieve their allocation of target species.

7. Increase the squid optimum yield (OY) to 5,000 metric tons from 2,000 mt.

This adjustment of OY allows foreign nations a sufficient incidental catch of squid while maintaining harvest of squid at levels below the estimated maximum sustainable yield.

8. Increase the Atka mackerel OY by 2,000 metric tons to 28,800 mt. The increase conforms the OY to new information indicating higher historical catches of Atka mackerel by foreign nations.

9. Remove the domestic one-hour tow restriction. After experience, the Council judged this an unnecessary management measure given the separate incidental catch quota on halibut for domestic fishermen.

10. Remove the domestic requirement for the use of off-bottom trawls from December 1 to May 1. As in number 9, above, this measure was considered redundant for the protection of halibut.

11. Require domestic permits to be renewed annually and domestic reporting (i.e., fish tickets) to be submitted within 7 days instead of 72 hours to eliminate an unnecessary inconsistency between Federal and State regulations.

On July 9, 1979 (44 FR 40099) this amendment to the FMP for the Gulf of Alaska groundfish (see 43 FR 17242) was published in the Federal Register along with proposed implementing regulations. Comments on the proposed regulations were invited until August 16, 1979. No comments were received.

The Assistant Administrator for Fisheries, under a delegation of authority from the Secretary, has determined that this amendment to the FMP (1) is necessary and appropriate to the conservation and management of Gulf of Alaska groundfish resources; (2) is consistent with the National Standards and other provisions of the Act; (3) does not constitute a major Federal action requiring the preparation of an environmental impact statement (an appropriate statement of no significant environmental impact has been filed with the Environmental Protection Agency); and (4) does not constitute a significant action requiring the preparation of a regulatory analysis under Executive Order 12044.

Signed at Washington, D.C., this 22nd day of August 1979.

(16 U.S.C. 1801 et seq.)

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

PART 611—FOREIGN FISHING

A. Amend 50 CFR Part 611 as follows:

§ 611.20 (Amended)

1. In § 611.20, Table I, under Gulf of Alaska Groundfish, change TALFF for Mackerel, Atka, to "25,640" and TALFF for Squid to "4,465".

§ 611.92 (Amended)

2. In § 611.92(b), change "fishing area"

to "regulatory area" where it appears as follows:

§ 611.92(b)(1)—one place.
§ 611.92(b)(1)(i)—two places.
§ 611.92(b)(2)(i)(A)—four places.
§ 611.92(b)(2)(i)(B)—one place.
§ 611.92(b)(2)(ii)(A)—five places.
§ 611.92(b)(2)(ii)(B)—four places.

Table I.—Gulf of Alaska Groundfish Fishery TALFF and Reserve¹ by Species and Regulatory Area for 1978-79: Regulatory Areas²

		[In metric tons]			
Species		Western	Central	Eastern	Total
Pollack	TALFF	52,150	70,200	14,200	136,550
	Reserve	50	17,000	1,000	18,050
Pacific cod	TALFF	3,936	9,626	3,050	16,612
	Reserve	1,364	1,174	150	2,688
Flounders	TALFF	8,150	11,400	6,500	26,050
	Reserve	50	100	100	250
Pacific ocean perch (POP)	TALFF	2,150	6,350	13,075	21,575
	Reserve	450	1,250	625	2,325
Other rockfishes ³	TALFF	175	500	4,600	5,275
	Reserve	25	100	200	325
Sablefish	TALFF	1,815	2,795	2,490	7,100
	Reserve	185	905	810	1,900
Atka mackerel	TALFF	4,350	18,700	2,590	25,640
	Reserve	50	700	410	1,160
Squid	TALFF	895	1,780	1,790	4,465
	Reserve	105	220	210	535
Other species ⁴	TALFF	4,200	8,100	3,070	15,370
	Reserve	100	200	30	330

¹ The TALFF's specified in this table may be modified during the year if reserves are apportioned in TALFF.

² See Figure 1 of this § 611.92(b) for description of regulatory areas.

³ The category "other rockfishes" includes all rockfishes other than Pacific ocean perch.

⁴ The category "other species" includes all species of fish except: (A) The other fish listed in the table; and (B) shrimp, scallops, salmon, steelhead trout, Pacific halibut, herring, fishes of the genus *Coryphaenoides* and Continental Shelf fishery resources.

§ 611.92(b)(2)(iii)—one place.

3. In § 611.92(b)(1), remove Table I and replace it with the following Table I.

4. In § 611.92(b)(1), insert the new Figure 1.—Regulatory Areas of the Gulf of Alaska:

Figure 1. Regulatory Areas of the Gulf of Alaska

5. In § 611.92 is amended by revising (b)(1)(ii)(A); adding (b)(2)(i)(D); revising (b)(2)(ii) and (C); deleting (b)(2)(ii) (D) and (E); revising paragraph (c); and amending paragraph (d)(3), as set forth below.

§ 611.92 Gulf of Alaska groundfish fishery.

* * * * *

(b) * * *
(1) * * *
(ii) * * *

(A) *Apportionment of reserve amounts.* As soon as practicable after each of the following dates, the Regional Director shall apportion to the TALFF's twenty-five (25) percent of the initial annual reserve amount for each species in each regulatory area: January 2, March 2, May 2, and July 2.

* * * * *

(2) * * *
(i) * * *

(D) The provisions of paragraph (b)(2)(i)(A) of this section do not apply to foreign vessels using longline gear unless the allocation reached is for Pacific cod or sablefish. However, when the area allocation of any groundfish species, or species group other than Pacific cod or sablefish is reached, any subsequent catch of that species in that area by vessels using longline gear shall be considered catch of a "prohibited species" and treated in accordance with the provisions of § 611.13.

(ii) The Regional Director shall issue a notice of closure, pursuant to the procedures of § 611.15(c), prohibiting fishing for the applicable species of groundfish, in the applicable regulatory area during the applicable periods using the applicable gear, as listed in paragraphs (A) through (C) below, when it is determined that one or more of the following catch limitations will be reached:

* * * * *

(C) The allocation of a nation for any groundfish species, or species group, in a regulatory area: the Regional Director shall issue a notice prohibiting all fishing for groundfish by vessels of that nation using trawl gear, and prohibiting retention of that species or species group by vessels of that nation using longline gear, in that regulatory area until November 1, *except* that if a

national allocation for sablefish or Pacific cod in a regulatory area will be reached, the Regional Director shall prohibit fishing for groundfish in that regulatory area by all vessels of that nation until November 1.

(D) [Reserved]

(E) [Reserved]

(c) *Open areas.* Except as prohibited in paragraph (d) of this section, foreign fishing for groundfish is permitted in the Gulf of Alaska beyond twelve nautical miles from the base line used to measure the U.S. territorial sea, and between three and twelve nautical miles from the base line used to measure the U.S. territorial sea between 169° and 170° W. longitude.

(d) * * *

(3) *Fishing with longline gear.* * * *

(i) *General.* Longline fishing for groundfish by vessels subject to this section is prohibited east of 140° W. longitude at all times. For the purpose of this § 611.92, longline means a stationary, buoyed and anchored line with hooks or pots attached, or the taking of fish by means of such a device.

(ii) *Longline fishing for sablefish.* Longline fishing for sablefish by vessels subject to this section between 140° and 169° W. longitude is prohibited: (A) Landward of the 400 meter depth contour, from May 1 to September 30; and (B) landward of the 500 meter depth contour, between October 1 and April 30.

(iii) *Longline fishing for Pacific cod.* Longline fishing for Pacific cod by vessels subject to this section between 140° to 169° W. longitude is prohibited landward of the 400 meter depth contour during the halibut fishing seasons as established by regulations of the International Pacific Halibut Commission. The Regional Director shall give notification of the opening and closing dates of the U.S. halibut fishing seasons to the designated representative of each foreign nation, at least 48 hours before the opening and closing dates of the U.S. halibut fishing seasons.

PART 672—GROUND FISH OF THE GULF OF ALASKA

B. Amend CFR Part 672 as follows: 1. In § 672.2 delete the paragraph commencing "Fishing area * * *",

delete the paragraph commencing "Off-bottom trawl * * *", and add the following new definition:

§ 672.2 Definitions.

* * * * *

Regulatory area means any of three areas of the FCZ of the Gulf of Alaska seaward of the State of Alaska. The three regulatory areas are described as follows:

Area and Location

Eastern, between 132° 40' and 147° W. longitude.

Central, between 147° and 159° W. longitude.

Western, between 159° and 170° W. longitude.

* * * * *

2. Section 672.4(e) is amended to read as follows:

§ 672.4 Permits.

* * * * *

(e) *Duration.* A permit shall continue in full force and effect for one year, or until it is revoked, suspended, or modified pursuant to 50 CFR Part 621 (Civil procedures).

* * * * *

§ 672.5 [Amended]

3. Section 672.5, change "72 hours" to "seven days": where it appears as follows:

§ 672.5(b)—two places.

§ 672.5(d)—one place.

4. In § 672.20(a), Table I, (c)(1), and (e)(1) are amended to read as follows:

§ 672.20 General limitations.

(a) *Optimum yield.* The optimum yield (OY) and reserves for species regulated under this Part in the three regulatory areas are set forth in Table I. These specifications of OY and reserves are effective for a fishing year beginning on December 1, 1978, and ending on October 31, 1979. The OY of each species in Table I is the maximum amount of that species which may be caught or harvested during the fishing year by vessels of the United States and foreign nations in each regulatory area.

Table I.—Optimum Yield and Reserves: Regulatory Areas

[In metric tons]

Species		Western	Central	Eastern	Total
Pollock	OY	57,000	95,200	16,600	168,800
	Reserve	50	17,000	1,000	18,050
Pacific cod	OY	9,600	19,400	5,800	34,800
	Reserve	1,364	1,174	150	2,688
Flounder	OY	10,400	14,700	8,400	33,500
	Reserve	50	100	100	250
Pacific ocean perch (POP)	OY	2,700	7,900	14,400	25,000
	Reserve	450	1,250	625	2,325
Other rockfish	OY	300	800	6,500	7,600
	Reserve	25	100	200	325
Sablefish	OY	2,100	3,800	7,100	13,000
	Reserve	185	905	810	1,900
Atka mackerel	OY	4,400	19,400	3,000	26,800
	Reserve	50	700	410	1,160
Squid	OY	1,000	2,000	2,000	5,000
	Reserve	105	220	210	535
Other species*	OY	4,400	8,600	3,200	16,200
	Reserve	100	200	30	330

*Includes all stocks of finfish except: (1) those listed above, and (2) salmon, steelhead trout, Pacific halibut, and fishes of the genus *Coryphaenoides*.

* * * * *

(c) * * *

(1) *Apportionment of reserve amounts.* As soon as practicable after each of the following dates, the Regional Director shall apportion to Total Allowable Level of Foreign Fishing (TALFF) twenty-five (25) percent of the initial annual reserve amount for each species in each regulatory area: January 2, March 2, May 2, and July 2.

* * * * *

(e) * * *

(1) If, during the period between December 1 and May 31, the Regional Director determines that the estimated total catch of halibut in any regulatory area by vessels regulated by this Part will reach the amount listed below, he shall issue a field order pursuant to § 672.22(a) prohibiting, until June 1, groundfish fishing with trawl gear in that regulatory area by vessels regulated by this part.

Regulatory Area and Catch Amount

Western—29 metric tons (m.t.).

Central—52 m.t.

Eastern—31 m.t.

* * * * *

§ 672.20 and § 672.22 [Amended]

5. Sections 672.20 and 672.22, change "fishing area" to "regulatory area" where it appears as follows:

§ 672.20(b)(1)—three places.

§ 672.20(b)(2)—two places.

§ 672.20(b)(5)—two places.

§ 672.20(e)(2)—one place.

§ 672.20(b)(3)(i)—one place.

6. Sections 672.24 and 672.25 are amended to read as follows:

§ 672.24 Gear limitations. [Reserved]

§ 672.25 Effort limitations. [Reserved]

[FR Doc. 79-26547 Filed 8-24-79; 8:45 am]

BILLING CODE 3510-22-M

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION
[13 CFR Part 121]

Small Business Size Standards;
Procurement Purposes; Proposed Change

AGENCY: Small Business Administration.
ACTION: Proposed Rule.

SUMMARY: This proposal would amend the wording of 13 CFR Part 121.3-8(c)(2)(i) to carry out the intent of Pub. L. 95-507 subsection 15(j). This change will allow small offerers, including nonmanufacturers, to furnish any domestically manufactured product on Federal procurements valued at less than \$10,000.

DATE: Written comments must be submitted by September 11, 1979.

ADDRESS: Address all comments to: Kaleel C. Skelrik, Chief, Size Standards Division, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: John D. Whitmore (202) 653-6373.

SUPPLEMENTARY INFORMATION: Pub. L. 95-507, enacted October 24, 1978, among other things, added a provision, Subsection 15(j) to the Small Business Act requiring that:

Each contract for the procurement of goods or services which has an anticipated value of less than \$10,000 and which is subject to small purchase procedures shall be "reserved" exclusively for small concerns
